British-American Wax Paper Company, Limited
Darling Building, Toronto

Practically all the Manual Training Schools in Canada Use Our

High Quality Tools

We make a full line of fine Beveled Edge Tang and Socket Chisels, Pattern Makers' Chisels and Gouges, Turning Tools, etc.

You cannot find a more complete assortment of **carving tools** on the continent.

Dealers can make a big profit by handling this line. Ask for catalog.

BUCK BROTHERS
Millbury, Mass., U.S.A.

Robt. Sorby & Sons, Ltd.
SHEFFIELD

have a very extensive assortment of garden forks, trowels, rakes, hoes, shears, and sets of garden tools.

Finishes may be all bright, bright and red, all blue, bright and blue or black.

Our goods yield a good profit.

Geo. H. Saywell Co., Winnipeg and Montreal

Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The **Thermo Washer** is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

Old Standard Eagle, Pyramid and Globe

GERMANTOWN LAMPBLACKS

Are Recognized Everywhere AS THE BEST

When we originated Germantown Lamp Black at our factory at Germantown, Philadelphia, we little realized that it would become the STANDARD of the trade and in order to market their blacks every other manufacturer would have to use that name or make something better. Special Blacks for Paint, Varnish, Rubber Oilcloth, Paper, Fertilizer, etc.

Look for the red seal on every package. Why buy the "Near Brand" when the best is procurable?

ASK YOUR DEALER.

The WALDEN PISTOL is an ideal gift for any boy, being harmless. ALL BARK, BUT NO BITE!

We Want Active AGENTS in CANADA

HALL & CROSS Ltd., Chancery Lane, London, Eng.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Construction of a 15-inch Hydraulic Self-Propelling Steel Suction Dredge," will be received at this office until 4.00 P.M., on Tuesday, March 3, 1914, for the construction of a 15-inch Hydraulic Self-Propelling Steel Suction Dredge.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of T. H. Schwitzer, Esq., Mech. Superintendent, Birks Building, Ottawa, Ont.; J. L. Nelson, Esq., Supt. of Dredges, Vancouver, B.C.; J. S. MacLachlan, Esq., District Engineer, Victoria, B.C.; C. C. Worsfold, Esq., District Engineer, New Westminster, B.C.; J. G. Sing, Esq., District Engineer, Toronto, Ont.; Collectors of Customs at Kingston and Collingwood, Ont., and A. E. Dubuc, Esq., District Engineer, Montreal, Que.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, January 20, 1914.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—51193.

The demand for the Dana—

Naturally reaches its height along in the sultry months of July and August. But people who go away to summer cottage or camp, usually leave in May, and they also want some ice cream, during the hot months, and would like to take the "Dana" with them.

So, therefore, if you're on the look-out for some profitable business, you'll put in a stock of "Dana's" and start suggesting to your customers that they include one in their summer kit.

Show them the Dana,—explain how the can is very tall in proportion to its diameter—how the dasher keeps the contents moving and removes the frozen cream from the sides of the can, as fast as it becomes solid; demonstrate to them that the Dana is just as easy to grind as a watch is to wind—and you'll sell out before the real hot weather even begins.

Doesn't this sound a good proposition to you? It will look even better when you learn of the profits.

So write us to-day.

LONDON, CANADA

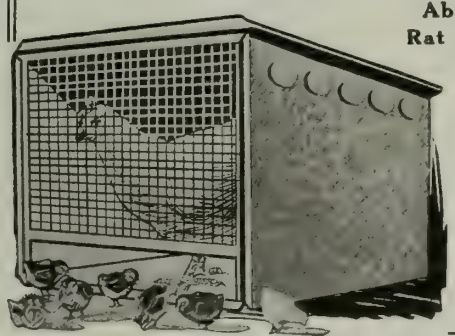
No Getting Away From It!

The Kling Hame Fastener holds customers as well as horses. Anyone can attach it in a minute. Keeps the collar uniformly tight at all times. No matter how he lunges, the horse can't open it or break it. We refund the money for any that may be returned to our dealers. Costs you $2.25 a dozen from any jobber.

Look for "Kling" on the lever. Circular on request.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Sole manufacturers of the Klingsnap and Kling Hame Fastener.



D. C. Ross & Co., 56 Colborne Street, Toronto, Ont.
Canadian Distributing Agents.

Send $2.00 to Henderson & Richardson for full-sized SAMPLE COOP.

Demonstrate it in the dull season and you'll line up many orders for spring delivery.

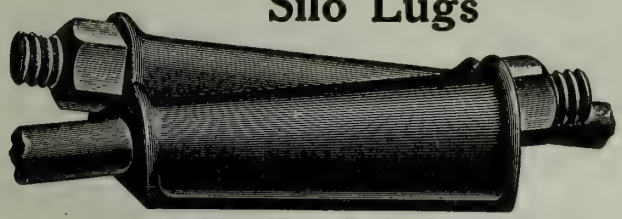
CHICAGO STEEL BENDING BRAKES



(Made in 200 sizes)

Best results with least effort. Purchasers delighted, not only with the construction of the machine, but also with the work it turns out.

Sheet Metal Workers would do well to obtain full information concerning these machines.

The Steel Bending Brake Works Ltd., Chatham, Ont.

Silo Lugs

Bands on Silos, Water Tanks, Penstocks, Kilns, etc. For round rods ⅜ to 1½—flat bands 2 to 6 inches. Malleable iron. Prompt shipments.

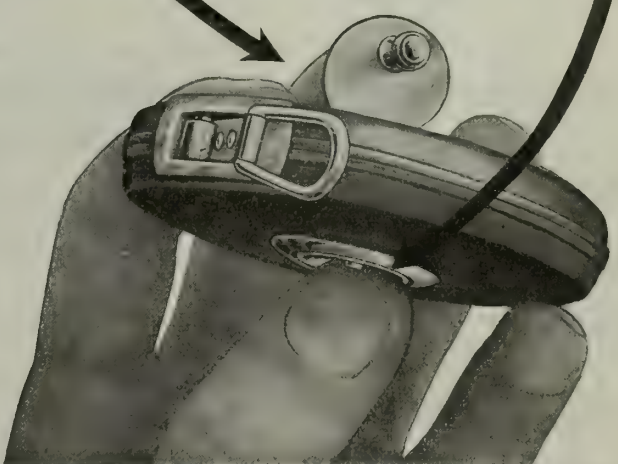
It is opened without effort

EVEN in the coldest weather, with the hands enclosed in the thickest gloves, our new pattern handle will fly up with a click. It is absolutely flush; the handle is released by slight pressure of pin on the underside—it cannot get out of order.

RABONE STEEL TAPES ARE THE ONLY PERMANENT STANDARDS OF LONG LENGTH



The materials and workmanship are the best. Every Rabone Steel Tape is etched on our patent duplex system of marking. The feet are in black figures on a bright steel tablet, while sub-divisions have bright figures on matt background. There is no chance of error, and the figures remain visible and distinct.

EVERY STEEL TAPE AND MEASURING CHAIN BEARS THE TIME-HONOURED NAME OF JOHN RABONE & SONS

Ask your jobber for quotations and write for a Catalogue to our Canadian Representative.

What Motor Trucks Can Do For The Hardware Dealer

Mack Truck used by The James Walker Hdw. Co.
Hardware Dealers, Montreal.

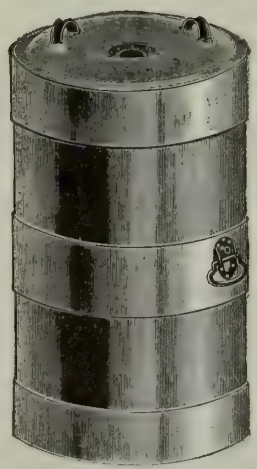
The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.

We are sales agents for the leading gasoline motor truck of the world—MACK.



Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

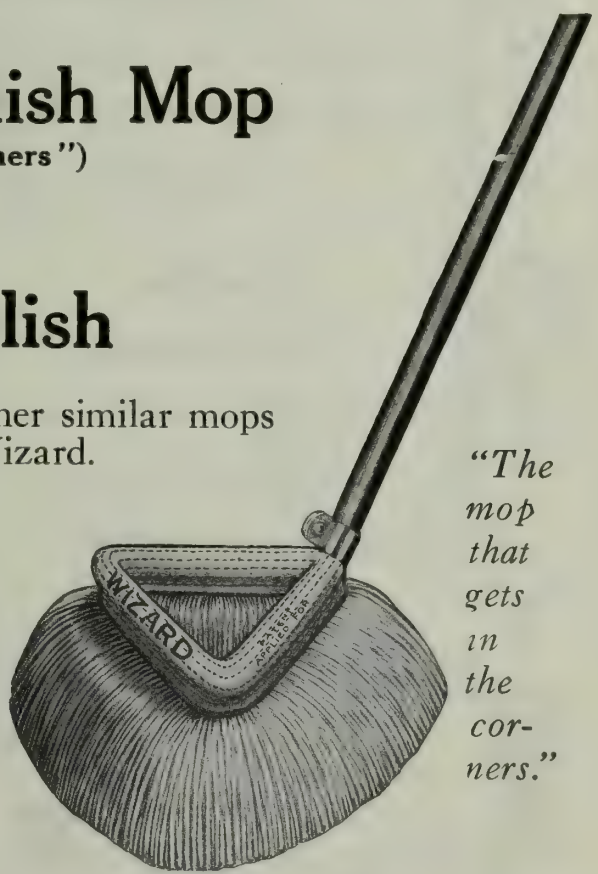
A Big Proposition is Open to "WIZARD" DEALERS

Last year over fifty-one thousand dealers sold Wizard Triangle Mops and Polish through the heavy advertising done by the manufacturers in National publications.

This year the advertising campaign will be bigger than ever, and the dealers who handle Wizard Mops and Polish will do even a better and larger business on this line than in the past.



Wizard Triangle Polish Mop

(The Mop that "Gets-in-the-Corners")

and

Wizard Furniture and Floor Polish

are so much better in every way than other similar mops that a comparison will always favor the Wizard.

"The mop that gets in the corners."

25c. bottle.

50c. bottle.

1 qt. can $1.00

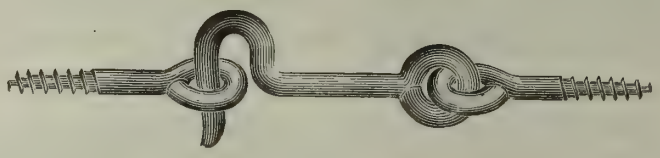
Retail price $1.50

The Wizard Mop is of very full stocked Cotton Threads permanently bound into a cloth-covered **Triangular** Metal Frame. The handle is attached to the frame by an "elbow joint" which gives a free up-and-down play to the handle.

The Mop is sent out properly saturated with Wizard Polish. When the Mop becomes soiled it can be thoroughly cleansed with hot water and soap and renewed with Polish.

Wizard Polish is not an oil nor a varnish. It is a Wood Food and Polish Renewer.

Besides its use with Wizard Mops for cleaning and renewing Hardwood Floors, Linoleums and Oil Cloths, it is unexcelled for use in repolishing furniture, carriages, pianos, etc. It dries instantly and does not gum or stick.



This is a money-making proposition for any dealer.

What "Plymouth Cordage" Means

The three noteworthy things about the products covered by the phrase "Plymouth Cordage" are their number, diversity, and well-known high quality.

This high quality is maintained in all "Plymouth Cordage" at all times. It is the result of superior manufacturing resources and methods, and rests on a policy which has stood the sales test for eighty-nine years.

These facts are of vital account to every dealer seeking connections that shall be of permanent value to himself and his customers.

Our Ottawa Exhibit

at booth 124, New Machinery Hall, during the Canadian Hardware Manufacturers' convention, February 16-21, will show a large number of the products of the Plymouth Cordage Company.

Come and see this exhibit. Let us tell you what "Plymouth Cordage" is doing for others. Then judge what it will do for you.

Superior Features

When you prove to mechanics that you can sell them a tool or instrument having some feature which gives greater speed or convenience, you make an easy, profitable sale. It pays to be familiar with a line that offers many such possibilities.

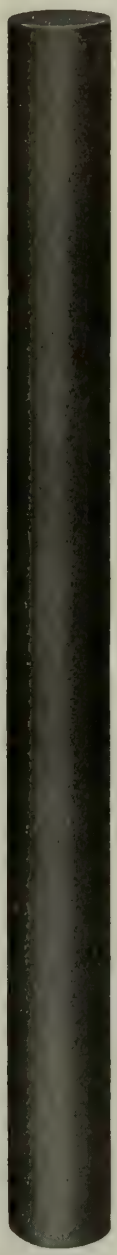
Starrett Tools

are all designed to give just a little better service than any other tools could do. The quick-acting micrometer, the combination set, and other tools in actual use in many shops prove this.

STARRETT TOOLS

STARRETT HACK SAWS CUT QUICKER LAST LONGER

The Starrett Spring Nut Calipers



are a good example of time-saving tools. The adjusting nut when released opens in two sections and may be pushed to its adjustment without turning as in the case of ordinary calipers.

Send for our big, new, free catalog No. 20MA, describing the full line of mechanics' tools and hack-saws.

The L·S·Starrett Co·Athol·Mass·

World's Greatest Toolmakers

From the Rough Stock To the Finished Drill In One Chucking

Rough Stock

Wilt Twist Drills are made by a process that accomplishes at a single chucking the work that under ordinary conditions requires five or six separate operations.

It is a revolutionary process and marks a noteworthy advance in twist drill manufacture.

It is a process by which accuracy to a remarkable degree is assured.

A process by which a clean-cut, well-defined clearance is obtained.

A process which, coupled with hardening of scientific accuracy, makes Wilt Twist Drills the most efficient drills manufactured to-day.

Be sure and visit our exhibit at the Convention of Hardware Dealers and Manufacturers, Ottawa, week of Feb. 16-21.

Finished Drill

Two Vital Selling Problems Solved

This is what the Manufacturers and Jobbers will do for you.

They'll send you their Samples on MULTIPLEX Wings.

How to sell a man quickly what he comes to buy is one of the pressing problems of your business.

Another problem even more important is to sell every customer something else he needs, but had not thought of.

The Multiplex method has solved both these problems by showing samples of hundreds of different things where every customer will see them when buying the one thing he came to buy.

While his first purchase is being wrapped, he turns the leaves of the Multiplex, finds something else he needs, and buys that too.

The Multiplex Way is the Easiest Way

to make extra sales. Thousands of dealers have found that out. Try it yourself!

This is the way; order a main frame with 3 or more wings—on condition that we, within 60 days, find at least six manufacturers who will furnish you with other wings ready mounted with their samples.

It's Up To You

It's up to us — so write at once and let's give you all the facts about this "Bigger Business Scheme."

The Multiplex Display Fixture Co.

919 N. 10th St., St. Louis, U.S.A.
1733 Republic Bldg., Chicago
1133 Broadway, New York

Is your business entirely successful?

Can you feel that the lines you handle are returning the best possible profit, for the amount of work you have to give them?

Don't you think that perhaps you may have overlooked some gilt-edged proposition—probably because you have been too busy to get out and scout around?

You certainly have, if you are not already handling

Rogers' Portland Cement

for it is a commodity with an ever-widening field, and an established prestige for excellence of manufacture, which makes it the favorite of engineers and architects, and which ensures its use on the most important contracts.

All around your store—within a block or so—there are buildings of some sort or other being erected. You can supply these builders with the Rogers cement they need, and they'll be glad to let you do it because it saves them hauling.

And you need not carry a big stock either; we'll ship direct to the job as promptly as you notify us.

Be a Rogers dealer—now, before your territory is snapped up.

ALFRED ROGERS LIMITED, 28 West King Street, Toronto

N. J. DINNEN & CO., Western Sales Mgrs., WINNIPEG, MAN.

Mr. J. C. Dietrich, President of the Shurly-Dietrich Co., of Galt, Ontario

writes us that owing to their plant being destroyed by fire, all business at present will be transferred to The R. H. Smith Company, St. Catharines, of which Company he is also President, where they will run a night and a day shift, and hope to be able to supply all their customers as usual. They wish to thank the trade for their patronage in the past and hope that they will continue to favor them with their business, as heretofore.

COMMUNITY SILVER

A HOLD-UP

DIARY OF A MERE MAN

Monday,_____3d, 1913

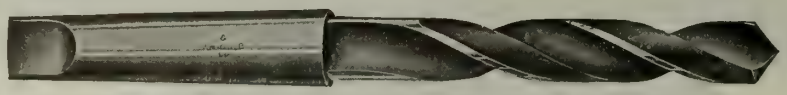
"POINTING a spoon at my head, Tess last night demanded my purse. 'I'm a Community Silver-ette, fiercely militant', she threatened. 'My platform—women's right to new spoons if their old ones are worn or hideous.'

Tuesday,_____4th, 1913

Tess and my purse out shopping.

Wednesday,_____5th, 1913

A chest of Community Silver arrived today. Tess is certainly some spoon chooser!



¶ Community Silver is built by overlaying solid silver upon a "backbone" of stiffer metal. This solid silver is so especially thickened at the wearing points, and toughened to resist wear, that in a long lifetime you will never see or touch anything but pure silver.

AT YOUR SERVICE FOR 50 YEARS

SIX TEASPOONS. $2.15 (engraving extra). In Canada, $2.75

Long Service is a Natural Result of The "Twisted-While-Hot" Process

It must be annoying to the average drill user to have drills made from well-known brands of steel fall down on the job. He wants efficiency and can secure it by adopting "Hercules" High-Speed Drills.

"Hercules" High-Speed Twist Drills

are made from a High Percentage Vanadium High-Speed Steel under the only "twisted-while-hot" process that retains all the strength of the steel in the finished drill. The grain of the steel is undisturbed, insuring longer edge-holding and greater resistance to the strains of the metals having different degrees of hardness.
The taper shanks, usually one size larger than ordinary, prevent tang troubles and give a greater driving power because the drill fits into the chuck firmly and in the centre.
Your jobber will supply them or you can send order direct. Send for Catalog No. 82-G.

We Make Ceiling Sales Easy For You and Pay a Good Substantial Profit.

Every store and almost every other building in your town that does not have a metal ceiling affords you an opportunity to make money.

When you hear of any building to be renovated, get after the party concerned. Point out that there is no other style of interior finish which compares with steel ceilings and sidewalls in appearance and durability—that "Preston Quality" compares favorably with that of any other make and that the cost is very low, considering the extra service our products give.

If you find it difficult to effect a sale, write us giving name of party and we will send strong business-getting letters which will greatly assist you—but be sure to keep after him or some other person will get the business.

We pay a big commission to all our agents. Write us now for full particulars.

Progressive Dealers are Careful Buyers

And Progressive manufacturers careful sellers,
And selling carefully means satisfying the buyer,
So to accomplish this, McClary's sell and the dealer buys

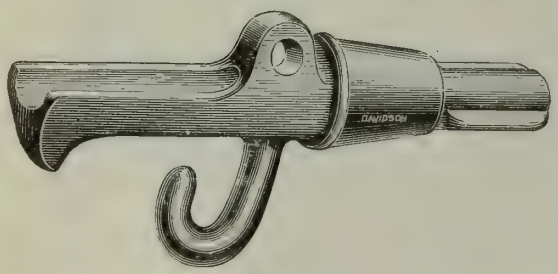
Quality Goods

which include the

"SAMSON" RAILROAD OR DELIVERY CANS

The "Samson" Bottom—the strongest, most sanitary bottom because it is stamped from one-piece, heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

The improved method of connecting the breast to the body ensures perfect rigidity and strength. The body overlap, which is curved to the shape of a half-circle, is placed **outside** the bottom of the breast. Inside the cavity thus formed, we put a half-circle piece of iron, and the whole connection is then firmly soldered together.



The extra heavy wired edge is another strong feature.

Write for a supply of our new 1914 "Samson" Booklets—

THE "EMPIRE" SAP SPOUT

STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7-16-INCH BIT WHEN TAPPING, and it will be found that with the **"EMPIRE" SPOUT** every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

WRITE FOR PRICES AND TRY A SAMPLE LOT.

Never Look Backwards SELL Quality Goods

To progress, to achieve a business success and then retain your trade, you must have the motive power behind your sales. Our splendid organization, our complete advertising campaign, our perfect service will bring you the Trade, but it's the famous quality of our goods that will **keep** it for you. Commence right by displaying our

Sask-Alta Range

The attractiveness of the design and the solid appearance of the Range provides an exterior that will appeal to every prospective customer.

The patented lift-top works in conjunction with the Broiler Door—One operation means saving energy.

The burnished cooking top gives a bright, polished surface—no black-leading necessary.

The grates are patented double duplex—one end can be worked independently of the other, so that fire has no dead ends.

The Fuel Saver in the smoke pipe is simple working, and efficient; and saves money.

The Semi-Steel linings in the fire-box are proven by test to be the best.

"McClary's on goods is a quality name."

Extended, with Warming Closet. For Hard or Soft Coal or Wood.

MAPLE LEAF STEEL RANGE

PROVED BY MANY YEARS OF SERVICE TO BE THE BEST VALUE IN A LARGE STEEL RANGE ON THE CANADIAN MARKET.

Construction embodies every practical modern improvement known to the stove builders' art.

Nothing that would in any way add to its efficiency has been omitted, and it contains many features that are new and admirable.

It is unexcelled in design and ornamentation.

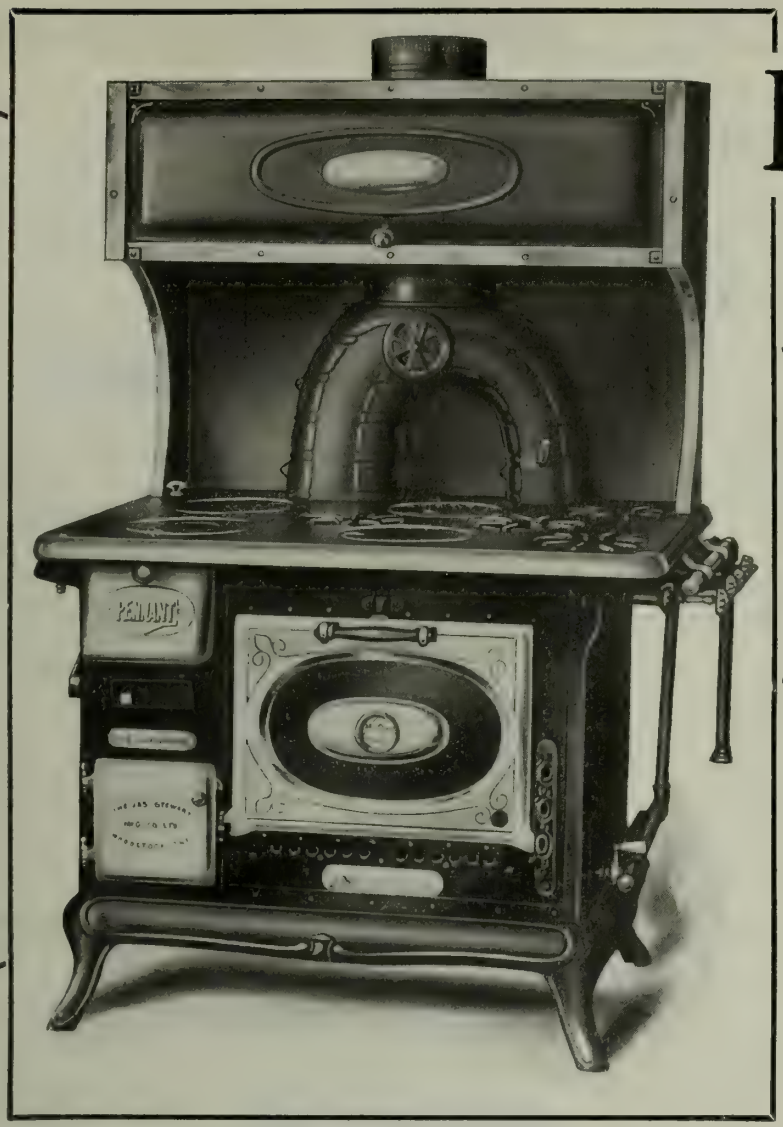
The Body is made of heavy polished steel of a refined quality. All parts that are exposed to the direct action of the fire are double thickness with asbestos mill-board between, all securely united together.

The Fire Box is straight, very roomy, lined with extra heavy cast sectional linings and fitted with the celebrated Duplex Grate, also wood grate. When desired to burn wood only, flat wood grate can be supplied.

The Oven is made of heavy wrought steel, extra large and high and is well braced with heavy cast-iron stays.

Flue Box is made of cast iron and will not burn out.

The Combination Coal and Wood Door is hung to swing away from the oven and has a heavy cast-iron lining. It is a drop door on a swing frame, giving a large opening for burning wood and a satisfactory one for burning coal.



If you attend the Convention be sure to call and see us. We want you to see how well made and how attractive the Maple Leaf Range really is.

If, however, you cannot be with us drop a line for full details and references.

PENNANT

Two-Fuel Range

Change the Fuel Without Changing The Range

The display of

"GOOD CHEER"

STOVES and FURNACES

will be the largest of the kind at the

OTTAWA HARDWARE EXHIBITION

FEBRUARY 16th to 21st.

THE PENNANT is the "last word" in household cooking appliances, offering, as it does, **Two Complete Stoves within the compass of One Good-Sized Kitchen Range,** and always available for coal, wood or gas without any tinkering or manipulating of burners.

¶ The top has four 8-inch holes and four holes for gas, presenting a total of **Eight Cooking Holes,** and all available at the one time if required.

¶ There is positively no connection between the coal and gas sections of range, so both fuels can be used at the same time.

¶ Oven flue and flues under main top carry all natural gas fumes direct to chimney.

¶ If you have gas in your town write us for particulars.

NICHOLSON DEALERS ARE NICHOLSON FRIENDS

When 10,000 dealers are 10,000 loyal friends, you can readily draw your own conclusion.

Every Nicholson dealer is a loyal Nicholson friend. The profit possibilities may have attracted them first—but it's the spirit of friendly co-operation that makes them "stick."

Files couldn't be made better than Nicholsons make them—so we've devoted much time to bettering our highly satisfactory service to the trade.

Bigger factory stocks—quicker shipments—more rigid inspections — down-to-the-minute goods — and a determination to make NICHOLSON-MADE FILES a most profitable line to carry.

These are the advantages that put the Nicholson brands in Canada's progressive retail stores.

To the Hardware
and Tinsmithing Trade!

A QUESTION:—

How much business is there for you in Re-decorating the Interiors of Stores, Theatres, Hotels, Cafes and Homes?

To say nothing of new buildings!

You can estimate on Interiors like this!

THE ANSWER

There is plenty of business—profitable business—for **you**, Sir, in recommending and selling "Metallic" Artistic Steel Ceilings and Walls.

Not only are "Metallic" Ceilings and Walls smart looking when laid, but they are more easily applied because of the **exactness** of each individual sheet.

Being Fireproof and practically everlasting "Metallic" Ceilings and Walls are far superior to plaster or papered walls.

The saving in labor enables you to quote prices which land you the jobs.

The superiority of the materials ensures the duplication of orders—pleased customers will talk about your work.

Our method of quoting you prices when specifications or dimensions are given is no small help to you in your business.

Write for full information to-day.

406	6 cups	15.50
409	9 cups	17.25

X-Ray View

It is easy to convince your customers that the faster the water in a percolator is pumped over and through the coffee the quicker the beverage is ready to serve, and the greater amount of good qualities will be extracted from the coffee grounds. The liquid does not need to boil to get the best of coffee, in fact it should **never be allowed to boil,** because only the bitter, harmful tannin is extracted by so doing.

You see the vital importance of the statement we are driving home to every lover of delicious coffee that "UNIVERSAL" PERCOLATORS CIRCULATE SIX TO TEN TIMES MORE WATER AND IN LESS TIME MAKE DELICIOUS COFFEE THAN ANY OTHER PERCOLATOR, because this means to them better coffee prepared more economically.

Cash in your share of this increased trade, while we furnish the publicity with dealer selling helps. Many styles of aluminum, coffee, nickel and enamel patterns to choose from, make this easy.

AN ATTRACTIVE DISPLAY STAND FURNISHED FREE WITH YOUR FIRST ORDER FOR ONE DOZEN PERCOLATORS.

X-Ray View

You see from the above illustration that tea can be made at the exact strength desired, when the "Universal" Tea Ball Tea Pot, is used. Some of the best tea grown has been spoiled by guess-work, when making the beverage. We know your customers love good tea and we know we make the best tea pot. This seems like an opportunity that should be developed to our mutual advantage. Again let us remind you of the several attractive "Universal" patterns which will appeal to the purchaser of high-grade goods.

ELEY BROS., LTD., LONDON.

The demand for the Dana—

Naturally reaches its height along in the sultry months of July and August. But people who go away to summer cottage or camp, usually leave in May, and they also want some ice cream, during the hot months, and would like to take the "Dana" with them.

So, therefore, if you're on the look-out for some profitable business, you'll put in a stock of "Dana's" and start suggesting to your customers that they include one in their summer kit.

Show them the Dana,—explain how the can is very tall in proportion to its diameter—how the dasher keeps the contents moving and removes the frozen cream from the sides of the can, as fast as it becomes solid; demonstrate to them that the Dana is just as easy to grind as a watch is to wind—and you'll sell out before the real hot weather even begins.

Doesn't this sound a good proposition to you? It will look even better when you learn of the profits.

So write us to-day.

HARDWARE AND METAL

Vol. XXVI. FEBRUARY 14, 1914 No. 7

Arrangements For "Hardware Week"

Special Trains Will Leave Toronto and Montreal—A Large Attendance Expected—All Arrangements Have Been Completed—Important Matters Will be Discussed.

ALL arrangements have been completed for the second annual exhibition of the Canadian Hardware Manufacturers' Exhibitors' Association, and the ninth annual convention of the Ontario Retail Hardware and Stove Dealers' Association to be held at Ottawa, Ont., during the week of Feb. 16 to 21.

Exhibitors and retailers are looking forward to a pleasant and profitable week, and with the excellent provisions that have been made for the comfort and entertainment of guests, their expectations should be fulfilled.

The exhibits will be of a very high order, and every hardwareman present at Ottawa should arrange to spend considerable time in looking over the array of hardware that will be on display.

On Monday, Feb. 16, special G. T. R. trains will leave Toronto and Montreal. The Toronto train will leave about 1.30 p.m., giving visitors from Western Ontario points ample time to make connections. The Montreal train leaves at 5.30 p.m.

At 9.00 p.m. an informal reception will be held at the Chateau Laurier.

On Tuesday at 9 a.m. the official opening takes place and the exhibition will be open to hardwaremen only.

At 2 p.m. there will be a joint meeting of the Ontario Retail Hardware and Stove Dealers' Association, the Quebec Retail Merchants' Association and the Canadian Hardware Manufacturers' Exhibitors' Association. At this meeting, matters of importance to each association will be taken up.

The visit to the House of Commons on Tuesday evening will be one of the treats in store for those attending the convention and exhibition. At 2 p.m. Tuesday a matinee for the ladies will be held. Tuesday's programme will end with a collation at the Chateau Laurier at 10.30 p.m.

The complete programme is shown in the accompanying panel.

Among the special features there will also be a theatre party for ladies at 8 p.m. Wednesday.

At 8 p.m. Thursday there will also be a theatre party as guests of the Exhibitors' Association.

A number of illustrated lectures will be given by manufacturers, these lectures will not be for the purpose of advertising the products of the manufacturers, but rather for the purpose of showing retailers how various lines of goods are made.

The Question Box Sessions of the Ontario Retail Hardware and Stove Dealers' Association will be open to all attending the convention and exhibition, whether members of the Retail Hardware Association or not. At these meetings a number of very interesting subjects will be discussed.

During the convention a number of short talks will be given by officers of the Retail Hardware Association. The following speakers will take part:—W. F. Macpherson, Picton, Ont., "Trade Agreements;" W. J. Carter, Picton, Ont., "Special Sales Plans;" C. C. Lee, Goderich, "Uniform Half Holidays;" E. J. Creeper, Owen Sound, "Retail Advertising;" C. W. Conn, Tillsonburg, "Tinshop Costs;" Jas. McGregor, Oakville,, "Cost of Delivering Goods."

First Vice-President W. F. Macpherson, of Prescott, will have some interesting information for those present, on subjects which have been successfully taken up and carried out by American Associations.

As secretary of the Advisory Committee he will report having made satisfactory progress with a freight audit bureau with a view to establishing such a department in connection with the Ontario Retail Hardware and Stove Dealers' Association. This work would be done at a reasonable cost and should mean a great saving to the retailers. The plan has been tried out by American associations and has proven very satisfactory, in many cases resulting in considerable profit for the retailer.

H. Occomore, president, Ontario Retail Hardware and Stove Dealers' Association in a recent letter to Hardware and Metal, stated as follows:—"With the convention only a week ahead everything looks bright for the most successful meeting we have ever had. Especially should it be a record year on account of being held as it is, in the Dominion's Capital. For their own individual good the hardware and stove men cannot afford to miss this year's gathering together. I feel that anyone present at Ottawa this year will be well repaid for any sacrifice they may make to get there."

Another of the questions to come under discussion is the proposed sale or exchange bureau to enable members to

M. R. Griffiths, Toronto, President C.H.M.E.A.

sell or exchange stock which is not moving with them. The question will be discussed thoroughly, as it is felt by many members of the association that such a bureau is necessary.

It is to be hoped that there will be a large attendance and that the association will be able to enlist a large number of new members.

At the last meeting in Hamilton it was felt that, although the best convention ever held, there should be a larger membership in the association. One prominent manufacturer frankly stated at one of the convention meetings "that the retailers should get closer together, gather strength in numbers and thus gain an influence that would become effective. It is, therefore, advisable that if big things are expected there should be a big organization of members to back up the work of the officers and assist them in creating an influence that would be effective.

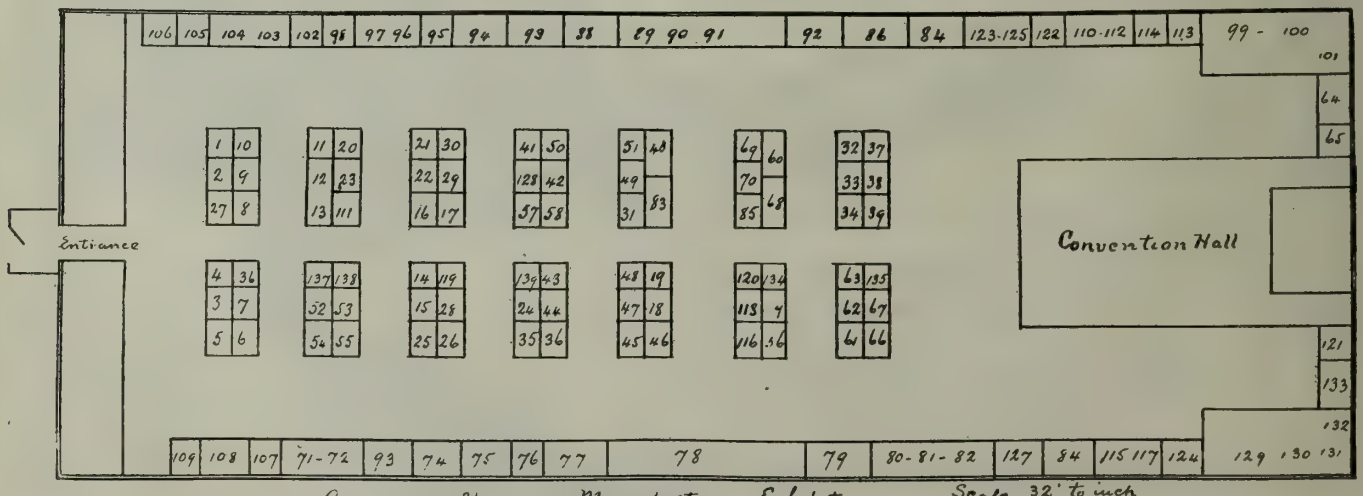
The Canadian Hardware Manufacturers' Exhibitors' Association have made

H. Occomore, Guelph, Ont., President O.R.H. & S.D.A.

A MESSAGE FROM PRESIDENT GRIFFITHS.

Hardware and Metal,
Toronto, Canada.

On the eve of what bids fair to be the most representative joint meeting of hardware interests, both selling and manufacturing, it is very encouraging to note the feeling of harmonious co-operation which exists on all sides. The great idea of mutual service and practical good-will is everywhere in evidence. Let us all, then, use the opportunity to push on to a more complete, just, and equitable understanding of our common interests.



Yours very truly,
M. R. GRIFFITHS,
President.

W. J. Carter, Picton, Ont., Member Executive O.R.H. & S.D.A.

MESSAGE FROM PRESIDENT OCCOMORE OF O.R.H. & S.D.A.

With the Convention only a few days distant it looks to me as though we will have one of the most successful meetings in the history of the organization. There should be a large attendance and I feel that any hardware merchant who attends will be well repaid for any sacrifice he may make to get there. Many important problems will be discussed, and a large attendance is expected from the Eastern Provinces. The fact of the Convention and Exhibition being held in the Capital of Canada should also be an inducement for hardware merchants to be present at Ottawa next week.

Canadian Hardware Manufacturers Exhibition
Machinery Hall - Ottawa

Scale 32' to inch

W. F. Macpherson, Prescott, Ont., 1st Vice-Presi. O.R.H. & S.D.A.

W. F. Macpherson, Prescott, Ont., 1st Vice-President Ontario Retail Hardware and Stove Dealers' Association, and Secretary of the Advisory Committee, has devoted a large amount of time investigating methods adopted by American Associations, and in a recent letter to Hardware and Metal, he stated as follows:

I will be able to report at our Convention having made a very favorable agreement with a freight audit bureau to handle the claims and audit the freight bills of the members of our Association. This, I claim, should be a great advantage to our Association, as similar agreements amongst the American Associations have been productive of a very great financial gain to the members of the various associations. Other matters of great interest will also be included in the report, and, with the many advantages to be obtained from the Convention meetings and the very large and excellent Exhibition of the manufacturers, I think it would profit every hardware dealer in Ontario to make it a point to attend the Convention in Ottawa.

Yours very truly,
W. F. MACPHERSON,
Sec'y to Advisory Committee.

splendid arrangements regarding railroad rates, hotel accommodation, etc.

Rates, Etc.

The rate from Toronto to Ottawa is $7.70 return, on certificate plan, plus $5 for hotel accommodation for five nights. The rate from any other station between Halifax and Edmonton is single fare on certificate plan, plus $5 for room, without bath, in Chateau Laurier or Hotel Russell for five nights. Room with bath is 50 cents per day additional for each person.

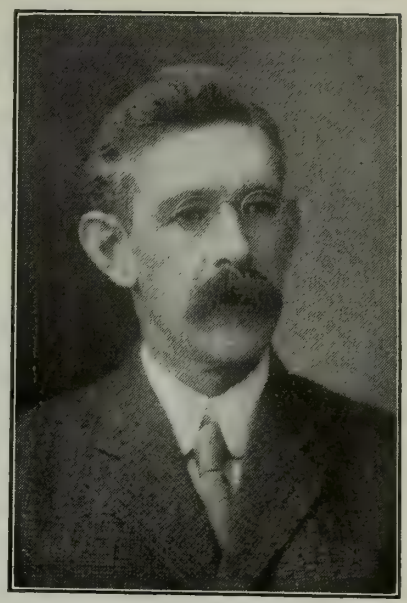
All who can conveniently do so are requested to make connections with the special hardware trains leaving Toronto and Montreal on Feb. 16.

There is no additional charge for traveling on the special trains and during the trip hardwaremen will have an opportunity of getting better acquainted.

Toronto special leaves the Union Depot at 1.30 p.m. and the Montreal special leaves Montreal at 5.30. Both specials will be G.T.R.

Be sure and secure a certificate when purchasing a ticket from your ticket agent. This certificate plus 25 cents, when signed by the secretary at Ottawa, can be exchanged for a return ticket without additional charge.

It had been previously decided upon to have a deputation wait on the Federal Government to present resolutions of the retailers, on subjects such as the unjust charges for reinspection of scales and measures; parcels post, and co-operative stores. It has been found that these matters have been taken up by the Retail Merchants' Association and the matter has been dropped for the present.



The Exhibition.

The officers of the Canadian Hardware Manufacturers' Exhibitors' Association have worked hard to make the coming exhibition the "best ever," and from recent reports the indications are that they have succeeded.

We have been informed that the exhibits will be larger in number than at any previous exhibition. The officers deserve credit for the able manner in which they have conducted arrangements, especially after the disaster to Howick Hall, where it was planned to hold the convention and exhibition.

Machinery Hall where the exhibition will take place has a floor space 140 ft. x 400 ft., allowing ample space for display. A section of the building has been reserved for the convention meetings.

There is a splendid car service to the exhibition grounds. A lunch counter in charge of a competent caterer will be established in the exhibition building,

F. M. TOBIN,
Sec'y.-Treas. C.H.M.E.A.

LAST-MINUTE DOPE FROM TOBIN.

February 11th,

At least half of the exhibits for the big Exhibition are already on the ground. The booths are all erected and exhibits are to be placed in their location as fast as they arrive.

The Dominion Board of the Retail Association will hold a meeting at the Chateau Laurier on Monday, the 16th and the members attending will remain during the week of the Exhibi-

To the James Stewart Mfg. Company, Woodstock, falls the honor of having the first furnace in operation at the Machinery Hall. Mr. Stewart was on the grounds early Monday morning, superintending the arrangement of their large exhibit.

Mr. R. McC. Smith of the G.T.R. is on hand with a carload of their exhibits which is to occupy a large space in the Machinery Hall.

An elaborate programme has been arranged for the ladies, including a special contest for a Canadian Hardware Manufacturers Exhibitors' Cup which is to be donated to the Ski Club for this occasion.

The members of the Local Committee are extremely active in arranging for theatre parties, special drives about the city and visits to points of interest, including some of the largest industries, the mint and museum.

and those attending the exhibition and convention will be enabled to secure lunch without the necessity of leaving the building.

The entertainment committee have made splendid arrangements for the entertainments of visitors and a good time is assured to all attending the exhibition and convention next week.

LIST OF EXHIBITORS.

Many of the firms exhibiting, will display new lines, not previously offered to the trade. Among the firms exhibiting, are the following:—

National Acme Mfg. Co., Montreal; Onward Mfg. Co., Berlin, Ont; Flexible Conduit Co., Guelph, Ont.; Tallman Metal & Brass Co., Hamilton; Canadian Steel & Wire Co., Hamilton; Kir-Ben Co., Ltd., Almonte; Springer Lock Mfg. Co., Belleville, Ont.; Imperial Oil Co., Toronto; Butterworth Foundry Co., Ottawa; Clare Bros. Co., Ltd., Preston; Steel Company of Canada, Hamilton; David Maxwwell & Sons, St. Mary's; Ottawa Paint Works, Ottawa; E. T. Wright & Co., Hamilton; Clare Bros., Preston; James Smart Mfg. Co., Ltd., Brockville; Dustbane Mfg. Co., Ltd., Ottawa; One Minute Washing Machine Co., Toronto; E. B. Eddy Co., Hull; Empire Agencies, Ltd., Toronto; Canada Brush Co., Ltd., St. John, N.B.; Oneida Community Co., Niagara Falls; Northern Aluminum Co., Ltd., Toronto; James Stewart Mfg. Co., Ltd., Woodstock, Ont.; Dominion Cartridge Co., Montreal; Renfrew Electric Co., Renfrew; Canadian Buffalo Sled Co., Preston; Autographic Register Co., 10 St. Peter St., Montreal; Barr Register Co., Trenton, Ont.; Gutta Percha & Rubber Mfg. Co., Toronto; Chadwick Brass Co., Ltd., Hamilton; The Beach Foundry Co., Winchester; Canada Metal Co., Ltd., Toronto; Moffatt Stove Co., Weston; Radiant Electric Co., Grimsby; Gurney Foundry Co., Toronto; The Pedlar People, Ltd., Oshawa; Dominion Iron & Steel Co., Ltd., Sydney, N.S.; Williams Chemical Co., Russell, Ont.; Brantford Roofing Co., Ltd., Brantford; Richards-Wilcox Canadian Co., Ltd., London; The Gazette Printing Co., Ltd., Montreal; Herald Co., Ltd., Montreal; Hall Zryd Foundry Co., Hespeler; Ontario Lantern & Lamp Co., Hamilton; Lufkin Rule Co., of Canada, Ltd., Windsor, Ont.; Gillette Safety Razor Co., Montreal; McFarlane Douglas Co., Ltd., Ottawa; Shurly-Deitrich Co., Ltd., Galt, Ont.; Canadian Wire & Iron Goods Co., Hamilton, Ont.; Canadian Heating & Ventilating Co., Owen Sound; Gendron Mfg. Co., Toronto; Greening Wire Co., Hamilton; Grand Trunk Railway, Montreal; Bishopric Wall Board Co.; McClary Mfg. Co., London, Ont.; Meakins & Son, Ltd., Hamilton, Ont.; Glidden Varnish Co., Toronto; Cummer Dowswell, Ltd., Hamilton; S. F. Bowser & Co., Toronto; John Morrow Screw & Nut Co., Ltd., Ingersoll; Taylor-Forbes Co., Ltd., Guelph; H. W. Johns-Manville Co., Ltd., Toronto; F. W. Bird & Son, Hamilton; E. C. Atkins & Co., Hamilton; Canadian Tap & Die Co., Ltd., Galt; Stratford Mfg. Co., Stratford; Ware Mfg. Co., Ltd., Oakville; Grant-Holden-Graham Co., Ottawa; Auto Strop Safety Razor Co., Toronto; Findlay Bros., Ltd., Carleton Place, Ont.; Boeckh Bros. Co., Toronto; National Machinery & Supply Co., Hamilton; Nineteen Hundred Washer Co., Toronto; D. F. Jones Mfg. Co., Ltd., Gananoque; Dunlop Tire & Rubber Mfg. Co., Toronto; Dominion Register Co., Toronto; Hardware and Metal, Toronto; Dominion Register Co., Toronto; Steel Trought & Machine Co., Tweed, Ont.; The Steel Equipment Co., Ltd., Ottawa; J. H. Connor & Sons, Ltd., Ottawa; Hamilton Stove & Heater Co., Hamilton; Canadian Hardware Journal; The Alabastine Co., Paris, Ont.; Geo. C. Kaitting & Sons, Ltd., Galt; Henry Disston & Sons, Ltd., Toronto; Independent Cordage Co., Toronto; Patterson Mfg. Co., Ltd., Toronto; D. Moore & Co., Hamilton; Smart-Woods, Ltd., Ottawa; Stamped & Enamel Ware Co., Hespeler; Wilt Twist Drill Co., Walkerville.

PROGRAMME FOR OTTAWA CONVENTION.

Monday, February 16.

1.30 P.M.—Special train leaves Toronto, G.T.R.
5.30 P.M.—Special train leaves Montreal, G.T.R.
9.00 P.M.—Informal reception at Chateau Laurier.

Tuesday, February 17.

9.00 A.M.—Official opening. Exhibition open to Hardwaremen only.
10.00 A.M.—Committee meeting.
12.00 Noon—Luncheon and address.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
2.00 P.M.—Matinee for ladies, Cy Warman at Chateau Laurier.
4.00 P.M.—Adjourn to Exhibition Hall.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.30 P.M.—Visit to House of Commons
10.30 P.M.—Collation at Chateau Laurier.

Wednesday, February 18.

9.00 A.M.—Hardware Exhibition open to Hardwaremen only.
12.00 Noon—Luncheon and address.
2.00 P.M.—Retail Convention.
3.30 P.M.—Adjourn to Hardware Exhibition.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party for ladies.
8.00 P.M.—Retailers meet in banquet hall, Chateau Laurier.
8.00 P.M.—Exhibitors meet in room, Chateau Laurier.
10.30.—Illustrated lecture for Dealers, Chateau Laurier.

Thursday, February 19.

9.00 to 10.00 A.M.—Retail Convention.
10.00 A.M.—Hardware Exhibition open to Hardwaremen only.
12.00 Noon—Luncheon served at Exhibition.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party as guests of Exhibitors.

Friday, February 20.

9.00 to 10.00 A.M.—Retail Convention.
10.00 A.M.—Hardware Exhibition open to Hardwaremen.
12.00 Noon—Luncheon served at Exhibition.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
8.00 P.M.—To be announced later.

Saturday, February 21.

8.00 A.M.—Special trains to Toronto and Montreal.

Lessons That Are Learned from the Inventory

The Need of Taking Stock at Least Annually is Emphasized—Too Many Merchants Think They Are Better Off Than Actual Conditions Show—Special Instances Cited.

Third of series written for Hardware & Metal by William Cambell.

IT is my intention in this article to go thoroughly into some phases of stock-taking. The subject will perhaps seem a little untimely, as most retail merchants take their inventory during the first few weeks of the new year. In many respects, however, the present is the most suitable time possible. I venture to say that a large proportion of the merchants who have finished up their stock-taking either did not carry out the work on the most thorough basis or failed to comprehend all that their inventory had to teach them. Perhaps, therefore, the facts which I desire to present are likely to impress themselves thoroughly when the work of stock-taking is still fresh on the mind.

What Inventory Shows.

The first point to be brought out is the importance of the annual inventory. In the first place, it lets you know for certain what your stock is, and by including it in your assets your balance sheet when prepared by an accountant will show you how you stand. Secondly, if you took stock a year before, the difference in the amount of your surplus item will show your net gain during that period. Thirdly, if you have kept a purchase and sale journal and know the amount of your total purchases and total sales, it will show your gross profit—a most important point, because it will show you for certain what percentage of profit you have made, not what you think you are making. For instance, if you have put 40 per cent. on to your cost your stock-taking should show that your gross profits have been 28½ per cent.

Stock-taking tests your profits and determines if there is any leakage, so that at least stock should be taken once a year for that reason alone. The biggest and most progressive stores keep stock systems to tell them what their stock should be at any time, and if anyone could say with reason: "Oh, I take stock only once in about three or four years, because I have a good idea of what I have," it would be them. Yet, we find that the firms with the best records take stock the most frequently. Why? Because it pays them to do it, and they are in business, and they have big business because they have the right methods and know every detail of their business.

The writer knows men conducting large stores and enjoying the reputation of aggressiveness who have not taken stock for three years or more. They claim they have a good idea of what their stock is. I have tested this knowledge on several occasions and I would not risk a nickel on it.

Every retail hardware merchant should read the accompanying article, which is the third of a series written for Hardware and Metal by Wm. Cambell. The subject discussed is one in which each merchant is vitally interested. Two articles on cost accounting have appeared in previous issues of Hardware and Metal. The articles have been prepared by an expert who has had many year's experience. — Editor's Note.

A man starts in business and does $5,000 a year; he has five-thousand-dollar ideas, and possibly knows the amount of stock he is carrying; his business grows and he is doing three or four times that amount. That man's stock will have outgrown that man's ideas, and if he takes stock he will find that he has a great deal larger stock than he thought he had.

The Man Who Thought He Knew.

I was consulted by such a man once, and he wanted his business put in order. He confided to me that he knew all about it himself, but that he wanted to show it to a partner who was to get a share. I asked him how much stock he had, and he told me confidently that he could tell any leakage directly, and he almost apologized to me for his weakness in allowing an inventory of his stock to be made. It showed $6,000 more stock than he thought he had. I do not think he has quite forgiven me yet, but he increased his insurance, fired the man who kept his stock and put fresh energy into his sales department.

How to Go About It.

The next phase to be considered is the proper method of procedure in taking stock. It is a fact that many retailers who take stock out of a sense of duty carry out the work in such an incomplete way that it is really useless; worse than useless, for the merchant accepts the totals at their face value and believes he knows how his business stands. An incomplete inventory will often give a merchant an entirely erroneous idea of his standing and lead to the adoption of suicidal methods.

I remember one instance where a certain merchant had been carrying out his stock-taking each year quite regularly, but doing so on a slipshod basis that amounted in reality to guessing at what he had in stock. To make it worse, he based each succeeding year's inventory to a great extent on that of the previous year, with the result that each year he got further away from the truth. When the time of readjustment came—as it must come in all such cases—the difference between the real value of the stock and the figures on the books was almost unbelievable. It was great enough to create a suspicion of dishonesty in some minds, but I knew that the whole difficulty had cropped up through sheer carelessness.

System for Recording Stock.

Now, how is stock to be taken so that every article shall be taken down for certain and a prominent record kept, one that can be referred to and any article traced at once—a list that anyone can go over and check quickly? For this you need sheets numbered 00 to 99, and as it is generally sufficient to have 50 on a sheet, you need two sets of sheets, one set numbered 00 to 49 and the other 50 to 99. The reason for this is that you only need two lots of printing, even if you require hundreds of sheets; after you get to 99 you add the figure 1 to the 00 and you have 100.

Previous to taking stock a ticket must be placed on each article or package to be taken, and, as it is taken down, the number on the list is marked on the article or package; the first article will be numbered 00, the second 1, and so on. The articles must be taken down in exactly the same order as they are arranged, so that a package numbered 40 would be between articles numbered 39 and 41.

If this system is thoroughly followed out you will get all your stock down and nothing down twice .

These sheets should be filed in a post binder and then you have a permanent and reliable list of your stock.

The experience of the writer extending over twenty years devoted to a study of business methods has shown him the necessity of taking stock frequently. Profit by this and you will never regret it. It is simple but it is comprehensive. It enables the merchant to cover the ground and to thoroughly estimate the stock.

HARDWARE AND METAL

VOL. XXVI. No. 7 Toronto, Canada, February 14, 1914 Two Dollars per Year

The Buying End in the Caboose

A RIPPLE of mild amusement percolated through the ranks of the buying fraternity, wholesale and retail, recently, when a contemporary paper published an illustration showing a long train representing the hardware business puffing along on the road to success. The locomotive was the selling end and away at the far end of the train was a little caboose. And, lo and behold, this caboose represented the buying end!

No one is inclined to minimize the importance of the selling end, and least of all the buyer. The buyer's success depends on the ability of the selling end to dispose of what he puts into stock. But with all due respect to salesmanship, it is not wise to overlook that other phase of a business which is quite clearly of equal importance—the buying. Surely, the buying end was entitled to representation at least as the tender which supplies the matter for the locomotive. But the caboose! Why not have left it off entirely? Why not concentrate on the selling end, Mr. Hardwareman, and leave the buying to attend to itself, or perhaps let the junior clerk attend to it. We confess to an inclination to join in the amusement that has been manifest in the ranks of the hardware buyers.

The position of Hardware and Metal is and always has been to give as much information as possible on all phases of the hardware business. The great bulk of our special articles—some five or six each week—are devoted to sales topics. Salesmanship is the underlying idea behind most of our regular departments—"What other hardwaremen do," "The junior clerk's page," and so on. At the same time it has been our earnest policy to keep the buying end equally prominent; an object which has been obtained by our unexcelled service on market reports and our new goods department. That this part of the trade paper is the one which appeals most directly to the merchant is clearly evident from letters received from subscribers of Hardware and Metal. They want market news, the information to assist them in their buying.

An Educational Contest

THE annual Christmas window contest of Hardware and Metal was the most successful of any yet held, from every standpoint. The number of displays submitted was the largest on record. The quality was higher than ever before. In fact, there has been a steady improvement noted from year to year in the quality of the displays entered. Hardware and Metal has held the mirror up to the advance of the art of window-trimming in the hardware trade; more than that this paper has assisted to a marked degree in raising the standard of display work.

A gratifying feature of the contest was the even representation of entrants from all parts of the country. There was a particularly large number of displays sent in from the Western provinces and the quality was uniformly high.

Despite the fact that the standard has advanced very markedly in the last five years, there is still much room for improvement in the work of the average hardware window trimmer. Some of the displays submitted contained faults in arrangement and decorative treatment which practically spoiled them. In many instances the goods were arranged in haphazard manner, a little of one line here, more of the same there. Wide strips of crepe paper were stretched from side to side of the window or diagonally across the space, thus spoiling the view and hurting the appearance of the display in a material way. These mistakes should be avoided and until they are eliminated, the general standard will not advance.

The average display man should give more study to the subject. If he were to take up the art of display in a systematic way he would discover new theories, new ideas and plans which would revolutionize his work. The harmonizing of colors, the preservation of balance, the utilization of space to best advantage are points which have been studied closely by experts and reduced to a scientific basis. A need that most display men feel is for more fixtures and better fixtures. The lack of proper facilities makes it impossible to show the very best results.

The improvement that has been effected of recent years has been most marked and satisfactory, however. The annual contests conducted by Hardware and Metal have been a potent factor in bringing this improvement about.

The Business Situation

BUSINESS during the past week with hardware, stove and metal merchants has been fair for this season of the year. The volume of business passing at present is not large, but too much should not be expected during this season of the year. The outlook for spring business is good and booking for future has been heavy. There is a decided improvement in the metal market. Stove manufacturers, although quiet at present, are booking good orders for spring delivery. The Financial Post, commenting on the Business Outlook stated as follows:—

In every part of the Dominion trade and commerce during the week have been inclined to quietness, but underneath this inactivity there is hopefulness born of the easier money conditions at capital centres. Though day-to-day money in London, as reference to our cable will indicate, is available for the time being at less than one per cent., and although money at New York is relatively as easy, there are no immediate signs of drooping commercial rates in Canada. During the week brokers have been able to get some accommodation at 6 per cent., as compared with 6½ a week ago, but the amounts available for this purpose are not large. Not too much credence can be placed in statements to the effect that there is abundance of money at 6 per cent., especially at Montreal. Some private lending has taken place, producing the appearance, temporarily, of an abundant supply. We are not yet, however, satisfied that it would be good policy on the part of the banks to place too large a proportion of their funds at call in Canada, nor is it at all probable that they will be able to do so. Their reserves are none too strong. After a period of anxiety they will very naturally incline towards the comfort and ease which strength in cash resources give them. They are, however, confronted with the imminence of heavy borrowing in London, where new issues are already causing some concern, and with the imminence also of a crisis in Mexican affairs. Moreover, reports from Brazil during the week have not been reassuring, nor have those from Paris. Trade in Britain is being maintained, and there also commodity prices appear again to be ascending. Here, therefore, are factors which are not conducive to continued monetary ease.

To forecast the probable course of business is made more difficult by the developments of the week. January bank clearings and those for the current week show a very decided falling-off, and for the first few weeks of the year the decline in the issue of building permits is very marked.

Rolling stock of the railroads is to a greater extent becoming unemployed. These particular circumstances indicate dullness, and also a very cautious attitude on the part of business, despite the bold front which published opinion clothes it. No doubt, as we have already stated, there is a healthy underlying hopefulness, which is fully justified by the actual easing of money rates at capital centres.

The decline in building may safely be attributed to the period, now happily past, during which the procuring of loans was a hopeless task, and bank clearings have contracted as a result of the elimination of speculation, largely, but not wholly, in real estate. Commerce will have a better chance to revive if the speculation referred to does not return; and, in so far as the building situation is concerned, the availability of money will tend from now on to stimulate activity. In Eastern Canada the demand for 7 per cent. mortgage money is still strong, and on central property on low percentage of valuation 6 per cent. and even 5½ per cent. money can be got. But it is the supply of the higher-priced money, available for the needs of the home-builder, that concerns business men most. As yet we do not discern any signs of an adequate supply becoming available for some time. Conditions in European centres are changing, and it is quite probable that before midsummer our more influential agencies will be able to place large amounts of debentures at a rate that will enable them to supply borrowers at rates prevailing at the beginning of 1913 and in 1912. There will not be any trade buoyancy until we have these conditions.

The Ottawa Convention

DURING the coming week Canadian hardware merchants will have an opportunity of visiting one of the largest displays of hardware and kindred lines, that has ever been gathered together in the Dominion. The Canadian Hardware Manufacturers Exhibitors' Association has at great expense prepared an exhibition worthy of the attention of any person at all interested in the hardware business. It is to be hoped that there will be a large attendance of delegates at the Exhibition and Convention at Ottawa next week. The Convention meetings will also be interesting to hardwaremen. Many important topics will be taken up, and trade problems discussed. The Question Box discussion should be particularly interesting on account of the many problems confronting the retail hardware merchant at the present time. The attendance of a large number of merchants who are expected from the Eastern provinces should also help to make the Convention a success. Splendid arrangements have been made for the accommodation and entertainment of visitors. Special rates at hotels and with the railways have been secured, and hardwaremen can visit Canada's Capital and the Exhibition and Convention at very reasonable expense. There are many interesting sights in the City of Ottawa. An article elsewhere in this issue gives information regarding the city and its points of interest.

Hardware merchants who are unable to go to Ottawa next week should endeavor to send one of their employees. Some merchants have signified their intention of taking some of their clerks to Ottawa. It is safe to predict that any employer or employee visiting Ottawa next week will return home, with new ideas, and more enthusiasm, which will reflect to the advantage of his business during the balance of the year.

Editorial Briefs

HOW MUCH is each member of your staff worth to you? It's a question that every hardwareman should answer.

• • •

IT'S GOOD THAT the storm king is "having his fling" this week. Mild weather should be on the books now for convention week.

HOPE TO SEE you all on the hardware special train next week.

• • •

THERE WILL BE a few hardware buyers on the special train Monday. Suppose they will be banished to the caboose. Or why let any buyers go to Ottawa at all?

Ottawa: The Heart of Canada's Capital.

The Exhibition and Convention City

A List of Interesting Places Hardwaremen Will Have An Opportunity of Visiting—A Treat in Store for Those Attending the Exhibition and Convention.

HARDWAREMEN and their wives visiting Ottawa the Capital of the Dominion, will no doubt wish to see some of the places of interest to be found in the city. In this article Hardware and Metal is going to take the reader for a trip through the city of Ottawa, pointing out some of the very interesting places which may be visited and giving instructions as to how these places may be reached.

In one of the panels accompanying this article is given a list of places, with names of the various car lines to be used.

The C.P.R. and Grand Trunk Railways have a union station which, for beauty of architecture and situation ranks very high. The traveler on arriving at the depot is at once in the heart of the Capital. Below is the dark water of the Rideau Canal, recalling the early days of Bytown, when the name Ottawa had not come into use. The canal connects with the River Ottawa by a series of precipitous locks, kept in perfect trim, but not much used.

Across the road is the renowned Chateau Laurier, one of the largest and most up-to-date of Grand Trunk hotels. But the eye long ago will have seen the towers of the Parliament Buildings, which stand on a promontory, and help to give to Ottawa its beauty and distinction.

Turning another angle in the circle, one faces the post office, not a very imposing building for the Capital, but having a unique situation at the head of Connaught Place, a plaza, which spans the Rideau Canal, and on which you stand as you leave Central Station. Looking ahead, straight over the locks, northwards, your eye catches a glimpse of the Alexandra Bridge, which connects the Capital with Hull, Que. The Laurentian mountains are in the distance. Look around. To the east lies the older part of the city. Look up the canal, and you will get a glimpse of residential new Ottawa. By proceeding to the left, you will come to Sparks street, the commercial street of Ottawa.

This is the experience of those from the east and the west, who arrive at Central Station.

Machinery Hall, where the exhibition will be held, is located in the Exhibition grounds. Exhibition cars run from Sparks street along Bank street, and pursue a straight course to the Exhibition Grounds.

Among the interesting places to visit are the Victoria Museum, Rideau Hall. The latter place can be reached by taking a Rockcliffe street car on Sparks street, going east. It passes along Sussex street, where the new Government departmental buildings are being erected. This is one of the most interesting streets in the city. It is an old commercial thoroughfare. Near the English church at the beginning, is the office of "Le Tempts," the only French daily newspaper. On the right one gets a passing glimpse of Byward market, attended by farmers from miles around.

At a considerable distance along Sussex street, the visitor will be struck by the jail-like appearance of a smart-looking building, the doors of which are guarded by soldiers. This is the Royal Mint, in which our coins are made. Canadian bills are manufactured by two private concerns, whose plants are situated near the Parliament Buildings. Near the Mint is the Archives building.

A remarkable view then opens up to the eye. The car runs on the very edge of a cliff, overlooking the river, and east and west the view is one that will not easily be forgotten. From here the grade is downward. At the foot, near some large lumber mills, are Rideau Falls, where the Rideau River empties itself into the Ottawa from a height of about 50 feet.

The district around here is quiet, and almost like a country village. The car climbs a hill leading to Rockcliffe Park, famous for its rifle ranges and scenery, and it is a little way up this hill that the traveler must alight to see Rideau Hall. Returning, at the foot of the hill, a St. Patrick street car may be taken.

which passes through another section of the city.

House of Commons.

When the hardware dealer looks out from Central Station, he sees the spires and pinnacles of the House of Parliament. By walking up Wellington street on the other side of the Post Office, he will come to the driveways leading to the various buildings. The main entrance is through Victoria Tower. A stairway on the right leads to the Senate Chamber, and one on the left to the House of Commons. Both Houses are identical in design, shape and size, being 82 by 45 feet. The galleries in each case provide accommodation for about 1,000 people. The soft light of stained-glass windows is considerably intensified by roofs of corrugated glass. Under a canopy is the Regal chair, occupied by the Governor-General at the opening and closing of Parliament. On a dias immediately in front is the Speaker's chair. The south wall is hung with portraits of King George III. and Queen Charlotte, and from a door in the right corner a staircase leads to the "corner-stone."

The Victoria tower is ascended by a winding staircase leading past the clock, with its dials eight feet in diameter, and its 14-foot pendulum which strikes the hours on a bell weighing a ton with a 50-lb. weight. From the top an unsurpassed view is to be obtained of the country for many miles in every direction. The Union Jack flutters during the day, and an electric light flashes from the highest point of the tower when either House is in session.

B. D. BLACKWELL,
Chairman Entertainment Committee C.H.M.E.A.

The west block contains the Departments of Customs, Inland Revenue, Public Works, Trade and Commerce, and Marine and Fisheries.

The east block contains the offices of the Governor-General and the Departments of State, Finance, Justice, Privy Council, Solicitor-General, Auditor-General, Indian Affairs and Dominion Police.

The south block is named after Sir Hector Langevin, a former Minister of Public Works. In it are the Departments of Agriculture and Post Office, part of the Interior Department, Patents, Copyrights, etc.

City of Hull.

No visit to the Capital should be terminated before seeing the city of Hull, that dark spot across the river. Before crossing, stand on Parliament Hill behind the House, and take a good look at one of the few French cities in Canada. Hull is probably more a French city than Quebec itself. Notice the enormous amount of lumber stacked around. It is a sight seen nowhere else in the world. On the left are the gigantic Chaudiere Falls, supplying power to the immense paper mills of J. R. Booth, the "lumber king," and those of the E. B. Eddy Co. Note the many religious buildings, distinguished by their whiteness, contrasted with the dark framework of the dwelling houses.

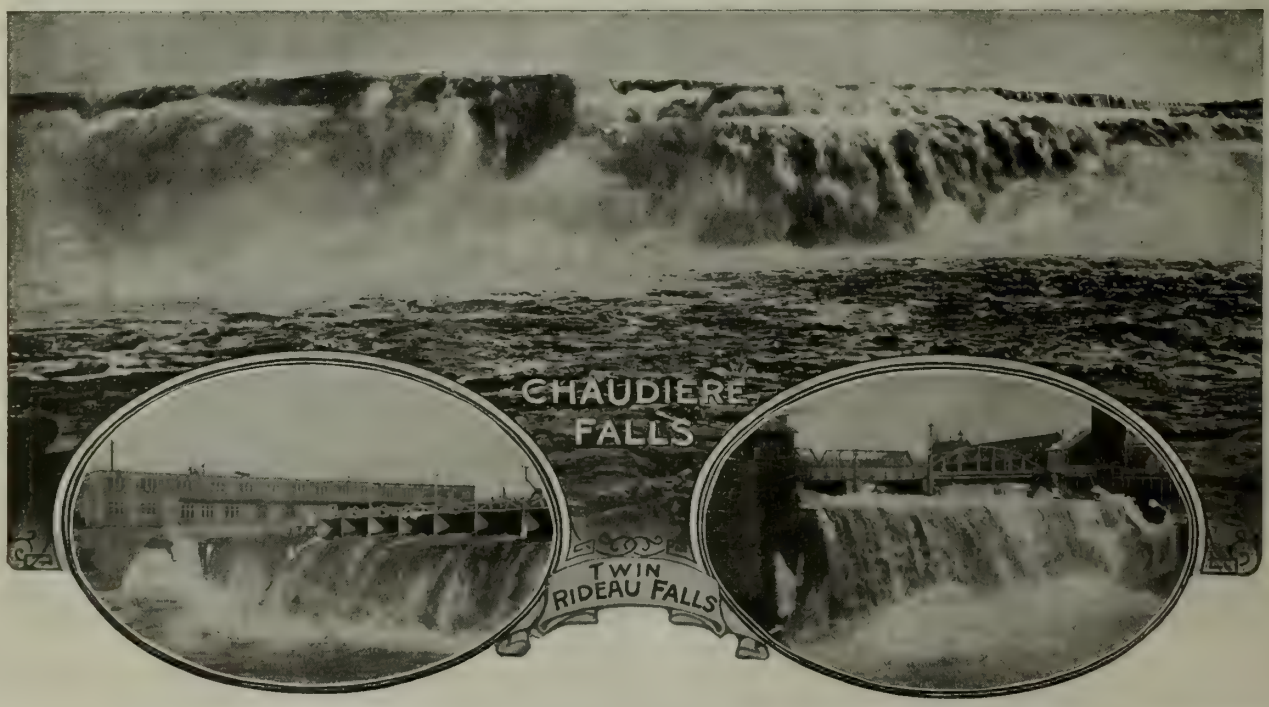
To reach Hull, take a St. Patrick car going west on Sparks street, which crosses the Ottawa river near the Chaudiere Falls, allowing the visitor to get a clear view of the cataract, as well as of the Booth and Eddy mills. The car goes no further than the other side of the river. The visitor may either take one of the Hull Electric Railway cars, or walk through the city. It is best to return by one of the Hull cars, from which a splendid view of the Houses of Parliament can be obtained while crossing the Alexandra bridge. The ride is one of the most interesting in the district.

Other Places of Interest.

Those who are interested in churches

Some of the Capital's Prominent Hotels.

may visit the Basilica, the Roman Catholic cathedral, situated near the Royal Mint. This can be reached by taking a Rockcliffe car east. The Victoria Memorial Museum, which cost $1,200,000 to build, is one of the most imposing buildings in the city. Take an Elgin street car. For those who enjoy an automobile ride, there is nothing better than a spin over the Driveway, which extends from the Experimental Farm to Cartier Square along the bank of the Rideau Canal, and through Rockcliffe Park.



Other places of interest are the Parliamentary Library, situated in the Houses of Parliament, the Government Printing Bureau, the National Art Gallery, the Supreme Court, the Government Fisheries exhibit, the Carnegie Library, and the Otawa University. There are several beautiful parks, but at this time of the year they are not very inviting. A popular breathing space is Parliament Hill, with its wide stretches of lawn, its trees, shrubbery, summer houses and, above all, its magnificent outlook up and down the Ottawa, and across to the Quebec shore. Here, half-way between the edge of the cliff and the river, is the pleasant path known as the "Lovers' Walk," and here is Parliament Square, a large open space 700 by 600 feet, which shows off the buildings around it to the best possible advantage.

The Experimental Farm.

The Experimental Farm, covering 460 acres of land, is situated three miles from the city hall, and from it experimental agriculture in the several provinces of the Dominion is directed. While the chief object of the work is to obtain

by repeated experiments useful data on the seeding, cultivation and harvesting of farm crops, on the breeding, feeding and housing of various classes of live stock, and on the conversion of milk into other marketable products, the management of the whole is, as far as possible, conducted for profit, all operations being carried on after the most approved practical methods. The live stock consists of four classes of animals; namely, horses, cattle, sheep and swine. A small dairy for the care and preparation of the milk for the market is operated. Poultry is also an important department.

Dominion Observatory.

Near the north gate of the Experimental Farm is the Dominion Astronomical Observatory. This building is of Romanesque architecture, carried out in grey sandstone trimmings. The main building was begun in 1903 and occupied in April, 1905. A wing for a "transit" house was added in the following year. The total cost was approximately $175,000. In the interior a central octagonal tower is surmounted by a revolving hemispherical dome, under which is the telescope. There is also an astronomical library, reading-room, photographic room and lecture-room.

Manufacturing Centre.

Many of those attending the convention will have time to pay a visit to some of the important industries. It must not be forgotten that while Ottawa is one of the most beautiful cities in the Dominion, it is quite an important manufacturing centre. Several of the largest industries in the country are located in the capital.

There are about two hundred industries in Ottawa and Hull, giving employment to about 20,000 persons, and paying out in salaries about $8,500,000 per annum. The district output of lumber for 1912 aggregated 559,000,000 feet, board measure, valued at $16,800,000.

Among the industries in Ottawa that will appeal to visitors to the hardware convention are:—Aluminum Castings, Ltd., Parkdale Ave.; Butterworth Foundry Co., Broad street, makers of furnaces, stoves, etc.; Beaver Co.; Capital Wire Cloth & Mfg. Co., Armstrong and Hamilton avenue, wire cloth, etc.; Canada Floors, Ltd., Champagne and Wellington streets, sanitary floors, roofing, etc.; Canada Cement Co., Gatineau road, Hull; Carlton Mfg., Co., tents, awnings., etc.; J. H. Connor & Son, 10 Pretoria avenue, washing machines,

Ottawa's Transportation Facilities.

THE REJUVENATING BUG.

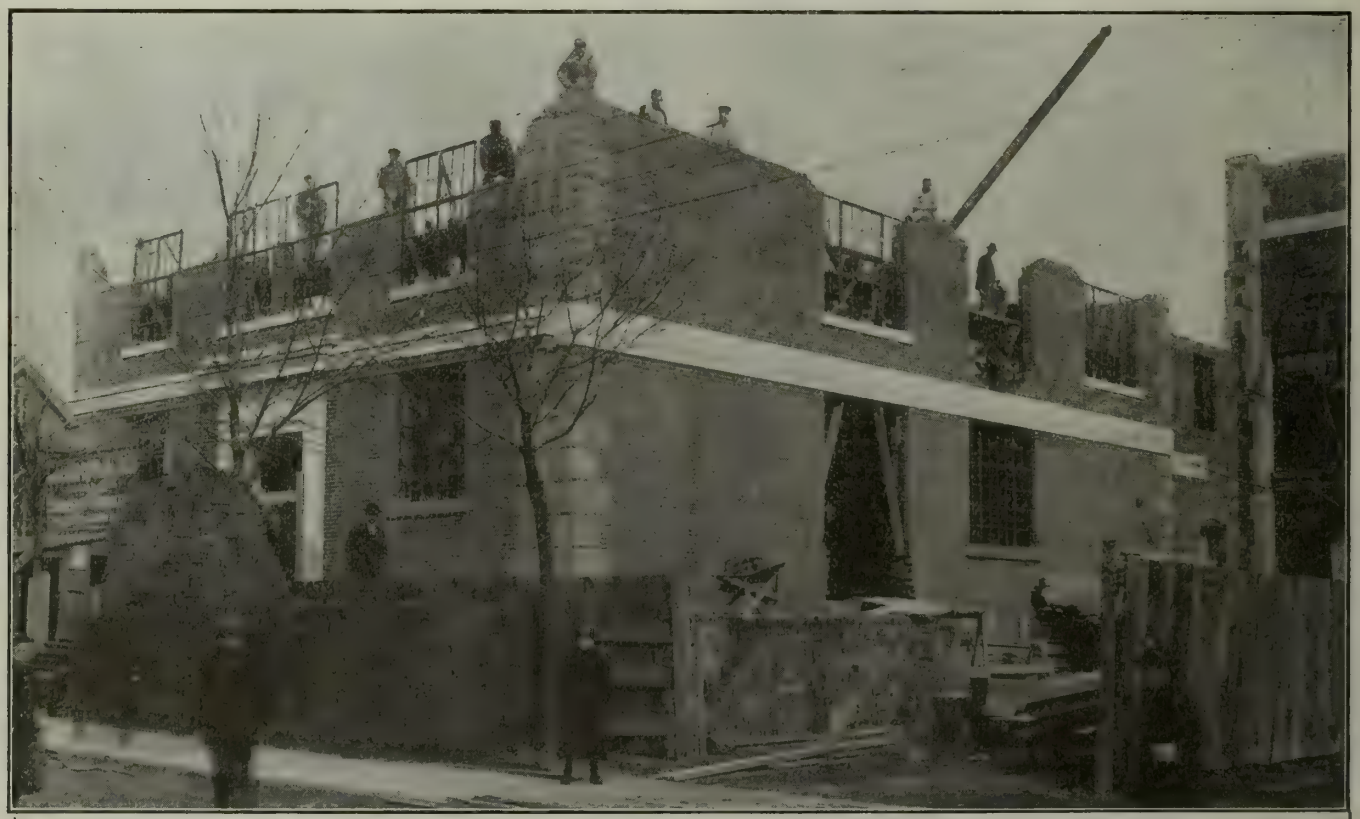
A representative of Hardware and Metal recently called at the Winnipeg house of the Miller, Morse Hardware Company and observed that the rejuvenating bug had been working hard. The firm have completely remodeled their offices and have adopted many of the latest appliances for thoroughness and speed.

Uniformity is the keynote. One is impressed, not by the individual fixtures, but rather the whole; everything tends to harmonize, and at once you see that the arrangement is ideal for cooperation.

The firm have also prepared for the Winnipeg bonspiel, an occasion always looked forward to by many jobbing houses in the city.

Many customers and friends take advantage of the slack season and reduced railway fares to come in and pay a visit

The Miller, Morse Hardware Co have provided ready accommodation for letter writing, and their mail department handles and delivers all letters sent in their care. The latest magazines and daily papers are to be found, with comfortable provision for their perusal.



JUDGING SALESMEN.

The salesman who fails to make a sale and permits a customer to walk out, may be a poor salesman. He may not have shown his stock in the proper light; he may have been personally distasteful to the customer; he may have talked too much about his stock, or he may have done or failed to do hundreds of things that might have won a sale. On the other hand he may have been particularly pleasing to the customer personally; he may have shown his goods in the best light possible, and may have said just enough and no more; yet the customer didn't buy, because the article he wanted was not in stock. Under the circumstances it might have been possible for the salesman to have forced something upon the customer that he would have returned the following day. A good house is known by its satisfied customers. A salesman then should be known by his satisfied customers.

EXHIBITION AND CONVENTION

etc.; Dominion Electric Co., 417 Sparks street., electric irons, etc.; James Davidson, Ltd., refrigerators, toboggans, etc.; T. Lawson & Sons, 376 Wellington St., castings, babbitt metals, etc.; Laurentian Foundry Co., 94 Ottawa street, furnaces, stoves, etc.; J. Leslie & Sons, 114 Scott street, tinwares; Modern Electric & Mfg. Co., 436 Wellington street, electric fixtures; McFarlane & Douglas, 350 Slater street, metal roofing; National Mfg. Co., Lyon and Catharine streets, steel stoves and ranges; Ottawa Stair Works, 989 Somerset street, refrigerators, etc.; Ottawa Paint Works, 687 Wellington street, oils, paints, etc.; Pritchard - Andrews Company, 264 Sparks street, stamps, scales, etc.; The Steel Equipment Co., Ltd.; Grant, Holden, Graham Co., Ltd.; Smart Woods, Limited.

The above picture shows the progress being made on the five-storey 50 x 100 addition to the MacLean Publishing Co.'s building on University Avenue, Toronto, proprietors of this paper.

This building will provide space that has been urgently required for the last year or two for the editorial and business staffs of their various publications. That we have great faith in the future of Canada is shown by the fact that we have acquired the whole block on University Avenue, running from Edward to Agnes Street. As the business develops and as Canada develops, the next building will be erected on the southern corner of the property, bordering on Agnes Street. The old building on your right of the picture—and it is only four years old—is one of the most substantially built brick, steel and reinforced concrete buildings in Canada. It will be devoted exclusively to the printing presses eventually. It runs through to Centre Avenue.

Bad Debt Problems Were Discussed

Retail Merchants of British Columbia Get Together in Annual Convention on the Question of Improving Collection Facilities —Deputation Waits upon Hon. Mr. Bowser.

By Special Wire.

Victoria, B.C., Feb. 10.—The two-day convention of the British Columbia Retail Merchants' Association adjourned this evening after consecutive and spirited sessions. A number of important resolutions were passed, dealing with problems facing the trade.

The convention opened on Monday with a large attendance of retail merchants from all parts of the province, and representatives of all trades. A significant feature was the unanimity shown on many points, all the trades represented displaying a willingness to co-operate to secure better conditions.

Many of the points taken up and debated at greatest length had to do with proposed amendments to the provincial statutes, giving the merchant more adequate protection against the "dead beat." Statistics were introduced which showed that during the year 1912 the money lost by the retail merchants of the Province of British Columbia through bad debts amounted to one million dollars. This staggering total had not been improved upon during 1913, which was a bad year in the matter of collections. The unfairness of laws which permitted so serious a condition to develop was most pointedly brought out.

The present Capias Act fixes the amount at $50 for which a man can be prosecuted. Anyone owing less than that amount cannot be reached effectively. This phase of the question was debated at some length, and the consensus of opinion was that the minimum amount should be changed from $50 to $10.

The Loan, Act, which allows farmers' money at 4 per cent. for co-operative societies, was criticized.

Changes were advocated in the Garnishee Act.

It was thought that there should be provisions making wives jointly responsible for goods sold for maintenance of the household.

In fact the "bad debt" problem bulked very largely in the proceedings, and the greater amount of the time was taken up in discussing the many phases of it. Resolutions covering the points above were carried.

To-day a strong delegation waited upon Attorney-General Bowser and laid the resolutions before him. The speakers gave a strong presentation of their case and showed the extent to which losses from bad debts had grown, demonstrating that it constituted a severe menace to business.

Hon. Mr. Bowser gave attention to the arguments presented and promised that the question would be given full consideration.

A number of routine matters were taken up at the convention, including election of officers and making arrangements for convention next year. The 1915 convention will be at Victoria.

The above brief synopsis of the proceedings at the convention of the British Columbia Retail Merchants' Association held at Victoria on Monday and Tuesday was secured by wire from our editorial representative in the City of Victoria. A complete report is being sent on, giving full particulars and a resume of the discussions. This will appear in next week's issue.—Editor.

Inauguration of the Parcels Post System

For First Time Three Months Weight Limit of 6 Pounds—After Three Months, Limit Will be Increased to Eleven Pounds—Ordinary Stamps Being Used — Additional Charge in Some Districts.

A SOUVENIR mail-bag sent by Postmaster-General Pelletier to the Duke of Connaught inaugurated Canada's Parcels Post system at midnight on Monday. The first deliveries took place Tuesday morning, Feb. 10.

To what extent parcels post will be used is still problematical. For the first three months parcels up to 6 lbs. only will be accepted. After the first three months parcels up to 11 lbs. will be accepted.

Retail hardware merchants will receive a certain amount of protection from the mail order houses by making use of the local zone, which gives him a low rate for twenty miles in each direction from the town in which his store is located.

It will no doubt take some time to get the new system working smoothly.

Mail order houses are already sending out adveritising matter regarding parcels post, and will, no doubt, make a huge effort to boost sales by featuring parcels post.

Retail merchants should begin immediately to make use of the new system, especially the local zone.

Hardware and Metal has published several articles pointing out how the new system could be used.

In the near future a number of articles will appear showing how American hardwarmen have made use of parcels post, and pointing out how Canadian hardwaremen can also use methods that will make the new system work to their advantage.

The accompanying panels show the information that has so far been issued by the Postal Department regarding rates, stickers, etc.

What May Be Sent.

Articles of mail matter acceptable at parcels post rates include farm and factory products, merchandise of all descriptions, such as dry goods, groceries, hardware, confectionery, stationery, blank books, etc., seeds, cuttings, bulbs, roots, bedding plants, scions or grafts, and all other matter not included in the first class, and not excluded from the mails by the general prohibitory regulations with respect to objectionable matter.

CANADA—PARCEL POST
PERISHABLE
HANDLE WITH CARE
This gummed label is to be attached to parcels containing perishable articles, such as meat, fish, butter, fruit, etc., also to the back of the "fragile" tag, which is to be used when articles of a perishable nature are being forwarded.

This label to be used only when sacks contain fragile articles.
CANADA—PARCEL POST
FRAGILE
HANDLE WITH CARE
REMOVE TAG CAREFULLY AND USE AGAIN.
P.P.2 500,000-15|1|14.

Parcels consisting of third-class matter may be mailed at parcel post rates, or third-class matter rate at the option of the sender.

Parcels containing intoxicating liquors or explosives are expressly prohibited.

Sender's Address.

It is desirable that the sender's address should appear either inside the parcel or on the cover, and this must be kept distinct from the address proper.

A parcel may contain invoices and accounts provided they relate exclusively to the contents of such parcel; it is also permitted to enclose a card or slip of directions for the identification or treatment of the article or articles contained in the parcel. Care must be taken not to paper giving in a brief manner necessary abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and addressee, into what might properly be called correspondence. A parcel containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage.

Limit Is Six Pounds.

During the organization period, which includes the months of February, March and April, the limit of weight is six pounds, but after that it will be eleven pounds. In the same period there will be no insurance, but parcels may be registered. In addition to the regular rates of postage an additional fee of five cents, prepaid by postage stamps, is required for each parcel mailed for local delivery in places where the letter carrier system is in operation.

How to Pack Goods.

In the regulations for the parcels post the Postmaster-General has given specific suggestions how the various articles should be packed for safe transit through the mails.

For instance, in regard to eggs, it is recommended that a papier mache, wooden or other box of a rigid material with a tight-fitting lid be used; that each egg be wrapped separately in newspaper or other protecting material and fill up the vacant spaces carefully. In addition, the parcel is to be clearly marked as containing eggs.

Specific regulations are given as to the

(Continued on next page.)

Postal Rates By Parcel Post

	1st lb.	2nd lb.	3rd lb.	4th lb.	5th lb.	6th lb.	7th lb.	8th lb.	9th lb.	10th lb.	11th lb.
Within 20-mile zone	.05	.06	.07	.08	.10	.12	.14	.16	.18	.20	.22

Law effective Feb. 10. 1914.
Weight limit, 11 pounds.
Weight limit first 3 months, 6 pounds.
Size limit, 2 feet 6 in. long; 12 in. wide or deep.

Place this table in your hat—it will come in handy. It shows parcels post rates for each post office in Canada for the 20-mile zone and the provincial zone, and the Ontario rates to other provinces.

Appointment of Western Canada Editor

Chas. W. Byers to be Western Canada Editor of Hardware and Metal—Rapid Growth of the West Necessitates An Addition to Staff of Western Representatives.

THE growth of the Western Canadian provinces has been so rapid, and of such importance, that Hardware and Metal has recognized the necessity of making additions to the western staff. In addition to the present Vancouver and Winnipeg representatives, Hardware and Metal will, from now on, have a Western Canada editor, in the person of Chas. W. Byers, with headquarters in Winnipeg.

Mr. Byers will tour the West in the interests of Hardware and Metal and will keep closely in touch with the western hardware trade studying trade, and market conditions, and problems which confront the western retailer.

The appointment of a Western Canada editor will help to strengthen Hardware and Metal where it is already strong and will demonstrate to our many readers in the West, that Hardware and Metal is not slow to recognize any improved service which can be instituted for the benefit of the readers of this paper.

The steps taken is but another evidence of the determination of Hardware and Metal to make the service given as efficient and thorough as possible. and to uphold the record which it has held for the past twenty-six years.

Chas. W. Byers the western editor of Hardware and Metal is well qualified for the position, as he has had a thorough newspaper and trade paper experience. His work has brought him in close touch with hardware markets in the East, and the experience thus gained will prove invaluable in studying conditions in the West.

Before entering journalism Mr. Byers had a varied experience, all of which has helped him in making a success of his work in connection with trade papers.

Mr. Byers studied engineering under Professor William Robinson at Nottingham University, winning two scholarships there and graduating in 1906.

In June of that year Mr. Byers sailed for the United States, where he obtained his first position with the Sullivan Machinery Co., manufacturers of mining machinery, Claremont, N.H. After seven months in their shop, he was sent to operate their coal cutting machines at Wind Rock, Tennessee. For eight months he worked in and around various mines in the Southern States, and returned north in the winter of 1907 to Cincinnati, Ohio, obtaining a post with Allis-Chalmers & Co., in their electrical shops.

In 1908 he visited his home in England, and, on returing, worked for several months in the shops of the Vermont Farm Machinery Co. at Bellows Falls, Vt. It was while here that the Semet-Solvay Process Co., with whom Mr. Byers had been associated in Ensley, Ala., made him an offer to go to Detroit, there to conduct tests on their coke ovens, with a view to taking charge of a bat-

CHAS. W. BYERS.

tery of new ovens which they were erecting. He accepted the post, and was with the company the greater part of 1909.

As winter approached, a temptation came to enter the journalistic field. Up to this time, Mr. Byers had never seen the editorial sanctum.

He went to Ottawa and secured a position on the Evening Journal. In August 1910 he received an offer to join the staff of the Hamilton Spectator and accepted, remaining with the latter paper until the following year when he went to England for the coronation and returned to Canada just prior to the general elections. Because of his knowledge of the French language he was given a position on the editorial staff of the "Daily Witness," before long being appointed telegraph editor. He later became assistant to the city editor. After spending eighteen months with the "Witness" Mr. Byers joined the editorial staff of the MacLean Publishing Company, on the trade and technical papers with headquarters at the Toronto office.

The western market reports will be enlarged and will come under the supervision of Mr. Byers.

PARCELS POST SYSTEMS.

(Continued from page 54.)

methods in which liquids, oils, or fatty substances must be packed in order to be sent through the mails. Strong wooden or heavy cardboard blocks or tubes are necessary, with a cushion of some absorbent material to take up the liquid in case the container should break. Further, every precaution must be taken to make the block or tube water-tight. Manufacturers or dealers who intend to send such articles in quantities are recommended to submit a sample package to the officials, so that the conditions are seen to be observed.

Further all parcels have to be prepared in such a way that the contents can be easily examined, and the sender's name and address should appear on the cover of the parcel.

Extra Charges.

Note A.—During the organization period, covering the months of February, March and April, 1914, an additional fee of 5 cents, to be prepaid by postage stamps, will be charged on each parcel mailed for local delivery in places where the letter carrier system is in operation.

Note B.—During the months of February, March and April, 1914, no packet will be accepted for transmission by parcel post weighing more than six pounds.

Note C.—An additional charge to meet the extra cost of transportation will be made on parcels addressed to or posted at offices in certain outlying districts when such parcels have to be conveyed more than 100 miles by a continuous stage service, such districts to be designated by the Postmaster-General.

Tags, Labels, Etc.

For fragile articles, an official tag has been provided. For perishable goods, a gummed label of similar design is provided. When the article in a parcel is both fragile and perishable, the label is to be stuck on the back of the tag.

No parcels will be collected for postage. Even the big mail order houses, sending out hundreds of parcels every day, will have to take them over to the post office in their own wagons. All people sending out a large number of bundles at a time are requested to notify the post office authorities, in order that they may be handled without loss of time.

Current News of the Hardware Trade

New Firms.

South Durham, Que.—Z. Blain & Fils, tinsmiths, have registered.

Vancouver, B.C.—McKinnon Heating and Plumbing Co. have registered.

Moose Jaw, Sask.—The Best Hardware Co. has incorporated.

Conquest, Sask.—Mitchell Bros. have commenced their hardware business.

Business Changes.

Imperial, Sask.—C. T. Emde has disposed of his hardware and furniture business.

Teeswater, Ont.—The hardware business of Dick & Son has been sold to Mr. Dormer, of Oshawa.

Expanse, Sask. — The Rotstein Brothers have disposed of their hardware business to W. L. Schulz.

Winnipeg, Man.—The Winnipeg Metal and Heating Co. will in future be known as the Empire Metal and Heating Co.

Wapella, Sask.—The partnership of Kidd and Clements has been dissolved and the firm is being succeeded by Kidd & Clements, Ltd., who are taking over all assets and assuming all liabilities of the former company.

Fire Losses.

Galt, Ont.—The large plant of Shurly, Deitrich, Ltd., saw and bed manufacturers, was destroyed by fire.

Exshaw, Alta.—Fire did considerable damage to stock-house, shipping-house and sack-cleaning department of the Canada Cement Co. Officials of the company state that the fire will not interfere with the company's business, as they have large stocks in No. 2 warehouse at Exshaw, and also at Calgary.

To Open Hardware Business.

Miami, Man.—Jas. A. McIntosh, who has been for several years connected with the business of Watson & George, of Morden, is leaving to go into the hardware business at Kerrobert, Sask.

Appointed Manager.

Guelph, Ont.—J. B. Clay, president of the Canadian Gate Company, left recently for Cedar Falls, after appointing T. S. McCutcheon manager of the business. Mr. McCutcheon has been on the selling staff for the past couple of years, and is well versed in the company's affairs.

Retailers Elect Officers.

Belleville, Feb. 10.—The officers elected by the Retail Merchants' Association for the ensuing year are as follows:—President, F. B. Smith, hardware merchant; first vice-president, H. E. Fairfield; second vice-president, John McFee; secretary, M. H. Mowry; treasurer, Wm. Doyle; committee, Messrs. Jennings, E. Dickens, Lanning, Wallace.

The city assessment for the year is about completed, and shows the population to be 11,803, an increase of 682 over that of last year.

Ontario Incorporations.

Steffens & Noelle Aktiengesellschaft, capitalized at $40,000, to carry on trade in bar-iron, hoop iron, sheets plates, etc.

Beeson Non-Skid Tire Band Co., Ltd., capitalized at $40,000, head office Ford, Ont., to manufacture and deal in auto accessories, non-skid tire bands, etc.

The Beam Bros. Mfg. Co., capitalized at $40,000, to manufacture and deal in threshing machines, boilers, farm implements, etc., with head office in the town of Waterloo, Ont.

The Clauss Shear Co., Ltd., capitalized at $40,000, head office Toronto, Ont., to manufacture and deal in shears, scissors, razors, strops, tinners' snips, manicure articles and all kinds of household cutlery and hardware, etc.

Gibbons, Kemp Co., Ltd., capitalized at $40,000, head office London, Ont., to manufacture and deal in vacuum washers, fuel-saving devices, etc., and to take over the business of the Dominion Specialty Mfg. & Sales Co., London, Ontario.

Dominion Incorporations.

Keeptone Electric Co., Ltd., capitalized at $75,000, head office Hamilton, Ont., to manufacture and deal in autos, boats, motor vehicles, bicycles, engines, motors, etc.

Death of J. H. Fairbank.

J. H. Fairbank, generally known as "The Father of Petrolea," and its leading citizen for the past 45 years, died at his home on February 10, after an extended illness. Mr. Fairbank was actively identified with nearly all Petrolea's leading industries, including the Vantuyl & Fairbank hardware stores in Petrolea and Oil Springs. Mr. Fairbank was one of the first promoters of the oil industry in Petrolea. He was also closely identified with public life, and held many public offices. He represented East Lambton in the Dominion Parliament from 1874 to 1889.

Death of J. W. Thompson.

The death occurred recently, in the General Hospital, Winnipeg, of John W. Thompson, M.P.P., for Minnedosa, Man. The deceased was at one time a hardware merchant at Minnedosa, and was one of the pioneers in the West.

Death of L. D. Sutherland.

Winnipeg, Man. — Llewellyn David Sutherland, sales manager for the Winnipeg branch James Smart Manufacturing Company, died Thursday night at his home, 313 Aubrey Street, at the age of 37. He had been ill two weeks, suffering from heart trouble. Mr. Sutherland was a son of William Sutherland, 434 Spence Street, manager of the Smart Manufacturing Company, and had been a resident of Winnipeg for 11 years. He was born at Ingersoll, Ont., and later lived in Brockville, Ont., and Detroit, Mich., before coming to this city. He was widely known among the hardwaremen of Winnipeg and the western provinces.

Personal Notes.

F. W. Miskelly, hardware dealer, Smith's Falls, paid Toronto a business visit this week.

S. Bonathon, hardware merchant of Newcastle, was a business visitor in Toronto this week.

W. M. Leith, of J. Wiss & Sons, Newark, N.J., was a caller on the Montreal hardware trade during the week.

Mr. Howe, representing the Dover Manufacturing Company, was calling on the Montreal hardware trade during the week.

Alex. H. Purdom, manager Purdom Hardware Co., London, Ont., left early in the week on a business trip to New York.

Mr. Best, a partner in the firm of Campbell & Best, hardware merchants, Peterborough, was a business visitor in Toronto recently.

Mr. Barton and Mr. Fisher, of the Barton & Fisher Hardware Co., Port Arthur, are spending the week in Toronto. They intend visiting Ottawa so as to enable them to attend the convention.

William Miller has discontinued his connection as secretary of the firm of Henry Disston & Sons, Philadelphia, and on February 1 associated himself with the Simonds Mfg. Co., Fitchburg, Mass., and Chicago, Ill. Mr. Miller has had many years' experience in the saw business, having been associated with Henry Disston & Sons for 37 years.

Following is the report prepared by one of the judges, delegated to judge the displays entered in the Annual Christmas Window Contest conducted by Hardware and Metal. It was a difficult matter to award the prizes out of so large a selection of displays of high merit. The judges were men well qualified to undertake the task, and they submitted each display to a close scrutiny. The judges were as follows: T. A. Lytle, retail manager Aikenhead Hardware Co., Toronto, H. H. Black, member of the Executive of the Window Trimmers' Association, T. B. Costain, managing editor MacLean publications and former editor of Hardware and Metal.—Editor.

Awards in Christmas Window Contests

Judges Announce Their Decision—Growing Interest Each Year —Western Canada Well Represented—High Quality Displays Submitted—Several Received Honorable Mention.

THE annual Christmas window contest of Hardware and Metal has been growing of wider interest with each succeeding year, culminating in a truly inspiring contest at the close of the past year. Not only was the number of contestants larger, but the representation from the various provinces was more thorough. The West was particularly well represented, many photographs being submitted by Western trimmers.

An outstanding feature was the very markedly high quality of the displays submitted. Those who have seen the trims sent in year after year, as the writer has done, cannot help but have noticed that the quality of the work has been gradually getting better. Year by year hardware window trimming has advanced. It began on a comparatively low standard and has now attained a stage where it ranks with the best work seen in any other trade.

It is undoubtedly fair to ascribe a share of the credit for this development to Hardware and Metal. The articles which have been given to the trade have helped materially in creating a realization of the importance of window displays as well as educating the display men to do a higher grade of work. For many years Hardware and Metal has reproduced window trims of all kinds of goods. The writer knows of several hardwaremen who have clipped all pictures of windows which have appeared and have filed them away, using them constantly and to good advantage in arranging trims themselves. Finally, the annual Christmas contest had done a great deal to educate the hardware window trimmer; a fact most amply attested by the improvement seen each year in the quality of the displays submitted.

A Difficult Decision.

The awards announced last week were reached with great difficulty. When the judges settled down to the task of selecting the six best trims from the two huge piles of photographs before them, they realized that their task was far from a light one. As the work advanced, this impression deepened. There were so many really splendid windows submitted that to make a fair selection entailed the closet and most exacting scrutiny, the study of detail and the careful analysis of general effect. We feel, however, that the windows finally selected were the best of the lot when passed under the close scrutiny and rigid examination that was found necessary. Our reasons for ranking the prize winners in their respective order will be outlined later.

It should also be explained that the judges faced another very grave difficulty. Many of the best displays were shown on small and indistinct photographs. In several cases it was practically impossible to appraise the worth of a window because the print was too poor to show up the details. In other cases, the photograph was sufficiently clear to demonstrate that the window had been a good one but not good enough to make the display attractive appearing. Would the judges be justified in eliminating contestants whose photographs handicapped them in this way? This question was debated at some length and regretfully the judges felt impelled to rule in the affirmative in a number of cases where the prints were very indistinct. A number of others were considered strongly, however; and one was awarded a prize.

Have Standard Size.

In this connection the judges feel that they have a suggestion which Hardware and Metal might adopt with advantage next time. A standard size might be set for all photographs entered. This would give all contestants a fair chance. It should be possible for each trimmer to get a photo of the proper size as Hardware and Metal offers to pay a sum to all unsuccessful contestants to cover the expense of having the photograph taken.

The Basis of Judging.

The windows were judged on a dual basis. First the appearance of each was considered, its power of attracting attention, of pleasing the passer-by. Second, the selling force of each was appraised. Needless to state the latter consideration bulked larger in the opinion of the judges in the ratio of two-

PRIZE WINNERS IN CHRISTMAS WINDOW CONTEST.

The judges have just announced the prize winners in the Annual Christmas Window Contest of Hardware and Metal. Reproductions of the prize-winning displays, and full information appear in this issue of Hardware and Metal. Following are the prize winners:—

Places of 5,000 and Over.

First Prize.—Fred J. Mills with Mills Hardware Co., Hamilton, Ont.

Second Prize.—Chas. Byford, with Bond Hardware Co., Guelph, Ont.

Third Prize.—C. H. Smith, with J. H. Ashdown Co., Calgary, Alta.

Places Under 5,000.

First Prize.—W. S. Petrie, with D. Leckie, hardware, Kelowna, B.C.

Second Prize.—D. E. Tait, with T. S. Tait & Sons, Campbellford, Ont.

Third Prize.—John F. Bingham, with G. A. Binn's hardware, Newmarket, Ont.

Display by Fred J. Mills, with Mills Hardware Co., Hamilton. Awarded first prize in places over 5,000.

thirds to one-third. By marking on this basis, the judges determined the percentage value of each display.

The appearance of a trim depends largely on the arrangement of the goods, and the decorative effects. As far as the best windows were considered, there was little to choose on this point. They were all attractive and striking to a marked degree, unique arrangements and strikingly original ideas being worked out in each.

In determining the sales force of a window, many factors entered. A good assortment in itself constitutes selling force if the articles are well arranged. In many cases, however, the value of the assortment was practically ruined by the fact that the goods were scattered in a decidedly promiscuous way. Knives would be found in one corner of the window. More knives would be stuck in another corner and perhaps later the eye would perceive still more of them stuck up somewhere on the background. With a trim of this kind it is impossible to look over the complete assortment of any line without looking the whole display over; a serious weakness inasmuch as the average person will refuse to do this.

Another consideration bearing strongly on the question of sales force is the use of price cards. Some of the best displays were quite seriously marred by the total absence of cards of any kind. Others went to the other extreme, putting in cards of such unsual size that the display seemed to be one of cards rather than of hardware goods. The goods were completely subordinated. The best windows had small and neat cards for each article shown.

This rather lengthy prelude will serve to show the lines of examination along which the judges proceeded in seeking to render the fairest verdict possible.

Places Over 5,000.

The selection of photographs submitted in the contest for places over 5,000 was a particularly fine one; and the task of the judges was, therefore, correspondingly hard. After very careful consideration the choice was narrowed down to three—the three which obtained the highest marking on the basis decided upon. It may be stated that there were many other trims which came very close but the judges felt that the three selected had a small but an unmistakable margin.

Then came the task of deciding the order. It was felt that the window of the Mills Hardware Co., Hamilton, deserved a higher rating on both points than the other two and it was, therefore, awarded the first place. A particularly good point was the way in which it had been "built up." Starting with the base of the window, the arrangement progressed upward, giving the display a well filled-in appearance and providing an unusually high order of selling merit as well as presenting a highly artistic appearance. The price cards used were very small and neat. One fault may be pointed out—the over-profusion of the decorative effects at the top. A much simpler setting in this respect would have improved the general effect.

The race for second place ran close between the display of the Bond Hardware Co., Guelph, and that of J. H. Ashdown Co., Calgary. Both were artistically arranged, with elaborate backgrounds, clever decorative effects and unique arrangements of goods. They ranked very high indeed. That of Mr. Smith was as

Display by W. S. Petrie, with D. Leckie, Kelowna, B.C. Awarded first price in places under 5,000.

good as any display submitted in point of general arrangement of goods and decorative effects. In fact, the judges were inclined to believe that it excelled all others by a very small margin in this respect. But it contained no price cards. And this, it was felt, seriously militated against its selling force.

On this point the decision hinged and second place was awarded to Mr. Byford of the Bond Hardware Co.

Places Under 5,000.

It was a merry race also in the contest for places under 5,000.

First place was awarded to W. S. Petrie, of Kelowna, B.C., largely on the undoubted selling force of the display. The large space at the disposal of the trimmer had been filled with comparative sparsity and each article was ticketed with a large card. The cards were really too large, but the lack of crowding in the window overcame this fault to a considerable extent. As it stood, the display had a most unusual degree of selling force and on that quality won the award.

The second prize window, that of T. S. Tait & Sons, Campbellford, Ont., presented many good points with one partial fault. It was "flat," with no attempts at building up whatever. This effect was relieved to some extent, however, by the good use made of the background.

The third prize window, that of G. A. Binns, Newmarket, was one of unusual originality. It contained some features distinctly new as will be seen from the description given later. The photograph did not do the trim justice, but it gave sufficient detail to demonstrate to the judges that this was a display of unusual merit. It was, therefore, given a place in the awards.

HONORABLE MENTION.

The following were given honorable mention in the contest, and will each receive $1.50 *to cover cost of photographing displays:—Jules Gordeau, with J. H. Ashdown Hardware Co., Winnipeg; W. S. Bate, with McLaren Hardware Co., Winnipeg; L. A. Phaneuf, with South Hill Hardware Co., Moose Jaw, Man.; R. H. Thornhill, with the P. Hymmen Co., Ltd., Berlin, Ont.; Chas H. McGibbon, with Peterboro Hardware Co., Peterboro; A. L. Shields, Kincardine, Ont.; H. H. Otton & Sons, Barrie, Ont.; Thos. Houghton, Parkhill, Ont.; J. Sutherland, with the Whitten Co., Bracebridge, Ont.; Jas. A. Craig, with Van Tuyl & Fairbank, Petrolea, Ont.; Ted Robert, with B. Carriere & Fils, Hull, P.Q.*

Letters From Winners.

The following letter is from W. S. Petrie, with D. Leckie, Kelowna, B.C., winner of first prize in places under 5,000:

"For the past few years I have been greatly interested in window dressing, believing as I do that there is no better method of showing wares than in a judicious display artistically and strongly shown.

In arranging my 1913 window, my intention has been to have a closed-in background as you will readily see from photograph described, as follows:

First I made a frame of three rough boards 12 feet long, on which I tacked three pieces of beaverboard 4 ft. by 8 ft., and for the side panel to the right I used one piece 4x8 and a piece 2x8, and same were tacked to the wall; the beaverboard was then tinted with Hall's dis-

"John, this Lantern is a pippin"

The Smith Hardware Store said it was—I bought it and I heartily agree with them because I have never had a lantern that was near as good, and I've paid some mighty big prices too.

What's its advantages!

Why! it gives a 12-candle power, bright white light, and will burn 32 hours continually with one filling.

The globe does not become smoked, or break.

The strongest wind will not blow it out.

It is easy to clean, easy to fill and easy to light.

What's the name of it!

temper a canary color, the front was then paneled with British Columbia fur, stained with S. and W. Belgian oak oil stain, this blending very nicely indeed.

The shields also of beaverboard and covered with dark tan sateen on which were shown as you will notice, silverware.

The decorations were poinsettia vines which you see surrounding the different shields giving the window a gay and festive appearance very suitable to the season.

On the floor I have placed at intervals two small tables covered with pale grey linen centrepieces on which are shown cut glass. In the centre, a pyramid 4 tiers, covered also with dark tan sateen on which are shown carving sets and brass vases.

On either side of small tables I have placed two pedestals on which are two brass fern pots with growing ferns inside. On the floor, covered with dark tan sateen, are numerous carvers, scissor sets, and silverware. Each article shown is distinct from the other which, with the clear marked prices, proved an attractive display for the shopper and a profitable one for our firm."

A letter from Jno. F. Bingham, with G. A. Binns' hardware, Newmarket, Ont., described the novel features of his display as follows:

"The window was a great attraction as we had an electric railway in it running at intervals; also an optical illusion in the little house. It was worked by electric lights flashed on and off and so arranged that when the one light was on, nothing but a doll in bed could be seen, but when the other one came on, Santa was seen standing beside the bed ready to fill the stocking."

A letter from Chas. F. Byford, with the Bond Hardware Co., Guelph, Ont., one of the winners, described his display as follows:

"In this window, as will be seen, lattice work was used to good advantage, that at the top of window near the glass was painted a flat white and that at the background, white and gold; all had the imitation holly entwined.

The round white pillars with the capital's white and gold, stood out prominently against the olive green sateen curtains.

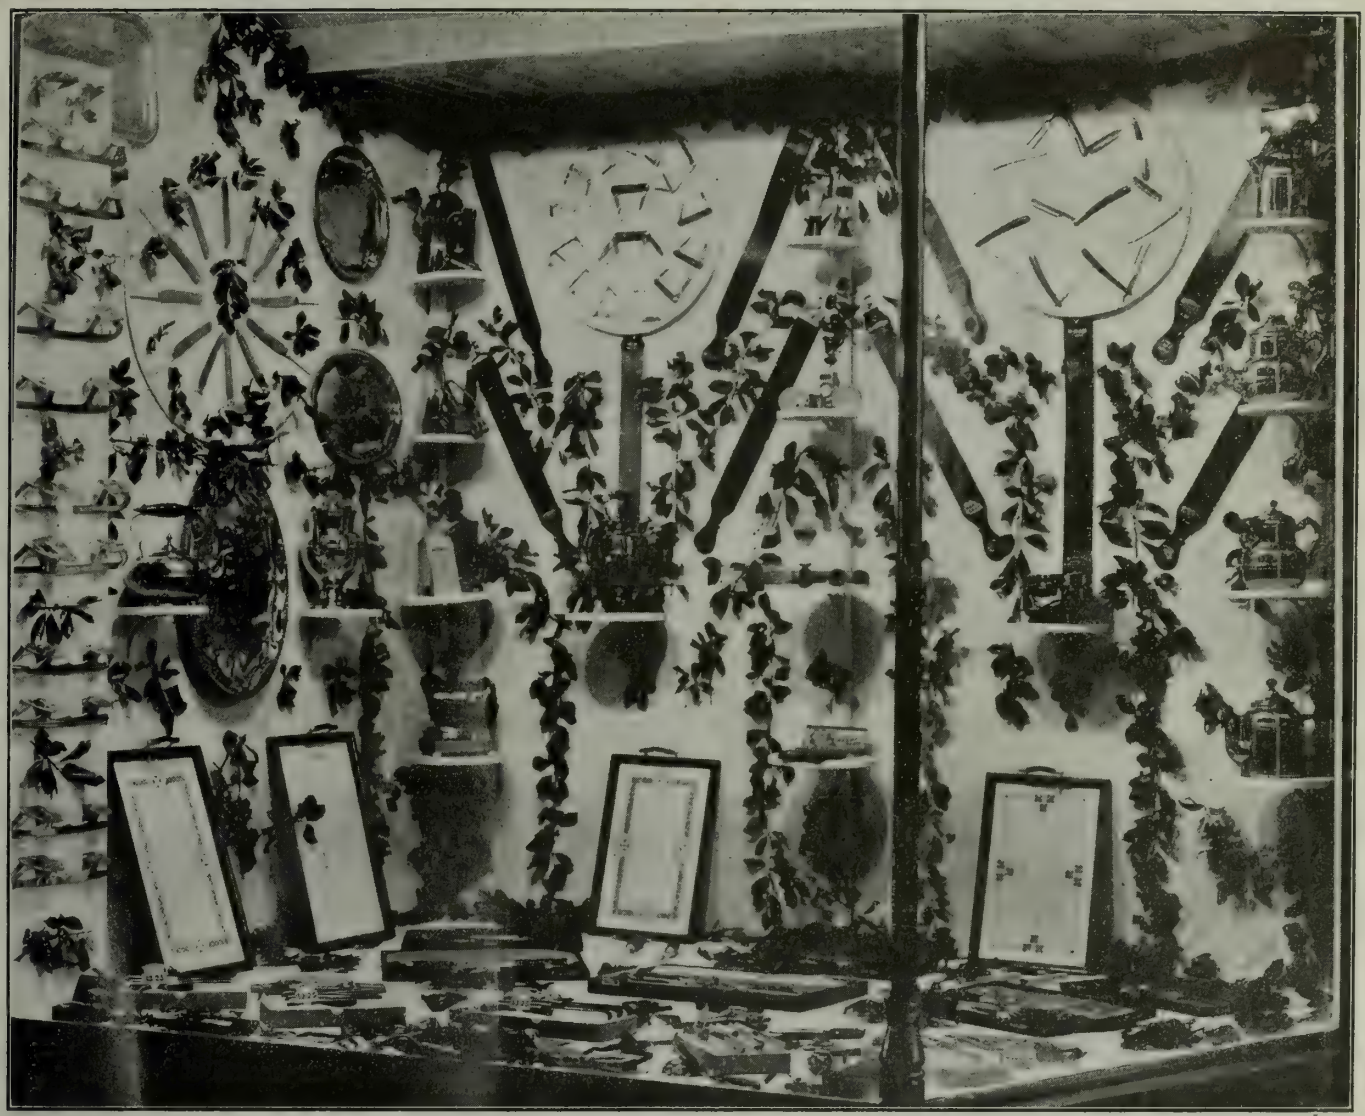
On the floor, three sets of steps were arranged in circular shape, this was done with empty wood cartridge boxes which are all one size and I find very useful for this particular part of the work.

White cheese cloth was used for covering the floor, the edges of the steps were trimmed with holly leaves.

An arch fastened on the two centre pillars covered with real holly sprays, under which was hung a wreath with a dove, holding in its beak a piece of white ribbon with Christmas Greetings in gold letters on it.

The use of palms and some sprays of yellow chrysanthemums added taste. Silverware was shown chiefly in this window, together with some cased cutlery and each article was priced with a neat card.

The corner window was made up of brass goods, nickel ware, safety razor,, shaving outfits and other articles suitable for Xmas gifts. This display went a long way towards helping to break last year's record for Xmas trade."



The names of those receiving honorable mention appear in the accompanying panel.

THE TRADE OUTLOOK.

The following article from the Steel and Metal Digest on the business outlook will no doubt interest those interested in the steel and metal trades:—

The past month will be a marked one in the annals of modern business history, and will often be referred to by writers on economic subjects, as the period, when after the year of "the panic that never came," a sudden change took place from acute pessimism to confident optimism, and when all the fears and uncertainties of a twelve-month disappeared like the sudden lifting of a fog.

The old adage that it is darkest before dawn was fully confirmed when December, 1913, is compared with January, 1914. The uncertainties and fears that tried the souls and courage of business the world over, found all business dispirited and depressed at the close of the year, and in our country we were in the midst of the most sensational curtailment of operations that had ever taken place in history, outside of times of panic or war. Our basic industry, the iron and steel trade, had collapsed from full operations of three months before, to about 40 per cent. of normal. It was rare to find a hopeful view expressed regarding the early months of the new year. Stress was laid on the losses caused by the Balkan war that would take time to restore, that money must continue tight all through 1914 until new wealth was supplied by the crops, that too much of the wealth of the world was invested in en-

Display by D. E. Tait, with T. S. Tait & Sons, Campbellford, Ont. Awarded second prize in places under 5,000

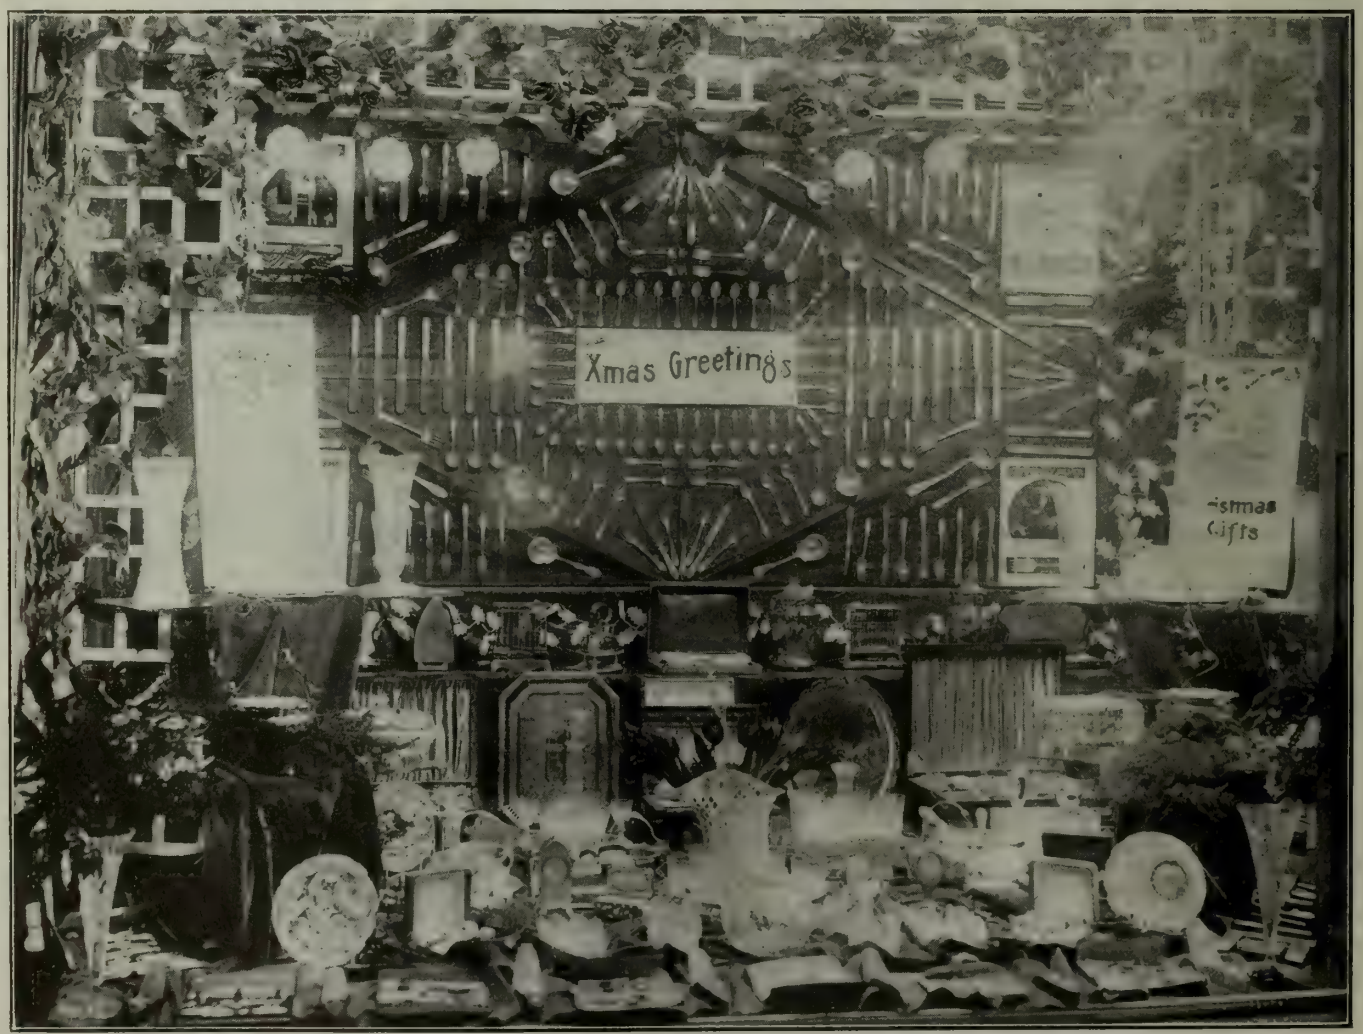
terprises and improvements that must remain unproductive for years, leaving not enough fluid money to handle properly and with ease the business of the world. That in the United States a revolution had taken place in the tariff and fiscal affairs of the country, which even if a benefit eventually would take some time to try out; that socialistic experiments and business regulations by the Government would continue to create distrust of capital and business; that the extravagance of both the individual and Government, civic and federal, the disproportion between wages and return from capital, and many other unfavorable features, too well known to require repetition, would all mitigate against any improvement in business.

We took occasion to examine these fears, and while acknowledging the facts on which they were founded, drew attention to the peculiar circumstances that accompanied them and gave our reason for reaching a conclusion that there were fundamental conditions which would be more powerful for a return to normal conditions, than those which apparently were causing such an acute state of apprehension in business. It required, however, some courage to write our closing sentence last month when we said, "we predict a growing expansion from now on, with trade in full swing before midsummer."

A Great Change.

A remarkable and sudden wave of optimism has since swept over Europe and America. The losses of the Balkan war are forgotten. Instead of not enough money, there has been a glut of funds with interest rates being reduced every day. The tariff and fiscal changes have become regarded as blessings and potent aids to business expansion. The Government has made peace with business and little fears are felt of the alliance being disrupted. High costs of living are quoted now as signs of individual ability to demand and pay for the conveniences, and what were years ago luxuries, but which are now the necessities of life. One hears little of wage reductions, and a great deal of profit sharing between the employer and his workmen.

In a word, confidence has been restored. The wheels of business are daily increasing in their revolutions. The procession of business has made a start to march onward, and we confidently believe our other prediction will be confirmed, "trade in full swing by midsummer."



No Miracles Occur in Business.

Judging, however, by the attitude of some, especially in speculating circles, one would think a sudden miracle had occurred in business, and that from abnormal times we had suddenly jumped into perfectly normal conditions. But no miracles occur in business. Sentiment can change in a day, actual business developments proceed from fundamental causes, which although they can often be discerned in advance are slow in their actual operations. We think it will be true in this case, and that in

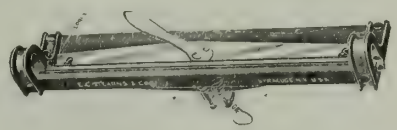
New Goods Offered Canadian Hardwaremen

STEVENS LINE LEVEL.

Frank. E. Corey, Newton Falls, Ohio, is offering the trade the "Stevens Line Level" here illustrated. The level, which weighs ½ ounce, consists of an accurate, proved level glass placed in a three inch aluminum tube with "spring German silver" end pieces and hooks formed from one piece of metal. The end pieces are attached to the tube by German silver rivets that pass through the tube and through lugs at top and bottom between the hooks and the centre of the level, thus preventing the hooks from pulling out of alignment in case of severe strain or rough usage.

The level can be carried in the vest pocket and the makers claim the levels can be used for ditching, sewering, laying drain tile, stone, brick and cement



Stevens' Line Level.

walls, carpenter work, grading of all kinds, for use in mines and in erecting shafting and setting machinery.

By placing the level on the line at the centre where the deflection is equal towards both ends, the end points can be brought absolutely level regardless of how taut the line may be pulled. This method is advised in laying out foundations, proving walls, lining up shafting hangers and machinery and on all work where great accuracy is desired. For sewering, laying drain tyle, irrigation ditches and electrical conduits, where the grade is laid out in short sections, the level can be used near the end of the line, the fall estimated for five or ten-foot sections, the line leveled and the grade estimated by measuring below the line with a rule at the end of each section. The accuracy of this method will depend on how taut the line is pulled.

STEARNS SAW VISE.

E. C. Stearns & Co., Syracuse, N.Y., are offering to the trade the new folding steel saw vise here illustrated. It is made of sheet and channel steel, finished in black japan baked on. Parts not japanned are nickel plated. The black jaw is faced with rubber which prevents vibration and makes the filing of saws practically noiseless. The lever is below the top of the vise on the back jaw and

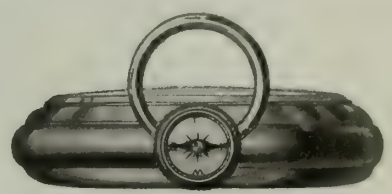
Stearns Saw Vise.

is therefore entirely out of the way. Dimensions: length over all, 12 inches; length of jaw, 10½ inches; width, 2¾ inches. Weight, 2 lbs., 10¾ ounces each. Packed one-twelfth dozen in a pasteboard box, two dozen in a case.

SAFETY FIRST.

The new industrial slogan, "Safety First" has been utilized for advertising purposes by the L. S. Starrett Co. in a unique manner. They have had prepared celluloid buttons bearing the solid red circular sign of the Safety First movement above which are the words, "Safety First," while under the emblem are the words, "Then Starrett Tools." The idea is that the first thing should be safety—then accuracy—and as they claim, Starrett Tools stand for accuracy.

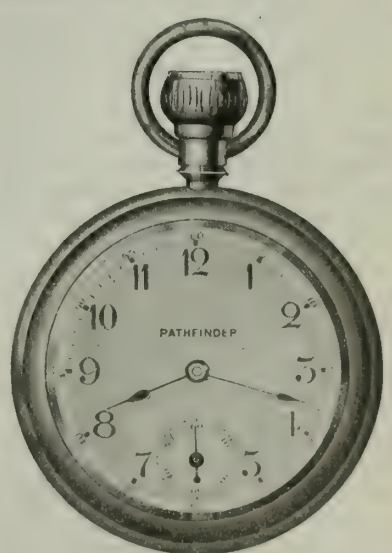
Button issued by L. S. Starrett Co.



These buttons are supplied to hardware dealers for distribution to mechanics; or to manufacturers for direct use by their men.

COMBINATION WATCH AND MARINERS' COMPASS.

The E. Ingraham Co., Bristol, Conn., are offering the trade a new combination watch and mariners' compass which it is said will retail in Canada at $1.25. The new watch, called the "Pathfinder" is a 14 size thin model, German silver, nickel-plated case, open face, Arabic dial, with red minute numerals around the outer margin, "pull out" stem set.



The unique location of the compass in a recess formed in the top of the watch crown, obviates the necessity for increasing the thickness of the case or distorting the appearance of the watch to accommodate the compass, and at the same time the compass is far enough removed from the steel parts of the movement, to prevent its being deflected thereby.

The movement is constructed on the most advanced lines known to the science of horology for the production of popular-priced watches, the company states. Among the superior features embodied in

Compass set in recess in top of watch crown.

its construction are, a patent lever double roller escapement, solid cut and polished steel pinions, hardened balance roller and staff, with polished bearing points fitting into specially hardened and polished steel bearings. The tangent rocking bar mechanism is said to be new and unique, specially designed to obviate the trouble known as "sticky setting." The patent recoil ratchet prevents the main spring from "setting" after the watch is wound up. No screws are used

Combination watch and compass.

in fastening the movement into the case, the locking device being simple and perfect.

D. A. Cuke, Secretary Oak Lake Fire Brigade, Oak Lake, Man.—Would be very much obliged if you would give me the address of the Wagnor Ladder Co., also names of a few manufacturers of firemen's scaling ladders.

The Wagnor Ladder Co. was located in London, Ont. We understand they are now out of business. Any of the following firms supply firemen's ladders: W. E. Seagrave & Co., Walkerville, Ont.; A. Jennings & Co., 19 Wellington street, Montreal; John Watson & Son, Wellington street, Montreal; The Hugh C. Cameron Co., Toronto, are agents for several of these lines, we believe.—Ed.

Twenty Years Ago
In the Hardware Trade

The following items were taken from Hardware and Metal of February 17, 1894.

"The fortieth annual dinner of Caverhill, Learmont & Co., Montreal, was held Friday night at the Balmoral Hotel."

Editor's Note.—Caverhill, Learmont and Co. are still doing business in Montreal, and are well known among Canadian hardware firms.

* * *

"M. E. Britton, of Cowan & Britton, was in the city this week."

Editor's Note.—C. E. Britton is still associated with Cowan & Britton, of Gananoque. At the recent dinner tendered the Canadian hardware manufacturers by the Steel Co. of Canada at Hamilton, Mr. Britton gave some very

(Continued on page 69.)

Cut of champion hockey team of Caverhill, Learmont as it appeared in Hardware & Metal twenty years ago. Names are: Top row—T. Newman, G. McGowan, A. MacFarlane, H. Douglass. Middle row—L. J. Labelle, J. Davidson (capt.), A. Bain, G. A. Jordan. See item in Twenty Years Ago.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Business during the past week has been rather quiet with the hardware jobbers. The severe cold snap has had a bad effect on the sale of some lines and has stimulated others. In the metal market the optimistic feeling exhibited last week still remains, and although the volume of business passing is not large, there undoubtedly is an improvement in this line of trade. Paint jobbers and manufacturers report a fair amount of business passing, and orders for future are very satisfactory. Collections during last month were fair.

Conditions are improving, although the process is slow. Reports from the West indicate that the trade in general is looking forward to a big improvement in business with the opening of spring.

MONTREAL.

MONTREAL, Feb. 11.—As stated last week, the local market is devoid of interest, and this week has seen no change. Seasonable lines, such as hockey skates, ash sifters, etc., have slackened up in demand, and it is the opinion of many of the local jobbers that retailers are satisfied to clean out their present stocks before ordering again, although it is said that these are very low at this time. Hockey sticks, snow shoes, and all sporting goods are still receiving quite a lot of attention, although the demand has fallen off here to quite a marked degree. This last week has seen quite a falling off in trade for some of the local houses, and business is claimed to be much slower than in previous weeks. However, there is no doubt that this is only a temporary stop, as spring lines will soon be moving. Quite a number of orders have been received for the latter, and it is not expected to take very long to have all these lines receiving their usual demand. There has been a little movement in guns during the week, and ammunition has also figured in the demand. This is a little early for these articles, but local dealers are of the opinion that it is only the start of a big season.

Although the orders that are being received at the present time are mostly of a sorting nature, these seems to be a tendency to lean toward the spring lines, and, although there is not what might be termed a demand for these lines at present, it is starting in.

There is also quite a demand from the lumber camps for their supplies, which consist mostly of axes, axe handles, boot calks, cant hooks and coil chain.

The supplies which are going out for use in the maple industry are also quite heavy, and quite a number of sap spouts, bits and pails have gone forward during the week.

The demand from the city merchants has not yet started, and the bulk of the business passing at present is coming from the country merchants. Travelers throughout the country report a very confident feeling amongst the retail trade, and conditions seem to be fast rounding into shape. The confidence placed in the future by these dealers is certainly helping matters along greatly. We must say, though, that there is no complaint as regards collections. Although there are some slow accounts on the books, taking them on the whole there is little room for complaint. Conditions seem to be about normal in this particular branch of the business.

There has been a general reduction in wringers this week, and the new quotations are as follows:—

One-year grade, 2.25 off list, per dozen.
Three-year grade, 3.00 off list, per dozen.
Five-year grade, 3.75 off list, per dozen.

Apart from this change, there does not seem to have been any other reduction or increase in the quotations of one week ago.

In the metal market for the week we might report a general feeling of firmness. Although most of the lines show a tendency to fluctuate more or less, the figures quoted this week are much the same as those of one week ago, with the demand practically unchanged.

Tin.

The market this week reports quotations from London £184 5s. for spots, while futures are quoted £185 10s. These figures show a decrease of £3 5s. and £3 respectively. Although there has been a falling off in the quotations, there does not seem to be any uneasiness in the market, and holders seem to be quite firm in their opinions that the market will show improvement from now on. It might be well to quote Morrison, Kekewich & Co., London, in this connection:—

"American consumers have been more active, and an increasing demand from this quarter is anticipated during the next few months.

"This month's statistics, due on Monday, are now expected to show more favorably, owing to reduced estimates of Straits shipments. Without being unduly optimistic, we look for steady improvement in the near future statistical position, which we think will enable those in control to raise prices to a higher level."

The New York prices have also fallen off to some extent, and spots are quoted at $40.75, while futures are $41.00. That market is reported to be quiet, with very little interest shown by consumers; the jobbing trade is also reported as being quiet. Locally, conditions are much the same as last week, when we reported a firmness, with a seasonable demand in evidence.

Spelter.

The quotations this week are practically unchanged from those of one week ago. London is quoting £21 7s. 6d., or the same as that of one week ago, while the New York price of $5.30 is 2½ cents under last week. The demand is practically unchanged from one week ago, with a firm market reported. Locally there is neither change in the demand or price.

Lead.

The local quotation of $5.75 has been reduced 25 cents, and is now $5.50. The market is easy and the demand light, although seasonable. London quotation to-day is £19 10s., or a reduction of 10 shillings from last week, while the New York quotation of $3.97½ is 10 cents under that of last week. This market is reported as being steady at these figures.

Copper.

The situation locally is unchanged from one week ago, with the same price and demand in effect. London quotes £65 15s. for spots, while futures are £66 5s., or a decrease of 17s. 9d. and 15s. respectively. New York quotes $14.55, or 5 cents less than one week ago. This market is also reported to be quite steady at these figures.

Antimony.

There is no change in the situation here, and both the demand and price are unchanged from one week ago.

Iron.

There is no change to report in this market this week, as local conditions remain the same as one week ago. London quotation, however, shows a slight decrease from one week ago, and is quoted 2d. less, or £2 11s. 7d. Reports from the New York market would lead one to think that there was more or less of a falling off in business during the past few days, and it is not thought that this

will change for a while, as the recent heavy buying has fairly well covered up the consumers.

In the stove and heating business there is nothing to report other than the usual demand for repair parts. The bulk of this business is over for the season, and manufacturers are now looking forward to the gas stove business, which will start in very shortly. This particular branch of the stove business is making great headway lately, as mostly all modern houses are replacing the old range for an up-to-date gas stove.

TORONTO.

TORONTO, Feb. 12. — The general situation in the metal markets is undoubtedly better, although the volume of business passing is not large. There is a slight improvement in orders which appear to be more numerous. During the past week there has been a slight cessation in speculating in tin and quotations have gone down ¼ cent per pound. Tin is considered fairly low at present quotations and there is a feeling that higher prices will shortly prevail. Copper is unchanged and quotations are the same as last week. Pig iron remains unchanged and the market is in a rather unsettled condition. There is a slightly better demand for spelter, the market is steady and unchanged. Lead remains unchanged.

Metal Quotations.

Toronto quotations on metals are as follows:—

Electrotypers' solder	30c	lb.
Brazing metal	26c	lb.
Ingot brass, red	14 to 16c	lb.
Ingot brass, yellow	13 to 15c	lb.
Wire solder	27½ to 29½c	lb.
Wiping solder	24 to 27c	lb.
½ and ½ solder	25 to 27c	lb.
Pattern aluminum	23 to 24c	lb.
Ingot aluminum 99% pure	19½ to 20½c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	15¾ to 17¼c	lb.
Tin	42½ to 45c	lb.
Lead	$5.65 to $5.85	
Tinkers' bar solder	28 to 29c	lb.

Quotations are gauged according to quantity purchased.

Hardware.

Business with hardware jobbers is seasonably quiet. Booking for spring is heavy. There is an improvement in the demand for lumbering supplies. Logging chains are quoted as follows:—5-16 in. x 14 ft., 85 cents each; ⅜ in. x 14 ft., $1 each.

Cement, Etc.

It is reported by manufacturers of cement that the demand is good for this season of the year, caused to a great extent by the open weather and the fact that users of cement are beginning to use more during the winter months.

Rope and Twine.

Business in rope and twine is seasonably quiet. 1914 quotations on binder twine will be issued this month. Rope remains as follows:—

Pure Manila rope	15c	base
British Manila rope	11c	base
African hemp	11c	base
Sisal	10½c	base
Lath yarn, single	9¾c	lb.
Lath yarn, double	10¼c	lb

Iron Pipe.

Iron pipe is in fair demand for this season of the year and is quoted at prices shown in current market quotations.

Waste.

There is a fair and steady demand for cotton waste at the following prices:

White Waste XXX Extra	11c	lb.
White Waste X Grand	10½c	"
White Waste XLCR	9¾c	"
X Empire	8¾c	"
X Press	7¾c	"
Colored Waste Fancy	7¾c	"
Colored Waste Lion	7c	"
Colored Waste Standard	6¼c	"
Colored Waste Popular	5½c	"
Colored Waste Keen	5c	"
Washer Wipers Mixed White	8½c	"
Washer Wipers Light Colored	7c	"
Dark Colored	5½c	"

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Electrotypers' Solder	30c	lb.
Brazing Metal	26c	lb.
Ingot Brass, red	14 to 16c	lb.
Ingot Brass, yellow	13 to 15c	lb.
Wire Solder	27½ to 29½c	lb.
Wiping Solder	24 to 27c	lb.
½ and ½ Solder	25 to 27c	lb.
Pattern Aluminum	23 to 24c	lb.
Ingot Aluminum 99% pure	19½ to 20½c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	15¾ to 17¼c	lb.
Tin	43 to 45c	lb.
Lead	$5.65 to $5.85	
Tinkers' Bar Solder	28 to 29c	lb.

WINNIPEG.

Winnipeg, Feb. 11.—Building permits now aggregate for the year 1914, $684,650, and will easily run over the $1,000,000 before the end of the month. It would seem then that building activity in Winnipeg during the current year will easily surpass 1913. It is of some interest to note that by far the greater proportion of permits filed from day to day are for small residences.

In the wholesale hardware trade forty below zero weather is realizing zero business, and at present there is nothing doing or in other words trade is quiet.

Collections during January were fairly satisfactory, averaging better than during January, 1913, though hardly up to expectations.

The Arctic weather of the past week has led to some selling of stoves, but this movement naturally at this date can not be considered of much importance. Stove dealers are, however, looking for a heavy immigration, and the placing of a large number of light cookers early in the season. As a matter of fact the advance guard of the immigrant army is already arriving.

In paints and oils seasonable quietness prevails, and travelers are content to book a few sorting orders and lay out lines for spring business Some heavy orders for spring have been already booked, and there is a good outlook for paints and window glass, and generally for kindred supplies.

In metals no changes are reported that have not been already recorded in these columns. There is much local interest in copper, which, according to Wall street is likely to go higher. At present business in structural steel and kindred lines is very quiet, but prospects are good.

A live window is always symbolic of a live dealer. And we may as well say it, for we believe it, a dead window is usually synonymous with a dead dealer. The old saw about not being able to tell how far a frog can jump by measuring his legs, may be all right, but that applies to a frog. The show window and the newspaper columns are the business legs of the hardware dealer, and we can almost tell how far he is jumping by taking a peek at the advertising and the nature of his window trims.

BUSINESS OUTLOOK.

(Continued from page 64.)

some directions we are getting ahead of the real actual trade procession, and if so will have to go more slowly than we have in the past three weeks, if not we must retrace some of our steps later on.

There is no need for disappointment if the late wave of optimism having spent itself, seems to recede. It will be followed by another one that will put us further up on the shore of business recovery.

Our plea is for conservatism in our views of the future. A great deal is present to make our recovery slow, but that it will be sure we are certain.

Outlook Justifies Confidence But Conservatism.

There yet remains to be secured a restoration of the disturbed relation of cost of operation of our railroads to the amount of revenue (freight rates) that they are to be permitted to obtain. There is the risk that our legislators at Washington may be encouraged by the way the vitality and strength of business has survived the surgical operations to which it has been subjected, to indulge in other experiments, the outcome of which may be less satisfactory. The present ease of money has been caused by the release of capital which was previously withdrawn by the lack of confidence of its possessors, and be it remembered, by business being at under 75% of normal. The way it is being snatched up by the flotation of large civic and Government loans, is not promising for future ease when business is restored to full operations. Until with a new harvest, new wealth is supplied, we must be content not to increase our speed too rapidly. We pleaded for confidence; it is here. Our plea is now for continued confidence, but mixed with it sound and careful conservatism. The morning of our business revival has begun, but some months are before us before it will be full midday.

RETAIL MERCHANTS' BANQUET.

At the annual banquet of the Trenton merchants, held recently, the following interesting subjects were discussed:—

Co-operation Legislation.
Tax on Mail Order Houses.
Bulk Sales Bill.
Railway, Freight Cartage Charges.
Inspection of Scales and Measures.
To Make False Advertising Criminal.
Workmen's Compensation Act.
Business Assessment.
Credit Reportings.

These are subjects which could be taken up by merchants in other towns at their meetings.

LETTERS TO THE EDITOR

The accompanying letter has been received by Hardware and Metal from a Canadian Wholesale Hardware Firm, and refers to the amendments to the Scales and Measures Regulations, published in recent issues of Hardware and Metal. The letter is here appended:—

"The Commissioner of Weights and Measures, we understand, has ruled that no more Spring Balances or Household Scales may be imported into Canada or manufactured in Canada, claiming as a reason the inaccuracy of spring scales. We do not agree at all in this opinion as to the accuracy of the scales, but in any event the cheap Household or Family Scales, which are in general use throughout the United States and Canada, are not intended for trade purposes. They are intended for family use in cooking, canning and in checking purchase of household supplies.

The Commissioner is presumably sincere in his desire to enforce the use of correct weights and measures by the shopkeepers, and we are heartily in accord with this purpose. We beg to submit, however, that in order to bring about this result the Commissioner can have no more effective assistance than the placing in every household one of these cheap, popular Family Scales. If the householder can be induced to weigh and measure his purchases he will very quickly detect any short weights or measures on the part of the shopkeeper, and the cheap, accurate Family Scales make it very easy for the householder to do this.

Furthermore, in view of the New Parcel Post regulations, it is very desirable that there be a cheap, accurate scale in every home. Otherwise the efficiency of the new law will be greatly interfered with by making it necessary for a large majority of the parcels to be brought down to the post-office to be weighed."

TWENTY YEARS AGO.

(Continued from page 66.)

interesting reminiscences of the early development of Canada.

* * *

Some business is expected from visitors to the annual bonspiel now on.

"It is not often that a commercial traveller is fortunate enough to fall heir to a fortune that will enable him to forsake the road, but such has been the lot of H. P. Heming, who represented H. S. Howland, Sons, & Co., of Toronto, in the north and north-west. George W. Rogers has taken Mr. Heming's place, and his friends are hoping that he will meet with as good luck therein as his predecessor."

Editor's Note.—Fortune has also smiled on Geo. W. Rogers, he is now in the hardware business in Perth, Ont.

* * *

"The hockey team of Caverhill-Learmont Co. has won the championship, and are now champions of the trade. The accompanying illustration shows the players in the winning team."

Editor's Note.—We have reproduced the illustration as it appeared in Hardware and Metal twenty years ago. Several of the former hockeyists are well known among the hardware trade. F. Newman, manager Canadian Fairbanks-Morse Co., Toronto branch; G. McGowan is still with Caverhill, Learmont & Co.; L. J. Labelle is still with Caverhill, Learmont & Co.; J. Davidson, secretary-treasurer Windsor Hotel, Montreal; A. Bain is located in British Columbia; G. A. Jordan is associated with Tooke Bros., Montreal; A. MacFarlane with A. MacFarlane & Co., Montreal, Que.

To be a good salesman, a man must have a pleasing appearance, have the patience of a Job, be a judge of human nature, know his stock from A to Z, know when he has said enough, and, above all things, a salesman who would be termed a success must tell the truth about the goods he is offering for sale.

"Persistency is a big factor in the collecting game as well as a faculty of diversifying your mode of attack. The much flaunted "psychological moment" can be applied in collecting accounts better than any other one place. In other words the time to get money from a debtor is when he has money.

The Nub of the "Co-operation" Problem

The Only Way to Co-operation is to Co-operate—Experiences of American Paint Dealer and Painter—Team Work is Essential.

WE have long had in mind this "Dealer and Painter Co-operation" number of the "A. P. O. D." We knew the need for co-operation — every paint man has known it—and we knew the difficulties, which are also well known. But it was not until we actually dug deep into the experience of the trade, the individual experience, that the apparent hopelessness of co-operation's cause in a vast majority of the smaller communities and painter men. While the sickness is of such proportions that it might almost be called a plague, the treatment must be individual. The prescription must be concocted to fit each patient—and the patient is any community where dealer-painter co-operation is now unknown.

The dealer cannot solve the problem by entering the painting and contracting business in competition with the painter. Nor can the painter help himself or the cause by taking up paint merchandising and the painter have a common goal. This they now have—a desire to see more good paint used, and used right. Then each must realize that the attainment of that goal is worth some small individual sacrifices. That is essential in all team-work. And lastly, each must believe so thoroughly in his mission that he is ready to put his shoulder to the common wheel, and keep it there.

members of branches of the trade that should remain separate and independent, though harmonious and helpful to each other.

It may sound a bit ridiculous to say that the only way to co-operation is to co-operate. But that's the truth. The essentials of working together, of team work, are simple. "In union there is strength" is a trite but a trusty aphorism.

First, it is necessary that the dealer dawned upon us. Actual conditions in hundreds of towns are expressed by these letters: —

These letters were received in the same mail, one from Ohio and one from Iowa. They came in reply to inquiries regarding the condition of the good ship "Co-operation." What do they show?

No, there's no evidence of a leaky hull, nor lost rigging, nor missing rudder. Snap judgment might say that for all practical purposes the ship had sunk—but it is not so. There's nothing the matter with the vessel. She's built right. The trouble lies with the man at the helm —not with a person but with personalities. The dealer and the painter believe that the one will sell more paint, and that the other will spread more paint, if they work together. They are right. But for one reason or another, because they are "humans" with the incidental frailties of mankind, the two cannot get together on a simple working basis.

Therein lies the nub of the problem. No single pill can be prescribed that will cure the malady known as "antagonism" for the entire fraternity of paint men in competition with the regular dealer. The overwhelming sentiment among dealers and painters, as well as among manufacturers and jobbers and their salesmen, is against the furthering of such makeshift encroachments upon each other, as

The accompanying article appeared in a recent issue of the American Paint and Oil Dealer. It points out some of the difficulties which have to be overcome in order to successfully promote co-operation between the painter and the paint dealer, and gives instances of actual experiences. The co-operation problem is one which confronts Canadian dealers as well, and as the subject has been featured in previous issues of Hardware and Metal, the accompanying article will no doubt prove interesting to our readers.

Paint no longer is regarded as a luxury—or at least it is considered as such by only a very small percentage of our people. It has taken its place as one of the necessaries of our modern civilization. In fact, paint is an indication of civilization. We do not see wretchedness in all its bald repugnance where the paint brush has been vigorously wielded. Well painted houses convey to the minds of those who see them the notion that those within are intelligent and reasonably prosperous—that they have caught the spirit of the twentieth century, which is that this life is more than a mere existence, and that man is not a human mollusc.

Read This From a Paint Dealer and This From a Master Painter

I feel utterly unequal to the task of writing even a brief letter (for publication) upon this subject, as we have found the average painter so irresponsible a proposition that we have feared to even court his favors—preferring to sell what we could in spite of him, rather than let down the bars to a losing game by counting too fondly upon his aid in disposing of our wares.

Of course, there are exceptions, usually among a class that don't care to contract their work. When we are so fortunate as to encounter one that we regard as really straight or one that we feel will not be disposed to expect a $10 or $15 credit on the strength of the first $5 worth of paint sold by our joint efforts—we do our best to interest him from the standpoint of merit, just as we do an ordinary consumer.

I certainly believe in co-operation. I've heard it preached all my life—I've tried to practise it—but I have made up my mind that I'll have to wait till every Paint Dealer in this town dies before I see it worked into a reality.

Painting is an honorable trade which borders on art. Efficiency is attained only after years of study and experience. The best paint can be ruined, so far as its service goes, in the hands of an amateur. And yet read this typical catch-line from the ad of a local Paint Dealer:

"Say Good-Bye to the Painter—You can spread our paint yourself and save money."

No, co-operation with the Paint Dealers here is out of the question.

Dining Room Finished with Lin-Una Burlap.

LIN-UNA BURLAP

Made Well—Sells Well

This ideal wall covering, suitable for dadoes, panelling, and all-over effects in halls, staircase, dining room, living room or den—used extensively in theatres, public halls and hospitals.

Lin-Una Burlaps have a special backing which cause them to adhere when pasted to the wall. They are shrunk in the manufacture and will not shrink on the wall; are dyed with non-fading colors; and form a decorative material unsurpassed at any price.

See that you stock Lin-Una.

BERRY BROTHERS' VARNISHES

For longest wear and easiest care, recommend Berry Brothers' Varnishes for your customers' floors, woodwork and exposed outside surfaces. They protect the wood perfectly—they keep it looking bright and handsome—make the work of cleaning easier, therefore less expensive.

Berry Brothers' products have stood for 56 years as the *standard* of high-grade varnishes. They are the result of careful, scientific manufacturing methods, so they give lasting satisfaction.

There's a Berry Brothers varnish for every need. The following principal products are best known and most widely used in ordinary finishing or refinishing work:

Liquid Granite—A floor varnish whose name suggests its wonderful durability.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Wood Finish—For the finest rubbed (dull) or polished finish on interior woodwork.

Luxeberry Spar Varnish—(It's waterproof)—widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

If you do not handle Berry Brothers' Varnishes, write us direct for information.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, Feb. 11.—The business which has been featuring the local market for the past few weeks still keeps up and future delivery orders are coming in. Retailers seem to be buying more freely this year, and apparently look for a big year in the paint department. The amount of business passing for immediate deliveries is quite seasonable, although light. Collections are reported as being quite normal and conditions improving all along the line, especially so in the country.

White Lead.

There is no change in the market this week, and the same strong feeling prevails. The pig market has dropped a few points since our last issue, but, as the local quotations did not change when that market was climbing, it is not likely that there will be any change in local quotations unless the pig market keeps on going down for some time to come. The following quotations are still in effect:—

Dry White ..... 7 cents.
Lead in Oil—
5-ton lots $7.75
1-ton lots 8.05
Less than 1 ton 8.25

Linseed Oil.

This market is still quite firm, with the same prices in effect. The demand is very good for this season, and in the opinion of some local dealers dearer oil might come.

Raw Oil—
1 to 4 barrels ..... 60c per gal.
5 to 9 barrels..... 59c per gal.
10 to 25 barrels..... 58c per gal.
Boiled Oil—
1 to 4 barrels..... 63c per gal.
5 to 9 barrels..... 62c per gal.
10 to 25 barrels..... 61c per gal.
With open prices for carload lots.

Prepared Paints.

As stated above, the demand is practically made up of future bookings for spring trade. The bulk of the business passing at present is coming from the dealers throughout the country, and the city merchants will soon have to be placing their orders. This business looks good for some time to come.

Glass.

There is the same seasonable demand in evidence, with the same prices in effect.

Putty.

Theer is no change in the demand, the business passing at present being quite seasonable, with the same prices in effect.

Bulk, in casks....$2.30 per 100 pounds.
Bulk, in drums... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.
With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

This market is very firm, and, although there has been no actual advance in quotations during the week, all dealers are now quoting the one figure—68 cents per gallon—whereas last week they were split in their quotations, and some were quoting as low as 66. It does not look as if there would be cheaper prices here, as the conditions in the South are none too bright, and dearer prices would not be surprising. Lots of five barrels and over 1 cent cheaper.

WARNING.

Hardware and Metal has been informed that white lead claimed to be absolutely pure is being offered to the Canadian Trade at a very low price.

We have also been informed that an analysis has shown the lead to be about 50% pure. We hereby warn our readers to thoroughly investigate any claims which may be made by firms offering lead at exceedingly low prices. In purchasing white lead the dealer should see that it measures up to the standard claimed for it. He should also protect his own interests, as well as his customers' by purchasing from firms whose reliability and standing have been well established.

Gasoline.

The demand has not changed since one week ago, and the same prices are ruling; namely, 25½c per gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21c for 100 gallons and over.

Benzine.

There is no change in either the demand or price. Barrel lots in wood are quoted at 23 cents per gallon, in steel and drums 20 cents, while local tank wagon price is 19 cents per gallon for 100-gallon lots and over.

Coal Oil.

American oil—best, 21 cents per gallon; tank wagon, 17½ cents for 100 gallons and over. The demand is very good. There is also another grade of oil which is quoted at 17½ cents, with the tank wagon price 14 cents for 100 gallons and over.

TORONTO.

TORONTO, Feb. 12.—Toronto paint jobbers and manufacturers report an improvement in business this week. Dealers are booking more freely for spring delivery and the orders are larger. Indications point to a good year's business in the paint line. Orders for immediate delivery continue to come in very fair numbers. No price changes have taken place during the past week.

Linseed Oil.

The demand for linseed oil is not very brisk this week and prices are unchanged as follows:—

Raw linseed oil, 1 to 2 bbls per 9 lbs., 65s.; 3 to 5 bbls. per 9 lbs., 63c.; 6 to 9 bbls, per 9 lbs., 61c; 10 bbls. open. Boiled linseed oil, 1 to 2 bbls. per 9 lbs., 68c.; 3 to 5 bbls. per 9 lbs., 66s.; 6 to 9 bbls., 64c.; 10 bbls., open.

Oil for less than 1 bbl., 7 cents per gallon additional, 5 gallon cans, 50c.; 10-gallon cans, 75c. each.

Naval Stores.

No change has taken place in quotations in naval stores. Resin is quoted in 280-lb. gross lots at $6, and in smaller lots at 3½c per pound.

Glass and Putty.

There is a seasonable demand for glass at prices shown in current quotations. Putty quotations are unchanged.

White Lead.

Lead is still being booked for delivery until May 15, at the following prices:—
5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Prepared Paints.

Spring booking continues active and a large number of dealers, who have been holding back for some time are now sending in orders.

That the clerk should make himself familiar with the selling price of every article in the store is often emphasized by the fact that the proprietor has to be asked every now and then about certain prices. Clerks have been known to be employed for years in stores and were even then not familiar with the selling prices of many goods.

Paint that pleases your trade

THE paint that pleases your trade and brings in "repeat" orders, is the paint that gives the most enduring service, for the paint that wears is the only paint it pays to use.

In doing a job of painting, every stroke of the brush costs money, from which it follows naturally that the cheapest way to keep a building properly protected is to use the paint that lasts longest, regardless of first cost of the paint.

B-H "ENGLISH" PAINT

although sold at a reasonable price, has the quality of endurance to a superlative degree—it is made to last and it does last. There's no secret about it. We make it strictly in accordance with our guaranteed formula—70% Brandram's B.B. White Lead and 30% Pure White Zinc as the base of White and tints; and every painter knows that a paint so made will last longer and give more satisfaction than any other.

This fact makes the path of the dealer who handles "English" Paint a smooth one. Send for our Dealer's Proposition giving details.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Hardware, Metal and Paints Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

New Sales Plan for Alabastine Dealers

Hardware Men :—

Call at Booth 121 at the Ottawa Exhibition, Feb. 16-21, and see our Messrs. Bertram and Patterson. They will explain our new plan for getting expert decorators and painters to use our package goods and show you the big, striking window trim we give our dealers this year. They will also explain how we co-operate with you in reaching the buyer with our extensive direct mail, newspaper, magazine and street car advertising, free books on decorating, free stencils and brushes.

MERIT AND PUBLICITY

A Winning Combination

Around this trade-mark we have made Paints and Varnishes of merit —goods for which they are especially made—goods that serve in such a satisfactory and economical manner that each sale means a pleased customer and continued patronage.

And back of this merit is a forceful Advertising Campaign, which is making all goods, bearing this trade-mark, well and favorably known to paint users throughout Canada.

MARTIN-SENOUR 100% PURE PAINT & VARNISHES

This Spring Martin-Senour publicity will be unusual in expansion, embodying all the good forms of advertising —Magazines, Farm Papers, Newspapers, Bulletins, Signs, Posters, Moving Picture Slides, Window Trims and Store Displays of various kinds.

If you are looking for a line of Paints and Varnishes with the winning combination—Merit and Publicity, have us give you the whole Martin-Senour story—then decide.

When Wood Workers Ask for Screws

Be able to supply them with

PAT. FEB. 2, 1909

SEE THAT SQUARE HOLE

ROBERTSON'S SOCKET HEAD WOOD SCREWS

These screws are far superior to any other kind. They have a square hole into which our specially designed driver fits snugly. The driver cannot slip and thus spoil screw heads or material.
We also manufacture high-grade Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.
Drop a card for catalogue.

The P. L. Robertson Manufacturing Co., Limited, Milton, Ont.

Toronto Agents: Toronto Wire Nail and Tack Co., Edwin Ave., W. Toronto

John Wanamaker says that advertising doesn't jerk—it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

The MOORE way of selling paints adds no cost to the selling price

Mr. Dealer,—

Your customer demands the best paint you can give him at a reasonable price. The money you pay for your paint, is it going in the can, or elsewhere? Every can of Moore's House Colors contains value for money received.

If it is expensive to sell the paint you handle, and you have to pay more for it on that account, then you are not giving your customer value for money received. Why? Because your cost is increased, but your value has not.

Write for particulars of the MOORE way of selling paints. It will pay you.

NEW YORK CHICAGO CLEVELAND CARTERET

Stephens Ready-mixed Paint

REG. TRADE MARK.

is made by experts for the use of everyone.

The professional painter, as well as the amateur, is a steady user of "Stephens" because it saves him time and money, and always gives satisfaction. "Stephens" is more uniform than any he could make himself.

You want his custom, don't you?

Then write us for the "Stephens" agency proposition.

G. F. Stephens & Co., Limited, WINNIPEG, CANADA
Branch at Calgary, Alta.

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a Want Ad. in this paper.

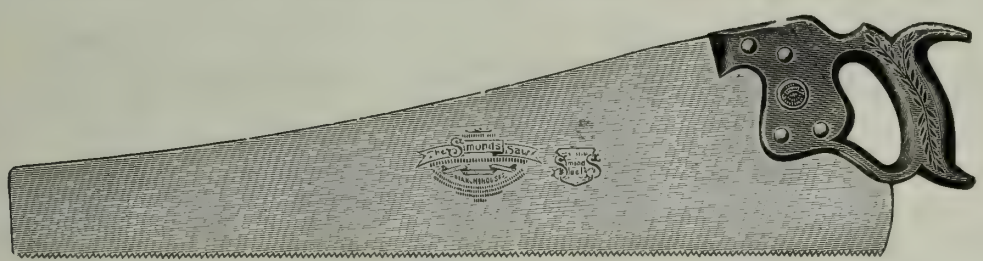
"True Color, Brother, at the First Stroke, and the Last-"

—and the satisfaction of a good job, well done, all through, comes from the use of

Lowe Bros. High Standard Liquid Paints

You can't hope to hold the trade worth holding with paint that is made "on the cheap," that cracks, peels and blisters and looks shabby almost as soon as dry. But you can hold it with Lowe Bros. High Standard paints, made with the exact and scientific knowledge, gained during 50 years' experience, of the art of high-grade paint making.

And you can get that trade in the first place with our advertising, and with the whole-hearted, shoulder-to-shoulder campaign we put up for and with you. Some Lowe Bros. dealers report as much as 200% in their paint business since they joined the Lowe Bros. family.



To-day is the day to write us.

SIMONDS SAWS
Best for Dealer and Carpenter

Carpenters in Canada want saws that will cut easy, and remain sharp a long time. Good steel gives these qualities to a saw. Simonds Saws are made of Simonds Steel and are absolutely guaranteed.

Dealers want a fair profit. Prices are established on Simonds Saws which give this profit. Place your order with your Jobber, or write us for catalog and discounts.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

International Color & Chemical Co. of Ontario Limited

CALGARY **WINNIPEG** **SASKATOON**

Don't sell your customers a shoddy suit of paint for their buildings.

Selling Paint is much like selling clothes

Your customers want to buy a coat of paint that will add to the appearance of their property and protect it for the longest possible time.

CP CANADA PAINT

may be compared with the finest tailored clothes. It is made from pure materials according to formulae that insure every quality that is essential to a good paint. It is thoroughly combined by modern paint-making machinery by expert paint makers, and is the result of over fifty years' experience in making ready-mixed paints.

You should not, however, be contented with stocking a good paint. Realizing the mutual benefits to be derived from an aggressive plan to assist CP Agents in increasing their paint sales, The Canada Paint Co. have perfected a complete and practical sales plan to bring more paint buyers to the stores where CP products are sold. Before placing your spring order you should be familiar with the CP proposition, for it will bring increased profits from your paint department, and will help your entire business. A post card will bring a CP Representative to you, whenever convenient.

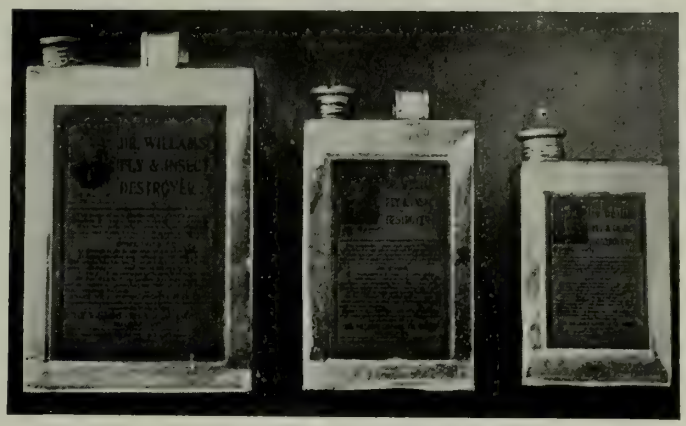
Build Up a Profitable Fence Department!

Handle a line of fencing that does not serve only as a mere boundary line, but one that gives real fence service—one that is built strong enough to withstand the onslaughts of stock as well as the ravages of all kinds of weather. Such a fence is

Peerless Fencing

You can sell this fence with a clear conscience. You can guarantee that **Peerless** goods will give full satisfaction. We will stand right back of your guarantee, whether it be in farm fencing, poultry fence, ornamental fence, gates or any other lines we manufacture, our policy is to satisfy every customer if at all possible to do so. **Peerless** fencing is well advertised through farm papers or other mediums. It is a line that is easily sold. Having an agency for **Peerless** will sell other goods for you.



It's Made of Heavy Open Hearth Steel Wire

with all the impurities burned out and all the strength and toughness left in. Heavily galvanized. Every intersection is locked together with a Peerless clamp. Top and bottom wires of Peerless Poultry Fencing are extra heavy—extra strong. Consequently fewer posts are required. **Peerless** fencing can't sag—can't rust—can't get out of shape—can't help giving absolute satisfaction.

For 30 days we will accept dealers' orders for our PEERLESS Farm Fencing and Gates at a special reduced price. Write for further particulars to-day.

Good Goods
Good Business Good Profits

This is the song sung by every customer of The Williams Chemical Company, Limited. Our year, 1913, is ended and every gallon of our goods were sold with our positive guarantee and not a can was returned; all we received were many unsolicited testimonials from coast to coast and a large number of loyal customers added to our list.

Remember, there is only one Fly Killer on the market doing all that is claimed of it, that is Williams', the goods put up in the cans bearing the yellow label, printed in black, the acknowledged standard by which all others are judged.

We are also the sole manufacturers of Snow White Hand Cleaner, being endorsed by The National Railway Association, Limited, of Canada, and the Dominion Government.

We will be at The Hardware Convention with a full display and cordially invite every wholesale and retail merchantto give us a call.

Remember, whether you buy these goods direct from us or from any of the following wholesale distributers, the same guarantee is attached to every can:—

Wood, Vallance & Co., Hamilton, Ontario.
Wood, Vallance, Ltd., Winnipeg, Man., sole distributers for the Provinces of Manitoba and Saskatchewan.

The Force That is Moulding A World

The man who can move a product, the man who can move an idea or a thing from where it was made to where it is used and bring back something of value in exchange, is the Force that is now moulding and making the world of which each of us is a part.

No man is paid to sit at a desk, nor to fill a chair,—except College Professors. We are paid to deliver a thing from "here to there" and bring back something in return. The problem of civilization, the problem of each firm and of each business man is to set each man and woman at work doing that which he can do best.

Each of us should be a producer, should be at work where we can show results. We are paid, or should be—and some of us are—for our ability to produce. Land is worth what it will grow when intelligently cultivated. Real estate is worth what it will bring because of accessibility and location. What will it bring? What can he produce? This is the principle that underlies it all.

The man who uses other men to help and to lend a hand in the great scheme of usefulness, is the man that gives opportunity. And opportunity means life and liberty and love and success and health and happiness. And these are the only things that are really worth while.

Each of us is paid for doing something that needs to be done, but too many of us are able to do nothing that anyone wants done. Too many of us have no trade, no skill, no training. There is nothing we can make or sell or buy, and consequently we possess no desire to perform useful service because we do not understand what service means.

Our present methods of training young men and young women during the early and all important years of life is wrong, and worse it is travesty and more than this: it is a crime against the race and against the individual who suffers. We grow up to manhood and womanhood without a trade, without an occupation, without anything the world can use in moving something from "here to there" and bringing back something of value in exchange.

The man, the woman, the boy or the girl that must earn a living should be trained to do something well—skillfully—for these are the things that count in moulding and making an individual that improves the standard of things about him.

To those who are toiling in the mines, inventing machinery, weaving the cloth that clothes the world,—to those who are driving our engines of power and guiding our trains across the continent,—to those who are working in our offices of business—to those who are breeding better plants and growing flowers to feed our souls with beauty—to those who are spanning our streams with structures of steel—to those who are training their hands and minds to do something useful here in the great scheme of building a race of men and women —my heart goes out to them across the miles.

For all these we need finer homes, better foods, finer clothes, better books, cleaner newspapers, better shops, safer travel, more parks and more play-grounds for recreation and change, and when we begin to teach our children to do the thing they are best fitted to do so that they will be able to render a service the world is willing to pay for,—then, and not until then, will we have all of these things.

The problem of civilization is to set men and women at work doing that which they can do best; for the individual of this type sets a higher standard for everything touched by his money and his intelligence.

OTTAWA

"Wear-Ever"

The Reason Why

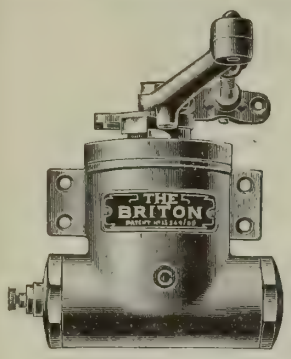
The enormous pressure of rolling mill and stamping machine makes the metal in **"Wear-Ever"** aluminum cooking utensils dense, hard and smooth. The "case-hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensil darker, smoother, less liable to be discolored and more easily cleaned.

"Wear-Ever" Aluminum Utensils

are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated.

Demand for **"Wear-Ever"** utensils exists—has been increased each year for eleven years by consumer confidence, by sample-demonstration work, and by magazine advertising.

"Wear-Ever" advertisements will appear in the March numbers of the Ladies' Home Journal, Pictorial Review, Delineator, Designer, Woman's Magazine, Woman's Home Companion, Good Housekeeping, Christian Herald, McCall's Magazine, Woman's World, Saturday Evening Post, and Country Gentleman, which publications have a combined circulation of 11,019,453. Assuming — as publishers do — that each copy of each magazine is read by at least five persons, the number of people who are "scheduled" to see the March **"Wear-Ever"** advertisement is 55,097,265.



Names of Customers, Cards to be used in circularizing them, Folders for distribution, Ad Book, Window Display Book, Demonstration Book, Display Cards and Picture Slides are at the service of **"Wear-Ever"** dealers.

An Ermined Judge

The Supreme Court of Canada is becoming overloaded with business. The big increase in cases during 1913 has meant that the six judges who sit daily in the dingy old building at Ottawa have been hard-worked men. The procedure is simple, dignified, and conducted with almost an Arctic silence.

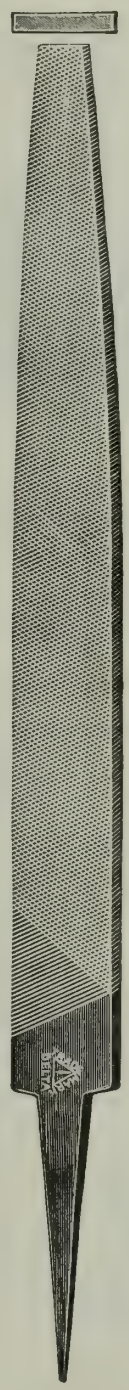
Yet there is a human side to the situation, for the trappings of flesh cannot be wholly discarded in this, the Clearing House of legal wrangles.

A special writer, at the suggestion of "MacLean's Magazine," visited the Court, and in other divers places dug up much useful information concerning which the average Canadian knows little.

The March "MacLean's" will appear with the first of the celebrated Coburn covers, and the illustrations have been attempted on a strikingly broader scale. Besides this leading article there is the pronouncing of a leading Toronto doctor on "The Truth About Radium."

Several short stories, well illustrated, will appear in this issue.

Do not miss this copy. The cover alone, being something new in Canadian journalism, will be more than worth the price.



Send your name and address on a postcard to Dept. "M" and commence your subscription with this striking number—Mail it to-day.

Subscription $2 a year. *Twenty cents a copy.*

The MacLean Publishing Co.,
LIMITED

143-9 University Ave. -:- TORONTO

Of Vital Interest

to you, as a dealer of repute, is the quality of the goods you handle, is the kind of service those goods are going to give your customer.

For instance—files! Sell a man a low-grade file and although, perhaps, there may be a little more profit in it, you're running a very big chance of jeopardizing your reputation.

But sell him clean-cutting, long-lasting, crucible steel

Delta Files

and the splendid, efficient service they give will bring that man's repeat orders, and pay you many times better than the extra profit on the single low-grade sale.

Besides you'll have his confidence, and he'll think of you every time he requires anything you are likely to handle.

Order from your jobber or from us direct, but never accept any without this mark on the tang:

Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The Thermo Washer is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

Evans, Coleman & Evans, Ltd., Victoria.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

THE "WANT AD."

The "want ad." has grown from a little used force in business life, into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the smal affairs and incidents of daily life.

A Two-Fold Service To Hardware Merchants

The Annual Spring Number of Hardware and Metal, to be issued March 21, will excel all its predecessors in the value of the two-fold service it will perform for the hardware merchants of Canada.

One phase of this service is through the "news" or editorial section of the paper. The other, no less important, is through the advertising department. And both of these sections will be more instructive and attractive, than in any other number Hardware and Metal has produced in 25 years.

The advertising pages will tell an interesting story of the new and old things that enter into and form a part of the hardware business. Among the contributors to these pages will be many of the brainiest business men in Canada, who have put hard and conscientious study into the solution of their advertising problems.

So, do not fail to read, with special care, the advertising pages of Hardware and Metal's Annual Spring Number. They will disclose to you many and great possibilities for profit.

CLASSIFIED LIST OF ADVERTISEMENTS

Insertion of advertisers' names in this Classified Index is not a part of the advertising contract. It is a service we give free, and it is printed solely for the convenience of our readers.

Revolving CASES

A TIME SAVER and System Promoter. Every up-to-date Hardware Store should have these Cases. They prevent the mixing of screws and bolts, thus enabling the dealer to keep his stock in good shape, making it a pleasure instead of a task to handle them. These Cases are also used by the Auto trade for keeping small parts, and no one who has seen or used one will be without them. Catalog on application. Sold by all jobbers. Manufactured by

American Bolt & Screw Case Co.
DAYTON, OHIO.

A Confidential Chat With Our Readers

"That February 7 issue was the best regular number you ever turned out," was the emphatic statement made to a Hardware and Metal representative by the sales manager of a big wholesale hardware house.

And it was pretty good. We were forced to admit that ourselves, at our weekly conference last Tuesday, and it is the one ambition of every member of the staff at these conferences to unearth every possible flaw in the editorial contents of the previous week's issue.

But although February 7 was certainly a fine number, we have no hesitation in saying that this week's issue beats it by a very good margin. We believe that the sales manager we have referred to would say so too.

And that is as it should be. Hardware and Metal, during the twenty-five years of its history, has built up a wonderful prestige in the Canadian hardware trade. But it is not content to rest upon that prestige. The live organization behind this paper insists upon constant and steady progress. The result is seen in the continuous development of Hardware and Metal during the past quarter century.

If readers of this page will look up their file copies of Hardware and Metal, three, five, fifteen or twenty-five years back, they will be really amazed at the improvement that has been shown by their trade paper. It is not to be wondered at that Canadian hardware merchants are proud of the fact that their weekly paper stands to-day in the very fore-front of the world's hardware publications, and is everywhere regarded as thoroughly representing Canada's hardwaremen—whether manufacturers, wholesalers or retailers.

And that reminds us
of a letter we received the other day from a Vancouver subscriber, J. A. Kidd:

"I am well satisfied with Hardware and Metal," said Mr. Kidd, "but don't you get too satisfied."

We can tell Mr. Kidd that there is not much danger of such a state of mind overtaking us. Every member of our staff is always on the alert for improvements which may be adopted in Hardware and Metal to make it still more valuable to the trade it serves. Our paper must do a great deal more than "hold its own" before its publishers regard it with any degree of satisfaction.

And here's another point: If, perchance, our editors should ever get the idea that there is no room for further improvement in Hardware and Metal, we would only need to point out the inferiority of past years' issues as compared with those of 1914, to prove the possibility of still further development.

Here is a Case in Point.

In another column of this very issue, announcement is made of the appointment of Chas. W. Byers as Western Canada Editor of Hardware and Metal, with headquarters in Winnipeg.

Mr. Byers is a graduated mechanical engineer, who has had several years' newspaper experience, the past eighteen months being with the technical papers of the MacLean Publishing Co. He is well-fitted for the post which has been assigned him, as readers of special articles he has recently contributed to Hardware and Metal, will agree.

It will be a part of Mr. Byers' duties to spend a considerable portion of his time traveling about the Western Provinces, getting into personal touch with Hardware and Metal's readers in that territory and becoming thoroughly familiar with their problems.

This is but another concrete instance of Hardware and Metal's unceasing desire to give its subscribers a better service to-day than in the past.

Notice the Current Market Quotations
in this week's issue as a still further example of Hardware and Metal's improved service.

We owe this improvement to the suggestions of our readers.

When Mr. Davis was promoted to the editorship of Hardware and Metal, he decided to get a general expression of opinion from our readers as to how they would like to see the paper improved during 1914.

Up to the moment of writing this little chat-on-paper, several hundreds of our subscribers had replied to Mr. Davis' letter, and while the majority asserted that Hardware and Metal could not be improved, a great many submitted some really fine ideas.

It is highly significant that the department for which practically all of the improvements were suggested, was that of Current Market Quotations.

This proved most conclusively to us that the retail hardware trade of Canada demanded the very best possible service, in the way of Weekly Market Reports. They will not be satisfied with Hardware and Metal, or any other trade publication, which does not give them accurate and up-to-the-minute information in this line.

And so you will, in this issue, find the Current Market Quotations printed in larger and more readable type; better classified and alphabetically arranged for quick reference; and many new lines quoted which have not previously appeared in this department. The new page of Western Canada quotations is a feature which will be especially appreciated by the subscribers west of the great lakes.

This little story of our constant seeking for betterment during a long period of twenty-five years, will explain why it is that Hardware and Metal has, as paid subscribers, 90 per cent. of the bona fide hardware merchants of Canada in every province.

And it will also explain why Hardware and Metal's subscribers are so well satisfied with the complete weekly service given them, that only a scant 20 per cent. of them think it worth their while to subscribe for any other hardware paper.

CHICAGO STEEL BENDING BRAKES

(Made in all sizes)

Regarding the Steel Bending Brake we purchased last spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.

Yours truly,

THE McCLARY MFG. CO., C. E. Main, Manager

The Steel Bending Brake Works Ltd., Chatham, Ont.

THE PROGRESSIVE MANUFACTURING CO.

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for Machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

NILES, OHIO

Offers special advantages to MANUFACTURERS OF SHEET METAL PRODUCTS

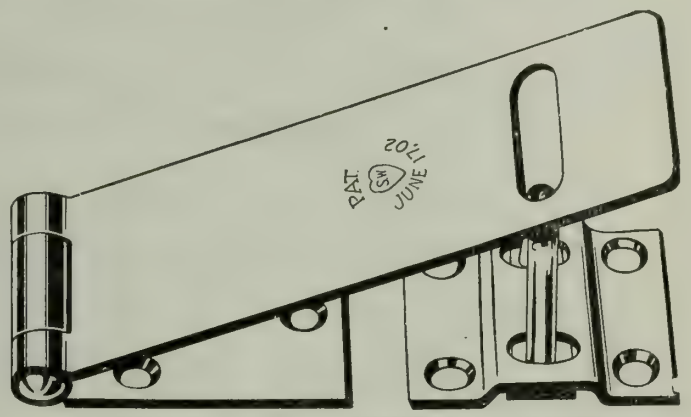
Some of the ADVANTAGES offered are:
FREIGHT—ADVANTAGEOUS rates to all parts of the Country.
MATERIAL—Six Sheet Steel Producers within a radius of nine miles. (Three in Niles.)
Annual capacity approximately 280,000 tons.
LABOR—Laboring residents of Niles have been Sheet Metal Workers for four generations.
If interested, address

The Deforest Sheet and Tinplate Company, Niles, Ohio.

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

Technical Books, 143-149 University Ave., TORONTO



Hated by Sneak Thieves

This Stanley No. 915 is a bona-fide Safety Hasp

It keeps sneak thieves on the right side of the door. It baffles the skill of intending intruders, who find no means for getting at the screws and balk at its great strength and resistance to a prying leverage

TRADE S.W. MARK

This Trade-Mark guarantees its genuineness and protects our patent on this 915 Hasp. You can supply yourself with four sizes: 3½, 4, 6 and 7 inch—The 7 inch being extra heavy, and strong. Plain Steel, Japan, Brass, Bronze or Antique Copper Plate, Galvanized or "Stanley" Sherardized. Stock them generously.

All Stanley Goods are ready for immediate Shipment.

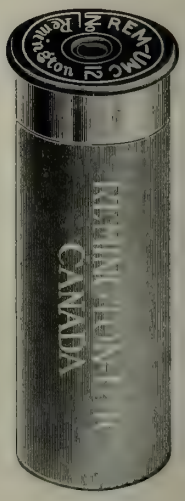
Remington-UMC



Knowing, as you do, how things are shaping themselves in the ammunition business, you will, of course, make your Spring orders for Remington UMC much larger than ever—

Nitro Club and Arrow, the "Steel-lined speed shells," smokeless—and New Club, the "Old reliable yellow shells" black powder—

Also, the "Remington," our new, low-priced smokeless shell, made for the man who needs to consider price and reliability, rather than extreme refinement.

The Remington shell will be loaded with Remington bulk and dense smokeless powders only—a powder guaranteed by us to be equal to any smokeless powder made. It combines stability, cleanliness in burning, high velocity and great accuracy, and makes possible a strong, hard-hitting, and fast-shooting load.

Your jobber is getting ready his specifications for Remington—UMC—Arrow, Nitro Club and Remington—all smokeless, all salmon color; and New Club, black powder, yellow. Send him your orders immediately.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

In case lots of 24, $1.95 each. In broken lots, $2.05 each. Less 2%.

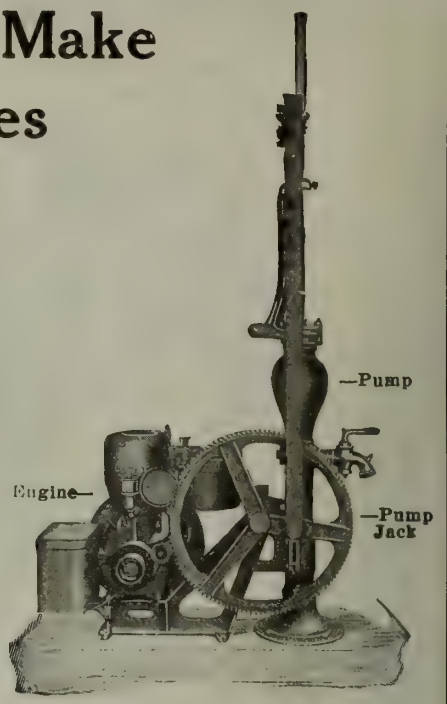
How the Hardware Man Can Make Money Selling Farm Engines



Every farmer is a prospect for a farm engine. Thousands of engines are being sold annually throughout Canada. The agricultural papers are full of farm engine advertising and long articles on the many uses and economy of the farm engine. Farmers read these papers very closely and are buying engines as rapidly as they can afford to. Farmers must come to the hardware dealer for supplies, and while there will look at a farm engine if you have one in stock.

You can add to your profits by securing the agency for a reliable farm engine.

FAIRBANKS-MORSE FARM ENGINES

Have an international reputation for reliability and long service. Farmers like them and speak well of them. Fairbanks-Morse engines are made in Canada, and are backed by a strong organization. We relieve you of all responsibility. Our engines are made in all the common sizes for farm use. By representing us you can supply any size or type of engine the farmer may need. The Eclipse engine shown here is in universal use and would be a safe engine to carry in stock, as there would never be a chance of your having it left on your hands. It is easy to sell. We are selling them all the time direct to farmers.

Write us in regard to handling our farm engines.

The Arguments That Sell

LEWISITE AND COVERTITE ROOFING

Facts which are easily proven.

LEWISITE

is the Best Prepared Roofing made—

WHY ?

Because it is made of Selected Long Fibre All Pure Wool Felt, and is thoroughly and uniformly saturated with **Trinidad Asphalt.**

It is coated on **Both Sides** with Heavy Gums, which are applied under heavy pressure, which compresses the whole into a **Single Solid Flexible Sheet.**

Positively Contains no Tar and will not taint nor injure rain water.

Live Sparks and Burning Embers will not ignite it.

Weighs 5 lbs. more per square

than any Standard Brand offered.

1 Ply, 40 lbs. 2 Ply, 50 lbs. 3 Ply, 60 lbs.

It is Backed up by us.

COVERTITE

is the Best Low-Priced Prepared Roofing offered, and is equal in quality to some Standard brands which are advertised freely.

While the Price is Very Low

it must not be confounded with the Cheap Roofings so often met with.

It is a **Solid Sheet** (not layers), made of good materials, saturated with a Non-volatile Bituminous Compound and Coated on both sides with a Gum composition.

Positively Contains no Tar, and will not taint nor injure rain water. Live Sparks and Burning Embers will not ignite it.

Weighs as much as Standard Brands

1 Ply, 35 lbs. 2 Ply, 45 lbs. 3 Ply, 55 lbs.

Both have Metal End Rolls, which protect the sheets from wear; 32 inches Wide, 108 sq. feet; with Nails and Cement packed in Roll.

Take Time to Read Your Paper

¶ Occasionally we meet a man who says "Oh, I haven't time to read trade papers! I'm too busy."

¶ He is typical of his class, and his class is growing smaller every year. He belongs to the betwixt and between variety, neither very large nor very small. His business is large enough to keep him at detail yet not big enough to permit of his hiring help to relieve him of petty duties.

¶ We refer to the owner or manager of a business which is just at the stage when it needs all the help and brains that can be given it. If the ideas that are constantly being supplied in "Hardware and Metal" were applied to the small but growing business, as well as to the large and well-organized industry, results would be amazing.

¶ Reading a trade paper, if a good one, should be one of a business man's first duties. Let him discharge that and the other claims upon his time will grow fewer in number and greater in importance.

¶ One of the most successful of the young men we know looks through "Hardware and Metal" from cover to cover every week. He glances through the editorial section, selects any article that may be applicable to his business, reads the News, Markets and special features. Then he starts at the front and reads the advertisements.

¶ His business is well organized, and everything moves like clockwork. He always has time to listen to a good proposition and he is a consistent and liberal advertiser himself.

¶ Take a half-hitch in your time for a few weeks and read your paper thoroughly if you haven't been doing so. It will only take you a few minutes each day, and results will be surprising.

¶ Fall into line with the big body of successful men who are keeping in close touch with changing conditions, improved methods, and new machinery.

FIVE REASONS WHY! SAMSON HAMMERS WIN FRIENDS

1. They are made from the best steel that can be bought for the purpose.
2. The handles are made from pure white, straight-grained, second-growth hickory.
3. They are tempered by experts and each one tested individually.
4. The shape is perfect, the balance exact, the claws will draw a pin.
5. If one proves defective you get your money back.

HAMILTON, ONTARIO

Manufacturers of Tinsmiths' and Sheet Metal Workers' Tools, Presses, Dies, Shears, Canning Machinery, etc.

GREENING

GREENING'S STEEL WIRE CHAIN

If you are interested in chains examine carefully the perfect mechanical construction of "Greening's." I is the most perfect chain made. We make it in thirteen sizes. We use it exclusively in all our Halter, Dog, Tie Out, Cattle, Trace Chains, etc.

Correspondence solicited.

We send cuts with table of breaking strain.

Samples, etc., upon request.

THE B. GREENING WIRE CO., Limited

HAMILTON, ONT. MONTREAL, QUE.

Superior Features

When you prove to mechanics that you can sell them a tool or instrument having some feature which gives greater speed or convenience, you make an easy, profitable sale. It pays to be familiar with a line that offers many such possibilities.

Starrett Tools

are all designed to give just a little better service than any other tools could do. The quick-acting micrometer, the combination set, and other tools in actual use in many shops prove this.

STARRETT TOOLS

STARRETT HACK SAWS CUT QUICKER LAST LONGER

The Starrett Spring Nut Calipers

are a good example of time-saving tools. The adjusting nut when released opens in two sections and may be pushed to its adjustment without turning as in the case of ordinary calipers.

Send for our big, new, free catalog No. 20MA, describing the full line of mechanics' tools and hack-saws.

The L. S. Starrett Co., Athol, Mass.

World's Greatest Toolmakers

Is your business entirely successful?

Can you feel that the lines you handle are returning the best possible profit, for the amount of work you have to give them?

Don't you think that perhaps you may have overlooked some gilt-edged proposition—probably because you have been too busy to get out and scout around?

You certainly have, if you are not already handling

Rogers' Portlana Cement

for it is a commodity with an ever-widening field, and an established prestige for excellence of manufacture, which makes it the favorite of engineers and architects, and which ensures its use on the most important contracts.

All around your store—within a block or so—there are buildings of some sort or other being erected. You can supply these builders with the Rogers cement they need, and they'll be glad to let you do it because it saves them hauling.

And you need not carry a big stock either; we'll ship direct to the job as promptly as you notify us.

Be a Rogers dealer—now, before your territory is snapped up.

ALFRED ROGERS LIMITED, 28 West King Street, Toronto

N. J. DINNEN & CO., Western Sales Mgrs., WINNIPEG, MAN.

Mr. J. C. Dietrich, President of the Shurly-Dietrich Co., of Galt, Ontario

writes us that owing to their plant being destroyed by fire, all business at present will be transferred to The R. H. Smith Company, St. Catharines, of which Company he is also President, where they will run a night and a day shift, and hope to be able to supply all their customers as usual. They wish to thank the trade for their patronage in the past and hope that they will continue to favor them with their business, as heretofore.

COMMUNITY SILVER

"HELLO! Jack? * * Oh Jack! It's here! Mahogany with the cutest—— * * * Bringing Mr. and Mrs. who? * * Tonight, at seven? * * * That's nice, because I can use my—— * * Oh!—Well then, silly, *our* new Community Silver."

You Can Use a "W&B" Wrench Until You Lose It

"W & B" Wrenches are so carefully made that they can stand all the abuse incidental to hard wrench service. The jaws are tougher than the toughest nut and will hold the bite wherever there is room to hold on to the nut. This means that you can use a "W & B" Wrench until you lose it. When you buy a new "W & B" Wrench, it'll be for some new service. Select the wrench you need from our line of 58 styles and sizes.

We Make Ceiling Sales Easy For You and Pay a Good Substantial Profit.

Every store and almost every other building in your town that does not have a metal ceiling affords you an opportunity to make money.

When you hear of any building to be renovated, get after the party concerned. Point out that there is no other style of interior finish which compares with steel ceilings and sidewalls in appearance and durability—that "Preston Quality" compares favorably with that of any other make and that the cost is very low, considering the extra service our products give.

If you find it difficult to effect a sale, write us giving name of party and we will send strong business-getting letters which will greatly assist you—but be sure to keep after him or some other person will get the business.

We pay a big commission to all our agents. Write us now for full particulars.

General Demand Created by Advertised Brands

Brands of standard quality goods extensively advertised are in greater demand than standard quality goods not advertised.

Advertising not only stimulates the demand for a certain brand, but it creates a demand for other goods carried in stock.

CANADA Portland CEMENT

is the standard of cement quality and it is advertised in nearly a thousand newspapers and magazines throughout the length and breadth of Canada.

The dealer who sells Canada Cement not only sells more cement, but it gives his customers confidence in all his goods and enables him to sell those customers his other goods.

Prepare now to get your share of the 1914 cement business, by writing for quotations and terms.

Progressive Dealers are Careful Buyers

And Progressive manufacturers careful sellers,
And selling carefully means satisfying the buyer,
So to accomplish this, McClary's sell and the dealer buys

Quality Goods

which include the

"SAMSON" RAILROAD OR DELIVERY CANS

The "Samson" Bottom—the strongest, most sanitary bottom because it is stamped from one-piece, heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

The improved method of connecting the breast to the body ensures perfect rigidity and strength. The body overlap, which is curved to the shape of a half-circle, is placed **outside** the bottom of the breast. Inside the cavity thus formed, we put a half-circle piece of iron, and the whole connection is then firmly soldered together.

The extra heavy wired edge is another strong feature.

Write for a supply of our new 1914 "Samson" Booklets—

PERSISTENCY IN ADVERTISING

One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals the densest fog or the darkest night can not long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot.—*Printing Art.*

Your Spring Trade—How About It?

Be ready for your Spring Trade, secure it, keep it, and realize quick returns by laying in a stock of McClary's Quality goods early. Our fine series of Gas Ranges has been further increased by two new lines, with the "Champion Interchangeable" still in the lead.

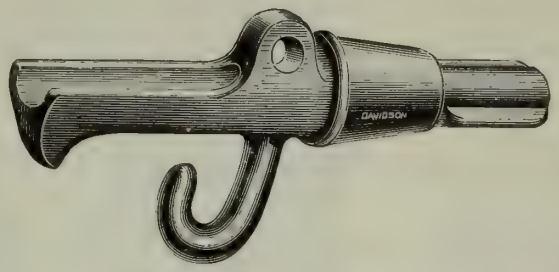
CHAMPION INTERCHANGEABLE RANGE

This famous two-in-one Range is still the only and perfect solution to the complete coal and the complete Gas Range problem.

The Champion gives double service, at the price of one, saves miles of unnecessary steps, one Range to clean, and only 36 inches of floor space taken up.

Gives a yearly service, not even subject to weather changes, and its easy, simple manipulation is one of its strong features.

Built of the same material as our Standard Steel Ranges—a sure sign of quality.



Burns Artificial Gas, Manufactured Gas, Coal and Wood, and all garbage accumulated during the day.

Our nearest Branch at your service—full particulars sent immediately.

"McClary's on goods is a quality name."

MONTREAL TORONTO HAMILTON LONDON CALGARY **McClary's** WINNIPEG ST. JOHN, N.B. EDMONTON VANCOUVER SASKATOON

THE "EMPIRE" SAP SPOUT

STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7-16-INCH BIT WHEN TAPPING, and it will be found that with the "**EMPIRE**" **SPOUT** every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

WRITE FOR PRICES AND TRY A SAMPLE LOT.

'Eliminate the Failure and the Professional Idler.'

¶ No man or woman should be permitted to grow to manhood or womanhood without being able to do something intelligently that the world wants done; without being sufficiently skilled to earn a respectable living and enjoy the better and finer things of life.

¶ No man or woman should be permitted to grow up into middle life without an occupation, without a trade, without a training along a certain line, or without a profession. This is a problem that should be handled by the state and the nation working in conjunction; and training schools should be established and factories should be erected for the purpose of bringing about this end.

¶ This is a very simple proposition and to any of us who have an inquiring mind the idea occurs logically and naturally. It is so simple, in fact, and so evident, that no one can possibly walk around the proposition or walk away from it.

¶ The average money paid for unskilled labor is $1.50 a day. This labor is unintelligent, untrained, misdirected and represents less than one-tenth of individual efficiency. It is the labor of those who have developed neither brain nor hand; of those who have never been trained, and who have never trained themselves to do anything intelligently that the world wants done. And just here we may say that no man can develop his hand without developing his brain.

¶ The training of boys and girls, of young men and young women is the most ignorantly handled of anything connected with our modern civilization, and this ignorance is responsible for the greater part of our poverty; for the suffering and sickness that usually come from poverty and is responsible, in a very great degree, for the unhappiness and the misery that exist throughout the human family.

¶ As a nation we are supporting a vast number of battleships and along with the navy we are supporting thousands of idle men who become, by the nature of their environment, professional "do-nothings." Young men who select the navy as a vocation are not only dependent on someone else for the food they eat and for the clothes they wear, but the nature of their calling is such that they are almost entirely unfitted for any useful vocation in life.

¶ As a nation we are supporting an army of men who do not work and who do not study—an army of professional idlers. And this is, without doubt, the greatest travesty in our modern civilization—that the Government should keep an army of men either on land or sea, that produces nothing, that does nothing but consume and destroy, is the greatest mystery of our time. The policy has been handed down to us from a semi-civilized period of the world when the soldier and the priest were a burden on the peasant who toiled in the field and suffered under taxes to support them.

¶ Our battleships are out of date almost as quickly as the style of woman's dress and ready for the junk-heap. Every year millions of dollars are spent to build these steel monstrosities of idleness, and every year millions of dollars are spent to feed and clothe and transport an army of idlers. Instead of having an army of a few hundred thousand young men, we should have an army of ten million young men, and each of these men should be trained and educated by the Government to earn a living; to be useful to the Government while they are working for the Government, and at the same time fit themselves to do skilfully and intelligently something the world wants done when they grow up to manhood.

¶ A half hour each day is enough time to devote to the routine of military training. That a young man should be paid by the Government to parade around covered with brass buttons and braid instead of producing something useful for the Government and for himself is a crime against taxpayers; against the man who is lured into this life of idleness.

¶ How long will it be, I wonder, until we develop a race of thinking men and women—a race of individuals intelligent enough to do away with this organized "Army of Parasites?"

Perfect Saw Steel Forms the Basis of Every Operation in the Disston Works

Irrespective of all the care and expertness used in the eighty or more operations necessary to produce a high-grade hand-saw, it is the steel which forms the real basis upon which the subsequent efficiency and durability of the saw depend.

Disston Crucible Steel has been made since 1855. Through all these years constant experiments have been carried on with the object of attaining the absolute perfection it possesses to-day. The peculiar quality which gives such wonderful endurance to Disston Saws is found only in Disston Crucible Steel. To this exceptional steel can be attributed in no small degree the widespread preference that is shown for Disston Saws.

Henry Disston & Sons,

(Incorporated)

Keystone Saw, Tool, Steel and File Works

PHILADELPHIA, U.S.A.

Some of the principal operations in making DISSTON Saws:

A—Pouring steel from crucible to moulds.
B—Rolling saw plates.
C—Trimming and weighing blades.
D—Toothing.
E—Hardening and tempering.
F—Grinding.
G—Polishing.
H—Setting and filing.
I—Handling.

TOOLS FOR ENGINEERS

TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY

NICHOLSON DEALERS ARE NICHOLSON FRIENDS

When 10,000 dealers are 10,000 loyal friends, you can readily draw your own conclusion.

Every Nicholson dealer is a loyal Nicholson friend. The profit possibilities may have attracted them first—but it's the spirit of friendly co-operation that makes them "stick."

Files couldn't be made better than Nicholsons make them—so we've devoted much time to bettering our highly satisfactory service to the trade.

Bigger factory stocks—quicker shipments—more rigid inspections — down-to-the-minute goods — and a determination to make NICHOLSON-MADE FILES a most profitable line to carry.

These are the advantages that put the Nicholson brands in Canada's progressive retail stores.

THE PORTLAND POWER WASHER

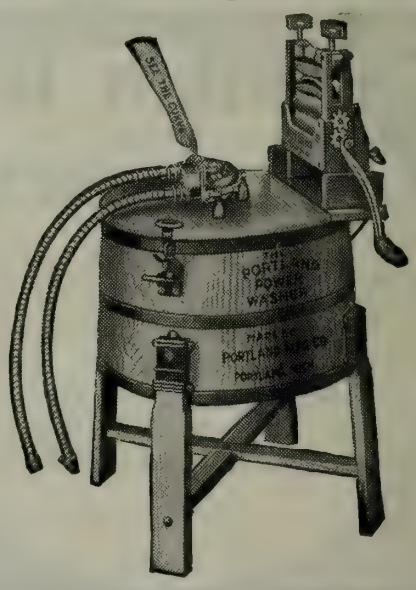
is manufactured in one of the largest factories in the world, owning and operating its own brass foundry, where all motor parts are made of the best material that can be procured.

All castings on our motors are brass and will not rust.

The motor is gearless and needs no oiling, thereby saving grease spots on the clothes.

The tub is large and fully corrugated, and finished in the best possible manner, with oil filler and varnish.

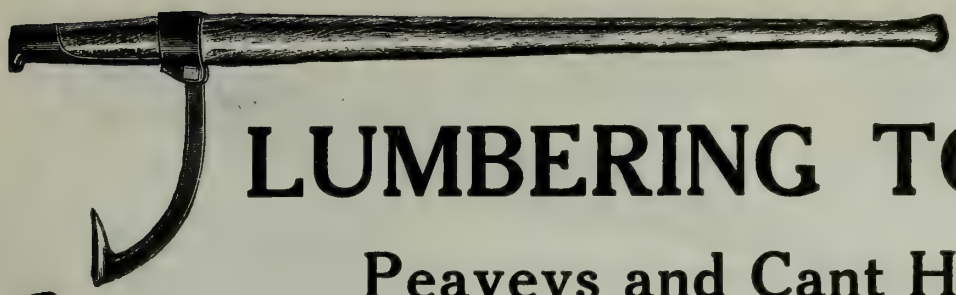
Will operate on less pressure than any other water motor machine on the market.



The agitator travels farther at each stroke than any other machine; therefore does the washing in much less time.

No **exposed** working parts.

Is thoroughly tested by our skilled expert before leaving the factory.



This machine is made by men who have "grown up" in the business; men who have studied whys of every washer's success and the reason for every washer's failure. That's why the **Portland Power Washer is such a perfect piece of mechanism.**

It will be a splendid washer for you to handle. Guaranteed for 3 years.

Cameron and Campbell, - Toronto

To the Hardware
and Tinsmithing Trade!

A QUESTION:—

How much business is there for you in Re-decorating the Interiors of Stores, Theatres, Hotels, Cafes and Homes?

To say nothing of new buildings!

You can estimate on Interiors like this!

THE ANSWER

There is plenty of business—profitable business—for you, Sir, in recommending and selling "Metallic" Artistic Steel Ceilings and Walls.

Not only are "Metallic" Ceilings and Walls smart looking when laid, but they are more easily applied because of the exactness of each individual sheet.

Being Fireproof and practically everlasting "Metallic" Ceilings and Walls are far superior to plaster or papered walls.

The saving in labor enables you to quote prices which land you the jobs.

The superiority of the materials ensures the duplication of orders—pleased customers will talk about your work.

Our method of quoting you prices when specifications or dimensions are given is no small help to you in your business.

Write for full information to-day.

The demand for the Dana—

Naturally reaches its height along in the sultry months of July and August. But people who go away to summer cottage or camp, usually leave in May, and they also want some ice cream, during the hot months, and would like to take the "Dana" with them.

So, therefore, if you're on the look-out for some profitable business, you'll put in a stock of "Dana's" and start suggesting to your customers that they include one in their summer kit.

Show them the Dana,—explain how the can is very tall in proportion to its diameter—how the dasher keeps the contents moving and removes the frozen cream from the sides of the can, as fast as it becomes solid; demonstrate to them that the Dana is just as easy to grind as a watch is to wind—and you'll sell out before the real hot weather even begins.

Doesn't this sound a good proposition to you? It will look even better when you learn of the profits.

So write us to-day.

THE "ORIGINAL" FOUNTAIN

THE "BABY" FOUNTAIN
It Sprinkles Square

THE FOUNTAIN "SHOWER"
A Hose Nozzle with the
"Mist-Like Spray"

THE "HALF-CIRCLE
FOUNTAIN"

Practical Durable Attractive

Made of brass and handsomely finished. Nothing to rust or get out of order. **Every one of them has the beautiful "Mist-Like" Spray that has made the name "FOUNTAIN" famous from Coast to Coast.**

The Original Fountain is too well known to need description. It is 8 inches in diameter and is packed a half-dozen to the carton. Weight 10 lbs. to the dozen.

The **"Baby"** Fountain is now in its third year and has "made good." It sprinkles square instead of a round surface. size 5¼ inches in diameter. Packed six to the carton. Weight 5½ lbs. the dozen.

The Fountain **"Shower"** is a hose nozzle with the "Mist-Like" Spray. A splendid sprinkler for gardens and small lawns. The price is surprisingly modest. Size 2¾ inches in diameter. Packed a dozen in a carton and weighs 2 lbs. to the dozen.

The **"Half-Circle"** Fountain sprinkles only half of a full circle. No need to shut the water off to move it about. May be held in the hand like a nozzle. It is absolutely unique in design and is most pleasing in appearance. Size 4½ inches long. Packed six to the carton and weighs 4 lbs. to the dozen.

Every sprinkler of the "Fountain Family" is packed in a beautifully lithographed display carton that not only effectively displays the sprinklers but also explains the method of operation. These displays make the Fountain Sprinklers sell themselves.

Vol. XXVI. FEBRUARY 21, 1914 No. 8

"Hardware Week" at the Capital City

Exhibition and Convention—The Ontario Retail Hardware and Stove Dealers' Association May Effect a Basis of Affiliation With the R.M.A.—A Full Report of Proceedings to Date Follows.

THE ninth convention of the Ontario Retail Hardware and Stove Dealers' Association and the second hardware exhibition conducted under the auspices of the Canadian Hardware Manufacturers' Exhibitors' Limited, were held jointly at Ottawa, commencing on Monday, February 16 and continuing throughout the week.

In the following pages Hardware and Metal gives a complete report of the proceedings up to the last hour before going to press. In order to render possible the presentation of so complete a report in such rapid order, no expense has been spared. Seven members of the staff of Hardware and Metal have been in Ottawa during the week collecting the information and collaborating in the preparation of what we believe to be one of the most complete reports yet presented. The proceedings for the balance of the week will be given in next week's issue.

The hardware exhibition was undoubtedly all that the manufacturers had claimed it would be. Not only was the number of exhibits larger than in any previous year but the exhibitors had gone to unusual lengths in showing their goods to the best advantage. A number of special features are referred to elsewhere in this issue.

At time of writing the attendance at the retail convention sessions had not come up to expectations, although the western Ontario delegation were down in good force and quite a number of Quebec retailers had arrived. A feature which proved decidedly deterrent was the distance from the centre of the city to the convention hall, resulting in the

attendance of only a proportion of the members and delays in getting the meetings started. The meetings were conducted, in fact, under heavy handicaps.

During the early sessions a marked tendency was shown to take up topics of vital interest and to get the association on a basis where practical benefits would accrue to the members. Reports submitted by the various officers reflected this spirit and it is quite certain that, before the convention is concluded, much valuable work will have been done.

Perhaps the outstanding feature of the convention was the opening of negotiations with officers of the Dominion Retail Merchants' Association with a view to having the two associations work in concert in handling questions of national import affecting trade conditions. The general feeling was that better results would be obtained if all branches of trade stood together on issues where it was necessary to appeal to legislative bodies. It is altogether likely, therefore, that before the end of the week a basis of affiliation will be arranged to make it possible to work in concert on trade issues.

A feature which must also be mentioned was the presence of a large number of ladies at the convention. Over a score of the members had brought their wives along, thus adding interest to the social side of the proceedings. A splendid programme had been mapped out for the ladies. They enjoyed themselves to such an extent that it is altogether likely they will be on hand at all future conventions.

CONVENTION NOTES.

Hardware and Metal's booth was one of the busiest in the exhibition hall.

* * *

"Didn't intend to come this year," said Robert Smith, of Bolton, "but when Hardware and Metal arrived Saturday morning I made up my mind to come after all. And I brought Mrs. Smith too."

* * *

The visitors from Quebec rovince included some good singers. One of the features of the convention, apparent at all hours of the day, was a mixed quartette, selected from the Quebec hardwaremen and the Cocks o' the North.

Formal Opening of the Hardware Exhibition

President Griffiths Suggests a Different Time of Year for Future Meetings—Address of Welcome from City—The Value of Trade Organizations Voiced—A Strong Sentiment in Favor of Home Products Evidenced.

THE exhibition was formally opened on Monday morning. It was after the hour set for the ceremony when President Griffiths, of the C.H.M.E.A., began the proceedings, but, as he explained, the delay was inevitable on opening day owing to delays in arrivals. He coupled this statement with an urgent appeal for promptitude in attending all succeeding meetings and fixtures.

In officially opening the exhibition, Mr. Griffiths gave a hearty welcome to the representatives of the various bodies coming together. The exhibition he described as the "most conspicuous manifestation of hardware manufacturers in Canada." The association of which he was the head, represented a total capitalization of many million dollars. They had given a great deal of thought to the problem of presenting to the retailers of Canada in the most instructive form the output of Canadian hardware manufacturers. "The association," he declared, "stands primarily for the dissemination of the true Canadian spirit. If there has ever been an opportunity of presenting what the manufacturers of Canada have to offer, that opportunity is here."

He went on to show how rapidly and remarkably the Canadian Hardware Manufacturers' Exhibitors' Asociation had grown since its organization, two years before, pointing to the size and scope of the present exhibition as the culmination of two years of steady effort and much earnest thought.

J. W. MONCUR.

M. R. GRIFFITHS.

In conclusion President Griffiths threw out the valuable suggestion that the time of holding the convention and exhibition be changed in coming years to a more suitable season. The suggestion met with a hearty response from the meeting.

An address of welcome from the City of Ottawa was delivered by Controller Parent, who appeared in the place of the Mayor, who was suffering from indisposition. Dr. Parent began with a very gallant reference to the large number of ladies present, voicing his belief that the presence of the ladies assured the success of the convention. He expressed his regret that the fire at Howick Hall had necessitated the making of new arrangements and concluded by assuring all present that the city was theirs and again reiterating the warmest of welcomes.

President Occomore, of the Ontario Retail Hardware and Stove Dealers' Association, spoke in reply to the civic address of welcome, speaking in his usually happy vein. He assured Controller Parent that the members of the O.R.H. & S.D.A. would avail themselves of the very hearty and unconditional welcome which had been extended to them. He felt assured also, from what he had seen on the special train on the way up, that the ladies were prepared to take advantage of the welcome also. The convention and exhibition just opening would, he believed, be the most successful and helpful yet held and undoubtedly much of the credit would be due to the hearty co-operation of the city of Ottawa. He expressed the hope that the convention would some time again be held in the Capital City.

B. W. Ziemann, of the Dominion Retail Merchants' Association, was next called upon. He dealt briefly with the growth of the organization he represented, which had culminated just the day before in the affiliation of four Provincial bodies with the national board. The object of the organization, as it was of all trade organizations, was to improve the conditions under which the retail bodies did business. The impression seemed to have been in the past that the retail merchants were "hewers of wood and drawers of water," but this was now being discarded. The retailers represented the largest investment of capital of any class. He believed that, with the organization now perfected and the dawning recognition of mercantile rights, there was a brighter future in store for retail interests.

J. R. Beaudry, of the Retail Merchants of Quebec, made a strong appeal in favor of home-made goods. The exhibition which the manufacturers had built up showed that goods made in Canada compared most favorably with the products of other countries. He stated that it would please all concerned if the city of Montreal were selected as the place for the next exhibition and convention. After expressing these sentiments n pleasing and succinct Eng-

ADAM TAYLOR.

lish, Mr. Beaudry repeated it in French for the benefit of the retailers present from Quebec Province.

Secretary Wrigley, of the O.R.H. & S.D.A., began his remarks by expressing the hope that all present would prove themselves boosters to make the exhibition and convention the greatest on record from every standpoint. He referred to the fact that the retail association was eight years old and gave a brief summary of what had been done in that period. Before the retailers got together, there was an association only of the wholesalers. As a result of the formation of the retail organization, the manufacturers had since come together and the complete trade triangle had been formed. He referred to the fact that the work of the C.H.M.E.A. had resulted in the building up of the exhibition to the magnificent proportions it had now attained.

David Deschane, chairman of the hardware section of the Montreal branch of the R.M.A., spoke in terms of warm praise of the work which was being done in the organization represented, extending the heartiest good wishes of the Montreal hardwaremen for the success of the exhibition and convention. Mr. Deschane referred to the splendid co-operation which had been established between the manufacturers and retailers and spoke of the resultant good.

The attendance at the opening meeting was large and a creditable display of interest was manifested throughout.

Officers Make Some Sweeping Recommendations

President Occomore and First Vice-President Macpherson Suggest New Lines of Action for the Retail Association—District Chairmen Are Suggested—A Freight Audit is Being Tested.

THE opening session of the convention was held on Tuesday afternoon in Machinery Hall under conditions which were not exactly favorable. Owing to the sudden change of plans necessitated by the burning of Howick Hall, the convention hall had been arranged at one end of the building used for the exhibition. This entailed very bad accoustic properties in addition to a very more severe degree of frigidity than is deemed comfortable. President Occomore and the various speakers endeavored at the outset to use the platform, but the strain on the vocal chords proved too severe, and by the time the meeting was half way over, a reassembling was suggested. The officers moved to the floor of the hall, and had the members draw their chairs close around. This made it possible to conduct the proceedings with less strain on the organs of speech and hearing.

The proceedings were characterized by a determination on the part of officers and members to get the association on an active and businesslike basis. The reports of the officers were full of this spirit and contained many live suggestions. President Occomore and First Vice-President Macpherson, who in his capacity of secretary of the Advisory Committee, had been very active during the year, introduced in their annual statements suggestions and recommendations which, undoubtedly set the members thinking and which should bear fruit in determined action during the coming year.

It had been intended at first to make the meeting a joint one with the manufacturers and the members of the Retail Merchants' Association. At the last moment, however, it was decided to leave the joint meeting until later on. Accordingly President Occomore called the gathering together and proceeded with the regular business of the convention.

The first order of business was the reading of the president's address. A verbatim report of this appears elsewhere.

Executive Committee Report.

The report of the Executive Committee was presented as follows:

The past year has seen a lightening of the work of the Executive Committee on account of the activity of the Advisory Committee elected at the Hamilton convention a year ago.

Vice-President Macpherson, who has acted as secretary of the Advisory Committee, has given very freely of his time, and has declined to accept any remuneration other than necessary expenses. As a result of his attendance at a meeting of hardware association secretaries at Chicago he has instituted several plans of work which ought to result in a considerable increase in membership.

W. F. MACPHERSON.

One weakness of our association work in the past has been that membership fees have been, speaking generally, received only from those who have attended the conventions from year to year. An increasing number are, of course, finding the educational and social features of our annual conventions worth the cost of attendance, but, in the absence of mutual fire insurance or some such direct cash benefit, we have been unable to attract more than one-third of the hardwaremen of Ontario into our ranks.

The Advisory Committee's arrangement for checking freight bills, coupled with the adoption of the district captain plan, ought to materially increase the association membership roll during the coming year.

This increase in membership and activity is essential as while receipts for membership fees were greater during 1913 than in any previous year, and expenses have been curtailed very greatly, the cash balance has fallen about $200 since the end of 1912. The cutting off of receipts from travelers' memberships and the Hardware Exhibition is the direct cause of the deficiency.

The decision to hold this year's convention in Ottawa was made after a study of the membership roll showed that only about 20 per cent. of the members were located east of Toronto. It is expected that the advantages of association membership will be shown to a large number of Eastern Ontario hardwaremen who have not attended previous conventions.

In making arrangements for the Ottawa convention it was originally planned to have a deputation present several resolutions to Premier Borden and mem-

C. W. CONN,

bers of his Cabinet, but, as it was found that similar resolutions had already been presented to the Government by the Retail Merchants' Association, the arrangements for the deputation were canceled.

The Dominion Board of the Retail Merchants' Association were invited to meet in Ottawa during our convention, and have accepted our invitation.

We suggest, for the consideration of the convention, the following resolutions:—

Resolution 1.—Resolved that the proposed Parcel Post System in Canada should rest upon two basic principles: 1st, that the rates charged should be fixed according to distances; 2nd, that rates should be high enough to make the parcel post self-supporting.

Resolution 2.—Resolved that the inspection of weights and measures should be made at the expense of the public treasury, as the aim and object of this inspection is to protect the public.

Resolution 3.—Resolved that this association favors the maintenance of prices on all articles bearing a trade mark and requests the Parliament of Canada to amend the Trade Mark Law so as to make it an offence for any one to sell at a reduction any article bearing the trade mark upon which the manufacturer has set the price for which it should be sold to the consumer.

Resolution 4.—Resolved that this association is very strongly opposed to the Parliament of Canada granting any special legislative privileges to co-operative societies.

We also urge the consideration of a resolution condemning the indiscriminate slaughter and sale of fish and game and the failure to enforce existing game laws in some districts of the Province.

The Canadian Hardware Manufacturers' Exhibitors' Association, in arranging such a large and successful exhibition, and in helping to give our convention very wide publicity, deserves the thanks and support of every member of the Retail Hardware Association. While their exhibition is primarily intended to be educational, there is no better place for hardwaremen to make purchases of the newest goods than at the Hardware Exhibition.

H. Occomore, Chairman,
Weston Wrigley, Secretary.

Advisory Committee Report.

First Vice-President Macpherson presented a detailed and comprehensive report as follows:—

Pursuant to the resolution adopted at 1913 Convention, your Executive named as an Advisory Committee—President H. Occomore, Second Vice-President C. W. Conn, and J. N. McGregor, with Vice-President W. F. Macpherson as secretary.

In March a letter was sent to the members of the association stating the purpose for which the committee was appointed, and offering our best services to the membership, to take up any grievances on their behalf and try to obtain redress. The only grievances named were on the glass situation, and the matter is now under consideration by the glass association.

At a meeting of the committee held in Hamilton in August, the matter of programme for this convention was dealt with, and the joint action of the Retail Merchants' Association was considered advisable to present certain matters of joint interest to the Dominion Government for consideration, and the secretary was authorized to interview Mr. Beaudry in Montreal. In company with General Secretary Wrigley, who was in Montreal at the time, we saw Mr. Beaudry, and arranged for the drafting of several resolutions covering legislative matters affecting other classes of merchants as well as hardwaremen. These resolutions were adopted by our executive committee in November, but as we were later informed that the resolutions had, in the meantime, been submitted to the Dominion Government by the Retail Merchants' Association, we cancelled our appointment for a deputation, and it rests with this convention to say what course we will now follow.

Hardware Secretaries' Convention.

In October, I attended a convention of secretaries of U.S. Retail Hardware Associations in Chicago, and obtained considerable information of value to our association, my report to the executive on my return being as follows:—

"This association is formed of the secretaries of the various State associations who are really in almost every instance the actual managerial officials of the association. The object of the conference was to discuss questions of interest to the association, and, by an interchange of ideas and the comparison of results obtained from various lines of action adopted by the several associations, with a view to adopting such as would profit each association, and strengthen the membership and usefulness of our organizations.

W. J. CARTER.

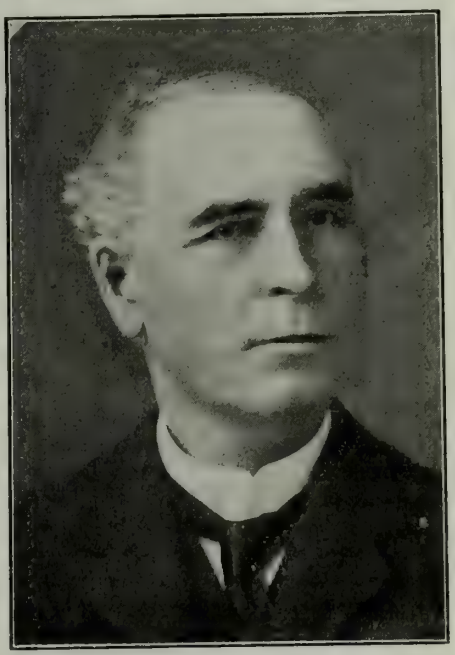
"In this report, I will not be able to give you in detail all the matters brought forward in the meetings which were remarkable for the interest sustained throughout, the meetings being attended by all the delegates present, about 30—and the close attention given during the conferences, which consumed eight hours or more in each of the two days' deliberations.

Increasing of Membership.

Several associations reported having tried out the district chairmanship plan. That is to name a chairman for stated districts, whose duty it is to report to secretary the names of all the eligible dealers in his district, who will, upon receipt, write them, setting forth the objects of the association, and soliciting their membership. This is followed up by a letter from the chairman of the district, which can be written by the secretary and forwarded to the said chairman for his signature and mailed by him from his office. This, in most cases, would be from one whom the dealer we are after would have personal acquaintance or knowledge, and would be with good effect. The list procured at the outset would be of much more value than one obtained from source such as directory or mercantile agency record. It

also interests the various chairmen in the work of the association and has been the means of developing some good live timber for the future conduct of association work. Splendid results were reported from this plan of action.

Local associations (outside of the large cities) have proven a failure in practically every case reported.



Freight Audits.

A number of the state associations have arranged for the audit of freight bills of their members, and the amount of moneys collected from the railways for overcharges through improper rates, charged, and goods billed under wrong classifications surprised me. One State reported having upwards of $10,000 worth of claims entered and about 50 per cent. of this amount refunded up to the present time. These over-charges are caused by railways having inefficient help in their billing departments—junior clerks who do not understand the various classifications—and always make sure to err on the right side. Other states reported having tried it out and found only a few claims to present, which they attribute to better and more intelligent billing clerks being on the shipping routes. Claims are allowed to be entered in the States for a period of six years back. There are several audit bureaus in the States who make a business of preparing such claims. It would be well for us to ascertain if such a bureau exists in Canada, and get full particulars of same—and have a few of the members of executive furnish their freight receipts for a test case.

Exchange or Sale Bureau.

This proposition as tried out by several states at the conventions with good success appeals to me as a winner, and one which we should work out for our convention. In every retail stock there creeps in at various times lines which do not follow up the judgment of the buyer, and become dead or unsaleable stock. At the same time this identical line of goods has proven itself a seller in some other districts. The idea is to have a list of such articles submitted by our members with full description of goods, as to quantity, condition and with sample if possible, or cut and descriptive matter. The one offering the goods to also name a reserve bid. An evening is taken up at the time of convention and each lot offered by auction. In case of a lower than reserve bid being offered, then the one bidding and those interested in his goods are put in touch, and private sale is put through. Of course, it is expected that the reserve bids should be such as to give a bargain as getting rid of the unsaleable goods should be of sufficient interest to offer at a reduced cost to realize and turn over same.

Such other articles as are not disposed of at time of convention are later compiled by official having same in charge together with others which may be submitted after invitation—and a list of these mailed to all the members, say quarterly. Inquiries regarding any of the lines offered are then referred to the party offering, and matter taken up directly between the parties interested. This sale or exchange bureau has been worked up with good success. Another feature is that it keeps the membership in closer touch during time between conventions, a matter which I have always felt extremely important, but hard to follow up without some such plan to keep the membership in touch with the executive officers.

M. S. MADOLE.

Question Box Discussions.

I briefly outlined our proposed plan of action in reference to some of the live questions for discussion, being introduced with short papers on the topics selected, to be followed up with general discussion. One state, Indiana, I think, stated that they had the same plan in view for next convention. The matter was fully discussed, and it was recommended that the papers be edited and printed for distribution to members in advance of discussion.

Work Done in Ontario.

The clause of this report relating to district chairmen was acted on, and a valuable list of eligible dealers, about 950, was compiled. Owing to the large number of names received, it was impossible for me to follow up the plan of subsequent work by the chairmen for this convention, so I circularized the names early this month—after having sent type-written letters in December. During this convention, I would like to see a meeting of the district chairmen and our executive to formulate plans for drawing in dealers who do not attend conventions to our association.

Freight Audits.

After considerable correspondence, I have a proposition from a freight auditor in Montreal to take up this matter, and have now sent in my own freight bills along with President Occomore's, to obtain an idea of the value of this proposition.

I would also like to have the Exchange or Sale Bureau discussed during our convention, and obtain an expression of opinion as to its usefulness or practicability.

Your committee have also met the Exhibitors' Association with the executive, and formulated the programme for this convention.

There has been a large amount of correspondence from my office in connection with association matters, and if, at the close of this convention, we can see an increased interest in the furthering of the welfare of the trade in general, with a consequent growth in the numbers and influence of our association, I will feel amply repaid.

All of which is respectfully submitted.

W. F. MACPHERSON,
Secy. to Advisory Committee.

Secretary's Report.

Ottawa, the Capital City of Canada, is a fitting place to hold what we confidently expect will be the largest convention yet held of the Ontario Retail Hardware and Stove Dealers' Association.

In addition to the large attendance expected from Ontario, we look forward to the opportunity of fraternizing with several hundred fellow-retailers from Quebec Province, and to also have as guests many hardwaremen from the Maritime and Western Provinces of Canada.

Your secretary visited Western Canada last summer, and found a fair percentage of the hardware dealers organized in local branches of the Retail Merchants' Association, although in British Columbia the Retail Hardware Association still continues as a separate organization.

The executive committee met twice during the past year, and have had very pleasant relations with the executive officers of the Hardware Exhibitors' Association in arranging the programme, etc., for this convention.

The advisory committee has been in constant correspondence with each other,

and have done very practical work, Vice-President Macpherson having proven his capacity for the position of secretary, and a willingness to give the time necessary to accomplish practical results for the members of the association.

The advisory committee experiment having proven a success, should be continued. Would it not be a good plan to, as far as possible, elect past presidents to the advisory committee, thus retaining the activities and experience of the men who, after years of service, have been honored by election to the highest office in our association.

It is gratifying to report that 1913 was the most successful in the history of the association so far as membership receipts were concerned, and, with aggressive advisory and executive committees, a substantial balance in the treasury to work upon, and an enthusiastic and successful convention to inspire the officers and members, the coming year ought to be the most fruitful of results yet experienced by the hardware trade in Ontario through their trade organization.

WESTON WRIGLEY, Secretary.

Auditors' Report.

Geo. Mathieson submitted the report of the auditors as follows:—

We, the auditors of the Ontario Retail Hardware and Stove Dealers' Association, find in auditing the books of the association, that the year of 1913 was the largest for receipts from members in the history of the association, but that the cash balance on hand was decreased by about two hundred dollars.

We would recommend that means be devised to bring the balance up, as the surplus must not keep on going back at this rate, or else we will be in debt.

Increase your membership or membership fees, or try and induce the Exhibitors' Association to give a percentage of the receipts from their yearly exhibition.

The financial report is, in detail, as follows:—

Secretary's Financial Report, 1913.

RECEIPTS.

Membership fees	$ 795.00	
Supplies	23.00	
		$ 818.00

DISBURSEMENTS.

Paid to treasurer	$18.00

Treasurer's Report.

RECEIPTS.

Cash balance Dec. 31, 1912	$1,225.16	
Received from Secretary	818.00	
Interest	28.25	
		$2,071.41

EXPENDITURES.

Convention expense	$ 359.05	
Executive traveling expense	206.70	
Office expense	198.51	
Job printing	179.25	
Secretary's salary	100.00	
		$1,043.51

STANDING OF ASSOCIATION.

Cash on hand, Dec. 31, 1913	$1,027.90	
Saleable stock on hand	12.00	
Office equipment	50.00	
		$1,089.90

LIABILITIES.

None.

GEO. MATHIESON,
J. W. PEACOCK,
Auditors.

Toronto, January 22nd, 1914.

Provisional Committees.

The provisional committees were appointed as follows:—

Membership.—Geo. Mathieson, Toronto; J. W. Peacock, Toronto; W. J. Wagg, Providence Bay; W. A. Rankin, Ottawa; R. Hawkins, Smith's Falls; S. B. McClung, Trenton.

Nominating.—M. S. Madole, Napanee; J. R. Hambly, Barrie; D. A. Macnab, Orillia; T. M. Nash, Wellington; D. Mistele, Rodney; Mr. Chalmers, Palmerston; Robt. Smith, Bolton.

Resolutions.—Mr. Barton, Fort William; Wm. Magladery, New Liskeard; W. W. Bennett, Gananoque; A. J. Wright, Hamilton; W. W. Cuzner, Ottawa; W. H. Johns, Southampton; Mr. Ferguson, West Lorne.

Question Box.—H. E. Patterson, Drayton; C. F. R. Taylor, Carleton Place; W. D. Dewar, Pembroke; A. L. Shields, Kincardine; J. S. Moir, Arnprior; H. Morgan, Peterborough; Mr. Clements, Milton.

J. R. Hambly of Barrie, moved that the report of the presiden be referred to a special committee for consideration, the other reports to be referred to the Resolutions Committee. In making the motion he congratulated President Occomore and the other officers on the thoroughness of the work they had done.

Robert Smith, of Bolton, seconded the motion. "We seem to be getting down to work in earnest," said Mr. Smith.

The committee to which the president's address was referred to was made up of Messrs. Carter, Madole, Taylor, Shields and Smith.

A letter was read from Chas. C. Lee, of Goderich, a member of the executive committee, expressing his regret that through illness in his family he would not be able to attend.

Some Criticisms Voiced.

Chas. W. Conn read a letter from W. Pow, of Pow & Wilcox, Tillsonburg, which will apear in next issue.

The Register of Members

Owing to the slowness with which the members registered, it is impossible to give a complete list of those present. The members who had registered at the headquarters of the O. R. H. & S. D. A. up to Wednesday night were as follows:

G. A. Turner, Drayton; D. B. Ridpath, Toronto; Geo. Matthewson, Toronto; G. D. Davis, Toronto; T. B. Costain, Toronto; R. H. Ecclestone, Toronto; J. O'Hagan, Toronto; C. H. Blythe and H. Shorter, Ottawa; E. D. Campbell, Guelph; C. J. Robinson, Toronto; C. R. Wilkes, Montreal; W. L. Edmonds, Toronto; J. E. Martin, Montreal; Geo. H. Honsberger, Toronto; T. Chadwick, Toronto; P. E. Bedouin, Thetford Mines; F. M. Richards, Moose Jaw, Sask; H. D. Sinclair, Orillia; F. Bausbaugh, Waterford; T. W. McKenney, Toronto; W. M. Robertson, Toronto; Fred Hutt, Toronto; R. M. Allen, Kingston; D. R. Porteous, Hull, Que.; J. T. Jeffrey, Ottawa; A. L. Hixon, Berlin; J. G. Insole, Hamilton; W. G. Robertson, Toronto; C. C. Henderson, Toronto; A. T. Black, Toronto; F. L. Simpson, Lanark; R. H. Breeze, Collingwood; F. W. S. Davis, Toronto; W. L. Bailey, Kemptville; F. C. Lariviere, Montreal; C. Arthur, Summerside, P.E.I.; W. E. Forbes, Summerside, P.E.I.; G. T. Deacon, Lachute; R. Hawkins, Smith's Falls, Ont.; R. S. Drysdale, Arnprior, Ont.; S. C. Bishop, Norwich; A. R. Bernhardt, Preston; W. I. Wagg, Providence Bay; D. Christie, Owen Sound; Reg. Scott, Guelph; R. W. Clements, Milton; Ed. Wanless, Chatham; L. Doyle, Hawkesbury; R. W. Matthewson, Toronto; F. W. Barton, Port Arthur; M. S. Madole, Napanee; Donald McGregor, Caledonia; E. A. Whitten, Bracebridge; A. J. Wright, Hamilton; J. R. Hambly, Barrie; J. A. Clark, Smith's Falls; F. A. Rieard, Sudbury; H. E. Patterson, Drayton; W. J. Bell, Beeton; R. J. Walken, Tottenham; T. I. Hunt, Thorold; B. F. Ahrens, Hanover; G. E. Baxter, Little Current; J. C. Martineau, Quebec; Jos. Chalmers, Palmerston; Adolph Henry, Orono; C. F. R. Taylor, Carleton Place; M. Johns, Southampton; C. R. Bailes, Oshawa; W. R. Billing, Windsor; H. Occomore, Guelph; C. W. Conn, Tillsonburg; W. A. Rankin, Ottawa; J. Preeter, Zurich; Geo. A. Davison, Woodstock; Robt. Smith, Bolton; D. A. H. Occomore, Guelph, Ont., President O.R.H. & S.D.A.

The Future Status of Trade Associations

President Occomore, in His Address, Asks Some Pointed Questions as to Relationship Between the Associations of the Manufacturers and the Retailers—Suggests Joining Forces With R.M.A. on National Issues.

TO the members of the Ontario Retail Hardware and Stove Dealers' Association in Convention at Ottawa: I wish to take this, the first opportunity I have had, to thank you for the honor conferred upon me in Hamilton last February by electing me to the Presidency of this, the strongest One-line Association in the Province of Ontario to-day, an organization composed of members from all parts of the Province, both from the large cities and towns and the rural sections as well; an organization to which we, as members, ought to feel proud to belong, representing as we do in the Retail way, the largest, the wealthiest, and possibly the most stable of the industries, of not only the Dominion but of other countries; industries that possibly make more for the growth of this country than any other branch of the Retail Trade can lay claim to. For you to know that this is no idle boast on my part, you have only to think of a few of the many lines we represent; namely, the products of the Rolling Mills, Pipe and Tube Mills, Wire and Wire Nail Plants, Paint and Color Plants, Stove and Furnace Plants, Cements, Plasters, Woodenware, etc. And I could go on until you were tired.

Again, I say I feel it an honor to be the Presiding Officer of such an organization, especially so as I think it is the first time since the Association was first organized that you have placed this trust on the shoulders of one who represents, as I do, the Stove Dealers section of the Association —not that the other section has suffered in any way, owing to this fact; because I trust I have been able to lose sight of the fact that we are made up of sections, but that we are an association of both sections joined together and that what affects one affects the other.

In looking back over the year that is now drawing very near the close, I feel that there are many things which we had hoped to accomplish that we have failed in or in which we have done but little. We hoped to have been further ahead than we are with the matter of Inspection of Weights and Measures, Parcel Post, and several other matters that have been before us for some time. But we can console ourselves with the thought that when we get to the point that we have accomplished all we set out to do, we will have outlived our usefulness and it was time we were transplanted.

Owing to the changed conditions since the Guelph Convention, when we had to let go of the Exhibition end of our Association, we have had to reorganize, as it were, our work and have endeavored to concentrate our thought and action along other lines, namely, the betterment of the Retail Trade. To this end the Advisory Committee was created, so that your chief executive officers, as a small active body, could be more in touch with the work, with power to deal with trade grievances, from whatever source they might come, and use their very best efforts to correct and adjust them. As to what success we have met with I will leave the Secretary of the Committee to tell. At a meeting of the Wholesale Hardware Association, held in the fall, I brought up the matter of a uniform catalogue and price list, with the result that the Secretary of their Association promised the matter would be dealt with by them in the near future.

As to the present, there are a few things we need to know. Or, in other words, we had better stop long enough to take stock and find out where we are at. We are composed of a paid-up membership for last year which, I understand, is better than we have ever had before. I understand, also, that this total is made up of representatives from every section of the Province. But this total membership is only about thirty-three per cent. of the men eligible.

As to your Officers and Directors, I feel that in selecting these you have given the Association a body of men to control its affairs of whom you need not be ashamed; men of experience, faithful, conscientious, and of sound judgment. Your affairs have been well looked after by them this year. Our powers, especially along Legislative lines, are somewhat limited, accounted for to a large extent by the fact that we are only representing one section of the Retail Trade. This is a matter that should have our very earnest and careful consideration. To me it seems that right here is where we lose so much of our energy, owing to our inability to carry things to a successful issue.

As to our standing as an organization among the Retail Trade, I am glad to say that I think we are much stronger here than we ever were and outsiders are beginning to realize that we mean business and that it is not as has often been said of us, "just a bunch of hardware fellows out for a big time," with special emphasis on the "big." This is as it ought to be. Not that I would deprecate the social good-time side of our gathering; but let that be only a side line. Let us remember that it is Business first.

The last item on our stock sheet is: Just where do we stand as regards the Canadian Hardware Manufacturers Exhibitors, Ltd.? In this connection there are several questions I would like to ask. Some of them I will endeavor to answer and the others I will have to leave with you."

Mr. Occomore then proceeded to go into the question of the relations between the two bodies, asking a number of questions as to the division of responsibility and receipts and mutual representation on boards. The last question was:

"11. Should we move for a joint committee of the two associations to meet and talk the matter over and endeavor to arrive at a satisfactory solution of the difficulties; said committee to be composed of, say, three members from each association.

Questions 1, 2 and 3: While it is not necessary, I think, if it can be so arranged, that the two should continue to work together as, in my estimation, the dividing of the two bodies would weaken the aims and objects of both Associations, the Exhibitors just as much as ourselves. Their efforts bring to the Convention many that would otherwise never come, and our Convention being held at the same time makes it possible for them to bring these men to meet with them. To me the thing is very much interwoven.

The remaining questions I would ask you to answer for yourselves. To my mind the time has come when we should know these things.

Now, as to the future, I have already touched on some of the things necessary for our consideration and action if we are to be a successful Association, but there are several other things we might do. Some of these are outlined in the report of the Advisory Committee Secretary and Secretary Wrigley in his report of the Executive. Especially would I call your attention to the question of increasing the membership, as we should have at least sixty per cent. of the bona fide Retail Hardware and Stove men in the Province as members of our Association—and active ones at that. Your Officers have endeavored to make this Convention the most interesting one we have ever held, and yet I feel that we can still increase its interest by increasing the activity of its members. If every member would become a pusher instead of a puller, the future of the Association would be bright indeed.

I would suggest that more time than ever be devoted to question-box discussions. Resolutions brought in and passed should be followed up and pushed through with the utmost vigor. More prominence should be given to the advantage to us, as Canadians, handling and pushing made-in-Canada goods, in preference to those made in foreign countries (all other things being equal). We, as an organization, should take up seriously the question of increased cartage charges, especilly double cartage. If, as we expect, the freight audit is what we think it, as mentioned in the Advisory Secretary's Report, we would strongly urge the members to take advantage of it.

I would also suggest that before this Convention closes a strong committee be appointed to go fully into the question of joining in with and, if necessary, merging ourselves with the Retail Merchants' Association of Canada (Incorporated), as I am more firmly convinced than ever that if we wish to secure for ourselves our rights as Retailers, get our wrongs righted, either in Provincial or Dominion matters, it will be necessary for us to show that we are thoroughly representative. Almost all legislation we may be after affects not only us, but all branches of the Retail Trade. This we cannot do as a One-line Association but if there is some way (and I think there is) by which we can unite with the Retail Merchants' Association, there is no reason, that I can see, why we should not get almost everything we go after.

In closing, let me again thank you for the honor you conferred upon me, and to say that I hope the sessions of this Convention may be of much interest and profit to every member present and that the new year may be of still greater good than has this one now closing."

Bulk Sales Act Comes in for Discussion

A Summary of Terms of Proposed Ontario Act Given by Secretary of Credit Men's Association — No Action Taken — Splendid Paper on Retail Advertising Given by E. J. Creeper.

THE Wednesday afternoon session opened with an address by Mr. Sheldon, a report of which will be found in another section of this issue.

The second order of business was an address by Secretary Leary, of the Canadian Credit Man's Association, on the Bulk Sales Act pending in Ontario. He explained the terms of the proposed Act at some length, dealing particularly with the clauses of the bill introduced into the Legislature last year by W. D. McPherson, M.P.P. This bill he claimed had been very much misinterpreted.

The terms were briefly, as follows: A merchant negotiating a sale in bulk of his stock must supply the purchaser with a list of his creditors for all amounts over $50, and also to notify his creditors of his intention to sell. If the purchaser failed to secure such statement, the sale became void. The vendor must obtain a written waiver from the creditors or pay sufficient to cover the indebtedness, a third alternative being to pay into the hands of a trustee a sum to be distributed among the creditors. The fees of such trustee were not to exceed 5 per cent., and were to be paid out of the disbursements and not in any case to be charged against the debtor. The speaker laid special stress on this point to show that the proposed Act did not entail any expense on the retailer.

If the vendor can give waivers from 60 per cent. of his creditors and representing 60 per cent. of his liabilities, together with the statement, the sale will be valid.

The speaker elaborated on the various points, adding that all the provinces, but three, had adopted Bulk Sales Acts, and all the states but one. He declared that the passing of the Act in Ontario could be obtained only through the co-operation of the retail merchants and he asked that they give an expression of opinion in its favor.

Mr. Madole: "You have told us this is needed in the interests of the wholesaler. But what is proposed to be done to protect the interests of the retailer? We believe the wholesaler should be protected, but we also believe that something should also be done for the retailer, who is just as worthy."

Jas. Moir stated his belief that it would be premature to make any pronouncement on the Act when negotiations were pending with the R.M.A. which might result in the association acting in future with that body on all such questions.

Mr. Madole then moved that the convention had heard with satisfaction the explanation of the Act given by the secretary of the Canadian Credit Men's Association, but that in the opinion of the convention it would be inadvisable to take any action or to commit themselves on the question.

Jas. Dandy seconded the motion.

Mr. Leary pointed out that the Bulk

E. J. CREEPER.

Sales Act was designed to protect the honest retailer as well as the wholesaler. At present there was nothing to prevent a dishonest man from selling out his stock at 40 cents on the dollar and skipping the country, leaving the purchaser to dump that stock on the market at cut rates, thus creating unfair competition for the other merchants.

Mr. Occomore suggested that if Mr. Madole would agree to withdraw his motion, that the matter be left until the following day and that in the meantime a vote of thanks be moved to Mr. Leary.

W. F. Macpherson thought that in view of the negotiations pending with the R.M.A., it would not be fitting to take a stand on the subject. They should hear both sides first.

A. J. Wright asked on what ground the retailers had been fighting the bill.

Mr. Leary explained that one objection was that through the proposed measure an inquisitive person could get a complete list of the creditors of a merchant. They also objected to the $50 limit, believing that all obligations, no matter how small, should be listed as well. A great objection also was that a general merchant, wishing to sell out one line of goods would have to supply the purchaser with a complete list of his liabilities on all stock.

Address on Retail Advertising.

A splendid paper on the subject of advertising was then given by E. J. Creeper, of Owen Sound, as follows:

We live in an age of progressiveness. Modern business demands many things both unthought and unheard of in years which have passed. The subject which has been allotted to me for a five-minute talk is, "How to get the most out of advertising," or as I think it might be termed, "Looking through the nickels at the dollars beyond."

Advertising is as necessary to a hardware dealer as fertilizer is to the farmer, or in other words, it is a necessity. To begin with advertising is merely getting better acquainted with the public. There are hundreds of ways of advertising, but, as a general rule, it is the little things that count. By that I mean that it is not the most expensive means of advertising that always brings the best results.

If you will try and put yourself in the place of your prospective customer and discover why they purchase from your store in preference to others, you will probably find it is because of one of the following reasons:

That your store is convenient to them.

That you and your clerks are courteous.

That your smile is a little more pleasing and your ways a little more obliging than your competitor.

That your store is neater, cleaner, and more inviting than your competitors.

Let Us Start With Your Windows.

I am afraid there are too many of us who do not pay enough attention to our window advertising. It is one of the best publicity agents of any merchant. It is necessary, however, to make it so by displaying in a tempting and attractive manner the merchandise, so that people will stop and examine it. There must be some definite impression you wish to make and this idea must be concentrated in your windows to succeed. Change your displays not less than once every week; oftener, if possible, to get the best results.

Neatness and order in your store is another latent advertising feature. Have your shelves neatly arranged, counters free from miscellaneous packages, ad-

vertising signs in place and a general air of business about the place.

How often does a customer go into a store with the intention of buying a package of tacks or some other small article and after seeing other goods, attractively displayed, runs up his purchases to several dollars?

Then again, are your clerks well-informed and obliging?

There is nothing impresses a casual customer more than to enter a store where the clerks are obliging, courteous, and well informed. Do not keep a grouchy clerk at any cost. Courtesy pays big dividends, and always give particular attention to women customers.

There are many other ways of advertising that are inexpensive to the dealer and of which few really avail themselves. They are ways that bring big results if properly worked.

Practically all the manufacturers when introducing new lines will furnish you, for the asking, circulars and advertising matter to aid the dealer and very often are willing to print the name and address at the bottom of 500 or 1,000 circulars without cost to you. How many dealers ask the manufacturers for these circulars, and how many use them to good advantage when they are supplied? The use of these circulars is the finest opportunity of all to introduce the lines advertised thereon. You should place this advertising matter on the counter where goods are wrapped and enclose a piece of advertising matter in every order wrapped at that counter. This advertising is free to you and allows you to keep everlastingly at the proposition of letting the people know what you have for them without expense to you.

The aim of every ambitious merchant is to obtain the greatest results from the least expenditure. Competition demands it, but anything that is worth doing is worth doing well. It is not always wise to limit your expenditures in advertising so that the impression of cheapness in your management or your actions is given to your customers.

If you think of giving a customer a cigar, it is far better to keep your money in your pocket than to offer him a cheap one. The personal touch which you can have with your customers is a great aid to business. You can solicit trade by means of circular letters or post cards, but the actual going out and circulating among farmers, home-builders, and mechanics will make a much better and more lasting impression.

Then again the newspaper, without question, is one of the greatest factors for upbuilding of any progressive establishment. It must be used, however, with care and system, or it will be found to be an expensive luxury. Determine upon the amount you can well afford to spend and find out how much space you can get for that amount. The ordinary country and town storekeeper is apt to condemn newspaper advertising as he has possibly not succeeded in obtaining results from his advertising, because he has allowed the same ad. to appear time after time and then wonders why they do not pay. The reason lies in the fact that they are stale news, and nobody cares to read them the second time. Many people read the advertising columns as regular as any other part of the paper, and if you offer them in each ad. something that they need they will soon be coming around to see you. Catchy headings, good electros descriptive of goods all help to make impression on prospective customers.

There are many other ways of advertising, such as road signs, souvenirs, on programmes, and at church affairs. The last two, I believe, should be avoided as they are simply donations, and should come under that head.

The kind of advertising that brings results to-day is that which impresses the public and the way to do it is through your store service, your window displays, your newspaper advertisements, and your personal solicitation for business.

A hearty vote of thanks was tendered to Mr. Creeper at the conclusion of his address.

A Thorough Analysis of Salesmanship

A. F. Sheldon Delivers an Address Before Hardwaremen in Convention—Man Power the Great Force Behind Salesmanship—What Man Power Consists of—A Brief and Forceful Summary.

"THE Philosophy of Salesmanship," was the subject of the address delivered by A. F. Sheldon before the convention at the opening of the Wednesday afternoon session. In his remarks, Mr. Sheldon condensed a wealth of original subject matter on a subject of considerable depth and endless ramifications into a very few minutes, his address not exceeding half an hour in length. He succeeded, however, in putting before his audience in succinct form the elements of successful salesmanship and he held the closest attention of all.

Space does not permit of anything approaching a detailed report of his remarks. In brief the points he made were as follows:

To persuade some person to purchase your product at a profit (his definition of salesmanship) it is necessary to lead that person through four stages of mind. The stages by which a sale is approached are Attention, Interest, Desire and Action. However, the chief function of salesmanship from the standpoint of the retail merchant was not to get customers but to keep customers. The object of the retail salesmanship, therefore, should be to instil confidence and satisfaction; through satisfaction to create the sustaining power of confidence.

The one great cause of permanent confidence and satisfaction was found in service. He defined the three essential factors which constitute service as Quality, Quantity and Mode. The last was the most important as it covered everything that applied to service outside of the article offered—the efficiency of the sales staff, the completeness of the store equipment, etc.

There were three powers behind a business—man power, money power, equipment power. Of these three, man power alone was cause, the other two being effect. Destroy all the money power and equipment power in the world and man power would soon replace them. Destroy man power and the money and equipment powers would rust away. He, therefore, showed the paramount importance of man power in its relation to salesmanship.

The individual power of a man could be determined by considering him under four heads—Physical power, Ability, Reliability and Action. A man might have ability, reliability and the power of action but be handicapped by lack of health. A man with perfect health and plenty of ability might be of little value through lack of the force of putting his ability into action. In brief, a man must rank high in all four respects before he could be considered efficient. To qualify as a salesman, a man must possess a share of all four of "man power."

As stated at the outset, Mr. Sheldon spoke in terse and epigrammatic form. Some of his brightest thoughts are appended:

"Salesmanship is the power of persuading plenty of people to purchase your product at a profit.

"A house is known by the customers it keeps, not by the customers it gets.

"Words enter into persuasion to purchase your products at a profit but what enters more is efficient deeds.

"Sometimes the cheapest man on your pay rool is the most expensive to the organization.

"You can't eliminate mistakes from your work without health, vim, vigor and vitality.

"Bring life into harmony with God's law of efficiency.

"If salesmanship is service then hypnotism has nothing to do with it.

"There is only one difference between a rut and a grave—the one is deeper and longer than the other.

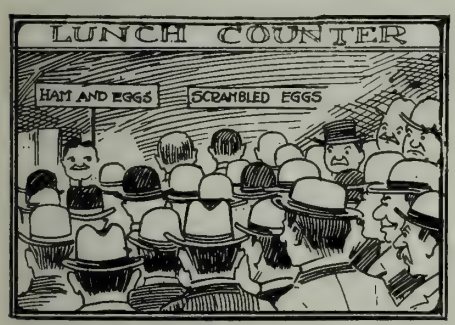
"The best ability is reli-ability.

"The square deal ethics in business pay—and pay big dividends.

"All labor troubles could be made to vanish if the 5 per cent. who employ and the 95 per cent. who are employed could only get close enough together."

Social Features of the Convention

RECEPTION MONDAY EVENING.



On the arrival of the special hardware trains from Montreal and Toronto an informal reception was held in the ballroom at the Chateau Laurier. A very tasty lunch had been prepared for the visitors. Special music and dancing were also features at the Monday evening reception. The entertainment committee was very active in looking after the comfort of the guests.

* * *

TUESDAY SOCIAL FEATURES.

On Tuesday, at 2 p.m., an entertainment for the ladies was given in the ballroom at the Chateau Laurier, Cy Warman, poet, taking the leading part.

At 4 p.m. the Parliament Buildings were visited, and at 8 p.m. a visit was made to the House of Commons, where one of the galleries had been reserved for the visiting hardwaremen. Much

There was a big rush at the lunch counter.

interest was evidenced in the proceedings in the House of Commons, where the hardwaremen remained until about 10 p.m.

At 10.30 p.m. a collation was held at the Chateau Laurier, where an excellent musical programme was furnished and dancing and other social amusements indulged in.

* * *

WEDNESDAY FEATURES.

On Wednesday morning a group photograph was taken of the hardwaremen gathered at the entrance to the Chateau Laurier.

From 10 to 12 a.m. was spent in a visit to the Eddy Works, the Royal Mint and the Museum.

A ski-jumping contest attracted a large number to Rockliffe Park at 3.30 in the afternoon.

In the evening, at 8 p.m., a theatre party was held at the Dominion Theatre, where the ladies and gentlemen in attendance were the guests of the Canadian Hardware Manufacturers' Exhibitors' Association.

* * *

THURSDAY FEATURES.

On Thursday morning a large number of visitors spent the hours between 10-12 in visiting the Eddy Works, Royal Mint and Museum.

In the afternoon, at 2.30, a drive around the city, starting from the Chateau, was a feature much appreciated, especially by the ladies.

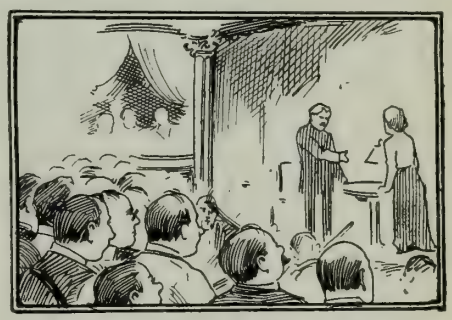
At 8 p.m. a ladies' theatre party was held at the Russell Theatre.

* * *

FRIDAY FEATURES.

A tobogganing party from 10-12, Friday a.m. was held at Cliffside slide. A large number of visitors also took advantage of the opportunity to visit points of interest in the city.

Friday afternoon was spent in shopping and visiting the stores.



Ottawa possesses so many points of interest that visitors had no difficulty in filling in all spare time to good advantage. A programme of entertainment for ladies and visitors was issued by the Canadian Hardware Manufacturers' Exhibitors' Association. The programme was attractively gotten up in pocket size, and contained, in addition to the programme, information regarding street car lines and how to reach the various points of interest and entertainment.

* * *

RETAIL MERCHANTS' LUNCHEON.

One of the unique features of the convention, was a luncheon tendered by the Dominion Board of Retail Merchants' Association, to representatives of the Hardware Exhibitors' Association, Retail Hardware Association, and the hardware trade press.

This very enjoyable event, took place in the private banquet hall of the Chateau Laurier, B. W. Ziemaan, president of the Dominion Board, being in the chair. J. A. Beaudry, treasurer of the Dominion Board and E. M. Trowern, secretary, were at the head and foot of the table, while the others present were: M. R. Griffiths, Adam Taylor, M. Moyer, J. R. Hambly, A. J. Vallerand, Jas. Hardy, B. D. Blackwell, Geo. B. Dowswell, E. C. Matthews, C. E. Stewart, H. E. Elliott, S. H. Alexander, A. Lamel, M. S. Madole, W. U. Boivin, W. Wrigley, J. Billinghurst, D. Cinnamon, N. C. Cameron, J. Caslor, D. Griffiths, A. A. Bittues, W. A. C. Hamilton, F. M. Tobin, C. W. Conn, H. P. Hubbard, J. G. Watson, W. F. Macpherson, D. Deschand, J. A. Hossack, H. Occomore, and J. G. Lorriman.

Theatre night saw the members out in full force.

The menu cards were very tasty, and the frontispiece, reproducing the Chateau Laurier and Parliament Buildings in colors, was much admired.

There were two toasts—Our Guests, and the Trade Press.

The task of proposing the former fell to J. G. Watson, Past President of the Dominion Board, Retail Merchants' Association, J. A. Beaudry, and E. M. Trowern, treasurer and secretary of the board. All of these speakers emphasized the importance of closer relationship between manufacturers, wholesalers, and jobbers.

Response was made by M. R. Griffiths, president of the Exhibitors' Association, H. Occomore, president of the Retail Hardware Association, Jas. Hardy, secretary of the Wholesale Hardware Association and S. H. Alexander, past president of the same association, H. E. Elliott also responded, on behalf of the Grand Trunk Railway.

The toast to the Trade Press, was proposed by W. U. Boivin, and responded to by W. Wrigley, of Canadian Hardware Journal, and J. G. Lorriman, of Hardware and Metal.

Before the gathering dispersed, A. A. Bittues and F. M. Tobin were also called upon to speak and they expressed themselves as being in favor of the proposal to link together more closely the three great divisions of hardware business.

Features of the Trip to Ottawa

The special train proved a splendid idea.—The members became acquainted in short order.

THE running of special trains from Toronto and Montreal was a happy idea. It brought the members—and their wives—together on a friendly basis, and turned what would otherwise have been a long and wearisome ride into a really enjoyable trip. In this way a basis of intimacy was established long before the trains reached the Capital City.

The Toronto train pulled out at 1.35 p.m. Monday and arrived at Ottawa station about 11 o'clock. Not for a second, however, did the proceedings on board drag. Thanks to the foresight of F. W. Bird & Sons, Hamilton, who handed around square boards of "Neponset" to be used for playing cards, and to the James Stewart Manufacturing Co., Woodstock, who supplied Good Cheer cards, there was ample opportunity for games.

* * *

President Occomore acted as master of ceremonies in the ladies' car, making the ladies acquainted with one another. It was noteworthy that most of the men wandered up to that coach quite frequently.

* * *

The cocks of the north were the first to find their way to the front coach. They made trips back every little while after that.

* * *

A trip to the front coach, by the way, seemed to result in a stimulation of enthusiasm, a general revival of exuberance and a wholesale brimming over of animal spirits.

* * *

The service in the dining car was a treat that was a little unexpected. To those who had anticipated having to roll off at a junction point and grab an ossified sandwich and a mug of muddy coffee at a lunch counter the announcement that a diner had been put on was a great relief.

* * *

The train ran in first to the C. P. R. station at Ottawa. The station hands promptly took the baggage off and started to cart it away. As luck would have it, Robert Smith, of Bolton, happened to be taking a turn up and down the platform and he noticed a suit case going past on the top of a truck which had a familiar look. He promptly called a halt and the baggage was taken back. It was certainly a narrow escape. If the train had pulled down to the Union depot without the baggage it would have been a chilly night for some. The climate of Ottawa is not adapted to sleep minus pyjamas.

* * *

The Montreal special beat the Toronto train in. When the Queen City delegation arrived there were rooms to be had, but the hotels didn't have emissaries out looking for custom by any means.

Eastern members got on at various points along the line. Ex-President Madole joined at Napanee, bringing two members with him.

Fred C. Lariviere, of Montreal, arrived on Wednesday. He was unable to attend sooner, as he had arranged a euchre party for his employees on Tuesday night. After seeing them safely home in carriages, Mr. Lariviere took a few hours' sleep and caught the early morning train to Ottawa. His appearance was hailed with acclaim. Previous to that everyone had been asking: "Where is Mr. Lariviere?" A hardware convention would not be complete without Fred C. Lariviere.

* * *

The Chinic Hardware Co., of Quebec, was well represented. J. McD. Wilson, J. N. Grenier and J. Achille Lachance were present from that firm. "Last thing I did on leaving the store," said Mr. Wilson, "was to put Hardware and Metal in my grip."

Advertise. You must persistently advertise your business. And there are various successful ways of advertising. One of the best advertisements is a satisfied customer, satisfied that he has just what he wanted, at the right price and at the time he needed it. When he sees or uses the article he will always think of the store from which he purchased it.

List of Exhibitors at Ottawa Exhibition

Vast Array of Hardware on Exhibition—Exhibits of a Very High Order—Parts of Some Exhibits Destroyed in Transit.

VISITORS at the Exhibition and Convention in Ottawa this week had an opportunity of seeing one of the largest, if not the largest, arrays of hardware ever gathered together for the inspiration of Canadian hardwaremen.

Members of the Canadian Hardware Manufacturers' Exhibitors' Association spared neither time nor money to make the exhibition a success, and their efforts were not in vain.

Despite the fact that they were badly handicapped by the recent disaster at Howick Hall, the Exhibitors' Association did not let the disaster interfere with their plans, and Machinery Hall, a building with a floor space of 400 x 140 feet, was secured for the exhibition.

Much favorable comment was heard regarding the extent of the displays and the original methods adopted to show the samples to advantage.

Owing to the destruction by fire of a railway car on Friday evening a number of exhibitors lost a considerable amount of advertising matter and samples, and were inconvenienced to some extent on this account.

Many new products of the manufacturers were on exhibition for the first time.

The Grand Trunk Railway System had a very attractive exhibit, one of the novel feature being a moving picture machine showing a trip through the St. Clair Tunnel.

The Canada Metal Co., Toronto, erected a large electric sign showing a mechanic pouring babbitt metal.

A large arch, erected by the Ontario Lantern and Lamp Co. and the Canadian Tungsten Lamp Co., of Hamilton, extended across the centre aisle of Exhibition Hall. The arch was brilliantly lighted with several hundred tungsten lamps.

The public were admitted to the exhibition during the evening, and a large number of Ottawa and Hull citizens took advantage of the opportunity to visit the exhibition.

The following list gives the names of the manufacturers having exhibits, and also the names of the representatives in attendance:—The Alabastine Co., Paris, M. M. Patterson, Alex. Bertram; Grant, Holden, Graham, Ltd., Ottawa, W. E. Cooper, H. Gilliam; Dominion Register Co., Toronto, J. C. O'Connor, Geo. Cameron, D. E. Precount; Geo. C. Kaiting & Son, Galt, Herb. Kaiting; S. F. Bowser & Co., Toronto, W. Y. Robertson, C. C. Henderson, H. Christie; Onward Manufacturing Co., Berlin, T. A. Wetzel, A. L. Higgins; Empire Agencies, N. B. Misener, J. B. Zavitz, F. C. Thompson; Butterworth Foundry Co., Ottawo, C. A. Connor, Wm. Banford; Imperial Oil Co., Toronto, K. F. Cameron, Ottawa, and H. N. Glover, Toronto; the Steel Co. of Canada, Ltd., Hamilton, H. T. Diplock, Fred Perego, W. A. Irwin, L. Krieger; Clare Bros., Ltd., Preston, H. Clare, M. Davies, Dave Aitcheson; the Jas. Smart Manufacturing Co., Brockville, J. A. Turnbull, Geo. Adams, J. Thompson, Jas. Gardner, Mr. Reynolds, Mr. Weatherson; the Ottawa Paint and Varnish Co., Ottawa, E. Street, A. Ayres, R. Hickman; Moffatt Stove Co., Weston, T. L. Moffatt, J. R. Moffatt, H. A. Stevenson, J. S. Millar; Dominion Iron and Steel Co., Sydney, N.S., Max Morell; G. M. Johnston, Mr. Street; the Canadian Buffalo Sled Co., Preston, Frank Melton; Radiant Electric Co., Grimsby, T. E. Hewitt, S. W. Canuff; the Canada Metal Co., Toronto, W. J. Harris, jun., A. E. Byers, S. Prevost; Northern Aluminum Co., Toronto, R. H. Osborne, A. H. Pannel, W. H. Garvock; Meakins & Sons, Hamilton, J. W. Rayner, H. Charles; the Renfrew Electric Co., Renfrew, C. E. Breckenridge, H. M. Ball; Gillette Safety Razor Co., Montreal, A. A. Bittues, N. Peterson, J. D. Dunn, D. P. Cotter; the Lufkin Rule Co. of Canada, Ltd., Windsor, Ont., J. A. Hossack, E. Russell; the Brantford Roofing Co., Brantford, Ont., G. S. Matthews, Fred Chalcraft, R. L. Shepard, J. A. Virtue, G. N. Huff, J. B. Tisdall; Jas. Stewart Manufacturing Co., Woodstock, Ont., C. E. Stewart, Thos. Stewart, E. Utting, Mr. Laffen; the Steel Equipment Co., Ottawa, C. P. Cruickshank, E. N. Knope, Mr. McKnight; Henry Disston & Sons, Toronto, S. Y. Dirigee, S. W. Batty, O. G. Kelly; Cummer, Dowswell & Co., Hamilton, Ont., G. B. Diwswell, F. T. Beine, N. D. Lynn; the Canadian H. W. Johns-Manville Co., Toronto, M. R. Griffiths, J. H. Shaver, J. A. Collins; Taylor, Forbes Co., Guelph, Ont., Adam Taylor, J. N. Taylor, jun., Geo. R. Waters, A. W. Given, C. F. Smallpiece, E. Dansereau; John Morrow Screw & Nut Co., Ingersoll, Ont., Geo. Duncan, H. W. Morrow; Bird & Son, Hamilton, Ont., G. E. Misener, F. T. Brush, E. E. Gledhill, V. M. Noel; Canadian Tap and Die Co., Galt, Ont., Luther Smith; Stratford Manufacturing Co., Stratford, Roy Harris; Ware Manufacturing Co., Oakville, H. H. Speare, M. H. Mairs; Auto Strop Safety Razor Co., Toronto, S. C. Stampleman, N. D. Batterson; Findlay Bros., Carleton Place, D. Findlay, J. K. Findlay, O. Favreo; Boech Bros., Toronto, Jno. Billinghurst, L. J. Levy; Canada Tool Steel Co., Toronto, J. Hamilton Kerr, A. M. Brodie, Bert Eaton; the Springer Lock Manufacturing Co., Belleville, W. C. Springer, J. E. Bennett, Jas. Little; Ker-Ben, Ltd., Almonte, T. W. Kirby, J. E. Bennett; the Gurney Foundry Co., Toronto, E. H. Gurney, W. L. Helliwell (Winnipeg manager), R. J. Lochart (Montreal manager), A. W. Fairbairn, F. W. Esmonde, D. W. Rose, A. J. Ross, R. G. Wright, F. W. Anthony, F. W. Spry; David Maxwell & Sons, St. Marys, Jas. Maxwell, R. S. Doran, J. W. Gallagher; Wilt Twist Drill Co., Walkerville, Ont., H. H. Clark, M. M. Sibley, A. D. Wilt, jun.; the Hall Zyrd Foundry Co., Hespeler, O. Zyrd, A. W. Cain, H. L. Knowles; Oneida Community Co., N. R. Carr, S. Hudson, C. E. MacLaughlin; Barr Registers, Ltd., Trenton, A. Million, J. Johnson; National Acme Co., Montreal, P. F. Millinger, R. L. Kendall, E. C. Atkins Saw Co., Hamilton, H. P. Hubbard, C. R. Hubbard, Jas. Chalmers; Tallman Brass and Metal Co., Hamilton, G. W. McKnight; Flexible Conduit Co., Guelph, J. S. Wheeler; E. B. Eddy, Hull, D. R. Porteous; Dominion Cartridge Co., Montreal, E. Doremus; Canadian Hardware Journal, D. O. McKinnon, W. Wrigley; J. O'Hagan, G. H. Honsburger, C. R. Wilkes; One Minute Washer Co., Toronto, F. J. Ehrhardt; Dominion Sanitary Specialty Co., Ottawa, R. K. Milks; the Beach Foundry Co., Winchester, H. C. Sparling, W. J. Bathgate; Gutta Percha and Rubber Co., Toronto, T. W. McKenney, E. E. Chisholm, H. E. Wiles, E. H. Minns, C. D. Scott; E. T. Wright & Co., Hamilton, H. G. Wright, G. C. Wright, J. W. Shields, J. Craig, G. C. Matheson; Dustbane Manufacturing Co., Ottawa, G. W. Green, W. J. Wellwood; the Williams Chemical Co., Russell, Ont., C. E. McCaffrey, I. McCaffrey; the Pedlar People, Oshawa, A. R. Lemon, H. Peel, F. L. Mason, W. E. G. Ramsay; Richards Wilcox Canadian Co., London, W. R. Yendall, J. C. Brown; Ontario Lantern and Lamp Co., Hamilton, J. W. Moncour, E. G. Cook; Smart-Woods, Ltd., Ottawa, E. J. Brown, W. Strachan, P. Woolconde.

Costain, Geo. D. Davis, R. H. Ecclestone, G. Mallech.

Officers Elected for the Ensuing Year

Men Selected to Direct Affairs of the Two Associations—Friday Sessions of Convention Called Off — City for Next Year's Convention Not Selected Yet.

OTTAWA, Feb. 19.—The election of officers in both associations was held to-day. The Ontario Retail Hardware and Stove Dealers' Association in convention this morning elected officers for the ensuing year as follows:

President—W. F. Macpherson, Prescott.

First Vice-President—C. W. Conn, Tillsonburg.

Second Vice-President—W. J. Carter, Picton.

Executive—James McGregor, Oakville; E. J. Creeper, Owen Sound; D. A. MacNab, Orillia; A. Wideman, Markham; W. W. Bennett, Gananoque; A. J. Wright, Hamilton.

Treasurer—John Caslor, Toronto.

Secretary—W. Wrigley, Toronto.

Auditors—J. W. Peacock and George Mathieson, Toronto.

The question of a meeting place for next year was discussed, but no decision was reached.

It was decided to call off the meetings scheduled for Friday, and the convention was declared over to-day.

At the annual meeting of the Canadian Hardware Manufacturers' Exhibitors, Limited, the following officers were elected:—

President—Adam Taylor, of Taylor-Forbes Co., Guelph.

Vice-Presidents—E. H. Gurney, of

JAMES A. HOSSACK.

Gurney Foundry Co., Toronto; J. W. Moncur, of Ontario Lantern and Lamp Co., Hamilton; Jas. A. Hossack, Lufkin Rule Co., Windsor; John Billinghurst, Boeckh Bros., Toronto; T. D. McFarlane, of McFarlane-Douglas Co., Ottawa; A M. Smith, McClary Manufacturing Co., London.

Directors—M. R. Griffiths, H. W. Johns-Manville Co., Toronto; A. A. Bittues, Gillette Safety Razor Co., Montreal; Chas. Stewart, James Stewart Manufacturing Co., Woodstock; D. Griffith, of B. Greening Wire Co., Hamilton; H. P. Hubbard, E. C. Atkins & Co., Hamilton; L. M. Smith; G. B. Dowswell, Cummer-Dowswell Co., Hamilton; F. M. Tobin, of Tobin Arms Co., Woodstock.

A VALUABLE JUNIOR.

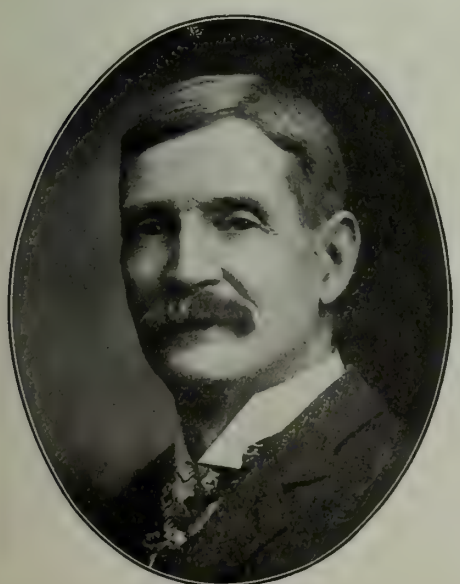
The following article has been contributed by a Hardware and Metal representative whose duties take him to various parts of Canada, calling on the retail hardware trade:

During my acquaintance with Canadian hardware stores I have learned that there are clerks and clerks. One of the first things I do when I enter a store is to make a mental examination of the junior, and to find out whether he likely ever to have a store of his own, and whether he will make a good business man. If I chance to come across an exceptional boy, I usually tell the manager of my conclusions, and invariably I find that it is not news to him. Of all observers, it is the man who pays the wages who is able to size up the clerk best.

Nevertheless, it doesn't take an outsider long to tell a good clerk at first sight. His very first movement when you enter the store tells for good or bad against him: but it is usually his last movement when the store is closing, that gives him away. There are clerks who will deliberately walk to the rear of the store if a customer walks in a few minutes after closing time. That doesn't augur well for his future success.

H. P. HUBBARD.

I have in mind just now a clerk I came across a week or so ago in an Ontario hardware store. He is sixteen years of age, has been in the business three years, and is what some men would call "a cracker jack." My attention was drawn to him one cold morning just after the store had opened. He was waiting on a customer, and the earnest and conscientious manner in which he went about his work, struck me forcibly. I mentioned the matter later to the proprietor, who was so delighted, he commenced to tell me a story of how this boy saved him a hundred dollars.



It ran this way. About six months ago, the store was partially destroyed by fire, and among the goods that suffered were about two hundred pairs of skates, and a lot of plumbing goods. These came in contact with some brown paint which was boiling from the heat, and the action on the skates, etc., was very detrimental. After the fire they looked as though they had been buried for a hundred years.

The proprietor was going away for a week, and remarked to this junior before going that when he returned, arrangements would be made to polish these goods. While he was gone, the clerk began to think for himself. That's a great asset in a clerk—to be able to think for himself without having to be told how to do everything. While the boss was away, he rigged up an old sewing machine stand with a shaft, and made a set of buffing wheels out of a couple of nail brushes, which he cut into

"The Phantom of Fear"

The imagination when seized with Fear will create things more terrible than either sickness or hunger.

A few days ago a young man was selected to present a business proposition to a number of manufacturing firms located in a large industrial centre. He had just completed a "college education," came of a "good family,"—his father had made a success in business, and as far as we can judge raw human material, he measured up, in mentality and in character, above the average.

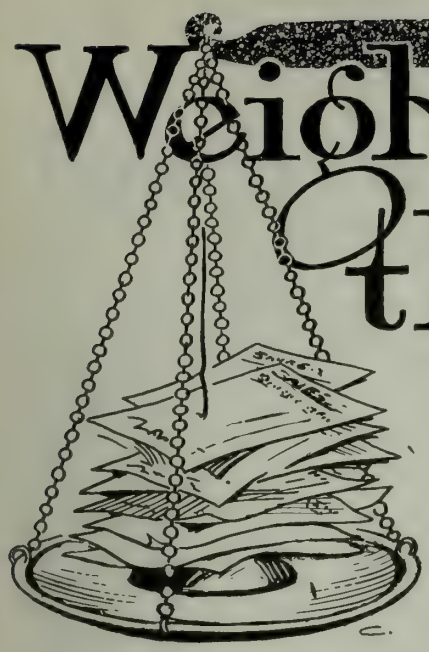
But in the Scheme of Life, the value of a man's ambitions is determined, the quality of his character is tested, and the fibre of the moral and mental courage that runs through his being is developed and strengthened, by coming in contact with the realities of life. No man can predict, with any degree of certainty, this thing or that of any other man until his sincerity has been called up for judgment before the Court of Experience.

After a preliminary training in New York City, this young man started on his first business trip; with all necessary information, money, opportunity, an unusual business proposition to place before his prospects and a fine position awaiting him as Assistant Manager of a Magazine, if he proved to be made of the right substance.

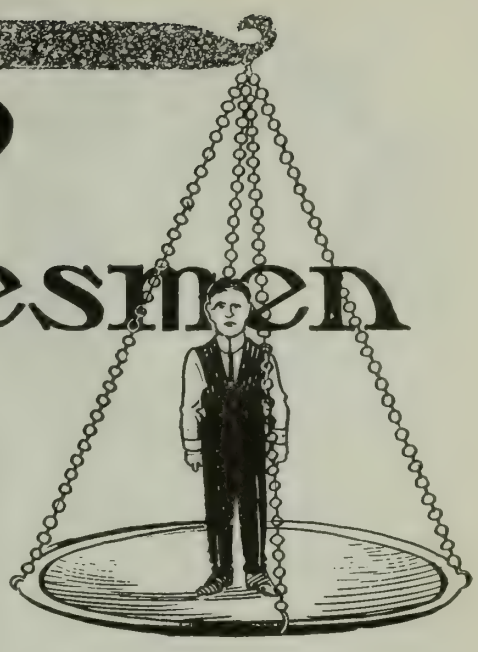
When the train pulled out from the Grand Central Station, facts, realities, verities and uncertainties came thudding through his brain. For the first time the threads of safety, certainty and security were severed. Day-dreams tottered and fell clattering one by one. College illusions and fancies were turned to for assistance, but these castles had crumbled to white ashes. Bubbles of conceit bursted and vanished,—the mirage had disappeared, and everywhere stood silhouetted the great black shadows of Reality—the necessity of dealing with life on the strength of his own courage.

WORK, a strange monster, with shapeless hands and stalking feet, confronted him at every turn. He planned to return home at the first station stop but did not have the courage—his entire being was frozen in a block of life's cold and rigid uncertainties. When he stepped from the train strangers were everywhere—humanity looked different than it ever had. He went to his room and retired at three o'clock in the afternoon. In a little while he arose and with trembling hands fumbled through his lists of business prospects, and each of these manufacturing firms had been transformed into a "phantom."

The next day he passed by the door of a few business houses but returned to the hotel without making a single call. In a little while he wired for money and when this came the fear of being forced to meet life on his own individual strength was temporarily relieved, but still the Night of Work hung about him like a dismal fog.



For twenty-two days he sat in the lobby of his hotel or turned restlessly in his bed, his mind constantly filled with the Phantom of Fear. Around every place of business he built, with his imagination, a wall filled with dark crevices in which lived the Ruminants, Owls, Bats and Dragons of Fear. On the evening of the twenty-second day he returned to New York City, pursued and beaten by a phantom—a thing that does not exist.



And the Phantom of Fear has forced the imagination to create all the ghosts and ghouls that ever haunted either the "grave-yard" or the courage of man.

Weighing up the Salesmen

By William Cambell

In this article prepared for Hardware & Metal, Mr. Cambell, expert accountant, deals with the necessity of operating the business on a systematic basis. He maintains that the individual work of each salesman should be definitely known. In this way only can the dealer judge, with any degree of accuracy, who are the most valuable salesmen, and how this knowledge can be used to get the best results from the entire staff. This is fourth in the series.

SOME years ago a business of comparatively small size changed hands. The first owner had not made much headway with it. He was the kind of man who makes a splendid employee but a poor employer. When working under direction he proved himself capable, aggressive, careful in detail—a brilliant salesman. On launching a business on his own account, he found new responsibilities saddled upon him which bewildered him. The detail and careful planning ahead which falls to the lot of an executive head were beyond him. He let matters slide, devoting his time to superintending sales. In other words, he worked *in the present* as the average employee does and let the future provide for itself.

Needless to state, poor Dempsey's experience as proprietor of a retail store was a short one and if not exactly disastrous was in a sense very inglorious. It took less than a year to run the business into a bad hole from which Dempsey extricated himself by selling out. The savings he had invested in the business were partly wiped out, but he was lucky in escaping with anything left at all. He secured his old position back and I understand is there to-day. He is doing as well as ever and each year adds to his neat pile of savings. He is, I may say, in his proper element.

System, His Cardinal Creed.

The man who bought out the business was a hard-headed fellow who had been in the commission business for some years. Harding, we will call him. He did not know anything about running a retail store but he did know the primary elements of successful business. He was the stamp of man who could take hold of any kind of a business, carefully get down to the roots of it and find out how that business needed to be run to get the best results out of it. He had a keen instinct for essentials and he believed in system as the cardinal creed of the business man.

Immediately on completing the deal whereby he secured the almost defunct Dempsey store, he came to me.

"This business," he explained, "is in bad shape. I am prepared to put in enough cash at the start to get it on a right basis. After that it has got to be put on a paying basis at once. We'll have to go through it with a dark lantern, you and me, and find exactly what's needed."

We went at it; and needless to state, found the business to be in a waterlogged condition. The systems Dempsey had put in were hopelessly inadequate and the details had been loosely arranged. We worked at it hard for some time and finally succeeded in putting in a system which seemed to fit the requirements of that class of business. A thoroughly experienced merchandising man was put in charge of the sales campaign. Harding, himself, camped on the system end of the business. He had it working like a well-greased machine in no time.

The business has grown many times over. A huge business oak has grown from the acorn that Dempsey planted. It must almost make him dizzy when he contemplates the store that has been built up and thinks of the wobbling little concern it was at the start.

Of all the systems we put in, there was one that I believe paid us best of all. This, at any rate, is the firm belief of Harding himself. It was a plan for keeping track of the work of the sales staff, which enabled him to judge accurately the worth of each employee. By means of this system he kept his sales staff as close to efficient as it is possible to do.

Weigh Up the Clerks.

When a man buys goods for his store he takes care to get good value; he tries to get articles that will yield a good margin of profit. Do you weigh up your clerks in the same way? Large departmental stores do this, in addition to dividing their store into departments. Your business may not yet be large enough to divide into departments, but there is no reason why you should not make every clerk a *Department*, and find out what clerk gives you the largest profit. Try it, and you will probably be surprised at the difference shown when you find that one or two salesmen are far ahead of their fellows. Study their methods and get others like them.

In teams playing for sport they weed out the weak men and so build up a team that wins the coveted trophy. Surely a business is at least as worthy of being built up as a baseball team. Yet how few businesses are run on such keen lines as a successful baseball team?

Do you take an analysis of your salesmen every week or month? Probably you know that it would be a good thing to do but are not sure of the best way to do it and so let the matter slide.

In order to check the men's sales, you will require either a cash register or to furnish each one with a duplicate counter book, one copy of sale to be handed in or filed as the sale is made out. Have a stick file for each salesman's slips, add them up every day and enter them in a record book. You will then soon find out who is selling the most goods.

(Continued on page 57.

Does Pampering the Public Pay?

Are merchants pampering their customers more than they should? Is it a paying investment to give them service to which they are not entitled, and which is unreasonable? To what extent is this being done, and where is it to be found most? These and other questions are discussed in this article by Mr. Byers, who gathered the information especially for this paper. The instances he cites are interesting, and the conclusions he has arrived at are worth close consideration.—The Editor.

Written for Hardware & Metal by C. W. Byers.

ALL other things being equal—that is to say, assuming that all merchants are more or less congenial, that their goods are comparatively good—it is the merchant who has the most rapid delivery, he who will most readily pander to the whims of his customer, and who is not too particular when he gets his bill paid; he is the man who is most likely soon to double his turnover, if not his net profit.

Knowing this, it has come to pass that every hardwareman in the towns and cities must have his delivery wagon in order to pay; and with a delivery wagon running around with all its attendant expenses, it develops usually into a credit business. In other words, competition in some cities has become so severe, the large stores are pitting against one another, doing little favors here, and being extra obliging there, until it has become an intolerable nuisance, and the public, like a spoilt child, is looking for more, and will cry if it doesn't get it. That is to say, the public is being pampered too much, and they are paying for it through the nose. It is a wonder they never stop to think who is paying for all these extra expenses. One of these days they will, when there is no money to burn.

Temptation in the Telephone.

Many things are to be blamed for this, not the least being chiefly that wonderful invention, the telephone. A woman senator from Colorado passed through Canada recently, and one of the messages she left with her Canadian sisters was to get out and do their business personally, and not to be tied down to the telephone. Telephone business always means expensive delivery wagons and long waits if parcels are sent C.O.D.

A man in Ontario made a purchase by mail at one of the large stores recently. Shortly afterwards his home was burned down, but the goods he had purchased were saved. He was short of money, so he wrote to this firm, asking them to allow something on the goods. They not only returned him the price of the goods, but told him to keep them as well. A splendid ad., but rather hard on that man from the standpoint of thrift and manliness, and rather hard on other stores who are unable to indulge in such philanthropy. Ten to one, that customer will get a swelled head, and will try the game on some other dealer. He will imagine all storekeepers willing and able to pamper him similarly.

What of the man who refuses to give credit, and expects his customers to carry their purchases home in their arms? Is he to suffer and to go into bankruptcy because he refuses to pamper the public?

It depends very much on how he buys and how he sells. To begin with, it is only natural that by buying judiciously he will be in a position to sell certain goods at a lower figure than his competitor across the way, who has to obtain good figures to pay for his deliveries of five cents worth of tacks a mile or two from the store.

There is a difference, however, between changing goods to satisfy a customer and advertising the fact. The large departmental stores who adopt the policy of "money back if not satisfied" are most guilty of pampering the public. While it must be admitted they are carrying the thing too far, at the same time one must admit that some of them handle their business with consummate skill.

ORDERS NOW BEING TAKEN.

In a recent issue of Hardware and Metal two pictures of the Frothingham & Workman fire, at Montreal, were published. It has been pointed out that these may give an erroneous impression as to the amount of damage done. One picture showed the commencement of the fire. It should have been stated that the two pictures were not of the same portion of the building, for while the main warehouse was demolished, the officers, sample rooms, etc., at the front were not damaged, except by water. As a matter of fact, orders are now being filled from this building and all customers are being taken care of as formerly.

METAL FURNITURE.

The applications of steel for domestic purposes in place of wood have been more extensive in America than on this side of the Atlantic. Steel doors, window frames, cabinets, bookshelves, and other articles of furniture are common, and there is no doubt that this development has been the result of the public demand during recent years for fireproof buildings and structures of all kinds. The manufacture of such furnishings, also, is more adapted to the machine production and repetition work which are characteristic of American industry. In this country a beginning seems to have been made with office and library fittings of sheet metal painted to imitate the grain of wood, and the alert furnishing ironmonger will do well to watch the progress of this innovation with a view to future business. If we may believe Thomas A. Edison, wooden furniture is destined to be entirely replaced by steel, at any rate for all ordinary purposes. The inventor is reported to have said recently: "An absolute law appears to be operating to substitute steel for wood in the making of furniture. This law is the increasing cost of wood, and soon all furniture will be made of steel, since the steel required for a given piece of furniture costs only one-fifth as much as the wood would cost for the same piece of furniture. Steel furniture is light, since only a little steel is required, and polished steel takes a beautiful finish. It can be finished in perfect imitation of mahogany, walnut, cherry, maple, oak, or any other wood. The babies of the next generation will sit in steel high-chairs and eat from steel tables. They will not know what wooden furniture is."—Ironmonger.

WINNIPEG R.M.A. ANNUAL.

Winnipeg Retail Merchants' Association elected their officers for the year at the first annual meeting recently. These officers are:—

President, J. A. Banfield; first vice-president, John H. Treleaven; second vice-president, C. H. Mulvey; treasurer, J. McNeil; secretary, J. F. Kennedy.

The following five members were appointed as delegates to the provincial board, W. T. Devlin, H. P. Story, C. H. Mulvey, W. J. McPherson and A. Connell, with H. Chevrier and J. F. Kennedy, ex-officio.

J. F. Kennedy, secretary, in his report, showed that since the inauguration of the Winnipeg branch, last September, 175 members have been enrolled. It was chiefly through representations, he said, made by the association, that the city council decided in favor of an exhibition in 1914.

It was reported that the business-tax committee, under the chairmanship of J. A. Banfield, had done excellent work, and as soon as all the data with regard to the systems in other cities has been obtained, the solicitor will take action.

W. T. Devlin, chairman of the overhanging signs committee, reported progress, and an amendment to the present city charter is being promoted during the present sitting of the legislature, to enable the city council to regulate these signs.

The report of the fire insurance committee was presented by Secretary J. F. Kennedy, and an explanatory address was given by the insurance expert to the association, G. K. W. Watson.

A deputation of the members, together with H. Whitla, K.C., have opposed amendments objectionable to the retail trade to the Bulk Sales Act, the Chattel Mortgage Act and the King's Bench Act.

The following were elected the new fire insurance committee, who will have the expert assistance of G. K. W. Watson: Messrs. Story, Andrews, Munro, Slasor and Carter.

CRITICIZE THE GOVERNMENT.

Claim Saskatchewan Legislators Acted Unconstitutionally.

Saskatoon, Sask. — (Special). — Periodical luncheons with a view to arousing more interest in the work of the Retail Merchants' Association, is under consideration by the executive. At the annual meeting this question was brought up and it is likely this course will be decided upon. President J. L. S. Hutchinson was re-elected president, and F. E. Raymond was re-elected secretary. The new members of the executive are C. Arden, vice-president, W. A. Rathbun, second vice-president, and F. E. Guppy, treasurer.

Some informal discussion occurred regarding the manner in which legislation had been "railroaded" through by the Provincial Government, affecting retailers, as well as trades, such as the Lien Act amendment, and the Wage Act. In the charter, the retail merchants operate under a clause plainly stating that no legislation can be put through affecting retailers without the bills relating to the same being submitted to the association executive. This was not done, so the retailers feel that if they can trip the government up in this matter and show them where they acted unconstitutionally, it will mean that all this new legislation will become void. A resolution was put through that the matter be taken up at the convention in Moose Jaw in February, and that it be made a test case to be taken to Ottawa. The secretary was also instructed to communicate with Dominion Secretary Trowern in regard to the matter.

WEIGHING UP THE SALESMEN.

(Continued from page 55.)

You can go *further than this* and find out who is selling the goods that are bringing you the *best margins of profit.* The man who is selling just advertised goods at a small margin and at a minimum amount of trouble to himself is not the man who is going to help you to build up a big profitable business. When you find you have a good salesman it should be both a pleasure and a profit for you to give him an advance. It is surprising how good salesmen help a business and how poor ones let it down. Study the methods of your salesmen: it will pay you.

Encourage a steady, reliable man; don't be afraid of giving him a word of praise, let him see that he is appreciated. Now that rents are higher and nearly all expenses growing, you must look to the increase of your sales to keep down the percentage of your expenses and one very good way is to dive down into each man's sales and weigh them up. You will find a great deal can be gained in this way, so even if you have a cash register, have counter check books as well, keeping each clerk's sales separate and checking one against the other.

CLAYS AND CLAY PRODUCTS.

Clays or shales suitable for the manufacture of ordinary common and pressed building brick, pottery, tile, sewer pipe, etc., are found widely distributed in almost every province of Canada, and are being utilized wherever there is a demand or a market for clay products. Fire clays or clays suitable for the manufacture of firebrick have been found at only a comparatively few points, including Shubenacadie, N.S., Dirt Hills, Sask., and Clayburn, B.C., and as yet are utilized to a comparatively limited extent only.

Kaolin or china-clay has been found in the county of Argenteuil, Province of Quebec, near St. Remi de Amherst, and a washing plant has been erected for the preparation of the material. The extent and importance of the clay working industry is shown by the value of the production which, in 1912, exceeded $9,000,000, and amongst non-metallic products was next in importance to coal. The consumption probably exceeds this value by at least one-third, owing to the large imports, particularly of firebrick and of earthenware and chinaware.

Mining Journal.

RETAIL MERCHANTS ORGANIZE.

A meeting was held a few days ago of the Merchants' Retail Association of Canada, when a Fort Frances, Ont., branch was organized and officers elected. The meeting was called to order by Mr. J. A. Osborne, president, pro tem, and the following officers were elected:—

President, Geo. Gledhill.

Vice-president, J. A. Osborne.

Secretary-treasurer, Bruce Lloyd.

Executive committee—Mayor Christie, O. Jalbert, A. H. Watson, W. G. Johnson and A. E. Carter.

The local association embraces in its membership every business man in town and starts off with every prospect of success.

THE VILLAGE WISEACRE.

Old Hod Binks is quite a feller, 'bout
the wisest in our town,
And his fund of information has brought
him into renown.
Fer you can't bring up no subject but
he's there with facts galore,
And he sits behind the wood stove, every
day down to the store.

There's no foreign complication that he
can't explain complete,
He is there with facts and figgers, and
he never gets cold feet,
When they put a question to him fer he
gives the answer quick,
And he makes that gang of low-brows at
the hardware look darn sick.

But there's one who's got his number,
one who isn't fooled a bit,
And she calls him good and proper, and
there ain't no doubt of it,
Old Hod Binks' wife has to hustle
'round and 'tend to every chore
While Old Hod is spoutin' wisdom at
the village hardware store.

THE LARGE 24-SHEET POSTER, ADVERTISING S-W PAINTS AND VARNISHES.

"How am I to get the best returns out of my paint business this Spring?"

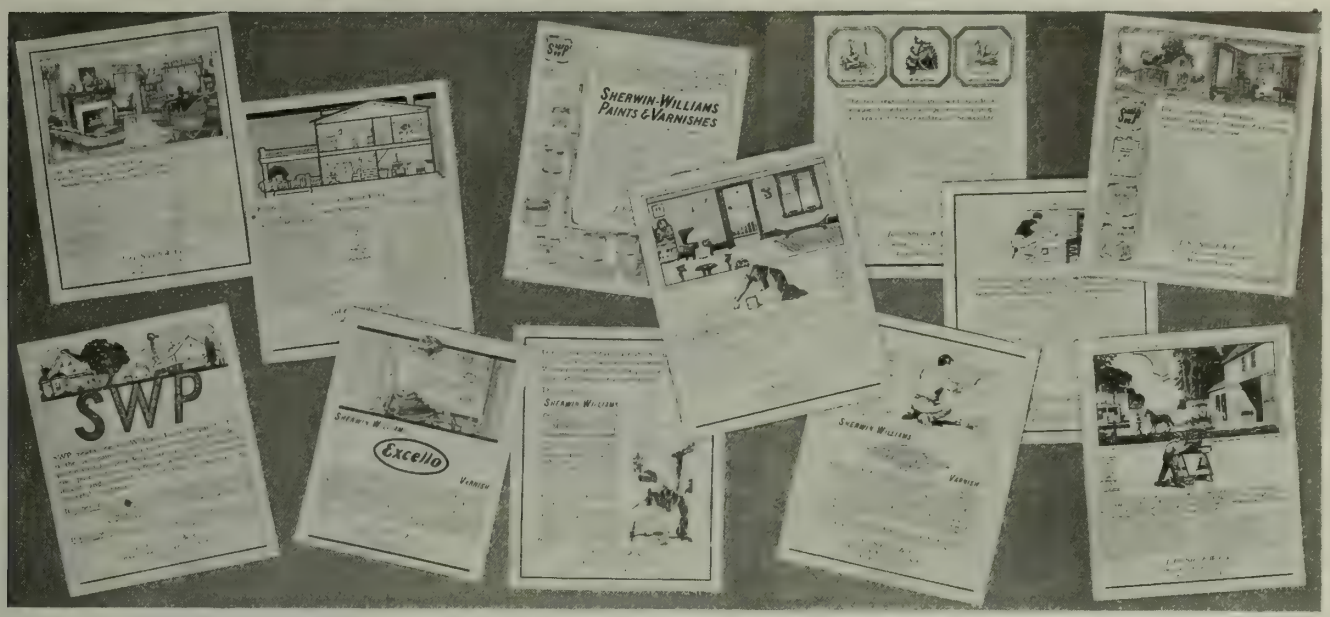
Sherwin-Williams Agents do not have to puzzle out a solution to the above question that aggressive paint dealers are asking themselves these days.

Each year sees a bigger and better Spring Campaign planned and carried out by the Sherwin-Williams Co. and their Agents. S-W Agents have only to arrange their stock and start the ball rolling, for the S-W Spring Campaign is worked out completely for them, and this year it is more complete than ever.

Each Spring, Property Owners become more familiar with S-W Products, through the extensive advertising carried on during the year by the Sherwin-Williams Co., and so the effectiveness of the Spring Campaign is greatly augmented by the good-will and interest already created.

In the larger towns and cities, the above 24-sheet poster will be displayed during the month Property Owners are deciding what paint to use. The size of the poster is bound to make an impression, and being attractively lithographed in colors it will undoubtedly be the most striking poster on the boards.

The S-W Spring Campaign is planned to reach all the prospective users of paints and varnishes. This year S-W Agents are joining with the Sherwin-Williams Co. in a Co-operative Newspaper Campaign. Some of the ads are shown on the opposite page, and we also show the bright and effective window trim that S-W Agents will use to link their stores up with the Spring Campaign.



Is there an S-W Agent in your town? If not, it will pay you to have our Representative call on you.

British Columbia Dealers Robbed of Million a Year

At Annual Convention in Victoria They "Beard the Government in Its Den" and Demand Legislative Changes—Ridiculous Laws That Favor Delinquents—Farmers Get Cheap Government Money and Compete Against Merchants.

Prepared for Hardware and Metal by Special Correspondent.

VICTORIA, B.C., Feb. 18.—The anual two-day session of the Retail Merchants' Association of British Columbia, which opened on Monday of last week at the Empress Hotel, closed the following evening after six consecutive and spirited sessions. As a result of the discussion on the different questions of interest to the trade in this province, in which delegates from the far interior had joined with those from the Coast, certain conclusions were reached which were laid before Attorney-General Bowser on Tuesday afternoon. The Minister received the strong delegation which waited on him, cordially, and promised that the representations made would receive careful consideration. F. W. Welsh, the Association's president, acted as spokesman and Hon. Mr. Bowser congratulated him on his lucid exposition of the issues.

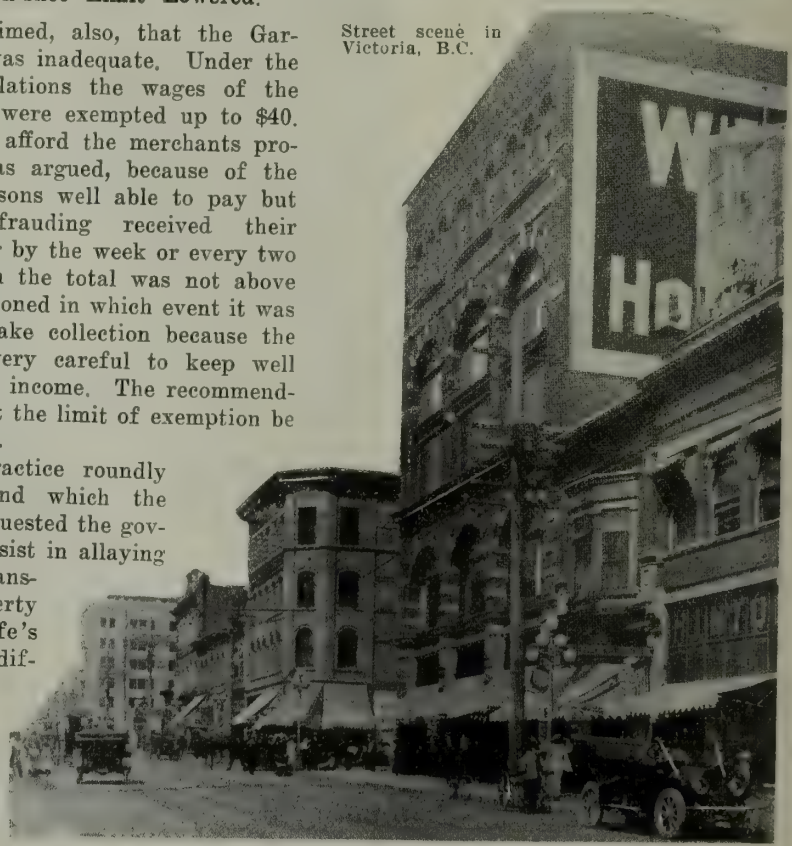
Dead-Beat Losses Mount High.

In practically every case the representations made were along the line of giving those engaged in the retail trade more protection against the class of people commonly known as "dead beats." Statistics, it was stated, proved that the total loss of the B.C. merchants from bad debts in 1912 was $982,000—or just about a round $1,000,000. In the State of Washington in the same year it was $1,750,000.

These figures were quoted in substantiation of the assertion that government assistance was needed, the added statement being made that, if such protective measures could be adopted as would wipe out this loss, the cost of living, over which there was such an outcry, might be reduced to a similar extent. In this connection it was declared that the organization did not exist to tamper with prices, it having put itself on record as being in favor of unhampered competition. What was wanted was more protection and this end was being sought by the formation of more branches and binding them closer together.

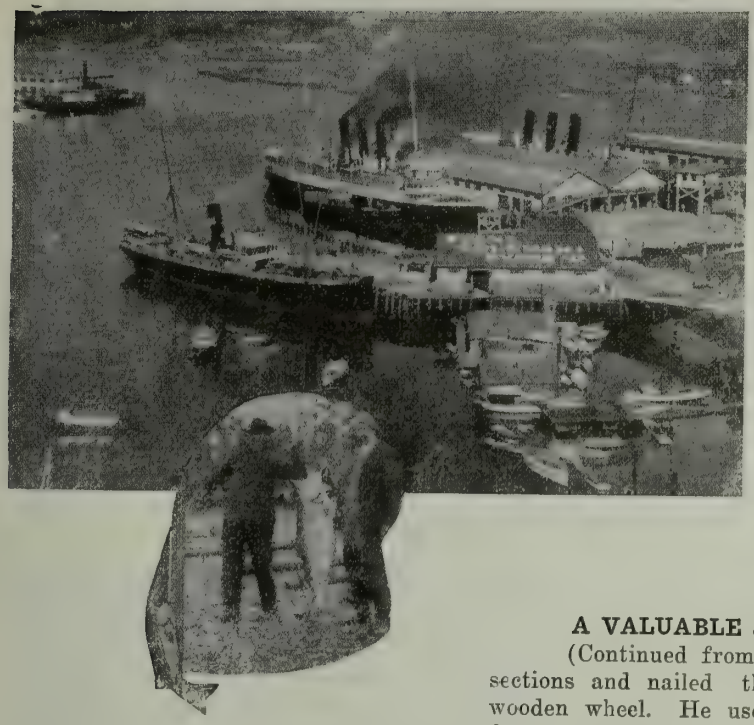
One of the first questions dealt with was the "Capias Act" as it now stands on the statute books. The opinion was that it is not adequate. Under its provisions a person owing less than $50 cannot be detained, if an attempt is made to leave, by the jurisdiction of the court. It was asked that the amount be reduced to $10 and that power be given the stipendiary magistrates to accept and to act on affidavits of merchants swearing that any individual is in their debt for any specified sum and is attempting to leave the community in question.

Reference was made to the B.C. Loan Act the contention being that, in some instances, the farmers were taking an unfair advantage of the privilege they have been extended in having government funds placed at their disposal at 4 per cent. Co-operative societies had been formed, it was stated, in direct competition with the merchants which was not fair or just, and could not have been what was intended by the legislators.



Want Garnishee Limit Lowered.

It was claimed, also, that the Garnishee Law was inadequate. Under the existing regulations the wages of the man in debt were exempted up to $40. This did not afford the merchants protection, it was argued, because of the fact that persons well able to pay but bent on defrauding received their cheques either by the week or every two weeks. Often the total was not above the sum mentioned in which event it was difficult to make collection because the debtor was very careful to keep well abreast of his income. The recommendation was that the limit of exemption be placed at $10.



Another practice roundly condemned and which the merchants requested the government to assist in allaying is that of transferring property to the wife's name when in difficulties. It was affirmed that this was exceedingly common in British Columbia; that many confirmed "dead beats" had reduced it to a science and that those engaged in the trade were suffering to the extent of thousands of dollars annually as a result. As a remedy it was suggested that the wife be made jointly liable for goods sold for the maintenance of the household.

Cheques Used and No Funds.

That something should be done to prevent the spread of the habit, which was said to be becoming more general, of signing cheques without having the funds to cover them was another conclusion. The delegates said that they could make a fine display of cheques returned from banks marked "N. S. F." if they were to be produced. It might be argued that there was the usual recourse under the Criminal Code through the police court but, it was answered, it seemed to be exceedingly difficult to obtain convictions. That there should be some more

Street scene in Victoria, B.C.

Harbor scene at Victoria, B. C., where the convention was held. In the insert is a sample of British Columbia sockeye salmon which has helped to make the province famous.

severe penalty was the declaration of the Convention.

Bonding of Collection Agents.

The collection agent also was discussed. There have been a number of instances, it was said, of Americans coming to the province, setting up in business, collecting several thousand dollars and leaving for the other side again without saying good-bye. It was suggested that this would be remedied if all collection agencies were bonded in an adequate sum by the provincial government so that those who placed their accounts in such hands for liquidation might be reasonably sure of securing the returns.

Uniform Closing.

Another subject receiving general support of the convention was, fixing the daily hour of closing of all retail stores, and the closing of all of them in one afternoon of each week; opinions differed as to who has the power to legislate, the Provincial or the Dominion Parliament. This the Attorney-General will consider.

Mr. Lorrimer of the C. P. R. was present and gave answers to many questions concerning freight charges, demurrage, theft from goods in transit especially from those on ocean bills of lading. Addresses were given on advertising, cost of doing business, calculations of profit on cost or selling price, etc., etc. Not a slack moment, and everything well and clearly discussed.

It was decided that the next annual convention will be held in Victoria, B.C., in February of 1914, on dates synchronizing with the session of the provincial legislature.

A VALUABLE JUNIOR.

(Continued from page 53.

sections and nailed them around a wooden wheel. He used finer brushes for polishing wheels. With the aid of a little metal polish and a scraper, he was able to remove the paint, and when the boss returned, he found scores of the skates looking as good as they did before the fire. He told me that he could afford to pay wages to a clerk like that. And he bought him a new buffing machine.

There is another feature about this clerk that I like. He is loyal to his boss and his store. His name is Harvey Curry, and he is employed by The Adamson Hardware Co., Orangeville, Ont.

AND THERE YOU ARE.

An agriculturist is a farmer who owns an automobile.

The man who invented the cabaret put the din in dinner and took the rest out of restaurant.

* * *

On the highway of success you can go as far as you darned please without fear of getting pinched.

LEGISLATION CHANGES WANTED.

The merchants of British Columbia have a large order to fill if they are to remove from the statute books of the Pacific Coast Province the unfair legislation now chalked down against them. As reported in the accompanying article, they waited on the Government last week and carefully laid before the Attorney-General facts and figures demonstrating that they were actually being robbed of about a million dollars a year by delinquents and dead-beats.

Their deputation to the Government requested among other things:—

1.—*Amendment to the "Capias Act" so that a person can be detained from moving if he owes* $10 *or more, instead of* $50 *or more.*

2.—*Discontinuance of government loans at* 4% *to farmers for establishing co-operative societies.*

3.—*Lowering of garnishee limit from* $40 *to* $10.

4.—*A law to make the wife liable with the husband for debts accrued by either.*

5.—*Preventive measures to alleviate the facility with which cheques are signed when no funds exist in the bank.*

6.—*The bonding of all collecting agencies by the provincial government.*

News that a new telescope is to bring the moon within twenty-nine miles of earth begins to interest the real estate men.

HARDWARE AND METAL

VOL. XXVI. No. 7 Toronto, Canada, February 21, 1914 Two Dollars per Year

Officers Advance Valuable Suggestions

THE reports of the officers submitted at the Ottawa convention of the Ontario Retail Hardware and Stove Dealers' Association were filled with valuable suggestions—ideas advanced with the purpose of making the association a more active force. That the past had been given over largely to problems of organization and that the time had now come when the association should be made virile and potent in its influence for the improvement of trade conditions, was the view that was reflected in the annual reports.

President Occomore's address touched on several topics of a decidedly vital nature, including the relations between the O.R.H. & S.D.A. and the C.H.M.E.A. At time of writing, this matter stands in abeyance to be discussed between the two bodies later. It is assured that an arrangement will be reached on certain points concerning the division of responsibility, and the making of arrangements for future exhibitions and conventions. The president also touched upon the advisability of effecting an arrangement with the Retail Merchants' Association, whereby it would be possible for the hardwaremen to act in concert with the other trade organizations in matters affecting all trades. That a united front would make any representations for legislation or for the amelioration of abuses more effective is, of course, apparent. An arrangement along the lines that Mr. Occomore suggested should, therefore, prove beneficial.

The general tone of the president's address was directly in accord with conditions as he had found them during his tenure of office.

He did not advance claims on the score of the achievements of the association in the past, conceding rather that the time, up to the present, had been devoted to building up to a position where the association would be able to make itself a practical, active and potent force. His address tended all toward the one point, to instil the idea that the time had come when the association would have to assume works which would be of tangible and direct benefit.

First Vice-President Macpherson followed with a report which fairly bristled with practical suggestions. Mr. Macpherson has been going into the work of hardware trade organizations very thoroughly during the past year and has become acquainted with the methods of the state associations in the United States. The ideas he outlined in his report are all good. If they can be put into operation during the coming year, the members will benefit in the most tangible way. Space does not allow of going into each suggestion in detail, but mention may be made of two which contain the germs of practical reforms. One is the establishment of district chairmen to keep the membership growing and to sustain interest in association work. The other was the establishment of a freight audit bureau. Mr. Macpherson presented figures on the last point which proved eye openers to the majority present. If Mr. Macpherson starts his tenure as president with the inauguration of the new features he has suggested, the success of his term in office is assured.

A Wrong To Be Righted

DISHONESTY is surely protected by the existing Capias Act in British Columbia. Under the provisions of that law no one owing a merchant less than $50 can be detained by the courts if he desires to decamp to other parts.

This represents the brand of injustice the retailer has been up against for years, not only in British Columbia, but in other provinces. The government there is actually shielding under its wings dead-beats who bleed the dealers who befriend them in their days of alleged penury. How such a law found its way to the statute books, Heaven only knows. Unfair critics maintain that the merchant has himself to blame for not being more careful in the extension of credit. That may be true in a sense, but it certainly denotes a warm heart and a Christian spirit when a dealer succumbs to a hard-luck tale from even a polished actor of the dead-beat type. Then again not all credit applicants are dead-beats. Some among them deserve consideration because they are honest. Just how a man can separate the wheat from the chaff becomes the problem, and in his endeavor to do what is fair for the worthy, he is entitled to the protection of the government from the wily ones who make it their business to rob the retail trade.

This problem was gone into thoroughly at the convention of British Columbia Retail Merchants' Association last week when the Attorney-General was interviewed. As usual, consideration of their request has been promised; but the merchants of the Pacific Coast province should never rest until that act has been amended. They want the $50 limit reduced to $10, and it appears to be only a matter of honesty that their claims should be met.

Statistics show that in 1912 the British Columbia merchants lost close on to a million dollars through bad accounts. That in itself should waken up any government, no matter how soundly it may be sleeping.

Dishonest Advertising Tabooed

FRAUDULENT ADVERTISING is being universally taken up by ad. clubs in Canada and by various retail organizations. This is something which all honest merchants will appreciate; for it must be said that in the past they have suffered much from the misrepresentations of competitors unscrupulous enough to use false statements in their advertising to promote their own personal gain.

The honest and above-board dealer is the man of whom the trade is always proud, for he is going to make the world from the standpoint of trade conditions better for having sojourned here for the three score years and ten.

It is not an uncommon thing to find a merchant—more often a dry goods or a boot and shoe man than a hardwareman—advertising a "going out of business sale" when that is not at all his intention. People get the idea that here will be found sweeping reductions because of such a sale, when as a matter of fact prices are held pretty much to their normal value.

Subdividers of real estate who advertise and sell property miles out as "within the city limits" have probably caused more harm to the business status of the country than all other thefts combined. No merchant cares to be caught by one of these men and no honest merchant would care to treat his customers similarly.

The age tends to honesty in advertising, and all dealers will stoutly maintain that honesty is the best policy.

The Debtor's Hiding Place

THERE is a phase of the Dominion postal regulations which might receive the attention of the retail merchants to their mutual profit. Postmasters are not permitted to disclose the forwarding addresses of people who have left "for parts unknown." So far as the dry goods merchant is concerned; the grocer, the hardwareman and the coal dealer who have carried them on their books for months, they "have folded their tents like the Arab," and silently stolen—hundreds of dollars worth of merchandize. Yet the postmaster and his clerks have a monopoly in the knowledge of their addresses and the creditors are helpless. All their mail may be forwarded, including the demands for payment of the merchants, but these are powerless if the delinquents ignore the bills, and no attempt can be made to enforce payment by process of law through ignorance of the new abode. In support of existing conditions it will be claimed that every man has a right to live where he pleases without divulging the fact to "the whole town," and that it would be a delicate matter for a postmaster to make public something that the public as a whole have no business to know. On the other hand it should be possible to place it in the discretion of postmasters to give such information where it is for the purpose of securing the payment of legitimate accounts and preventing the escape of liabilities through inability to get into personal touch with the defaulter who would laugh at a paper request for settlement. To avoid the misuse of such information it easily could be arranged for action through a committee of retailers as a guarantee of good faith. As the law stands, many consider that it works out unfairly to business men, and at once accords a privilege to a dishonest man and shields him in his dishonest escape from his indebtedness.

There is one device which Hardware and Metal has discovered as a remedy that will work in the majority of cases, pending some Government action. Send a registered letter to the delinquent debtor and add five cents for an "acknowledgement of receipt." Your registered letter will be forwarded and you will learn from your receipt the new address of the man who has disappeared. Where letter carriers operate you are likely to get even his street address.

Try this out.

Editorial Briefs

A SALESMAN who is made of the right stuff thrives upon opposition.

* * *

THE WEATHER MAN did his share. Nothing could be more favorable than the atmospheric conditions.

* * *

THE WESTERNER chuckles as he reads that the temperature in little old Ontario has touched 25 below.

* * *

THE MANUFACTURERS more than made good their promise to give the best hardware exhibition ever seen on the continent.

* * *

WHAT ARE TERMED "times of business depression" are really only periods of preparation for greater and more pronounced commercial success.

* * *

PRESIDENT OCCOMORE is to be congratulated on the determination he showed all through to get things down to a business basis. He proved himself an eager advocate of action.

CHICOUTIMI DID itself proud. Eight Chicoutimites in all were on hand—and a live, friendly bunch they proved to be.

* * *

THE BRITISH COLUMBIA merchants are hot on the trail of the "dead beat." Here's hoping they track him down in short order.

* * *

WITH MONEY matters on the mend, business will soon pick up. Spring should see things "humming," as they say in the West.

* * *

THE SALESMAN who assimilates all possible knowledge bearing upon the things he has for sale will never be placed in the position where his customer will know more than he does.

* * *

THE HARDWAREMAN who makes a success of his business must necessarily be a keen and aggressive salesman. But you can bet your bottom dollar that he is right on the job when it comes to buying and that he reads market reports.

Current News of the Hardware Trade

New Firms.

Montreal, Que.—Omer De Serres, hardware, has registered.

Business Changes.

Waterloo, Que.—D. M. Poirer have dissolved and new firm has been formed under same style.

Montreal, Que.—Mount Royal Metal Co. have dissolved, G. R. Hutchins continuing under same style.

Loss by Fire.

Banff, Alta.—The Brewster Trading Company suffered a severe loss by fire recently.

Camrose, Alta.—W. G. Duggan, hardware merchant, suffered a serious fire loss recently.

Lachute.—The rope works belonging to Thomas W. Bannerman was completely destroyed by fire recently.

Earlscourt, Ont.—B. A. Blackmore, hardware merchant, suffered loss by fire recently to the extent of about $2,000.

The Wood-Vallance Hardware Co., of Hamilton, suffered loss by fire on Tuesday, Feb. 17th. The heaviest loss, however, was caused by water. Several adjoining buildings were gutted by fire.

Okotoks, Alta.—Fire in the local business district did approximately $200,000 damage before it was got under control. The buildings gutted were the Okotoks Hardware Co., MacLeod Clothing Co., W. E. MacLeod building and Wilson's undertaking establishment.

Business Changes.

Hamilton. — Mackay Manufacturing Co., manufacturers of Weatherstrip, have sold out to M. W. West.

Windsor.—Barton-Netting Co. have bought over the entire stock of electric fixture stocks of the Walkerville Light & Power Co. and the Dominion Electric Co.

Moved into New Quarters.

Winnipeg, Man. — The Aikenhead, Clark Hardware Co. have moved into their new quarters in the Boyd Building, corner Portage ave. and Edmonton st., where they are now carrying on their wholesale and retail business.

Mr. O. L. Herring, who for the past five years has been on the staff of Frost & Wood Co. has been transferred to Montreal and will take charge of their office in that city.

Delhi.—Harry Morgan's hardware store was broken into last night and a little change, amounting to $1.50, was stolen. A watch and a jackknife were also taken.

Vernon, B.C.—The Vernon Hardware Company has begun excavation for a full-sized basement under the store on the corner of Barnard avenue and Seventh street.

Mr. Walter Tait who has been in the employ of the Ashdown Hardware Co., of Calgary, has been appointed as their representative on the road, with headquarters at Calgary.

Fort William.—The Dowswell Sheet Metal Works of West Fort William have completed all arrangements to extend their plant back forty feet, the present site occupying the corner of Ford and Brock streets.

The Hoshal Carmichael Co., Weyburn, expect to occupy their new premises in the N.D. McKinnon Block about March 1st. The workshop of the firm is now located in the basement and the carpenters are busy on the ground floor.

Personal Notes.

Mr. Barnes, hardware merchant, of Port Arthur, paid Toronto a business visit recently.

Mr. Fyfe, hardware merchant, of Fort William, was a business visitor in Toronto this week.

Robert Horne, hardware merchant, Sudbury, was a business visitor in Toronto this week.

James Dandy, hardware merchant, Streetsville, was a business visitor in Toronto this week.

Messrs. Barton and Fisher, hardware merchants, paid a visit to London this week, returning via Toronto to the Hardware Merchants' Convention now being held in Ottawa.

Mr. Smith, of Smith and Chafer, hardware merchants, Bolton, was in Toronto this week on business.

Robt. Horne, hardware merchant, Sudbury, visited Toronto on the way to the Ottawa Exhibition.

W. J. Wells, Heller Brothers, Newark, N.J., was calling on the Montreal hardware trade this week.

Mr. Galager, Union Hardware Company, Torrington, Conn., was in Montreal this week calling on the trade.

Mr. Shay, Goodell Pratt Company, Greenfield, Mass., was calling on the Montreal hardware trade this week.

George Baxter, of Kingsbro & Baxter, Little Current, Manitou, called upon several manufacturers this week in Toronto.

Winnipeg Personals.

Mr. Huck of the Huck-Kleckner Co., Vibanks, spent a day in the city recently, en route to his old home in Russia.

Messrs Keller and Overshaw, of the Latham Hardware Co., Moose Jaw, were in town recently, en route to the East.

Homer Couleg, buyer in the sporting department of the Ashdown Hardware Co., is away on a business trip south and east.

T. E. Yuill, representing the Ashdown Hardware Co., in southern Alberta, was recently operated upon for appendicitis at Lethbridge hospital, but is making rapid progress towards recovery and expects to soon be on the job again.

Among the hardwaremen who are in the city during the Bonspiel are :—R. E. More, Cudworth; F. J. Bradley, Pierson; G. F. Gislason, Elfros; J. P. Cheney, Lyleton; Adam Forbes, Rathwell and W. W. McCubbin, Oak Lake and W. Butchart, Plumas. The latter two gentlemen are famous curlers.

W. D. Barnes, who was for three years chief clerk in the sales department of the Ashdown Hardware Co., has severed his connection with that company and accepted the position of representative for the Continental Oil Co. in Saskatchewan. He was the cecipient of a handsome club bag presented by the Ashdown staff on his leaving.

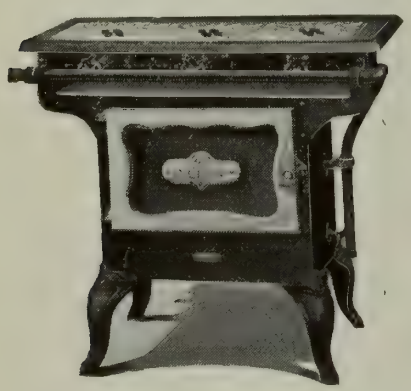
EFFICIENT ADVERTISING.

There are on the market a multitude of advertising schemes designed to attract attention to the store windows. While these are mostly very ingenious, many are without any further merit than their own cleverness, and it is well to consider more than the attractiveness before making any arrangements for their use. It is all right to attract a crowd, but you want the crowd on the inside of your store if it is going to do you any good. While it stands on "the outside looking in" it isn't doing you any more than to obstruct the way for possible purchasers. Devices that can be used just as appropriately for a line of pickles as for advertising hardware have little to recommend them. The merchandise you sell is, generally speaking, and if properly handled, the best means of getting people who are willing to buy, into your store. It is always hard to make me see how you can expect to sell one commodity by advertising another.

New Goods Offered Canadian Hardwaremen

IMPROVED MEASURING TAPES.

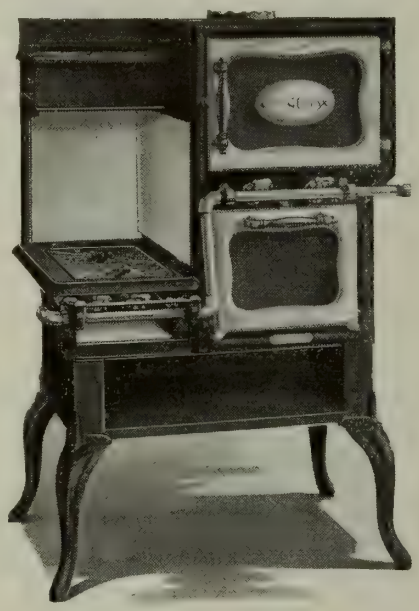
The Lufkin Rule Co., of Canada, Windsor, Ont., announce that they have added to their general line of steel tapes, a steel case liner for leather cases, and a push button opener for winding handles. These changes have been made without advancing prices.



"Challenge" and "Challenge Junior" steel tapes now have leather cases steel lined throughout. This gives the case extraordinary stability, also has made it possible to make it narrower than before by a full ⅛ inch, and hence neater in appearance and more compact. These cases now also have a positive action push button opener of new design for the winding handle.

"Rival" and "Rival Junior" steel tapes have nickel-plated steel cases as before. The cases of these tapes are now also equipped with a positive action winding handle opener same as the "Challenge" and "Challenge Junior" described above.

McCLARY GAS RANGES.



The McClary Mfg. Co., London, Ont., with branch offices throughout Canada are offering the trade two new styles of gas ranges here illustrated. The following claims are made for the new ranges.

"The 456T is a popular type side oven range designed for kitchenettes. The cooking top measures 13½ in. x 25 in. and has two 5 in. Star burners and an improved simmering burner. There is one 5 in. Star burner in the elevated deck over the cooking top. The roasting oven measures 16½ in. x 20½ in. x 12 in. and is equipped with two long cast

McClary's Gas Range No. 415.

burners, which also act as broiler burners. This enables broiling and roasting to be done at the same time, and does not increase the gas consumption. There is one 5 in. Star burner in the bottom of the broiling oven. As the height of this oven is 11 inches, the convenience of this burner, for frying or boiling, is easily apparent, as it is at a convenient height,

McClary's Gas Range No. 456T.

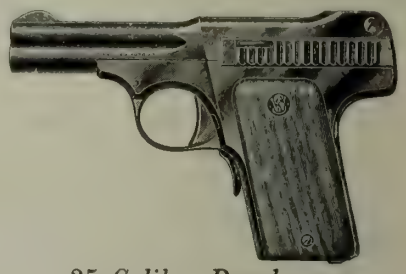
and all odors and steam are drawn up the flue. It also increases the cooking capacity twenty-five per cent. The oven can be equipped with glass door if desired.

The 415 is a thoroughly modern low-oven range having two 5 in. and one 6 in. (or Giant) burner, and simmering burner on top. The cooking top measures 15½ in. x 33½ in. and the grilles are flush with the main top. The oven measures 18x12x11 in., and is heated by one long cast burner. The oven linings are removable, and are anti-rust coated. This is a well-built, compact range which is guaranteed to give satisfaction, and is already in good demand.

35-CALIBRE AUTOMATIC.

Smith and Wesson, Springfield, Mass., are offering the trade the new 35-calibre, seven-shot, automatic pistol here illustrated.

The rear end of the barrel is firmly attached to the frame post, by means of a pivot and interlocking hinge. The forward end is clamped to the frame by the trigger guard; the two parts together forming practically one nickel steel piece. There being no motion between the two a maximum amount of accuracy is insured. By unhooking the guard, as hereinafter described, the barrel can be raised for cleaning.

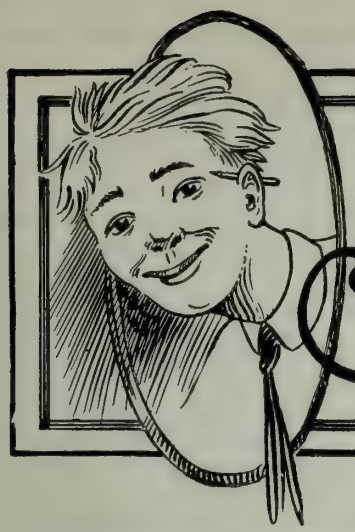


The nickel steel bolt, which is the only part operated by the recoil, is attached to the bolt spring by means of a "bolt rod" and "bolt release catch," and has for an abutment the frame post. It carries the firing pin, extractor and ejector.

The insert, so called for the reason of its being inserted in the rear of the frame, carries the main spring, main spring plunger, and hand operated safety, and is readily removed by withdrawing the two screws which hold it in position. When this is done a clear view can be had of the entire lockwork.

Attention is called to the simplicity of the lockwork in the arm. The sear is pivoted to the hammer and when the hammer is brought back to cocked position the sear is carried upward and pressed forward into the cock notch by the sear spring. The main spring is at the same time compressed by the hammer carrying down the stirrup—the other end of which engages with the main spring plunger carried in the insert.

The trigger operates by engaging with the sear plunger and releasing the sear from its notch.



The arm has two safeties; one a hand-operated non-automatic, engaging with and locking the sear, when the arm is cocked, in position. The other, one of the salient features of the pistol, being automatic and rendering the arm inoperative till depressed by the middle finger by two distinct motions, one transverse the other inward, in the order named. This safe cause a solid block of steel to wedge between the wall of the insert and the sear, locking the sear into the notch in the frame. When the safe is operated it causes the block to lift up above the sear by means of a pin and

35 *Calibre Revolver.*

cam slot. Upon releasing the safe the block at once resumes its original safe position.

The magazine is of the conventional design for this type of arm, and outside of its quality of workmanship has no distinctive features. The magazine catch is on the butt of the pistol and is operated by a transverse motion.

THE JUNIOR CLERK'S PAGE

"OURSELVES, LIMITED."

BROTHER JUNIOR:

We've just finished stock-taking at the store. The "Boss" knows just how much the business has added to his "pile" in the past year. Isn't it rather odd that we never think of taking stock ourselves? Yet we are or we should be a going concern. Honesty, knowledge of hardware and its allied lines, courtesy, salesmanship, and grit, are our stock. What we spend on developing any of these items is capital put into the business. Every squandered dollar leaves a gap in our stock somewhere—every bad habit is a piece of dead stock—and February is the ideal month for cleaning up goods and throwing out rubbish.

The accompanying article, "Ourselves, Limited," was contributed by a hardware clerk in a Quebec town. Hardware and Metal is anxious to hear from other hardware clerks, and will gladly publish contributed articles, suitable for this page.—Editors' Note.

Of course we're holding down our present job in a kind of a way, but maybe we're good for nothing else. We often hear the junior (or ourselves) say, "I do the work and So and So gets the credit; So and So being head clerk, or owner. In the hip pocket of our first pair of overalls was a head clerk's pay check. Honesty, experience, salesmanship, must endorse it before we can cash it. A head clerk works with his head and hands; most of us do so, alas, with our hands and head. He's at the head of the ladder and we're at the foot. It is all perfectly square, and as it should be.

A new year begins. Let us take stock. Let us know ourselves, know our goods, know our customers. The top of the ladder will not look so distant next year. Head clerks are not like kings, they're made, not born—and largely self-made.

THE CAVE OF GLOOM.

James Bonehead runs the ginseng store. His brow with gloom is crowded o'er. He used to have a decent trade, but now it's fallen and decayed. He blames his troubles on his clerks. "They are a set of idle shirks," he often says, "and that's no dream; not one of them has any steam. When I go into other stores and see the clerks skip around the floors, with vim in every move they make, I feel as though my heart would break. Why am I doomed to have employed cheap skates whose heads are but a void? If I had bright and active clerks you'd see my blamed old ginseng works get back the trade that once it had, and take in buck and bone and scad." James Bonehead soon might cease to fret if he would an example set; if he would hump around his shack, and smile clear round his face and back, and look and act as though he thought the world a pretty decent spot, he'd find his clerks would do the same; they'll always play the boss' game. No man with wormwood in his chest can from his hirelings get their best.

Walt Mason.

TUNGSTEN.

The tungsten bearing mineral scheelite has been found at a number of localities in Canada, but the only place at which it has been worked commercially is at Scheelite Mines, Moose River district, N.S. Here it occurs in quartz veins cutting the quartzites and slates of the gold-bearing series. The quartz veins also carry mispickel and several other minerals, but are not gold-bearing. A mill has been erected and about 15 tons of concentrated ore (72 per cent. scheelite) have already been shipped. Scheelite also occurs in the Malaga gold mining district, Halifax County, while at one locality near South East Margaree in Inverness County, C.B., from 300 to 500 pounds of hubernite (Fe, Mn) WO_4, were recovered from a large detached mass of quartz. The mineral has also been noted at New Ross, in Lunenburg County, and at Perry Lake, West Waverley, Halifax County, N.S.

STOREKEEPER VERSUS MERCHANT.

"A storekeeper is a pessimist; a merchant is an optimist. There is no real competition between a storekeeper and a merchant. The storekeeper is a dead one. He is a disappointment. His idea of the mercantile business is simply to get a stock and the public will beat a path to his door. The merchant not only gets a stock, but he builds a path to his door. He makes his place attractive, comfortable and pleasant. He buys what his trade demands and not what he thinks they ought to have. He does not resort to crookedness and trickery. He is a live wire. He invites upright rivalry but will not stoop to the competition of the storekeeper. It is easy to find the merchants and storekeepers in any community. The days of the storekeeper are numbered. Those in that class can by study and work elevate themselves. If they are so lazy and trifling and their ambition is so warped, they will not be missed except by that class of trade that the merchant would not tolerate."—Richmond Merchants' Journal.

REMARKS OF THE JUNIOR CLERK.

Monuments look good, but the finest memorial for any man is the esteem of those who knew him when he lived.

* * *

"The trouble with some men is that they are all the time thinking that tomorrow is going to be better than they are making to-day."

Problems For Sheet Metal Workers

IN Fig. 1 we show a sketch of what is known as a register box or a round to square. Such fittings are very common to the furnace-maker The same method is necessary when an ordinary square to round taper piece is required for an extension to a chimney except that the square portion is made to fit the chimney. No matter what length the piece is required, from the round to square, the same method is adopted.

We will now turn to Fig. 2. The outer lines are the actual elevation of the article required. E F G H is the portion which is to be square to round. A B C D are simply the collars. Having determined the sizes, make the plan as aforementioned which is really a series of angles. Now erect a vertical dotted line I J and draw dotted lines from E J and F J; then extend dotted lines, or transfer the same measurements as shown in Fig. 3.

Taking M as centre, place compass at J in Fig. 2, and open up to G, this being the diameter of the round portion. Then make circle as shown, or half this pattern will do, but by drawing the whole as shown, one can see both views in Figures 2 and 3. Next divide the arc as shown, after erecting the various angles, and be sure to have the portions very accurate, as shown in P 1, 2, 3, 4, 5, 6, 7, 8. These lines represent the various angles required as well as the height from I J and G E. We will now turn to Fig. 4.

Draw a horizontal line R S; then place the point of compass at P, Fig. 3, and open up to 8. Transfer this to R and form R 8; then repeat with P 7, again transferring this measurement to R 7, and so on until all have been transferred. Then from R erect a vertical line equal in height to J I in Fig. 3. Next draw a series of angles as shown T 3, T 4, T 2, T 5, T 1, T 6, T 7, T 8, Fig. 4. These represent the actual length of the lines in Fig. 3, P 1, 2, 3, 4, 5, 6, 7, 8, which is really only the quarter pattern.

We will now turn to Fig. 5. Using E as centre and with radii equal to the various lines shown in Fig. 4, from T 1 to 8 transfer them to Fig. 5 in small arcs. Next open the compass and mark off these arcs with the spaces on quarter circle, P 1, 2, 3, etc., to 8 in Fig. 3. This completes the stretch-out. Next using L in Fig. 5 as centre and E G in Fig. 2 as radius, describe an arc E i, Fig. 5. Then with E as centre and P K in Fig. 3 as radius, form another arc to intersect arc E i. Then draw a line from 1 to E i and from there to E, which will give the desired angle to form one-half of one side. Then draw the various lines the desired height, K A Ai and B and Bi, and so on, which will give the one-half pattern, the outer dotted lines are for the seams. And, if this fitting is required to be made from small pieces, a quarter pattern will be sufficient, except that material must be allowed extra for seams at J 1, Fig. 5, turning the pattern over to form the left or right halves.

HALF PATTERN ALLOWING FOR SEAMS

EARLY CLOSING AT BIGGAR.

The merchants of Biggar, Sask., have secured the passage of an early closing by-law, taking effect February 1, as follows:—

"Whereas the council of the town of Biggar were requested by a petition, signed by more than three-fourths of the ratepayers engaged in the businesses of general merchants and hardware merchants in the said town of Biggar, to pass a by-law for the early closing of the stores in the town of Biggar.

"The council of the town of Biggar enacts as follows:

"No person engaged in the businesses of a general merchant or hardware merchant shall keep open their place of business for the purpose of the transaction of business with the public, after the hour of seven o'clock p.m., except on Saturday, the day immediately preceding a public holiday, and from the 15th until the 24th days of December, both days inclusive.

"For the purpose of this by-law the term general merchant shall include persons selling clothing, boots and shoes, groceries, flour and feed.

"Any persons engaged in the businesses above-mentioned who shall keep open their place of business contrary to this by-law shall be liable on summary conviction before a justice of the peace to a penalty not exceeding five dollars for the first offence and not exceeding ten dollars for succeeding convictions, together with the costs, and in default of payment of penalty and costs the same to be recovered by distress."

CATALOGUES AND BOOKETS.

Souvenir of Royal Visit.

Pilkington Bros., Ltd., glass manufacturers, St. Helens, England, have in book form, a souvenir of the visit of their Majesties, the King and Queen to the Couley Hill Plate Glass Works, July 8, 1913.

The souvenir book, which consists of 40 pages is attractively gotten up, and many excellent half-tone illustrations are shown of the Royal Party inspecting the various sections of the glass works.

Some valuable and interesting data is also given regarding the manufacture of plate glass.

• • •

Carborundum Calendar.

The Carborundum Company, Niagara Falls, N.Y., have issued their 1914 calendar, the illustration representing the American Falls at Niagara.

The calendar is exceedingly attractive, and is quite up to the standard of the calendars which have been issued by the firm during the past five years.

• • •

F. E. Myers Calendar.

F. E. Myers & Bro., Ashland, Ohio, have issued their annual calendar. The 1914 calendar is much similar to the one issued last year and shows the many lines of goods manufactured by the firm.

• • •

Taylor-Forbes Catalogue.

The Taylor-Forbes Co., Ltd., Guelph, Ont., have just issued illustrated Catalogue H 56, of builders' and general hardware. The catalouge consists of 283 pages. Copies have been mailed to a large number of hardware firms.

• • •

Thos. Davidson Catalogue.

The Thos. Davidson Mfg. Co., Montreal, have issued Catalogue No. 42 consisting of 353 pages and featuring enamel-ware, lithographed and pieced tinware, sheet iron and steel ware, range boilers, stoves, aluminum-ware, etc. The catalogue is attractively gotten up and well illustrated.

• • •

Issue Calendar.

The Progressive Manufacturing Co., Torrington, Conn., have recently issued an attractive calendar featuring standard and special machine screws, rivets, threaded wires, specialties in headed work, hollow set screws, bits, etc.

The catalogue is attractively illustrated and shows many lines of specials, screws, etc. Copies will be mailed on request.

A CORRECTION.

In announcing the names of judges in our annual Christmas Window Contest, the results of which appeared in our last issue, we gave the name T. A. Lytle, retail manager, Aikenhead Hardware Co., Toronto. The name should have appeared as W. J. A. Lytle, the error being in the initials as they appeared in our February 1 issue. Mr. Lytle is assistant general manager of the company.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The cold snap which has been experienced recently seems to have caused a slight depression in business all along the line.

Glass manufacturers reported a splendid month for January, but February is if anything a little below par; quotations for larger quantities are being asked for. Hardware lines are a little quiet on the whole, very few changes in prices are reported. Manufacturers and jobbers are optimistic because of the large number of enquiries they are receiving for quotations. Stocks are low, hence, when the buying does begin it will be better than last year. Money is reported a little easier and collections are improving. The West is taking on her usual enthusiastic spirit.

Paint jobbers and manufacturers are a little quiet on account of the severe cold snap. No changes are reported in prices. Metal markets are firm with fair demands. Tin is lower by one cent per lb.

Business men are optimistic and feel that this spring will see a large amount of business being done throughout the whole Dominion.

MONTREAL.

February 18.—The business passing during the past week has been on the increase, although during the cold weather things were at a standstill as travelers were unable to do business and had to lounge around the hotels until the weather became more suitable. Many very interesting stories were told by the drummers when they arrived in town last Saturday. There were a number who experienced very cold weather in country hotels, which were like barns. The water jug was reported by all as having been frozen over during the night. That was one of the most common incidents, but perhaps the most exceptional story related was by one of the travelers from Caverhill, Learmont & Company, of this city. This man was forced to get up and put on his coon coat in order to try to sleep during the night. Perhaps the two days which caused the stop in operations will not be noticed though, as during the last couple of days there has been quite an increase in business, particularly so by mail, which has been very heavy. The travelers are once more on the road, and under more favorable weather conditions business is picking up and orders are being received mostly for sorting requirements, although there is also considerable business being received for spring lines. Apart from the sorting orders going forward, there is quite a demand for the lines which have been mentioned for the past couple of weeks, such as lumber camp supplies, consisting of axes, axe handles, boot calks, cant hooks, and coil chain. There is also quite a demand for maple supplies, consisting principally of sap spouts, sap bits, pails, etc.

There is not a great deal of business being received from the city retailers, as they seem to be holding off as long as possible, and orders, which are few, are simply for stock, which must be had in order to meet demands. There have been a few orders for hockey sticks and other articles used by the sportsman, but they are gradually diminishing, and that business is pretty well over for the season.

There is still the same confidence in the future reported by the travelers among the country merchants, and as collections are quite normal, there does not seem to be much depression felt. There are, of course, some slow accounts, but they are not excessive, and no matter what time of the year it is or how conditions are generally, they will always be found.

The prices this week are unchanged from those of one week ago, and there is nothing interesting or resembling a feature to report.

The Metal Markets.

In the metal market there does not seem to be anything very startling to report as the same conditions are in evidence with an up and down tendency in each of the markets.

Tin.—The conditions on the market this week are practically unchanged from one week ago, although there has been a reduction in ordinary Canada Plates of 15 cents for the smaller sizes while the large sizes have been reduced by twice that amount. On the London market the quotations this week are down from those published one week ago. Spots are quoted at £178 15s, while futures are £180 2s 6d, a decline of £5 10s and £5 7s 6d, respectively. The New York market also shows a decline in price this week and their price is given as $39.55. It is reported that the conditions which have been quiet for the past week have developed into absolute dullness. Buyers are apparently well supplied for the present and orders, to say nothing of enquiries are very scarce. This condition is not surprising to many in view of the extensive buying which took place recently on that market.

Spelter.—The demand is unchanged locally, with the same prices in effect. The London market is also unchanged from one week ago, and the price £21 7s 6d quoted to-day is the same as that of one week ago. New York reports conditions as being unchanged, although their price is five cents under that of one week ago, and is given as $5.25 East St. Louis. The demand is said to be fair, but not enough to create any efforts to make sales at the expense of lower prices.

Lead.—Locally the condition of the market may be termed weak and a further decline in the price is registered, and is now quoted at $5.40, a reduction of 10 cents from last week's quotation. London market seems to be holding up prices, although it is reported that that market is also weak. The quotation of £19 10s is the same as that of one week ago. New York is quoting 10 cents under last week and the figures given is $3.87½ East St. Louis. A report is to the effect that the market is easy at that figure, and also that the reduction is made in order to allow the export of United States lead to foreign markets, as it is said that the supplies there are quite plentiful at present.

Copper.—There is no change in the local market and prices are the same as those of one week ago. London is down 15 shillings in both spots and futures, the quotatons this week being £65 and £65 10s, respectively. The market is reported as being easy at these figures. New York quotes $14.45 East St. Louis, or ten cents under the quotation of one week ago. That market is also reported as being slow and there is very little improvement in consumers' operations.

Antimony.—There is no change in this market. The prices remain the same as does the demand which is only fair.

Iron.—The local market is devoid of interest and the consumption is no more than seasonable with prices remaining unchanged from one week ago. London quotes £2 10s 10d or a decline of 9d from one week ago. That market is said to be in much the same condition as last week. There seems to be a better feeling generally on the New York market, as apparently things are getting on a more established basis. The business closed last week is said to have been fairly good and there is also an improvement this week.

The stove and heating business is unchanged from one week ago and nothing resembling a feature is reported by manufacturers. The gas stove business has not yet started and the fuel range business is about over for the year.

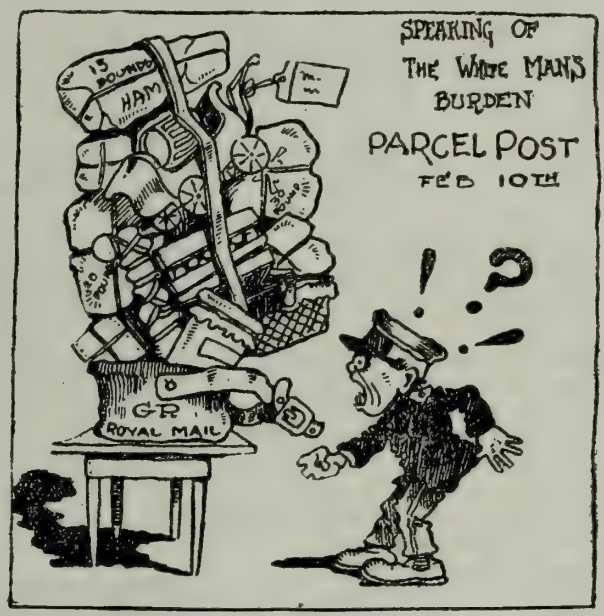
TORONTO.

Toronto, Feb. 19.—The metal market reports seem to be if anything a little improved on last week. No changes are reported with the exception of tin, which stands one cent less than last week. Manufacturers all along the line are preparing for a splendid opening up of business on the approach of spring.

Hardware.

The hardware business is a little quieter than reported last week. A large number of hardware merchants are in attendance at the convention now being held in Ottawa. Quite a number have placed large orders for spring shipment and seem to feel that this spring will see better times for the hardware trade. There seems to be more enquiries for better line of goods than previous. No doubt higher quality goods will be in greater demand.

Cement.



The manufacturers and jobbers of cement report favorable. Their sales are said to be larger for February this year than ever before for the same month. There has, however, been a slight lull during the severe cold snap. The reason for this splendid showing in the cement business is accounted for by two things, first the open winter, and second the fact that builders are now able to manipulate cement in some way so as to be able to use it during colder weather than in times gone by.

One manufacturer stated that the time was not far distant when frost would have little or no effect on cement.

No doubt one can look back to the time when the use of cement during very mild frosty weather, would have been looked upon as ridiculous.

WINNIPEG.

Extremely cold weather and the fact that most of the travelers are in off the road entertaining their customers during any very great activity in the output from the wholesale houses. Trade is said to be more than ordinarily dull but no particular significance is attached to the lull except that the season is opening up a little later than usual.

Pity the Poor Mailman!

An important price change in heavy hardware is a reduction of five cents per spool of 80 lbs. on practically all lines of barb wire. Another change is an advance of 1 cent per lb. on solder.

Prospects look good for a brisk trade in builders' supplies as building permits since the first of the year have run into exceptionally big figures. This applies not only to Winnipeg but to most of the western towns from which reports have been received.

Spring lines of paints and oils are now moving out freely and a reasonable expansion of trade in these lines is assured. People in the West are fast becoming educated that paint is the most effective of money savers either in the village, town or on the farm. Prospects of a good building season also augur well for the paint trade.

An advance of 5 cents per gallon on turpentine is the first change in the price of that commodity announced for a considerable time.

Collections are fair and there are no complaints under this head.

The Department of Trade and Commerce at Ottawa has arranged to send Watson Griffin as a special trade commissioner to the British West Indies to investigate conditions and prepare reports with a view to developing trade with these colonies.

TORONTO QUOTATIONS ON METAL.

Prices are gauged according to quantity purchased.

Electrotypers' Solder	30c		lb.
Brazing Metal	26c		lb.
Ingot Brass, red	14	to 16c	lb.
Ingot Brass, yellow	13	to 15c	lb.
Wire Solder	27½	to 29½c	lb.
Wiping Solder	25	to 27c	lb.
½ and ½ solder	25	to 27c	lb.
Pattern Aluminum	23	to 24c	lb.
Ingot Aluminum 99% pure	19½	to 20½c	lb.
Spelter	$5.35	to $5.65	per 100 lbs.
Copper	15¾	to 17¼c	lb.
Tin	42	to 44c	lb.
Lead	$5.65	to $5.85	
Tinkers' Bar Solder	28	to 29c	lb.

Staff Conventions and Reunions

Convention of the Disston Salesmen

Members of Eastern Sales-force Hold Semi-annual School—Salesmen Make Trips Through the Factory.

The semi-annual school and get-together meeting of the salesmen of Henry Disston & Sons, Philadelphia and Toronto, Can., was recently held at the Philadelphia factory.

The underlying motive for these meetings is the desire to make the men who sell Disston goods not only better acquainted with the manufacture of the goods they handle, but better acquainted with each other as well. An interchange of ideas and experiences between the representatives of a big business is always conducive to a finer corps spirit among the men, and consequently larger interest in the success of the line represented.

This meeting embraced all those members of the Eastern sales force who could attend. Owing to important matters which they had in hand a number of the men were unable to leave their work, but there was enough enthusiasm among those present to make up for any absentees.

While new goods were shown and demonstrated, and the superintendents of the various departments where they were made gave the salesmen much valuable information about their manufacture, the salesmen also made frequent trips through the factory viewing new machines and methods. These were shown and explained to the salesmen so that they could keep abreast of the progress constantly being made in the factory.

The meetings held daily throughout the week, were addressed by a number of speakers as well as various members of the sales force. The convention proved a big success, and the men started out again with increased confidence in the quality of the goods they are called upon to sell, and full of that spirit which recognizes no obstacles, but sweeps the men, and the goods they sell, onward to success.

ATKINS PIONEERS.

The fifth annual banquet of "Atkins Pioneers" was held recently at the Spencer House, Indianapolis. The membership of this organization is made up of employees of the E. C. Atkins Co. who have been associated with the firm for over twenty-five years. Twenty-five years ago the pay-roll of the company was about 200, and of this number 117 are still connected with the company. These annual banquets are gala occasions with the Atkins Company, full of good fellowship and hearty fraternal spirit. The "Atkins Pioneers" were organized February 1, 1906, with a membership of sixty-two, consisting of employees who had been with the firm twenty years or more, either consecutive or in the aggregate. New members are added the first of each year as their time matures. They are nominated and elected by ballot. The object is to foster a closer fraternal feeling and to add a mite of social intercourse to business associations. The poem of the Pioneers, written for the banquet, is as follows:—

We've gathered here to-night, boys,
To sing our songs of cheer,
And talk of all the good things
That have blessed us through the year—
The year that's past and gone, boys,
Which makes us pause to think
That each day we're getting nearer,
Yes, nearer to the brink,
Where we shall pass beyond, boys,
To that other, unknown, bourne
From which the fates decree
No traveler can return.
So while we all rejoice, boys,
In the pleasures of to-night,
And clasp each other's hands with
A grasp that's true and right,
Let's not forget to stop, boys,
For a moment 'midst our cheer,
And for the boys who've left us
Shed an earnest, heartfelt tear.
And let us bow our heads, boys,
In a silent prayer of love
For those we miss so sadly,
As they look down from above.
They are resting from their work, boys,
Of the twenty or more years
That they journeyed on with us.
And they still are Pioneers.

The Canadian factory of the company is located at Hamilton, Ont.

GLASS

Window Plate and Fancy Art Glass

Our stock is the largest in Western Canada, and you have the advantage of being able to order from our nearest branch. This means a saving of time and money, and in many cases of orders that you would be unable to fill had you to await shipments from a distance.

FIVE LARGE STOCKS

are maintained at our different branches. If you are called upon to supply any special order of art glass for which ideas have been supplied you, we have the plant to supply you with anything you desire. Secure our price list and catalogue, and when you are ready

The reputation and standing of Berry Brothers' Varnishes is the result of fifty-six years' honest manufacturing and aggressive publicity.

Wherever varnishes are used or sold, the name Berry Brothers stands for sterling quality and worth.

Dealers who handle Berry Brothers' Varnishes are getting the benefits of our national advertising of these four well-known products:

Liquid Granite—A floor varnish whose name suggests its wonderful durability.

Luxeberry Wood Finish—For the finest rubbed (dull) or polished finish on interior woodwork.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Spar—(It's waterproof)—widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

Methods of Retailing Paints and Varnishes

MONTREAL.

February 18.—The business on the local market this week has kept up well, although the number of orders being received at the present time is not quite as heavy as those of a few weeks ago. There are quite a few shipments going forward at the present time, which consist principally of spring stock. Conditions, that is to say collections, are very good in the country, and although the same cannot be said of the larger centres, there is a better feeling all round.

White Lead.

This market remains unchanged from one week ago, and the demand is much the same. The following prices are still in effect. The tone of the market at these figures is given out as being quite firm.

Linseed Oil.

There is nothing new in this market to report. The same healthy feeling exists under the same quotations of one week ago. The business passing at the present time is quite seasonable.

Prepared Paints.

Apart from the spring business which is quite heavy this year, there is nothing to report. One of the local manufacturers stated to-day that their deliveries for the present year, taking them in weekly periods, were ahead of those of one year ago. Most of the spring orders are starting to move out, and although there are still a number of orders coming in they are not quite so abundant as those received some few weeks ago.

Glass.

There is absolutely nothing to report in this market as the demand is still light with the same prices in effect.

Putty.

There is nothing in this market either as the demand is still light under the same prices.

Turpentine.

Although some of the local dealers have reduced their prices a couple of cents, there are still some who are quoting 68 cents. The lowest quotation to-day, however, was 66 cents. The market is still very firm at these figures. Lots of five barrels and over are quoted one cent cheaper. The reason for the decline in some of the prices is said to be on account of better conditions in the south.

Gasoline.

The demand in this market is still light, the usual spring demand not having started in as yet. The quotations which are still in effect are as follows:

In wood, per gallon	25½
In steel and drums, per gallon	22½
Tank wagon, 100 gallons and over	21

Benzine.

The demand for benzine in this market is unchanged from one week ago, and the same prices are in effect, which are as follows:

In wood, per gallon	23
In steel and drums, per gallon	20
Local tank wagon, 100 gals. and over	19

Coal Oil.

The demand in this market is dropping off a little owing to the days getting longer. The prices, however, are unchanged, and are as follows: American oil, best, per gallon, 21; American oil, tank wagon, 100 gallons and over 17½.

WARNING.

Buyers of Linseed Oil, Boiled or Raw, and Turpentine are warned to be somewhat cautious in buying just at present. Hardware and Metal has information that a quantity of inferior goods has been placed on the market of late. It is significant that no change in prices is reported from the regular sources of supply. The demand is steady and the supply rather lower than usual. We herewith show current prices as given by several reliable manufacturers and dealers.

Raw Oil—

1 *to* 4 *barrels*	60c *per gal.*
5 *to* 9 *barrels*	59c *per gal.*
10 *to* 25 *barrels*	58c *per gal.*

Boiled Oil—

1 *to* 4 *barrels*	63c *per gal.*
5 *to* 9 *barrels*	62c *per gal.*
10 *to* 25 *barrels*	61c *per gal.*

With open prices for carload lots.

Turpentine, Toronto—

Pure Single	*Bbls.*, 70c
2 *to* 4	*Bbls.*, 69c

Montreal—

Pure Single	*Bbls.*, 64c
2 *to* 4	*Bbls.*, 63c

TORONTO.

Toronto, Feb. 19.—Toronto paint manufacturers and jobbers report fair demands, the cold snap caused a slight lull. Dealers are booking orders freely for spring deliveries. Orders are larger in size, prices remain unaltered.

Linseed Oil.

The demand for linseed oil is about normal this week and prices are unchanged as follows:—

Raw linseed oil, 1 to 2 bbls per 9 lbs., 65c; 3 to 5 bbls. per 9 lbs., 63c; 6 to 9 bbls, per 9 lbs., 61c; 10 bbls. open. Boiled linseed oil, 1 to 2 bbls. per 9 lbs., 68c.; 3 to 5 bbls. per 9 lbs., 66c; 6 to 9 bbls., 64c.; 10 bbls., open.

Oil for less than 1 bbl., 7 cents per gallon additional, 5 gallon cans, 50c.; 10-gallon cans, 75c each.

Naval Stores.

No change has taken place in quotations in naval stores. Resin is quoted in 280-lb. gross lots at $6, and in smaller lots at 3½c per pound.

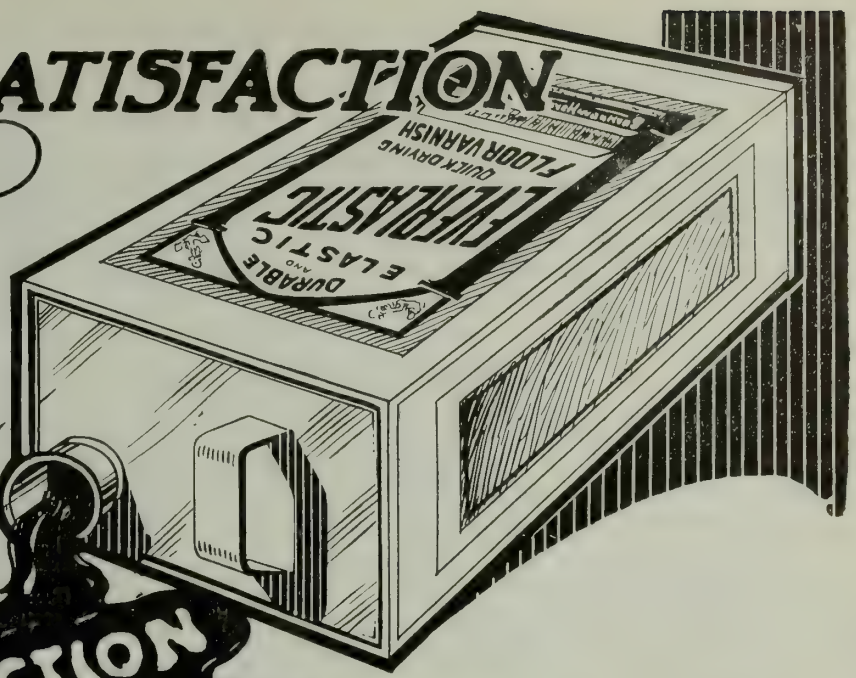
Glass and Putty.

There is a seasonable demand for glass at prices shown in current quotations. Putty quotations are unchanged.

White Lead.

Lead is still being booked for delivery until May 15, at the following prices:—

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.



Prepared Paints.

Spring booking continues active and a large number of dealers, who have been holding back for some time are now sending in orders. These, too are if anything for larger quantities than in previous years.

The salesman who sells every customer isn't always a good salesman. On first thought this may seem like an illogical statement to make, but it is a fact, nevertheless. There are some salesmen who, rather than miss a sale, keep at a customer so persistently that finally the customer buys something he does not like, and later the article is either returned, the buyer finds it convenient to avoid the salesman on his next buying trip, or he may avoid the store altogether, and go some place else to trade.

SPREADS SATISFACTION

on any floor

SATISFACTION

Hard usage is the lot of all floor varnish. It is there to be tramped on, and the whole art of getting floor satisfaction lies in using a varnish that will stand it.

EVERLASTIC QUICK DRYING FLOOR VARNISH

is a specialty—made for floors and right for floors, with just the qualities the service demands. Dries in 7 to 9 hours, and can be walked on the day after application, while it is so tough and elastic that no ordinary dent will crack it. Won't show heel marks and will outlast any other floor varnish we know of.

These qualities have made it the most readily salable floor varnish on the market, and the surest with which to build up a lasting and profitable trade.

Montreal Halifax St. John Toronto Winnipeg

Current Hardware, Metal and Paint Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

MARTIN-SENOUR PAINTS & VARNISHES

"A Repeat Order in Every Can"

Success isn't made up of orders. It is made up of re-orders. A satisfied customer returns to be satisfied again, while a good customer, poorly served, lasts no longer than the shoddy he buys.

Martin-Senour Paints and Varnishes are of best quality — producing best results for the purpose for which they are intended, so that each sale makes a satisfied customer and widens the way for more sales to follow.

Our big *nation-wide* Advertising Campaign in the leading Magazines, Farm, Religious and Commercial Publications will lead many new customers to the stores of our Dealer-agents—but these are only some of the many advantages of the Martin-Senour Full Line Agency.

The individual benefit of offering "100% Pure Paint" to pre-convinced buyers makes selling easy, and the repeat orders in every can build business.

Look well into our exclusive agency proposition. It's bound to interest you. A postal from you will bring particulars.

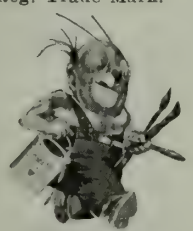
"Muresco helps to sell other lines in your store"

Mr. Dealer:

What about MURESCO this season? You have no line that is easier sold or more profitable on your shelves, and you have no line which will give better satisfaction to your customers than the well-known MURESCO wall finish.

MURESCO is the best wall finish known, and it is made in Canada.

Write at once for agency proposition and prices.



BENJAMIN MOORE & CO., LIMITED

NEW YORK CHICAGO CLEVELAND CARTERET

Stephens Ready-mixed Paints

Reg. Trade Mark.

Copyright.

Make satisfied dealers, because they make satisfied customers; move fast from your shelves because there's a sales-impelling reputation behind them; bring profit and goodwill, because of the way they behave in use.

If you are not a "Stephens" dealer you are overlooking the profitable line in the Paint Business. And the proof of this statement may be found with any of our agents.

May we tell you about our proposition?

G. F. STEPHENS & CO. Limited

Branch at Calgary, Alta. **WINNIPEG, CANADA**

Satisfaction, ab-so-lute-ly

You simply *have* to sell goods that satisfy your customers if you want to hold them. In regard to your paint trade, every time you sell a can of

Jamieson's Pure Prepared Paints

You sell paint that is made with this "consumer satisfaction" constantly in view. We believe in it and we know that no legitimate business can live without it.

We want you to sell Jamieson's Paints. Will You?

R. C. Jamieson & Co., Limited

A New Self-Measuring Gasoline Pump

Rapid-Double Acting-Accurate

¶ Entirely different in principle from any other gasoline pump.

¶ Pumps both on down stroke and up stroke—the only one pump with this feature.

¶ Twice as fast as any other pump on the market, and easier to operate.

¶ Valves are all accessible—no need to take pump apart to clean.

¶ Our prices for complete outfits will interest you. They are the lowest on the market.

¶ Sold on guarantee. Write for Self-Measuring Pump and Tank Catalogue.

The Steel Trough & Machine Co., Limited

Distributors wanted in West and Maritime Provinces. A real chance for a good firm in Winnipeg and St. John to handle them. 433.

PAINT AND VARNISH REMOVERS OF QUALITY

When you buy remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance.

Our Licensees are the only authorized manufacturers of the SLOW-DRYING, QUICK-ACTING, NEUTRAL REMOVERS.

	Name of Brand:
SHERWIN-WILLIAMS CO. OF CANADA, LTD., Montreal.	"Taxite"
INTERNATIONAL VARNISH CO., LTD., Toronto.	"Klensa"
PRATT & LAMBERT, INC., Bridgeburg, Ontario.	"Expedite"
BRITISH AMERICAN PAINT CO., Victoria, B.C.	"Bapco"
MOUNT ROYAL COLOR AND VARNISH CO., LTD., Montreal.	"Scrape-off"
ROBERTSON CO., LTD., JAMES. Toronto.	"Robertson's"
PEARCY & CO., LTD., SANDERSON, Toronto.	"Devolite"
STEWART & WOOD, Toronto.	"Solvo"
MARTIN-SENOUR COMPANY, LTD., Montreal.	"Martin-Senour"
ADAMS & ELTING CO., Toronto.	"Adelite."

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT NO. 78,586."

"High Standard" Paint Dealers Are "On The Right Side"

On the right side of the ledgers—on the right side of the best trade in their town—on the right side of the best paint proposition in Canada to-day.

There is nothing half-way or half-hearted about any claims Lowe Bros. make for either their product or their proposition.

We sell only the quality of paints that make good—the kind our agents can sell easiest, with the greatest percentage of profit, the minimum of trouble to themselves and the maximum of satisfaction to their customers.

We deal through exclusive agents only, give them a complete line, and the finest kind of co-operation and support that the trade has yet heard of. Ask a "High Standard" dealer.

If you want to amount to something in the paint business, write for our proposition.

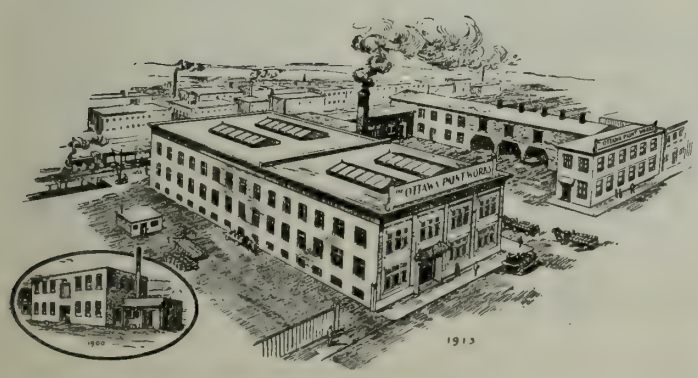
The Johnson Paint & Varnish Co., Limited, Vancouver, B.C.

Lowe Brothers LIMITED TORONTO

Lyon-Monkhouse, Limited Winnipeg, Man.

High-Grade PAINTS and VARNISH

Good Goods for Good Trade



Every can of paint or varnish which we sell contains such quality as makes an immediate "hit" with the user of much paint.

Our goods increase the dealer's prestige and make a busy paint department everywhere.

That our paints and varnish have real merit is proven by the many re-orders and new business that is constantly coming to hand.

References and particulars will be sent you immediately upon request.

Better write now.

DOVER No. 60 SAD IRON

ORDER THEM BY THE DOZEN SETS

A new line to compete in price with Mrs. Potts Pattern, and far superior in every respect.
Set consists of 3 cores, 1 holder and 1 stand, all neatly packed in strong fibre board box measuring 9 x 7 x 3¾", a handy package for your customer.

ORDER THEM BY THE DOZEN SETS.

Cores.—Three double-pointed, 4½ lbs. each (5 lbs. with holder), size 6⅞ x 3½", with nickel-plated or blued face, nicely polished. Tops are aluminized.
Holder.—Heavy nickel-plated pressed steel hood, black enameled wood handle—always cool, black enameled wood lever knob, positive wedge catch holds the core firm and secure, free from rattle. Remember—free from rattle.
Stand.—Corrugated and perforated pressed steel, asbestos lined. The Set complete in compact box, ready for your customer, weighs 14½ lbs.

ORDER THEM BY THE DOZEN SETS.

The "Dover No. 60" opens up a new avenue of profit for the dealer—for you need not sell at a cut price to compete with your neighbor. It is all nice, clean profit with the "No. 60."

ORDER THEM BY THE DOZEN SETS.

We are in receipt of an immense shipment of the **"No. 60,"** and in splendid condition to take care of the phenomenally large demand this popular Iron has created in the Western Provinces. Place your order with the Western House that Solicits Western business—The Miller-Morse Hardware Co., Limited, and be assured of prompt shipment.

ORDER THEM BY THE DOZEN SETS.

Don't wait to see "if there's a demand." The demand is here, and we doubt if any Jobber in Canada, besides ourselves, will be able to make prompt shipments during close of navigation. Don't court disappointment. Send your order in promptly. We ship same day order is received.

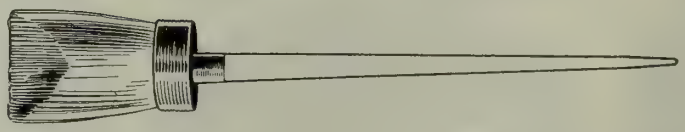
RAMSAY'S PAINTS & VARNISHES—
SATISFIED CUSTOMERS APLENTY—
YOUR PERFECTLY GOOD PROFIT—

That's a pretty good line up, and you can't do any separating —those three always stick together.



More than 70 years ago Ramsay's started to make good paint, they kept it up, and now the Canadian public know it.

Any man who comes into your store for paint and gets Ramsay's will come again when he wants more, because every brush of paint out of the can helps to write a good advertisement for Ramsay and for you.

It is time to get down to Spring business

You should have one of The Canada Paint Co.'s Price Lists for 1914

This price list and catalogue is a practical guide for paint dealers who like to know they are getting the worth of their money when buying a stock of paints and varnishes. You may have already placed your Spring order, but later on you will need some particular line, so get one of these price lists now, and when the time comes you will be able to compare the goods and the services rendered to you.

The Canada Paint Co.'s line of Paints and Varnishes is not only complete and of highest value and satisfactory quality, but it is backed by a live and progressive sales plan to bring more buyers of paints and varnishes to the stores of CP Agents.

We believe, after you have looked through our new price list, you will be interested to know more about the CP proposition. Ask for a price list to-day.

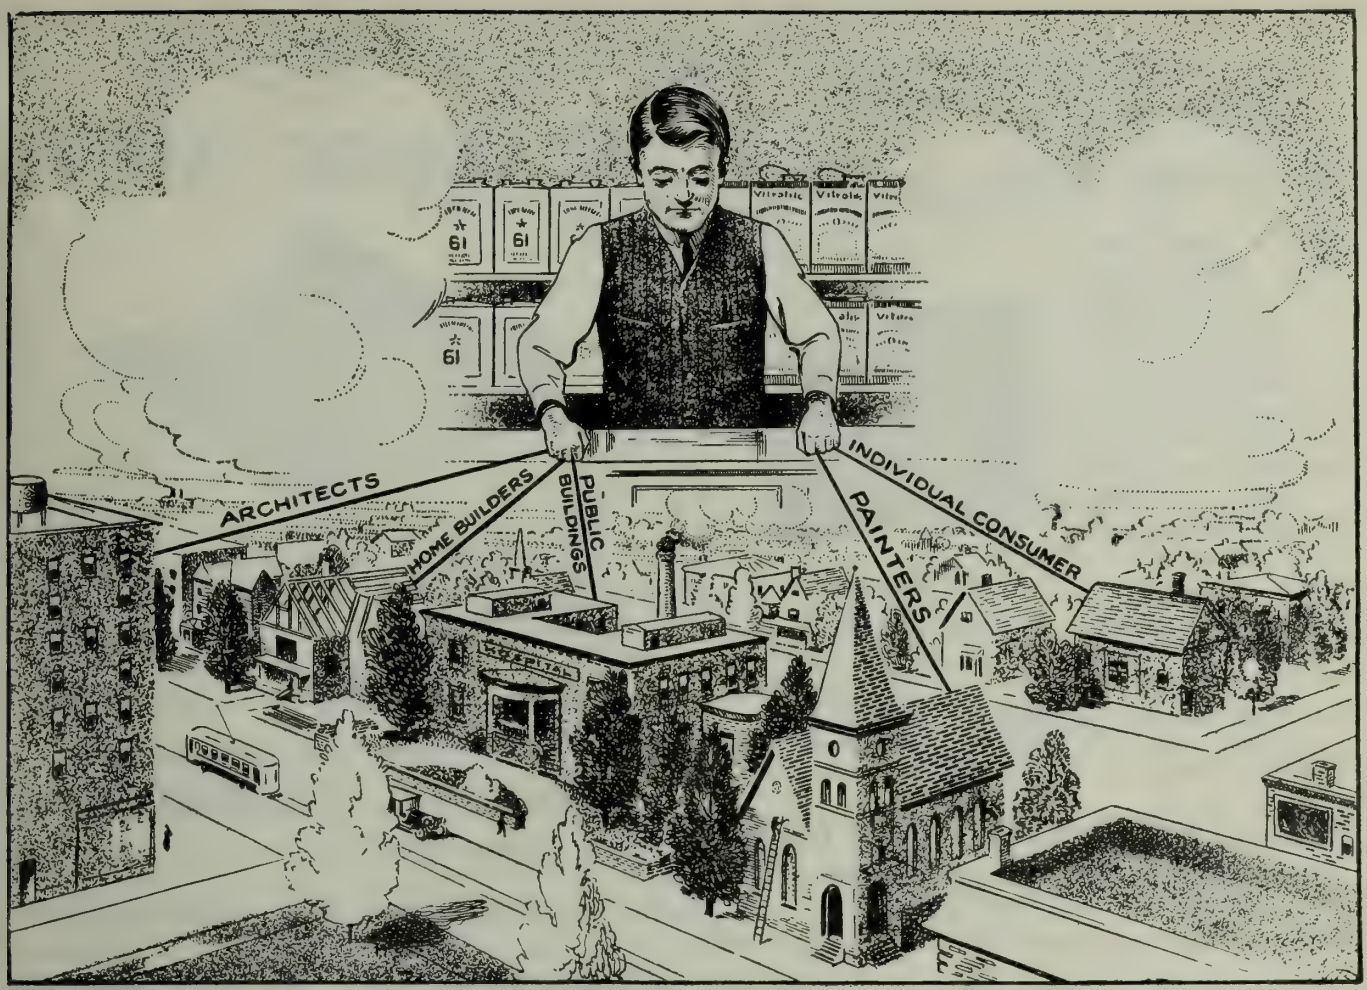
PAINTS-COLORS VARNISHES CP TRADE MARK **STAINS-ENAMELS LINSEED OILS**



Of the 1312 Issues of Hardware and Metal Since 1888 the March 21 Number will be Easily Best

Almost every day our editors are unearthing the material for an unusually good article, to appear in Hardware and Metal's Annual Spring Number, to be issued March 21.

Although this issue will not be mailed until four weeks from to-day, our plans are so far matured that we can safely promise it will be the best of all the 1,312 numbers of Hardware and Metal, since it first appeared in 1888.

Every page in this issue will be worthy of your careful perusal. And the advertisements will contain just as many profit-making suggestions as the "news" pages.

The time you spend in reading — yes *studying* — Hardware and Metal's Annual Spring Number, will be a dividend-paying investment on which you run no chance of losing.

Get a Line on Varnish Buyers in Your Town

BE a Pratt & Lambert dealer and enlist the aid of forces that will enable you to get the varnish trade from every conceivable trade channel in your town. You'll have the most effective and extensive magazine advertising campaign in the varnish industry working for you—reaching all those in your town who can afford to buy high-grade varnishes.

Varnish Talks, The Pratt & Lambert Painters' Magazine, and painters' trade paper advertising will enable you to get the painter trade. The Pratt & Lambert letter and booklet campaign, reaching everyone who is building, will assist you to land these good size, highly profitable orders.

Personal letters on specific jobs, personal calls, specifications and advertising in architects reference books and papers, costly sample panels and helpful literature furnished without charge, will get the good will of architects and contractors for Pratt & Lambert Varnishes for you.

Attractive Aqua-Types in many colors of the same designs as are appearing in the great national magazines, other store and window display matter of all kinds, framed panels, newspaper electros, bill posters, motion picture slides, etc. are additional selling helps for you.

If you're ambitious to get the cream of the varnish selling business in your town, write for Pratt & Lambert Dealers' Proposition.

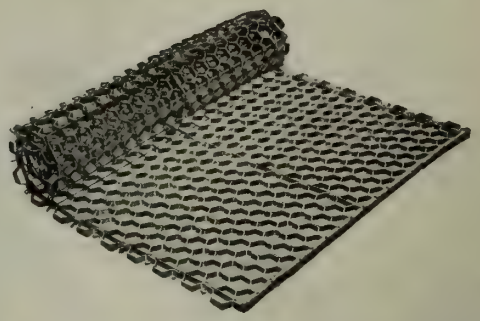
Humpty Dumpty Folding Egg Crates

for the farmers, for the poultry dealers, for a dozen and one people who enter your store every day.

Have some "Humpty-Dumpty" crates handy, where they can be seen and make a bid for all the large custom that will go elsewhere, if it doesn't come to you.



The "Humpty-Dumpty" gives splendid service, it protects eggs, preventing their getting broken—saving its users the cost many times over.

And it pays you who handle it a very nice profit, besides the good-will we've already told you about. Write for prices.

HAMILTON and WINNIPEG

ACME

"YANKEE" MATS

All-steel Door Mats always look better and last longer than other kinds of matting. Then too, they are strictly sanitary and never get clogged up with ice and snow or slush like fibre mats.

"Yankee" Mats will roll up like a rug and are reversible, affording two mats in one.

Made in nine regular sizes and in rolls, also special shapes made to order.

A stock carried all the time in our warehouse at Montreal.

Send for Literature from our Montreal Agents.

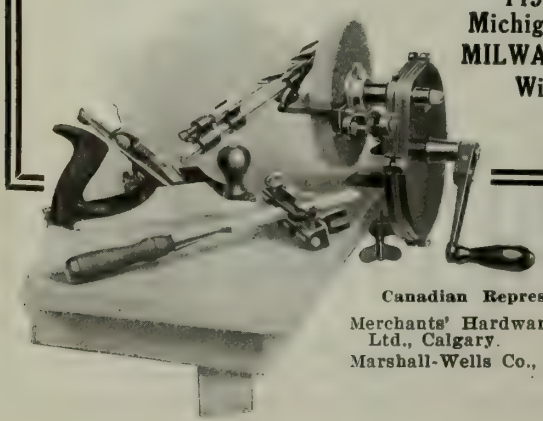
American Grinders

WHAT qualities do you demand in a tool grinder—Efficiency? Ease of operation? Durability?



Then the American will make a big hit with you! It's the simplest, strongest, smoothest-running Grinder on the market—**bar none!** And it has the "built-for-business" look that catches the eye of the mechanic. Furthermore, American Grinders are

Made with a positively oil-tight case.

Gears operate in a bath-of-oil

That means—double life for the machine—and easy sales and big profits for the live dealer who knows how to push goods of **exceptional quality!** Our new catalog is yours for the asking. Write our nearest jobber to-day.

"Competition Is a Word of the Past to Peerless Agents"

That's the way Peerless dealers speak about their agency. Read what this experienced dealer says about Peerless fencing. Note his Peerless sales ran six times greater than that of other fencing. Look—

The Banwell-Hoxie Fence Co., Hamilton, Ont. Middlemiss, Ont., Jan. 8, '13.

Gentlemen:—I have been selling fence for the past seven years and in that time have represented several different firms. It gives me pleasure to say that I took the agency for your fencing for 1912 and have sold in that one year more fence than in the other six years of my business, and the best of it is I have not had one complaint in any way against Peerless fence. Different from most fences it stretches flat and all wires of even length; the lock is tight and strong and the quality of the wire is of the best. There is very little other fence used in this district and competition is a word of the past to the agent for Peerless fencing. Yours truly, J. A. McDONALD.

This is but one of many similar dealer's letters in our files. Everyone is enthusiastic about his Peerless agency. Everyone has nothing but praise for Peerless fencing—the fence that saves expense.

Peerless Poultry Fence

is made of the best Open Hearth steel fence wire—tough, elastic and springy—and will not snap or break under sudden shocks or quick atmospheric changes. Our method of galvanizing prevents rust and will not flake, peel or chip off.

The joints are securely held with the "Peerless Lock" which will withstand all sudden shocks and strains, yet Peerless Poultry Fence can be erected on the most hilly and uneven ground without buckling, snapping or kinking.

The heavy stay wires we use prevent sagging and require only about half as many posts as other fences.

We also build Farm and Ornamental Fencing and Gates.

Do You Want the Peerless Agency?

We still have some valuable territory open to good reliable dealers. Do you want it? Do you want to be the leading fence dealer in your locality? Then write us. Ask for our dealer's proposition now before someone else gets ahead of you.

Banwell-Hoxie Wire Fence Co., Ltd.,

Winnipeg, Man. **Hamilton, Ont.**

"Wear-Ever"

The Reason Why

The enormous pressure of rolling mill and stamping machine makes the metal in **"Wear-Ever"** aluminum cooking utensils dense, hard and smooth. The "case-hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensil darker, smoother, less liable to be discolored and more easily cleaned.

"Wear-Ever" Aluminum Utensils

are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated.

Demand for **"Wear-Ever"** utensils exists—has been increased each year for eleven years by consumer confidence, by sample-demonstration work, and by magazine advertising.

"Wear-Ever" advertisements will appear in the March numbers of the Ladies' Home Journal, Pictorial Review, Delineator, Designer, Woman's Magazine, Woman's Home Companion, Good Housekeeping, Christian Herald, McCall's Magazine, Woman's World, Saturday Evening Post, and Country Gentleman, which publications have a combined circulation of 11,019,453. Assuming — as publishers do — that each copy of each magazine is read by at least five persons, the number of people who are "scheduled" to see the March **"Wear-Ever"** advertisement is 55,097,265.

Names of Customers, Cards to be used in circularizing them, Folders for distribution, Ad Book, Window Display Book, Demonstration Book, Display Cards and Picture Slides are at the service of **"Wear-Ever"** dealers.

Write for printed matter. Address

160 Bay Street, Toronto

An Ermined Judge

The Supreme Court of Canada is becoming overloaded with business. The big increase in cases during 1913 has meant that the six judges who sit daily in the dingy old building at Ottawa have been hard-worked men. The procedure is simple, dignified, and conducted with almost an Arctic silence.

Yet there is a human side to the situation, for the trappings of flesh cannot be wholly discarded in this, the Clearing House of legal wrangles.

A special writer, at the suggestion of "MacLean's Magazine," visited the Court, and in other divers places dug up much useful information concerning which the average Canadian knows little.

The March "MacLean's" will appear with the first of the celebrated Coburn covers, and the illustrations have been attempted on a strikingly broader scale. Besides this leading article there is the pronouncing of a leading Toronto doctor on "The Truth About Radium."

Several short stories, well illustrated, will appear in this issue.

Do not miss this copy. The cover alone, being something new in Canadian journalism, will be more than worth the price.

Send your name and address on a postcard to Dept. "M" and commence your subscription with this striking number—Mail it to-day.

Subscription $2 a year. *Twenty cents a copy.*

A Novel Feature of the

MAXWELL
"Favorite" Churn

—and one which has made it popular wherever used — is the

BOW LEVER

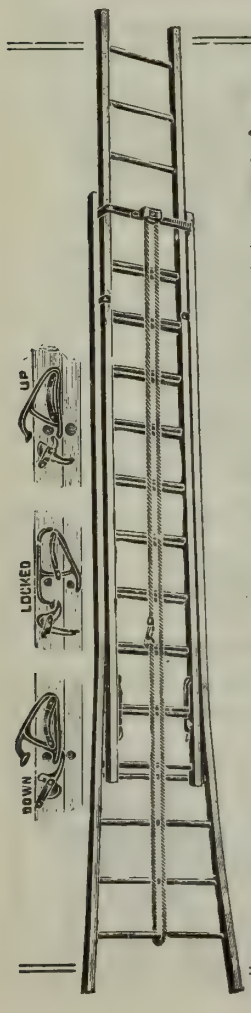
No other churn has this lever. Handle can be adjusted to centre, left or right, whichever is desired, or is easiest for driving. The frame is of light rigid steel with bolted trunnions, and the barrel of best imported oak with aluminum hoops. Swings on roller bearings and is exceptionally easy-running and durable. A splendid seller.

Send for Illustrated Catalogue of the "easy-to-push" Maxwell lines.

DAVID MAXWELL & SONS, St. Mary's, Ont.

There's a place for Everything

So goes the old proverb and it certainly was never so true as when applied to wire cloth. Awkward to cut, awkward to unroll, wire cloth can never be efficiently handled except on a **Bowser Wire Cloth Display Rack.**



The "Bowser" gives you a neat, convenient place to keep your wire cloth, where it is out of the way, yet easy to see and easy to get at.

Inaugurate a new period of store efficiency by writing for prices now.

R. M. Bowser & Son

Dept. A. RENFREW, PA.

As an aid to better profits

this Rope Extension Ladder is certainly a pretty sure bet.

Its beauty as a profit-maker lies, not only in the fact that its sound construction and excellent finish make it a **ready** seller, but also, because its wonderful utility and service capacity make it a **steady** seller, too.

Put a little time into pushing the Stratford, into featuring it, into telling people of its good points. The results will amply repay you, will make you glad you did so.

It is made of high-grade yellow pipe, with rounds of rock elm, fixed so as to do away with all springing and strain, and it may be had in all lengths from 20 to 60 ft.

Write to-day for prices.

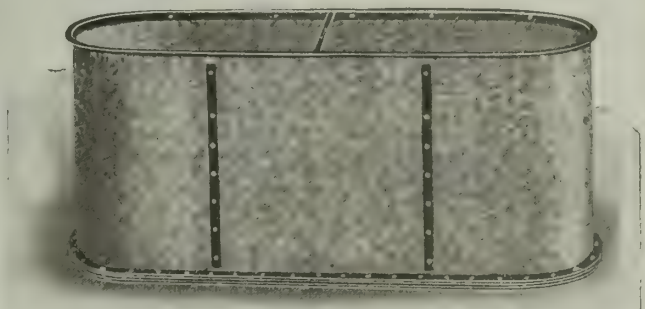
A Money-Making Line to Carry!

Mr. Hardware Merchant: Did you ever figure the amount of business you might do in spraying-machine accessories? All around you are men who own spraying machines, and who are constantly in need of parts and fittings. Many hardware men make substantial profits every year by selling

SPRAMOTORS

and accessories. Don't you want your share? The **Spramotor** is unrivalled in efficiency and durability, well advertised and easy to sell.



Write us for particulars of our proposition. There's money in it for you.

Spramotor Works
68 King St., London, Canada

GALVANIZED STEEL TANKS

WAYNE GALVANIZED STEEL TANKS for stock watering are far superior to the old-time wooden tanks.

WAYNE TANKS will stand the roughest usage. Will not dry up and leak in summer or freeze and burst in winter. Always easy to move wherever the supply of water may be.

THERE IS GOOD MONEY in it for you to handle the WAYNE line.

Catalogue and prices furnished on application.

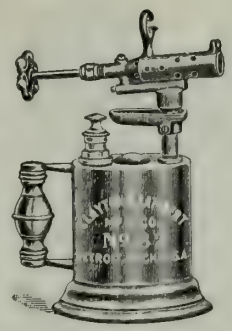
You Men who sell Paint

probably pride yourselves on the quality—on the good value and satisfaction you give to your customers.

You're proud of the line of paint you handle and you've every right to be too, but—do you feel the same way about your brushes?

Can they uphold the standard of quality set by your paint—are you sure that they will be a boost and not a knock to your business, when they go into action—**are they made by Meakins?**



For if they are, you need have no fear as to the sort of satisfaction they will give your customers—you can be sure that every one of them, leaving your store, goes out, a testimonial to the value you give.

And this is just the point that we want to drive home: You're selling high quality paint, you'll more than likely sell the brushes to apply it with. You've a chance here for a fine piece of "team work." If the paint and the brushes are **both** excellent, your prestige as a dealer gets a boost—and the sort of a boost that means future business.

Make sure of it now—the Meakins way, **by writing us for prices.**

Meakins & Sons, Limited

Hamilton, Ontario

A Wintry Day

or a windy one makes no difference in the operation of a "C. & L." Fire Pot or Torch, for they produce steady blue flames of intense heat, and are not affected by hard wind or extreme cold.

Satisfaction guaranteed if operated in accordance with directions. All burners are made of special generator metal, which holds the heat longer, and they will soon save their cost in the saving of fuel alone.

Your nearest jobber will supply at factory price, or we will ship direct if cash accompanies the order. Send for Catalog—it's free.

No. 32 Torch
Price Each, $5.20 Net

Every Horse Owner Buys at Sight

The Kling Hame Fastener holds the hames tight and uniform at all times. A child or woman can hitch up as easily as a strong man. Only takes a second to put on or take off, yet the horse can never open it or break it. Lasts longer than the harness. Costs the dealer $2.25 per doz. Any jobber. Write for circular. Look for "Kling" on the lever.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Sole manufacturers of the Klingsnap and Kling Hame Fastener.

BRANCHES AT WINNIPEG AND MONTREAL

STANLEY Cabinet Assortment

of Ornamental Hinges

TRADE S.W. MARK

Many of your customers are looking for just such hinges, and don't know that you have them. Put one of these cabinets out on your counter where they can see the samples on the display board.

The stock is on the inside of the cabinet, each box plainly labeled. The time of clerk and customer is saved in making the sale.

The Hinges Sell Themselves

This is Assortment A. There are three others:

B. Cabinet Hardware C. Door Bolts D. Small Plated Butts

All Interchangeable

You can buy one cabinet and by changing the sample board and stock from time to time, always have a fresh display attracting the attention of your customers.

Get in the game and beat the other fellow to this, the latest wrinkle in retailing.

Your Ammunition Business During 1914

You are planning for your year's ammunition business—making up your specifications and about ready to take them up with your jobber.

One point, especially, you should bear in mind—and act accordingly.

The tendency among the keenest sportsmen is to concentrate on Remington-UMC.

Many of your customers are long-time users of Remington-UMC ammunition. These men you know, and will provide for.

And beyond that, you want to make special preparation to take care of this season's demand from the men who shot Remington-UMC a few times last season—and convinced themselves that it is the ammunition they ought to have.

You yourself will have observed that whatever a man shoots, his preference in ammunition is more than likely to be Remington-UMC.

These are the shot shells you want—Arrow and Nitro Club, the "steel-lined speed shells," smokeless; New Club, the "old reliable yellow shells," black powder, and "Remington," our new low-priced shell, loaded with Remington bulk and dense smokeless powders.

The dealer who makes his strongest feature of these four shells, puts himself in position to take the lead in the ammunition business.

Remington Arms-Union Metallic Cartridge Co.
WINDSOR **ONTARIO**

Last Call to Win $100

The Starrett Contest for the best show windows of mechanics' fine tools and hack saws closes April 6.

Have you dressed a show window of mechanics' tools and hack saws so that you can send a photograph of it and enter the prize contest? We are giving the following prizes to the hardware dealers having the best show windows:

First	$100.00
Second	75.00
Third	50.00
Fourth	25.00

Fifth to fifteenth, enlargement of the photograph of the display.

This contest has been running since January first and the time is getting short. Every store should be represented. The rules are few and simple. They are as follows:

No. 1. The window must be originated and dressed by a member of the firm, by an employee, or by the regular window-dresser.

No. 2. The window must contain as its basis mechanics' fine tools taken from stock and may have any shop scenes of typical uses of tools or hack saws to add human interest. The size of the display is not the deciding factor.

No. 3. Displays will be judged as to their power to attract attention and arouse interest in the tools displayed.

No. 4. No firm shall receive any help whatever from our representatives in the planning or execution of the display.

No. 5. The display is to remain n the show window not less than one week.

No. 6. Every contestant must procure a photograph of his window at his own expense and mail a print to us. The size of negative must be at least 5 x 7 inches. The print is to remain our property, whether the window is a winner or not. The negatives are to be sent to us if we desire them. The photograph must show the display as it is for the entire week. If a man forms part of the display, the hour he is on duty must be stated.

No. 7. Photographs will be accepted up to April 6th.

Now if you have not yet entered your store, write to us immediately for our free display, etc., containing crepe paper, pennants, signs, cards, etc., and dress your window right away. Then have it photographed and get it to us before April 6th. Don't wait—a delay may lose you $100.

What Motor Trucks Can Do For The Hardware Dealer

Mack Truck used by The James Walker Hdw. Co.
Hardware Dealers, Montreal.

The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.

We are sales agents for the leading gasoline motor truck of the world—MACK.

Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

LEWIS BROS., LIMITED, MONTREAL

OTTAWA TORONTO

"We Believe in Others When We Believe in Ourselves"

¶ So long as there is someone, somewhere, who has confidence in my plans, in my individual growth—I shall not fail him. The fact that someone believes in us, perhaps a little child, has made most of us what we are. The individual who predicts our failure—who prophesies our undoing—is not our friend, for the reason that always the **prophet** wishes that his prophecies may be fulfilled.

¶ A human life is a precious thing, and like a flower, like a child, or like a plant, requires sympathy and intelligent care, for these two things constitute the **law of culture.** But neither plants, nor children, nor flowers can be forced, coerced or driven.

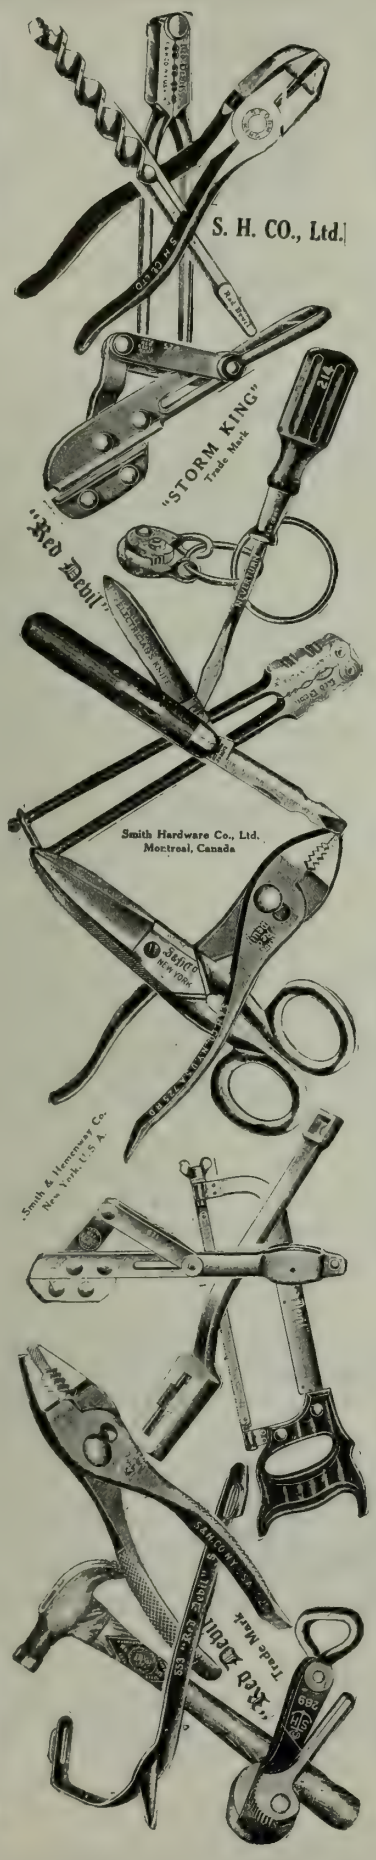
¶ We require someone who believes that our errors and mistakes do not represent us at our best. But we do not require idlers, self-appointed guardians, to care for our personal interests and to meddle in our private affairs. Peddling our mistakes, faults and failings through business offices, along the streets, and among our friends, will never in any way assist us to meet the big responsibilities of life.

¶ Prophesying, criticizing and meddling do not assist us to grow and unfold. The good in men and women we need in all our ideas and plans in order that we may accomplish bigger things here in this world. But we do not desire to have our lives become the property of meddlers, for these are only "busybodies" who do not fit in with the beautiful things of life, and being out of place in the scheme of things they naturally work hardest where they can do greatest harm.

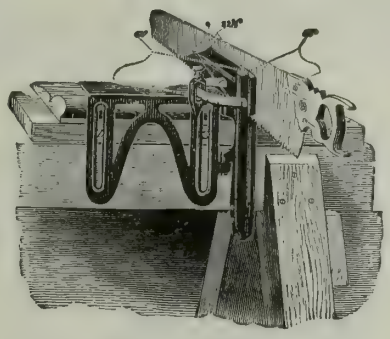
¶ Self-appointed "trustees" who look after our personal welfare are idlers, traitors and gossipers, all—afflicted with the Meddler's Itch—and like the "walking delegate," their business is to spread discontent and to organize trouble. The information the "gossip" carries can never be used for any purpose but to injure and destroy. The story the idler carries from door to door is not negotiable; it will buy neither books nor railroad tickets, clothes nor food.

¶ Oh, it is so easy to know our friends, they who have faith in us; but they of the "loose tongue" and the "double smile" are our enemies, seeking to undermine our plans, our ideals and our future. It seems to me that most men and women understand and appreciate the good, the true and the beautiful, and I believe that most of us have faith and confidence in ourselves and sympathy and kindness for our neighbors.

¶ Because of these facts in life—these principles which govern as certain as the laws that govern the seasons—**we believe in others when we believe in ourselves.** Each of us requires someone who believes in our plans, someone to say, "This man will build a monument to the Time and the Place in which he lives."



¶ So, if you walk to your office on to-morrow, or to your shop, or to your place in the World of Work, whether it be great or small, whether you are following a plow in the field, or sawing staves in the woods; whether you are behind a counter or behind an enterprise—you are not alone if there is someone who believes in you, who knows that you are not wholly bad.



¶ We need the good in men and women in all our plans in order that we may make the most of ourselves and our opportunities.

A Compact Credit Account Register

A Barr Account Register is built so compactly as to handle up to 1,500 accounts, requiring only 36 x 34 inches of floor space. Other credit registers require from 14 to 18 feet of space for a corresponding number of accounts.

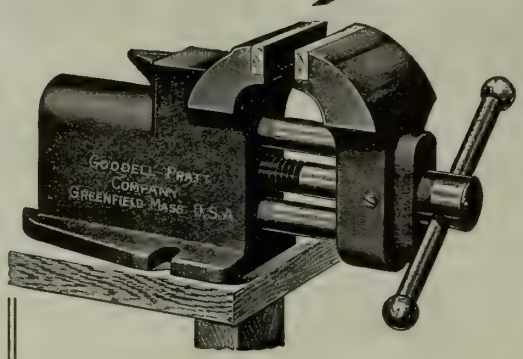
We emphasize this money-saving feature, but there are many more equally good features in a

Barr Account Register

A request from you for information in detail and a demonstration will enable us to acquaint you fully with the many advantages found exclusively in a Barr Register.

SPECIAL NOTICE

The Barr Register is a bona fide Canadian invention, fully protected by valid patents. There is not and never has been any legal proceedings against above patents, notwithstanding all competitors' talk to the contrary. We make this announcement as we understand that some merchants have been imposed upon and induced to buy other account registers through such talk.



Write to-day. "It Means Money To You."

409	9 cups	17.25

X-Ray View.

It is easy to convince your customers that the faster the water in a percolator is pumped over and through the coffee the quicker the beverage is ready to serve, and the greater amount of good qualities will be extracted from the coffee grounds. The liquid does not need to boil to get the best of coffee, in fact it should **never be allowed to boil,** because only the bitter, harmful tannin is extracted by so doing.

You see the vital importance of the statement we are driving home to every lover of delicious coffee that "UNIVERSAL" PERCOLATORS CIRCULATE SIX TO TEN TIMES MORE WATER AND IN LESS TIME MAKE DELICIOUS COFFEE THAN ANY OTHER PERCOLATOR, because this means to them better coffee prepared more economically.

Cash in your share of this increased trade, while we furnish the publicity with dealer selling helps. Many styles of aluminum, coffee, nickel and enamel patterns to choose from, make this easy.

AN ATTRACTIVE DISPLAY STAND FURNISHED FREE WITH YOUR FIRST ORDER FOR ONE DOZEN PERCOLATORS

X-Ray View.

You see from the above illustration that tea can be made at the exact strength desired, when the "Universal" Tea Ball Tea Pot, is used. Some of the best tea grown has been spoiled by guess-work, when making the beverage. We know your customers love good tea and we know we make the best tea pot. This seems like an opportunity that should be developed to our mutual advantage. Again let us remind you of the several attractive "Universal" patterns which will appeal to the purchaser of high-grade goods.

PERSISTENCY IN ADVERTISING

One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals the densest fog or the darkest night can not long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot.—*Printing Art.*

ELEY

CARTRIDGES

We Load for the World!

¶ No Ammunition Manufacturer or **Loader** handles or loads a greater variety of shot gun powders than ourselves, consequently our experience of the styles of powders and the specification of loads which give the greatest satisfaction to sportsmen is second to none.

Eley Smokeless Shot Gun Powder (33 gr. class) is inferior to no other powder. 33 grains is the Eley Standard load, and that this will do the work more satisfactorily than heavier loads of other powders is one of its merits. This load gives results equal to 3¼ drs. of other bulk smokeless powders.

ELEY CARTRIDGES are shot in the snows of Canada, the heat of Central Africa and India, and elsewhere throughout the world.
SOLD BY ALL GUNMAKERS AND AMMUNITION DEALERS.

THE "EMPIRE" SAP SPOUT

STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7-16-INCH BIT WHEN TAPPING, and it will be found that with the "**EMPIRE**" **SPOUT** every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

WRITE FOR PRICES AND TRY A SAMPLE LOT.

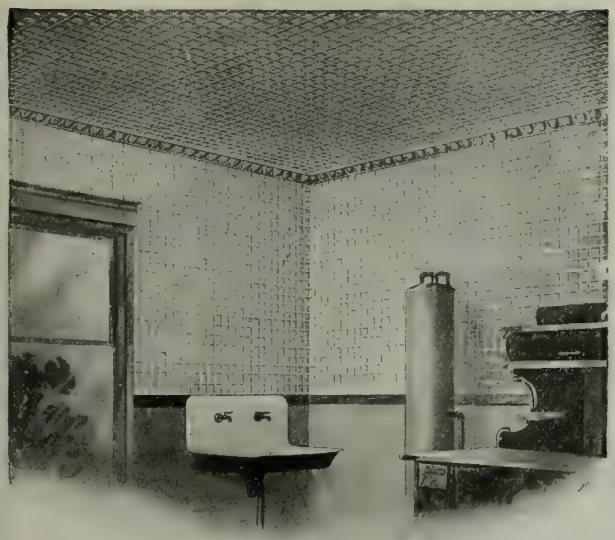
THE THOS. DAVIDSON MFG. COMPANY, Limited

MONTREAL **TORONTO** **WINNIPEG**

Wilt Twist Drills are made from the rough stock to the finished drill at a single chucking.

The circular diagram above shows the process—the three roughing cuts—the finishing cut and the relieving cut all taken before the drill is released from the chuck.

This produces a drill of marvelous accuracy and uniformity—with a clearance that is clean-cut and well-defined—and a groove contour that is scientifically perfect.



Wilt Twist Drills will do the hardest work with an ease and effectiveness that will surprise you.

They are the kind of tool that every wide-awake dealer ought to handle. The kind that makes both money and reputation for the dealer.

Write for our Dealers' Proposition.

The Wilt Twist Drill Company of Canada, Limited

Walkerville, Ontario

Safety First

Nowadays "Safety First" is not only preached, but practised in all constructional work.

The exterior of a Home or Store may be "safe as the Bank of England," but ofttimes the safety of the whole building is jeopardized by inflammable or flimsy ceilings and walls.

The interior shown here is just an ordinary kitchen. "Metallic" interiors are all "useful patterns" and ranging upwards from the design shown they culminate in the acme of artistic decoration.

"METALLIC" CEILINGS AND WALLS

Are "Safety First" Materials—Safe as regards fire, decay, dirt, disease, insects—safe since they cannot fall and injure persons or furniture—easily and quickly applied over old ceilings and walls or over new boards or studding—economic—durable.

Use Metallic Ceilings instead of Lath, Plaster and Paper.

The METALLIC ROOFING CO. LIMITED

TORONTO King & Dufferin Sts. — Manufacturers Established 1884 — WINNIPEG 797 Notre Dame Ave.

Mr. Dealer—Write for full information, catalogues and terms. "Metallic" Materials are safe for your business and safe for your customers—there's money for you in "Metallic!"

GREENING

GREENING'S STEEL WIRE CHAIN

If you are interested in chains examine carefully the perfect mechanical construction of "Greening's." I is the most perfect chain made. We make it in thirteen sizes. We use it exclusively in all our Halter, Dog, Tie Out, Cattle, Trace Chains, etc.

Correspondence solicited.

We send cuts with table of breaking strain.

Samples, etc., upon request.

Get your share!

Every year the amount of building throughout the Dominion is increasing. True, there may be temporary set-backs, due to financial unrest; but in the main, the march of building progress goes steadily on, and this is very natural, because it is only keeping pace with the increase in the population.

In all forms of building construction there is a use for cement—in the most modern forms of building construction there is a very big use for cement. Reinforced concrete, with the toughness of steel and the lasting qualities of granite, has revolutionized constructive methods, has made cement one of the builders' most-needed commodities.

And you can have your share of this big, new business by becoming a

Rogers Portland Cement

dealer, because you will be able to supply all the small builders, who have contracts close to your store, with the sort of cement their engineers and architects specify.

They would rather give you their business than go to the supply houses and haul cement several miles. They'll be right glad to give you their business because *Rogers Cement is Standard.*

Also, you don't have to carry a big stock to be one of our dealers. Get the builders' orders and we'll ship promptly in any quantity direct to the job, thus saving you an amount of worry and bother.

It's a great proposition for a man who wants great business.

Make sure of your share now.

50 YEARS IN THE BUSINESS

NICHOLSON DEALERS ARE NICHOLSON FRIENDS

When 10,000 dealers are 10,000 loyal friends, you can readily draw your own conclusion.

Every Nicholson dealer is a loyal Nicholson friend. The profit possibilities may have attracted them first—but it's the spirit of friendly co-operation that makes them "stick."

Files couldn't be made better than Nicholsons make them—so we've devoted much time to bettering our highly satisfactory service to the trade.

Bigger factory stocks—quicker shipments—more rigid inspections — down-to-the-minute goods — and a determination to make NICHOLSON-MADE FILES a most profitable line to carry.

These are the advantages that put the Nicholson brands in Canada's progressive retail stores.

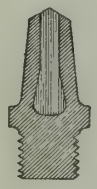
Red Tip CALKS



Let us tell you some of the reasons why RED TIP CALKS are rapid sellers and bring profit to the dealer.

MATERIAL—RED TIP CALKS are primarily a safety device and therefore there is no choice between them and cheap, unworthy substitutes. *Safety demands the best.* They are made by skilled labor, of the highest grade material, carefully analyzed and tested by schleroscope and are rigidly inspected before leaving the factory.

TEMPER—RED TIP CALKS are tempered exactly. There is no guesswork about it. The heat being regulated by electric pyrometers is even, and the last calks in the lot have the same temper as the first. Every box of 50 contains 50 *good* calks. Horse owners know this.

EFFICIENCY — RED TIP CALKS are made as here shown with a pin of high-carbon steel inserted in an outer shell of softer metal. Time has shown that this is the only way to make a calk.

LABOR AND TIME SAVERS—RED TIP CALKS when worn down can be removed and a new set inserted in 20 minutes by the aid of a simple wrench, thus eliminating long waits at the Blacksmith Shop.

COST—RED TIP CALKS cost far less than the old-fashioned way of sharpening, besides putting the user in readiness to travel at all times.

CAN CHANGE IN TWENTY MINUTES.

PROFIT—RED TIP CALKS pay a large profit to the dealer. They are quick, easy sellers, being widely advertised and as widely esteemed.

GUARANTEE—RED TIP CALKS are guaranteed to be as represented. They are guaranteed to wear sharper and last longer than others. They are guaranteed to be perfect in thread and temper. We market no seconds under any brand.

Genuine Neverslip Calks have Red Tips. Beware of Imitations.

Neverslip Manufacturing Co.

Vol. XXVI. FEBRUARY 28, 1914 No. 9

The Ottawa Exhibition and Convention

Practically a Full Report of Proceedings Appeared in Last Week's Issue of Hardware and Metal—In This Article Happenings of Last Day and Question Box Sessions Are Featured.

THE ninth annual convention of the Ontario Retail Hardware and Stove Dealers' Association was concluded on Thursday evening, Feb. 19. after the question box session at the Chateau Laurier. The two meetings scheduled for Friday did not take place. Owing to the cancellation of the special trains which were to leave Ottawa Saturday morning, the majority of those attending the convention left for their respective homes on Friday evening. The exhibition was held intact until Friday evening. The election of officers of the Ontario Retail Hardware and Stove Dealers' Association was held on Thursday afternoon. The election of officers of the Canadian Hardware Manufacturers' Exhibitors' Association took place on Thursday evening. A list of the new officers appeared in last week's issue of Hardware and Metal.

The question of where the next exhibition and convention will be held was left in abeyance until the executive of the two associations have an opportunity of holding a conference on the subject.

Mayor Graham on behalf of the City of London, has extended an invitation to the retailers and manufacturers to hold their next convention and exhibition in London.

It has not yet been decided what the future arrangements will be.

The attendance at the retail convention sessions did not come up to expectations, with the result that the convention was concluded earlier than had been expected.

The distance from the centre of the city to the convention hall was a deterrent feature, resulting in the non-attendance of many of the members.

Thursday Meeting.

The retailers' meeting scheduled for 9 a.m. Thursday, did not materialize.

The afternoon meeting scheduled for two o'clock, started on time. The report of the resolutions committee composed of W. W. Bennett, J. B. Ferguson, A. J. Wright, F. W. Barton, was taken up clause by clause, and passed.

Resolutions.

Following is the report of the Resolutions Committee:—

1.—Resolved that the Advisory Committee of this Association be appointed to confer with the Retail Merchants' Association in regard to the proposed

A Message From President Macpherson

Editor,
Hardware and Metal,
Dear Sir:

Prescott, February 24th.

I wish to express through your columns my appreciation of the honor done me in electing me President of the Ontario Retail Hardware and Stove Dealers' Association at the recent Convention in Ottawa. Seldom is there an opportunity given to any special line of trade equal to that of the combined meetings of our Association and the unexcelled exhibition by the Canadian Manufacturers Exhibitors Limited, by which at a minimum cost, a splendid educational course in hardware may be obtained which covers the various branches of purchasing, salesmanship, advertising and a practical demonstration of a great many lines of goods handled in the retail hardware store. That those who attended the Convention and Exhibition were enthusiastic over the joint program, was very apparent. I can assure you that the many features of interest and profit, which received discussion during the Convention, will have the earnest consideration of the Executive and the will of the Convention, as expressed by resolution, carried out by them. I would especially request that the membership in our Association would take it as a duty to lay before the Executive any trade problems which may arise from time to time, so that we may all profit by their experience and advice, and would like very much to correspond with every member of the Association, if possible, during the coming year, with a view to increasing the value of our Association to the individual membership. To Hardware and Metal, I must express my sincere thanks for their manifest interest in our Association and the very complete reports obtained at considerable cost and effort, which, I am sure, will meet with the appreciation and commendation of our entire membership. I would sincerely wish the greatest prosperity to our membership and the hardware trade in general during 1914, and I am sure that those who attended our Convention will go back to their work with renewed vigor and many good plans for the future.

Faithfully,
W. F. MACPHERSON.

"Bulk Sales Act," and report back to this association.

2.—Resolved that we are strongly of the opinion that all fees for the inspection of weights and measures should be abolished and that this association continue their fight against these unjust charges.

3.—Resolved that this association favors the maintenance of prices on all articles bearing a trade mark, and requests the Parliament of Canada to amend the Trade Mark Law so as to make it an offence for any one to sell at a reduction any article bearing a trade mark upon which the manufacturer has set the price for which it should be sold to the consumer.

4.—Resolved that this association is very strongly opposed to the Parliament of Canada granting any special legislative privileges to co-operative societies.

5.—Resolved that our Executive Committee be instructed to take steps to secure the better enforcement of the existing game laws, in order to prevent the indiscriminate slaughter and sale of fish and game, and that a copy of this resolution be sent to the proper authorities.

6.—Resolved that the association instruct the Advisory Committee to continue their efforts to secure the services of a Freight Audit Bureau, at earliest possible moment.

7.—Resolved that the communication from Mr. Pow, of Tillsonburg, be referred to the Executive Committee.

8.—Resolved that the hearty thanks of the association be tendered to Vice-president Macpherson, secretary of the Advisory Committee, for the very able manner in which he has discharged his duties during the past year, and for which he has refused remuneration.

A. J. Wright, Hamilton, Ont., newly-elected member Executive O.R.H. & S.D.A.

9.—Resolved that the thanks of the association be conveyed to the Ottawa Reception Committee, particularly to its lady members, for the pleasant social relations enjoyed by the members and their ladies during the convention.

10.—Resolved that this association tender to the Canadian Hardware Exhibitors' Association, a hearty vote of thanks for their untiring efforts in providing entertainment during this convention.

11.—Resolved that an expression of appreciation be tendered the Grand Trunk Railway for the splendid service they gave on their special trains to Ottawa from Toronto and Montreal. In promptness, comfort and dining car service every passenger was delighted.

Papers Read by Members.

First Vice-president Macpherson read a paper on Trade Agreements. C. W. Conn, 2nd vice-president read a paper on Tinshop Costs. Both papers appear elsewhere in this issue.

Illustrated Talk on Salesmanship.

An illustrated lecture on "Stove Salesmanship," was given by E. H. Gurney, at the Thursday night meeting in the Chateau Laurier. Mr. Gurney's lecture appears elsewhere in this issue.

A talk was also given by Jas. McGregor, of Oakville, on the cartage problem.

1.—*Section of group photo taken in front of Chateau Laurier, Ottawa.*

QUESTION BOX DISCUSSION.

The Question Box Discussion also took place on Thursday night at the Chateau Laurier. The discussion did not prove quite as interesting, nor were as many good points brought out as at the Hamilton Convention. It is to be regretted that more time was not set aside for the Question Box session, which, if given the time it deserves would prove one of the most educative and interesting features of the convention. The chairman, H. E. Patterson Drayton, stated that he regretted that the discussion of so many questions would have to be rushed through in such a short time.

Despite the fact that the questions were dealt with hurriedly a number of good points were brought out. Following are the questions and the remarks of the members taking part in the discussion:

"Is there anyone here from a town of 5,000 who is doing a cash business?"

There was no one present who had introduced the cash system, although several merchants intimated that they were now considering the introduction of such a system. It was pointed out that a large number of firms offer special inducements, such as cash discounts, etc., in order to get customers to pay cash.

One member stated that he offered an extra discount for cash and found it satisfactory. Another dealer stated that most merchants are weak in the knees when it comes to asking customers to pay cash.

The general opinion appeared to be that each merchant must gradually work out his own system, and educate his customers into the habit of paying cash.

Albert Wideman, Markham, Ont., newly-elected member Executive O.R.H. & S.D.A.

"I have a business with a turnover of $15,000, stock $5,000, and mark my goods at from 40-50 per cent. profit. I do not make money and cannot see where the leaks are. Can you tell me?"

This question appeared to be a puzzler to the majority of those present, and the suggestion was made that the services of a business doctor be secured.

"What percentage of annual sales is considered a reasonable amount to be carried on account?"

One merchant stated that in his business the percentage averaged about 60 per cent. Another merchant stated that he thought 50 per cent, would be an average percentage in the majority of cases.

"Do you use truck or wagon for delivering and with what results?"

A merchant from a large city stated that he was introducing motor-cars for delivery purposes, and was disposing of his horses and wagons. He stated that where long hauls are necessary the motor car is the most economical. Where a number of cars are used it is necessary to have enough work to keep them busy.

Another merchant in a smaller city stated that he used a light motor car and found it very efficient for delivery purposes.

"What is the best method of securing co-operation of painters to use ready-mixed paints and decorative material?"

One merchant reported that he found it almost impossible to get painters to co-operate and that he did not know of any painters in his town in favor of ready-mixed paints. Another merchant related an incident to show how he started a painter using flat colors for walls. He approached a party who was

2.—*Section of group photo taken in front of Chateau Laurier, Ottawa.*

building a house and induced him to use flat wall colors, paying the painter a certain amount to apply the paint. The merchant sold the goods on a money-back-if-not-satisfied plan. The painter demurred at first, but finally undertook the work. He was well satisfied with the paint and is now a regular customer of the merchant.

"If I pay my mechanic 30c per hour for his labor, how much should I charge in justice to myself?"

A number of merchants expressed the opinion that men in the sheet metal trade undercharged rather than overcharged. There are many hours of lost labor in the tinshop. It was generally agreed that when 30c per hour is paid to the mechanic, the merchant should charge 45c to 50c per hour.

C. W. Conn, of Tillsonburg, urged members to introduce system in their tinshops, in order to be able to keep a record of the cost of each job and to tell whether the tinshop is a losing or paying proposition.

"Have members found a profit-sharing system suitable for a small business?"

None of the members, present knew of such a system although several stated that they pay a bonus to faithful employees at the end of each year. One merchant stated that he found it a good plan to advance the salaries of employees without being asked. He stated that the employees would appreciate the advance and the merchant would be well repaid for the extra outlay.

"What percentage of sales should a clerk's salary be?"

In answer to this question no definite percentage was stated. Those taking part in the discussion of this question stated they thought the bonus system the best.

OUR CONVENTION REPORT.

In last week's issue, Hardware and Metal gave practically a complete report of the Exhibition and Convention proceedings at Ottawa, including the list of officers elected for the ensuing year.

Hardware and Metal has received congratulations on all sides for the rapidity of the service it has given in this connection. In this issue the Question Box Session, and talks by merchants, are given in full.

"What is the proper method to store gun-powder?"

The answer to this question was. Keep in a metal vessel and be sure to have a permission clause in your insurance policy.

"If a customer buys his eavetrough elsewhere would you care to put it on?"

A number of merchants stated that they would be willing to put on the eavetrough but they would charge a high rate for doing so.

"Does circular letter advertising pay?"

One merchant stated that he found circular letters very effective in advising the public that he had vacuum cleaners to rent. It is three years ago since he sent out the circular letter referring to vacuum cleaners and he has had customers renting the cleaners at regular intervals since that time.

In another instance he sent out 200 circular letters advertising mops and only received one reply. He found out later that two other merchants had sent out the same kind of circulars before he did.

"What percentage of profit should a dealer add on stoves?"

One merchant, who does largely a credit business in which the payments are extended out for some time, stated that he adds at least 50 per cent. profit. Another merchant claimed that he could only get about 20 or 22 per cent. on ranges and base burners. On gas ranges he could get from 30 to 35 per cest. It was pointed out by one merchant that he always tries to make sales of household goods and kitchen utensils along with stoves and thus boost the profit. Another merchant pointed out that merchants should study closely

HARDWARE AND METAL

VOL. XXVI. No. 9 Toronto, Canada, February 28, 1914 Two Dollars per Year

The Association—and the Future

NO one with a sense of true loyalty to the Ontario Retail Hardware and Stove Dealers' Association would endeavor to say at this juncture that the convention at Ottawa was a success in the degree hoped for. The time has come for a frank analysis of the causes which resulted in the convention not coming up to expectations, in the hope that they can be provided against in future years. It would be the height of fatuity to express satisfaction when it is recognized that strong measures have become necessary if the association is to be kept on the up grade.

The attendance at the convention meetings at Ottawa was not large and interest, therefore, lagged to some extent. The fact most to be deplored was that many of the members, who had made the trip, preferred to take jaunts around the city seeing the sights to attending the meetings. It was found difficult to get those who did put in an appearance to do so on time; and nothing is more dampening to the ardor of the true enthusiast than a long wait for proceedings to start. That this comparative lack of interest should have developed this year was particularly unfortunate, as it was quite apparent that the association had reached the stage when an active and practical propaganda could be embarked upon. The officers came prepared with the suggestions and the detailed outline of a plan which would have made the association a live body, with a direct purpose and an active programme. The suggestions contained in the reports were accepted, and President Macpherson will take up the task of putting them into operation this year. The one source of regret is that he does not have behind him the impetus which could only have come from a thoroughly enthusiastic convention. If any one can carry out this arduous programme, it is the new president, but he will need the co-operation of all members—a more hearty co-operation than has been accorded to any president in the past.

If President Macpherson succeeds in putting his programme into operation—and we believe he will—and thereby makes the association an all-year-round body, he will have elevated it to a new plane of usefulness and the 1915 convention will be a record-breaker with no trace of the partial indifference which seemed to manifest itself this year. There can be no doubt that it is work of the order now undertaken which is needed to make the association a thoroughly virile, potent force in the interests of the retail hardwaremen.

The Business Situation

BUSINESS has been rather quiet, but with the coming of spring there should be a decided improvement. Hardware jobbers report that they expect a big improvement about March. At this time large numbers of booked orders will be shipped and booking for spring has been heavy. In some lines the booking is much heavier than the booking during the corresponding period of last year. Paint manufacturers report that business with the hardware trade has been holding up well and that orders for spring have been very heavy. Especially in the smaller towns business has continued good and compares favorably with the same period of last year. In the metal market there is a much better feeling although the volume of business passing is not large. Stove manufacturers and dealers have in some sections shown a falling-off in the demand for certain kinds of heating equipment. A great part of this falling-off can be attributed to the unseasonable weather which prevailed for a considerable length of time. The outlook for spring business is good, and manufacturers are quite optimistic.

That there will be a steady improvement in business conditions in Canada is the opinion of the majority of Canada's leading manufacturers. The improvement will not develop by leaps and bounds, but will be steady and sure. The development and progress of Canada, dependent though it is to a large extent on other countries, must go on. An American authority in writing on the prospects for recovery, states as follows:

"An important question at the moment is whether the recovery from the present business depression is to be quick, as it was after 1903, or is to be delayed as it was after 1884, or still longer delayed, as it was after 1873 and 1893.

"In many respects the indications are much more like those of 1903 than those of the other crises. On the other hand the bank reserves and the prices of the best bonds are lower than they were in 1904, indicating a greater lack of quick capital; and the position of our foreign trade and the price of steel and the earnings of the railroads are all worse than they were in 1904.

"Since the extravagance of the rich and the arrogant demands of employees have not yet been curbed, and since debt and taxation and general costs of doing business are still near high-water mark, it seems possible that we are only at the beginning of a long period of retrenchment, and of reversion to thrift and good sense.

"It seems to me clear that, since 1897 the temptation to spend a part of one's principal, believing it to be income, which is inevitably created by a long-continued decline in the value of gold, has been yielded to by so many people in Europe and America that the supply of free capital has been seriously impaired, and that at the same time many people have become too optimistic."

Who Owns the Press of Canada?

THE following editorial from Printer and Publisher bears on a question of vital importance to the retail merchant. The daily newspaper is the medium by which the merchant reaches the public, and its position and its ownership are matters that affect him directly. In the interests of the retail classes, it would appear advisable that the ownership of newspapers be made public. The editorial in question reads:

The question of newspaper ownership in Canada is a very live one at the present time. The public appear to be keyed up to a pitch where they are ready to believe almost anything and apply it to the press of Canada in general. Especially is this true in the big cities, where powerful industrial and financial corporations are constantly at work to secure their own ends. Quite a number of the metropolitan city dailies decline to say who are their owners or make transference of stock to other parties and enter certain amounts "in trust" in their list of shareholders. An illustration of the latter kind was brought to light recently by Toronto *Telegram*, which sought to have the public attribute certain ulterior motives to its two evening contemporaries, in connection with the stand they took on the municipal situation. A complete list of shareholders of the papers in question, the *News* and *Star*, as filed with the Registrar of Joint Stock Companies, was published.

In the case of the Star it was noted that stock to the value of $65,300 was held in trust by E. T. Malone and J. E. Atkinson. The stock personally owned by these two gentlemen brings the total of the four amounts up to $114,900, or considerably over half of the total capitalization. It is understood that the two trust amounts represent stock owned by the T. Eaton Company and the estate of the late Senator Cox. It is said the block of $17,700 in the name of Wm. Mulock, Jr., was secured by Chief Justice Sir William Mulock at the time he held the office of Postmaster-General.

Turning to the list of *News* shareholders we find its capitalization much higher than that of the *Star*. One very large amount and two smaller ones, aggregating $135,200, are held in trust. It is charged that these amounts are owned by manufacturing and financial interests who do not wish to disclose their identity. The largest individual shareholder is J. W. Flavelle, who owns $92,900 worth of stock. As is generally known, Mr. Flavelle is head of the William Davies meat packing company, which also operates a chain of retail meat stores. He is also a director of the Robert Simpson Co. department store.

It must be admitted that the secrecy surrounding the ownerships and part ownerships of the newspapers mentioned herein and also a number of others, is a matter for sincere regret on the part of the press of Canada as a whole. It should be said, however, that because certain shareholders see fit to take advantage of their privilege and place their stock in a trust account, it does not necessarily follow that they or the newspaper are guilty of any wrong-doing. The fact is, public opinion has been aroused and where the slightest suspicion of unworthy motives exists the public is inclined to arrive at hasty conclusions. But the public can scarcely be blamed for exaggerating—that is the best way they know of for showing their extreme disapproval. They naturally feel they have a moral right to know the names of those who are directing their opinions in order that they may be in a position to judge the value of the advice given.

It is of vital importance that the question which forms the title to this article be answered if the good reputation of the press of Canada is to be sustained. The enactment and strict enforcement of postal legislation, similar to that which is in force in the United States, which compel the publication of complete details of ownership, should provide an efficient remedy.

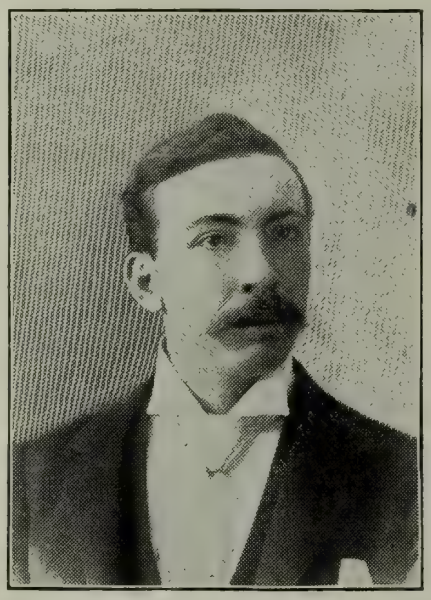
ACTION IS ONE of the four essentials of efficient man power, and in many respects the most important of the four. The man of action accomplishes things. Sometimes he gets started wrong, but in the end he is sure to get on the right track. The man who avoids the making of mistakes by doing nothing is valueless, a cypher in his particular sphere. Keep doing something is the motto of every successful man.

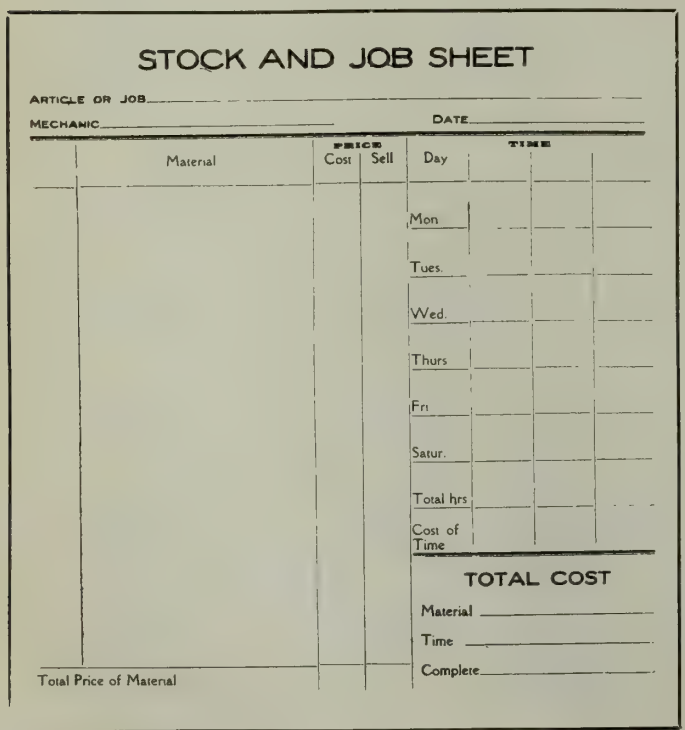
Keeping Record of Costs in the Tinshop



Paper Read by C. W. Conn, 1st Vice-President Ontario Retail Hardware Stove Dealers' Association at the Ottawa Convention —Description of Special Forms Used.

MR. PRESIDENT, officers and members of the Ontario Retail Hardware and Stove Dealers' Association:

Having been asked to give a few remarks on keeping track of costs in the workshop, I will give you an outline of my own personal experience along this line and trust it may be of some benefit to some of our members who have been in the habit of guessing at the cost of the work done and after a number of years in business wonder why they have not made a good profit.



Every one of us are in business to make money and in order to do so we must first determine the exact cost of work done on article made before making the price we are to receive for same. In the first place I have time-sheets (a sample of same I have here). You will notice they have the hours from 7 to 12 on one side and from 1 to 6 on the other side printed on same. Each man or apprentice must fill out his time card every day, accounting for every hour he works, also for material used. Their time sheets are turned into the office every night and the first thing I do in the morning is to check over these sheets and see that the work is charged up in its proper place; they are then placed in file in the office for future reference if occasion demands it.

For keeping track of small jobs or stock work I have had printed what I call a stock or job sheet (a sample of which I have here). You will notice it has ample space to put down the material used for a small job, also has a space for each day's time to be put in. To better illustrate the working of this sheet, suppose I give an order to my man for four (4) dozen 12 qt. IX flaring pails to be made. When he starts this order, say at 10 o'clock Tuesday, he puts on his time card opposite 10 o'clock, "pails," which shows when he started this job. He takes out his material as he needs it and marks same down on the stock sheet which he has started for this job. He works the balance of the day on this job and at six o'clock he puts down the hours he has worked on the pails (7), in the column provided for same on the stock sheet, and the next morning I take his time sheet and see that he has entered on the stock sheet the right time he has worked. Possibly he may be called away to do other work for one, two, or three days before he has a chance to work on these pails again; however, when he starts this job again, at the end of the day he puts down his time and material on the stock sheet and so on till the job is completed. When the sheet is turned into the office, and the material and time figured up you have the exact cost, no matter how long the job may be before it is completed.

C. W. Conn, 1st Vice-President O.R.H. & S.D.A.

These sheets are then filed away for reference, and when you have this same job to do again, and you find there is a difference in the cost of same it gives you a chance to find out why this difference, also the men know you have these records and are more particular to be more accurate in keeping proper account

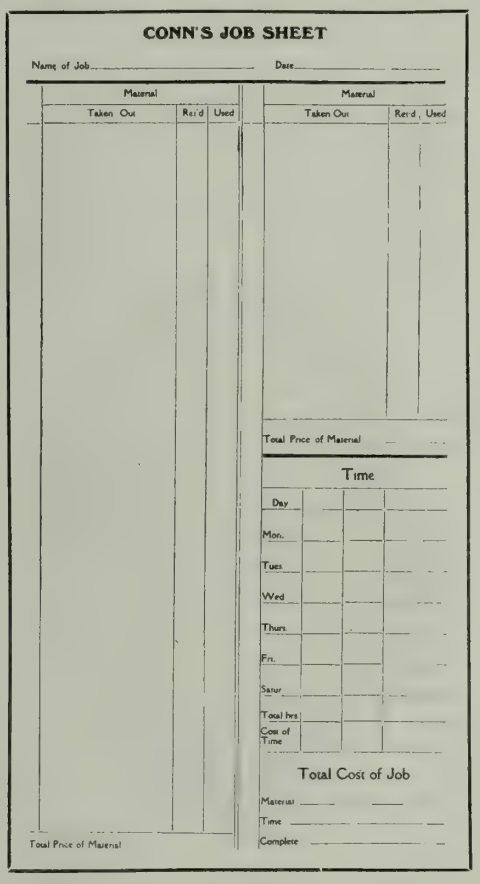
of their jobs for they know you will notice it and want an explanation of same.

I can assure anyone who is running a workshop, no matter how many men he keeps, he must adopt a system of some kind to keep accurate account of material used and time spent on every job done, no matter whether it is large or small, so that he can add to this cost enough profit, that at the end of the year he has realized something for his efforts put forth, and this system which I have adopted has proven to me its worth many times over and I would not run a workshop without it.

For plumbing, heating and gasfitting jobs which require a great many different articles, I have a large job sheet printed, which is similar to the other one with the addition of another column for goods returned. Every job that is started, the material taken out of shop is entered on this sheet and the time of each day and of each man is marked on sheet.

When job is completed the material returned is simply marked in the returned column and what is not returned must have been used, therefore you have accurate record of everything required for every job done.



Of course this takes time, but I consider it is time well spent, for by a system of this kind is the only way to know the exact cost of work done, also when your customers know you have a system of keeping track of their work they feel better satisfied they are not being charged for a few feet more pipe or a few more fittings than were actually used on their job, and if there is ever a dispute you can show this sheet to your customer and he is usually satisfied. A system of this kind is also much handier for your workmen as they don't have to trust to their memory for anything except to put down on the job sheet the material as it is taken from the shop, and after a few similar jobs are done you can judge very accurately the cost of another similar job very quickly by referring to these sheets which are filed in the office.

I have been told by a very reliable traveler who is in close touch with most of the workshops all over Ontario that he knows of only three men who really know the cost of every contract they do. Now, gentlemen, I think this is a serious mistake in not knowing the completed cost of every job one does for by no other way is a person to know how to take other similar jobs, except by guessing and that many times is wrong.

I strongly recommend every one who runs a workshop to adopt some system whereby he will know his exact cost of all work done and to charge for such work prices that will bring the balance on the right side at the end of each year.

Now, if there are any of our members here who would like more information regarding these sheets I have been using successfully for some years, I will be only too pleased to give it to them, also I am open for any suggestions any one has to make which might improve same.

Gentlemen, I thank you for your kind attention and I trust these few remarks may be the means of assisting some of you in your business.

QUESTION BOX DISCUSSION.

(Continued from page 40.)

the stoves they are selling, and by using salesmanship incite interest in the stoves to such an extent that price would be a secondary consideration.

"What is the opinion of members regarding the Canadian Merchants' Agency, Ltd., Toronto?"

One merchant reported that he had been approached by the Agency and after considering the proposition he decided it was not a good one for the hardware merchants.

Another merchant had also been approached by the Agency but he had refused to accept the proposition. Reference was also made to the growth of the mail order business in Canada and several members expressed the opinion that it would be a good plan for the association to issue a standard catalogue for distribution to the buying-public.

"Have any of the members had any experience with American window glass?"

A Toronto merchant stated that he had been selling American window glass and found it very satisfactory. Another merchant stated he had encountered considerable difficulty in cutting American window glass.

Brick-Bats From an Association Member

Letter Written by W. G. Pow, of Pow & Wilcox, Tillsonburg, and Read by C. W. Conn at the Ottawa Convention, in the Absence of Mr. Pow.

OWING to the illness of Mr. Wilcox I am prevented from attending the convention this year to represent the firm of Pow & Wilcox, but through the kindness of Mr. Conn I write now as I would have spoken had I attended this convention.

Having been a member of the association since its organization in the Rossin House, Toronto, some years ago and having enjoyed a pleasant time at all the conventions, yet we often ask ourselves and are asked by others, "what do we get out of this association besides a good time and a little hardware education at the exhibition?" Time after time we read with interest the good things some of our retail friends have to say about the association but as the course of any business is not always the smoothest and sometimes knocks are boosts, I take this opportunity of handing out a few knocks to the jobbers, the manufacturers, the trade papers and this association:—Take the jobbers; they hold their meetings behind closed doors and under penalty of some fine or other they agree to sell goods at certain prices and appoint a certain firm to whom they pay a high salary to keep them in line and to see that these prices are not broken. You will note that after each meeting of the jobbers some few lines advance the following week and some other lines keep advancing for some weeks after, for it would not do to advance all these lines just after the meeting but no doubt these advances were all arranged.

The manufacturers:—Now I'm a firm believer in protection to home manufacturers but some home manufacturers are getting too much protection and have grown so big and made so much money that they can go to the Government, make demands and get almost anything they ask. Under this heading I am going to mention only one line and that is poultry netting and I would like to have thrashed out at the question box discussion, why the price of small mesh netting dropped on Dec. 13th over $2.00 per roll on some widths and in a couple of weeks the discount on larger mesh changed from 50 to 60% off the list and yet the cost of raw material remains the same and nearly all orders have been booked for months. If these manufacurers make a profit now what must they have made in the past years when they were charging us from 40 to 50% more on some sizes? Protect Canadian manufacturers when they protect you is my motto from now on. Is it fair for these manufacturers to give catalogue houses and some buyers an extra 10% because they can sell a few more rolls a year than some of us and then they tell us to go out and fight catalogue houses. We do fight them but in order to do so and to make any money in the netting line as we have had to import same for the last two or three years but because we undertook to give some of our fellow hardwaremen the benefit of our experience by offering them netting dollars cheaper than the Canadian netting and as soon as this was known the Canadian manufacturers went to the Government and had the duty raised and because the raise in duty wasn't sufficient to stop the importation of this netting they drop their prices. I believe the committee appointed to investigate the high cost of living must know a lot of the causes before they leave their chairs at Ottawa.

The trade papers:—We all like to read them and some of us feel that we could not conduct our business without them, yet as individuals what do they care for us; they want circulation regardless of who the subscribers are and in many cases you will find these papers in the hands of small foundry men, bicycle repair men and men not in any way entitled to them. With circulation they can demand advertisements and talk Canadian-made hardware but when they get all the Canadian ads. they can get they ask us to use our influence to get some of our friends over the border to advertise with them. To show how popular the retail men are as individuals, with the trade papers, let any retail man send his money with a small ad. about a line of paint he has to sell and see how quick your money is returned with a letter saying that the firm who make that line of paint is one of their regular advertisers.

This association is or should be a retail body standing on its own legs to conduct its own affairs and should not in any way be connected with trade papers for those trade papers have a duty to perform for their advertisers and in doing justice to them they cannot do justice to this association.

What would the jobbers or trade papers be without the retailer? They wouldn't exist, yet they do exist and prosper. We as a strong association could own our own trade papers and our own jobbing houses.

If the manufacturers and jobbers can bind themselves behind closed doors then come out and make demands of us, it is up to us to hold our meetings behind closed doors and bind ourselves together to make demands of them or run our own jobbing house and our own trade paper so we could have our letters or ads. published if we have the price.

Thanking you for the time I have taken and wishing you all a pleasant time and more success to the association in the coming year, I am

Yours very truly,

W. G. POW.

THEATRE PARTY WEDNESDAY EVENING.

There was a large attendance at the theatre party, given at the Dominion theatre, Wednesday evening, February 18, when visitors were the guests of the Canadian Hardware Manufacturers' Exhibitors' Association. The theatre party was thoroughly enjoyed by all those who were present.

The Great Howard, Scotland's representative ventriloquist made quite a hit, when he worked in a number of jokes at the expense of hardwaremen and firms who were represented. He was given great applause where he mentioned that:

"Lufken's making Ireland's Home Rule."

"Johns Manville was called for, he wasn't in the building, he was on the roof."

"Tom Williamson is not from Scotland, he is from Howland."

"Who was the first hardwareman?"

Ans.—Adam.

"What kind of hardware did he make?"

Ans.—Taylor Forbes.

"Did you Gillette to-day, Dr?"

Ans.—Yes, a little Bitt.

"Smith lost his baggage and when he appealed to Harry Elliot he was given a Grand Trunk."

Jas. Hossack, D. A. McNab and James Hardy were also mentioned.

Advertising is the life of any business. It's a stepping-stone to a larger and more profitable business. Its service and force cannot be arrived at; it just goes on building stronger and firmer as it grows in volume .

The Retailer and the Cartage Problem

Synopsis of Talk Given by Jas. N. McGregor Before Ontario Retail Hardware and Stove Dealers' Association at Ottawa Convention — Are Retailers to Blame for Present Conditions?

MR. President and Gentlemen,—I have not prepared a paper on this subject, thinking it might be better to open up a few lines of thought which would draw out a discussion that would lead to information, that would be valuable in this important part of our business. At this point it might be well to speak of how this present condition of delivering goods came about.

An enterprising merchant, looking around to find means to increase his sales and give better service, devised the plan of going his competitor one better, and leaving goods in the homes instead of having them take same from the store. He knew that this would entail greater expense, but hoped that the greater amount of trade received by this method would not only compensate him for the expense, but realize a handsome profit. It proved so effective that other merchants, noticing their customers leaving them, investigated why, and attributed it to the new departure of their competitor, with the result that one by one each adopted this method, until every merchant was leaving the goods in the homes of his customer, thus incurring hundreds of dollars more expense in distribution and no additional business being done by any of them. At this point permit me to digress a little and show how the retailer set an example for the wholesaler, which was taken up and incorporated into their business, and which the retailer regards as an injustice done him by the wholesaler. The retailer leaves the goods in the homes of those living in the town or city without any additional cost. The farmer drives in and pays the same price to the dealer at the store as the inhabitant of the town does in his home. The wholesaler incorporated this plan into his business and in the majority of cases delivers goods to the stores of his retail customers in the cities, while he makes his outside trade buy his goods f.o.b. warehouse, and it is from this that originates that great cause of complaint—cartage at the other end. It seems to me if the country merchant regards this as an injustice he should incorporate into his business a different method of delivering, because the farmer has just as just a cause of complaint as the country merchant, and we cannot reasonably ask a person to readjust an abuse to us which we are practising towards others.

The average delivery rig to equip, keep and maintain costs at least $800 a year, and many say this is a modest estimate. When we take into consideration how many of these every year, even in our small towns, run uselessly many times over the same territory, we cannot help but think that concentration would reduce this expense many fold. The most just way would be to have one price at the store, and have people which require additional service make that a matter between them and a common carrier, or, if this were not practicable by the drastic change, it would be much better to have a firm go purely into this line

Jas. McGregor, member Executive O.R.H. & S.D.A.

of business and the various merchants pay them a certain amount for this service. In this way there would be regular hours for delivery in certain sections, and customers would know if their order was not in before a certain hour they would have to wait until the next delivery. In this way the merchant's distribution would be put on a much more business basis. He would have certain specified times to get out his goods, and if an unreasonable request were made for delivery by a belated customer he could refuse delivery without imperiling the loss of their trade, as is now the case.

When Mr. McGregor had completed his talk on the cartage problem, a discussion took place among the retailers present, and many interesting points were brought out.

A Hamilton merchant reported that he had an arrangement with a delivery firm whereby all parcels from his store were delivered at a cost of $6 per week. He reported that so far he had found the innovation very satisfactory.

Deliveries were made at certain intervals during the day. He stated, however, that there was one disadvantage, and that was in connection with his follow-up system. When he conducted his own delivery system he always had his drivers on the look-out for prospects. If an order was sent in for a keg of nails the driver when delivering them was instructed to ascertain the nature of the work being done; if a new building was being erected the driver would take a note of it, and the builder was approached with a view to selling him builders' hardware. Under the contract system this method of securing names was impossible.

THE HOCKEY MATCH.

A very exciting hockey match took place on Wednesday, February 18, at Ottawa, between a team picked from members of the Ontario Retail Hardware & Stove Dealers' Association and a team representing the Canadian Hardware Manufacturers' Exhibitors' Association. Jas. McGregor, of Oakville and W. J. Carter, of Picton, were the chief rooters at the game. A number of players who had apparently not been on skates for some years introduced an entirely new style of hockey. It is said that a certain hardwareman from Owen Sound is carrying a great many bruises which he secured from consistent contact with the icy surface. Roy Harris, of Stratford, carried a souvenir in the shape of a swollen face. Several other players also have marks of the fray. It was a hard proposition to get the official referee to give a decision in the presence of the players but it is said that the score was 3—2 in favor of the Manufacturers' team. Following is the line-up:—

Manufacturers' Team.

Goal, Baird, Galt; Point, Matheson, Hamilton; Cover Point, McCaffrey, Russel; Centre, Ball, Renfrew; Right Wing, Harris, Stratford; Rover, McCaffrey, Russel; Left Wing, Moirs, Oakville; Referee, J. A. Clark, Smiths Falls; Umpires, W. Kennedy, Russel; L. Lewis, Smiths Falls.

Retailers' Team.

Goal, Ed. Wanless, Chatham; Point, E. J. Creeper, Owen Sound; Cover Point, Roy McGregor, Oakville; Centre Redmond, Elora; Right Wing, Patterson, Niagara Falls; Left Wing, Patterson, Niagara Falls.

The Science of Successful Stove Salesmanship

Illustrated Talk on Stove-Selling Given by E. H. Gurney Before Ontario Retail Hardware and Stove Dealers' Association in Convention at Ottawa—The Essentials.

IF any man in this meeting was to start to-morrow morning to buy a bottle of pickles, four times out of five, he would come home with a particular brand. No need to say what that brand is, you all know. Why is this? It's easy enough to say advertising and that is one of the reasons but it is really because that brand is "best known."

Last year down in New York a cheque for two million dollars changed hands in payment for a word and that word was "Uneeda," Why? Because "Uneeda" commanded a large portion of the soda biscuit business in the United States and did it because it was best known.

I have often heard dealers complain about mail order competition. I am going to show you some pictures of business that don't feel the mail order competition in the stove business and they don't feel it because they know they are best known in their own town

Eating meal in store window.

and this picture will show you how the dealer has accomplished this.

Here is a picture of a window in a city out in Saskatchewan. These seven men sat down to dinner in this window and had a full course repast from soup to nuts and they started in at 7.30 in the evening and finished after 10. There were cards suitably displayed telling about the cutlery that was used, the cut glass that was used, the stove that the meal was cooked on and utensils the dishes were cooked in, and by the time these men got around to their cigars the crowd was so large that the police had to keep moving them on as the traffic was absolutely blocked. This next picture shows you the window just before the men entered it, you can see the cards better here. Some of these cards are an acknowledgment of loans from other merchants, of the material used in making this display. This kept the cost down very materially.

This next window shows the interest that another crowd took in this same window when the result of a baseball match was shown cleverly on a board. No need to go into detail as to just how this was done and how advertising value

Crowd watching baseball score.

is obtained from it—look at the crowd. Gentlemen, this man is "Best known" in his locality. The man who is responsible for this window dress has helped to put this retail store in a position where the mail order house can't compete—he is here to-night.

I want to tell you about another man who is better known than the mail order house. This man has his place of business in a town of about 2,000 people within 25 miles from Toronto and yet he buys stoves by the car. Here are some of the methods by which he is best known. This first picture shows the posting of the neighborhood to advertise a demonstration. When the car of stoves arrived, they were loaded on ten lorries preceded by two automobiles containing the town band and they processioned all around the town. Following their procession, there was a baking contest to all ladies who would hand in the name of stove on which the cake they submitted was baked, together with the date on which the stove was purchased. This retailer secured a list of people who

Posting the neighborhood.

takes an interest in baking and who had old stoves.

Gentlemen: It is often claimed that the people who take an interest in anything like this have not got purchasing power but I want to say right here that the woman who won this contest was the wife of a Toronto millionaire. Here is the window that was used in this demonstration.

Gentleman: The mail order man would have difficulty in putting anything in the mails to compete with these methods as a means of publicity. I want to show here the store of a man who feels mail order competition. I know it because he has complained to me about it and I am not surprised.

I went into a store in Toronto the other day to buy a piece of cheese. The man who sold it to me had dirty hands and a dirty white apron and he did up that cheese in a most unappetizing package. In a word by the time I got to the door with that cheese, I had lost all interest

Car of stoves in parade, headed by town band in auto.

in it as an article of diet, yet this dealer had a pretty large store with modern cash carriers, bookkeeping system and was regarded as a first-class tradesman in his line, but that man should not go to a Grocers' convention.

I would like to see him go to a cheese buyers' convention and if I ever met him there, I could tell him a few things. This makes me think that sometimes we talk too much about selling and not enough about buying. Let us look at this end of it from the stove buyers' view-point. Let us imagine a buyer who is starting out to purchase a range for say $50.00. He is going to be interested in price or quality or he will prefer to go to the livest store. Usually he will find the livest store to be the place where he gets the quality. Now, let us say that he is going to spend $50.000 all in one lump for a range. How many times do any of us separate ourselves from $50.00 all at one time for a household article? I tell you it is a big event to that man and he wants to be treated as if the dealer

recognized it. What does he want? He wants an uninterrupted demonstration in an isolated part of the store. This picture shows what I mean. This man will not appreciate having his deal interrupted by some casual purchaser of eight cents' worth of tacks with a two-cent profit.

He wants a complete demonstration. A dealer should not be able to sell a stove and keep his hands clean. The custom-

Where baking contest was held.

er wants the stove taken to pieces, particularly if it is a high-class article, so that he will see just what he is getting. Here is the process.

Here is a stove that is not ready for sale. Gentlemen, that stove cannot be sold for its face value until some tidying up has been done.

Now, I would like to tell this meeting this proposition although it may be unnecessary. Mr. Sheldon probably told you this yesterday evening. (lantern here showed chart of psychology of Selling Reason, Pride, Economy, Efficiency.) It is a proposition that every clerk in your store should be taught that in selling a stove, every word he has to say should be to influence a buyer along one of three lines. I remember a colored preacher who lost his job and when he asked the Deacon why he was fired, the Deacon replied, you certainly argufy and you certainly did sputify, but "you fails to show wherein." It will be easier to show "Wherein" if every word of sales talk, is to appeal to the customer's sense by first pride, second, economy and third, efficiency. It isn't necessary for me to tell you how each may be used. I would just like to say in the first case that a remark to the effect "I know this will suit you, Madam, it is the same as we sold to Mrs. B. and you two are the best housekeepers in this town." In a word make every remark tell as it will appeal to one of these three qualities in a man or woman and the sale is more readily accomplished.

Of course it is necessary to give service to back any selling plan and certainly there is no time for me to give you an outline as to what this means to the stove department. The most important item however, is repairs and both manufacturers and dealers should see to it that prompt perfect repair service is forthcoming. To do this the manufacturer must standardize his parts and should get out illustrations something like the sheet shown herewith.

A dealer to do his part must appoint somebody in his shop who will be familiar with the parts usually required and who will become thoroughly acquainted with the manufacturers' name for these parts and who will follow every order placed for a repair part until the customer is absolutely satisfied.

Advertising.

I want to say a word about advertising. I have known a great many stove salesmen and there are many good ones in this room to-night, but mighty few of them can write an ad. It means extraordinary selling ability because you don't know who you are talking to, in addition to this it means a technical knowledge—you must get the amount of material and the amount of white space you buy in proportion, you must know what kind of cuts to use, you must get a heading that will jump right out of the paper because you must realize that your ad will be one of two hundred in a paper that only costs a cent and you certainly have got to simply snatch the reader's attention. I simply have two suggestions to make—that you consult freely with the publisher of your paper on matters of that kind; second, that you plan out carefully in advance your advertising for the year and see that it is never written in a hurry or by men who have no taste for the job. We all of us manufactur-

Stove not ready for sale.

ers and retailers could profit by living up to this.

The manufacturer who is a stove specialist should provide selling plans and advertising material and general co-operation for the use of the live dealer. I have no sympathy with the manufacturer who says "we will move these goods right off your floor." The main spring in moving goods off the floor is the live retailer but this retailer should be able to get his ammunition in shape of a well-thought-out, well-balanced selling plan, with perhaps advertising assistance from the manufacturers.

To sum up, (Essentials shown by lantern were Location, an adequate display and demonstrating floor, proper line and variety, and efficient sales organization,

Corner of special stove display room.

an advertising plan, demonstrations, an enthusiastic knitting together of all these essentials.) here are the essentials for successful stove department and I am not going to comment on them further except this last one, "an enthusiastic knitting together of all these essentials." If the boss has service at heart and is a well of enthusiasm, this is the most contagious thing in the world and every single item in the plan will pull.

This is the crux of the whole matter and this is the essential for welding the whole plan in one harmonious successful business scheme.

INVITATION FROM MAYOR OF LONDON.

Mayor Graham, of London, Ont., addressed the Thursday afternoon meeting of the Ontario Retail Hardware and Stove Dealers' Association, and exfended an invitation to the association to hold their next convention at London. He promised that ample accommodation would be provided for visitors at the hotels. The new Masonic Temple would be available for meetings of the retailers. The clubs would also be thrown open for the visitors at the convention. If an exhibition is to be held, the Armouries have been offered as a building in which to hold the exhibition. The new Masonic Temple, in which the meetings could be held, and the Armouries, in which the exhibition could be held, are within short walking distance of each other. President Occomore thanked Mayor Graham for the invitation, and assured him that it would be given consideration by the officers of the association.

Trade Agreements for the Furthering of Mutual Welfare

Paper Read at Ottawa Convention by W. F. Macpherson, President Ontario Retail Hardware and Stove Dealers' Association. Duty of Association to aid Members.

"I HAVE been asked to introduce by means of a short paper the matter of "trade agreements," and would at a meeting of this kind naturally expect to define the value of association work in this connection. By trade agreements I do not mean a simple matter of an arrangement of prices between local competitors, but rather the larger idea of that ideal state where the word "competitor" may be abolished, and where each may recognize the rights of the other in the community and work hand-in-hand for the furthering of their mutual welfare.

It is rather an unfortunate state of affairs that I am told exists in some towns, where dealers in the same line of business pass each other on the street, and are not able to say "Good morning" to each other. What an opening this gives for the demoralization of business in such a town—with a spirit of suspicion always alert, every little tale carried by some evil-minded person, who is looking for some favored treatment—is magnified and the spirit of anger and jealousy further intensified, and so the merry war goes on.

Instances have been quoted on the floor of this association where, through attendance at our meetings, dealers from the same town have really become acquainted, with a consequent improvement of trade conditions in that place.

I quite realize that it is more difficult to attain this end where possibly only 50 per cent. of the dealers in a place attend our convention; still surely enough leaven may be taken home by our members to introduce new life where the trade relations are now unsatisfactory. Have a talk with the other dealers and tell them how in a large number of towns, by having a friendly understanding, conditions have been bettered, and, above all, show confidence in your fellow-merchant, and show him that he may have confidence in you.

I consider it justifiable and right that local dealers should have an agreement as to prices on staple lines, and not at all a restraint of trade. We all know how the jobbers and manufacturers have agreed prices, accomplished through associations; and, while that is possible with them, it would not be so easy for us as an association, although I am interested to note that in some of the State associations the matter of a central price bureau is under consideration.

A proposition of this kind would certainly make a good basis on which to draw the various dealers together, and make it considerably easier for us to maintain a fair price for our goods. Many dealers in towns where price-cutting maintains, are much in the position of the manufacturer, who, according to an article in a recent Saturday Evening Post, when approached by a brother manufacturer with the words: "Now, you are engaged in the manufacture of screen doors." "Oh, no, sir," he interjected, "you are mistaken. I am engaged in making prices for Billy Martin to cut." This is a particularly lamentable state of affairs which does exist, and can only be adjusted by co-operation between the dealers. Don't give up in continuous efforts to reconcile the dealers in your town with the first repulse. Keep at it, as the final result amply repays one for swallowing a little pride possibly, and one-time enemies often become the warmest of friends.

Where this ideal state exists, as it does in many of our towns, prices are maintained, goods are bought together, giving a benefit of quantity price, and credits are talked over, so that protection is given against dead-beat customers.

I have always felt that it was the duty of this association to go to the aid of any of our members when necessary, and endeavor to get the dealers working together in their town, and feel satisfied that any such application would receive the favorable consideration of our executive, and some member of that body would be sent to aid any honest effort to the realization of the desired co-operation amongst the various dealers.

I sincerely hope that as time passes more and more of our members will have the pleasure and profit of working under some favorable and no more than proper trade agreement.

Increased Capital.

Chapman & Walker, Ltd., Toronto, have increased their capital stock from $50,000 to $150,000.

The H. Mueller Mfg. Co., Ltd., Sarnia, have increased capital stock from $300,000 to $500,000.

The Wallaceburg Brass and Iron Mfg. Co., Ltd., have increased the capital stock from $40,000 to $250,000.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of February 24, 1894:—

"When Hardware and Metal about a year ago announced the amalgamation of McKee & Davidson and Fortye & Phelan, two well-known firms, under the style of the Peterborough Hardware Co., it was intimated that the firm would build a magnificent building at the corner of George and Simcoe Streets, Peterborough. The building has been completed, and is one of the finest in the town."

Editor's Note. — The Peterborough Hardware Co. are still doing business in the City of Peterborough, and now do a wholesale and retail business.

* * *

"A new churn called the 'Cradle' is being placed on the market. The churn is worked by rocking it back and forth in the same manner as a cradle."

Editor's Note.—Many hardware dealers, no doubt, remember the time when the "Cradle" churn held sway. Its place has been taken largely by the revolving and other churns, which have been developed during recent years. In our issue of twenty years ago an illustration of the then new churn was shown, which demonstrates the fact that Hardware and Metal did at that time, as it does to-day, endeavor to keep the Canadian hardware trade posted regarding any new lines which may be produced.

* * *

"W. B. Clements, hardware merchant, Milton, Ont., was in Toronto this week attending the A.O.U.W. Convention."

Editor's Note.—The hardware business at Milton, Ont., is known as Clements & Son, and is now managed by R. W. Clements.

"Inferior material is a foe to profits, the brother of high cost and the friend of bad methods."

Dominion Board R.M.A. Submits Reasons and Proposals

Copy of Letter Sent by Dominion Board of the Retail Merchants' Association to the Officers and Members of the Ontario Retail Hardware and Stove Dealers' Association.

Toronto, Feb. 19th, 1914.

TO the President, Officers and Members of the Ontario Retail Hardware Association, Chateau Laurier, Ottawa.

Dear Sirs,—Acceding to our promise made at a joint committee meeting held this morning, we submit the following reasons and proposals with the view of endeavoring to cement together our two associations, so that they can more easily and effectually accomplish what they both have in view; viz,, the improvement of the conditions of the retail trade.

For a number of years our association made very vigorous efforts to carry out some very important resolutions, that all retail merchants who had the welfare of the retail trade at heart desired to secure.

Owing to a great many unfair clauses that have been placed in the Criminal Code before our association was organized we found that we were unable to carry out to a final issue the resolutions that we desired.

To remedy this and place us in a position whereby we could carry out our objects we applied to the Dominion Government and secured a Dominion charter by a special Act of Parliament.

Having removed the legal difficulties that formerly hampered us, and at a very large expense to the association, we are now in a position to do what we formerly could not do, and if the entire strength of the retail trade was bound together and acting as a unit we are certain that great good could be accomplished.

Our plan of organization, whereby all classes of retail trade come under one association, gives us the power, and it enables us to stand for the class we represent, which is the largest commercial class, and to announce with authority the views which they desire to have expressed, both before the Dominion or Provincial Governments.

Our experience has proven that all fair-minded retailers in all sections of trade desire the same thing, and they express the same views on all general subjects that are of common interest to all.

Under our plan of organization each section have their own offices, hold their own meetings and conventions, and have eentire change and control of their own special funds, and it gives them all they could ask; viz., "Home Rule within the Empire," and yet they are part of the whole, having the use of the strength and the influence that the unity of all the retail merchants gives them.

It is quite unnecessary to remind you, but for the purpose of giving you further reasons why we should all stand shoulder to shoulder. We desire to point out to you the necessity there is for all sections of the retail trade to be of one mind and one purpose when they are asking their Legislatures for legislation, or when we are opposing some legislation that is detrimental to our interests.

This condition can only prevail where we are all united in one body and all go together with the same demands, and not in separate bands or groups, some asking for one thing and some for another, without having any united opinion, but by all being united this danger is avoided.

Having these advantages, then, in our plan of organization, we believe that your members should receive, with the co-operation of our members, great strength to the forces, and especially as we have legally entrenched ourselves under a Dominion Act of Parliament.

We submit, therefore, the following:—

1. That more unity can be brought about and better work accomplished by all working together.

2. That the membership fee is $5 per annum, $1 of which is paid to the Dominion Board, and if you require any further sum for sectional work we collect it for you.

3. That any money that you may make in your section or collect for your section belongs to your section.

4. That any funds that you may have on hand will remain with your treasury.

5. That our boardroom, with its furniture and equipment, will become your boardroom as well, as you will become joint owners with us, and it will be at your disposal for regular or for special meetings, as arranged, the rent, light, etc., being paid for out of the general funds.

6. That our office staff, telephone, typewriting machines, writer press, etc., will be always at your service and paid for out of the general funds.

7. That all notices, both regular and special, are sent out at the direction of your officers and are paid for, together with the postage, out of the general funds.

8. That we supply all letter heads, bulletins and stationery, etc., at no further cost to your section.

9. That all your members would get our credit reporting service without extra charge.

10. That our organizers are paid out of the general funds, and they are always at your service.

11. That your correspondence is all properly looked after and kept on file without any extra cost to you.

12. That all legislation, both Provincial and Dominion, that you decide upon is taken care of by our officers without any further charge to your section.

13. That you are put in direct communication or personal contact with the officers of all the other sections throughout Ontario and the other provinces of the Dominion.

14. That when we secure sufficient members in the various provinces in our sections it is our intention to appoint a practical hardwareman to work in conjunction with our organization staff, and take up matters of trade interest with the members.

Any further details not mentioned here we shall be pleased to submit to you, and in closing we desire to say that we hope that good results may come out of the consideration of this important subject, as we must all feel that this is an age of organization, and one in which we must stand, as a retail class, closer together than we ever stood before, if we want to preserve those honorable traditions of trade which have been handed down to us, and which have been placed in our keeping.

Remaining yours truly,

B. W. ZIEMANN, (Signed)
President Dominion Board.

E. H. TROWERN, (Signed)
Secretary Dominion Board.

Perhaps the strongest reason for an inferior quality of work under conditions that tend to hurry mind and body is the ignorance of the worker as to the importance of maintaining a standard of quality in his work. His imagination may not have been called into play. He may have no adequate idea of the use and function of the parts he is turning out, and so works monotonously and without interest.

Fire Insurance Expert Suggested by R.M.A. Head Convention in Toronto

President Matthews, of Ontario Branch, at Fifteenth Annual Convention, Throws Out This Suggestion—Enthusiastic Over Work of Past Year and the Future — Many Important Resolutions.

By Staff Representative.

TORONTO, Feb. 26.—Wednesday morning, at 10.30, saw the opening in the Temple Building here of the fifteenth annual convention of the Retail Merchants of Canada, Ontario branch, with President E. C. Matthews, of Toronto, in the chair. The morning session was devoted to shaking hands, registration and reception of delegates and other preliminaries.

In the afternoon the proceedings were opened by an address of welcome from J. C. Van Camp, president of the Toronto branch, and a response by B. W. Ziemann, of Preston, Ont., the Dominion president. After the roll call and reading of minutes, President Matthews delivered his address to the delegates.

He was pleased to meet the merchants again, and extended to those who had traveled long distances, to convene with their fellow-retailers and discuss the various resolutions that would come up, not only a glad welcome, but his hearty appreciation for the interest they had in the cause, and which was shown in a most practical way by their presence.

"I need not endeavor to press upon you," he added, "that the cause which we represent here to-day is not only a worthy one, but it is also a very important one, as we represent the largest commercial class in the province—the retail distributors.

Importance of the Retailer.

"For many years retail merchants were not aware of their importance in the community, and it is only at this late date that we are beginning to realize that we are a factor that cannot be dispensed with. We are the first settlers in the villages, and out of villages we make the towns, and from the towns we develop cities. Our premises are the most highly assessed, and our merchants are among the most active and permanent city and town builders. It is for this reason that we have deemed it necessary that our welfare as a class should be cared for by and through an organization such as we have formed.

"For many years our time and attention has been given toward placing our requirements as a class before the merchants, and I am pleased to tell you that they are responding to our call more and more each year. The year that has just closed shows a greater increase in membership than the previous one, and we hope that the coming year will show a still greater addition to our members.

"I am thoroughly convinced that it only requires patient and persevering energy, and every retail merchant in Canada will see that the founders of this organization planned even bigger things than they themselves anticipated. Personally I have always been a strong advocate of organization. I believe that no improvement can take place, and no betterment of trade conditions can be made without organization. So firmly am I convinced that we can only make progress through associating ourselves together, that long before I went into business on my own account, and when I was the chief clerk in a prominent retail grocery store in Toronto, I became interested in a Retail Clerks' Association, and it was not very long after I took an active part in their work that I had the honor to be chosen as their president. When I ceased to clerk and became master of my own store, I naturally felt that what was good for the clerk, or good for the labor union man, or the manufacturer, or the farmer, or the lawyer, was good also for the retail merchant, and, after carefully looking into the manner in which this association was organized, I decided that it was planned on proper lines, and from the day I became a member until to-day I have always taken an active part in it, because I believe that only through it can any good lasting work be accomplished for the retailer.

E. C. MATTHEWS, Toronto,

President of the Retail Merchants Association, Ontario Branch, who presided. Mr. Matthews is a Toronto retail merchant.

United Front Advocated.

"It may seem unnecessary for me to endeavor to impress you with this fact, but I do not think that any of us can be too sanguine about the cause we represent. I feel that it is not sufficient that we become members in name only, we must believe deep down in our hearts that we are right, and that we are members because it is the only way to clear the channels of trade from all sorts of schemes and tricks, and that by all standing united for those things that are fair and honest in merchandising that they can be secured.

"It will be unnecessary for me here to lay before you the many things that we believe that can be done to improve the retail trade generally, as a great many important issues will come before you in the resolutions that will be presented and considered.

Study Fire Insurance Policies.

"There is one thing, however, that I have often thought that it would be wise for us to consider, and that is to engage a first-class fire insurance expert, whose duty it would be to go from place to place and examine the fire insurance policies of our members, and to point out to them just what their policies mean in case of fire. I am thoroughly convinced that thousands of dollars could be saved to our members; but better still a great deal of anxiety and

worry could be removed from us, if we knew exactly where we stood in case of fire. This may be worth your consideration if time will permit.

"The secretary's and treasurer's reports will come properly before you, and it is therefore unnecessary for me to make any reference with regard to them here.

"I am pleased to say that I have been able to attend all the executive meetings that have been held, and to visit the office a great many times during my term of office. I have made it my business as one of your executive representatives to keep in close touch with the great amount of work that has been carried on in the head office, and I desire to thank my fellow officers, and especially the secretary, for the great assistance I have received in securing any information I have desired. I have found the office staff obliging and at all times willing and all working with a zeal and interest in their work that bespeaks harmony and co-operation."

In closing Mr. Matthews again trusted that all would feel that their attendance in convention had been for their mutual good, and that all would go away with stronger desires than ever to not only believe in the cause they represented but to impress their belief on others, and thus strengthen the ties that bind the merchants in one big broad and far-reaching retail organization.

The Resolutions.

The receiving and consideration of reports occupied a good deal of time. With B. W. Ziemann in the chair, he read the various resolutions which were dealt with in order read.

The first was as follows:—

"That it is the opinion of this meeting that if it is the intention of the Ontario Government to appoint a fire marshal for the Province of Ontario, that he should be appointed under the direction and authority of a Minister of the Crown so that in the event of any severe restrictive measures being imposed upon us by the said fire marshal, or his deputies, that we, as merchants, will have access to the minister and be able to lay our complaints before him."

In discussing this resolution G. B. Ryan, of Guelph, maintained that someone should be appointed to inspect the various places of business. It costs more per capita for fire loss in Canada than in any other country in the world, he said. Premiums would be less if people were careful.

T. B. Cramp, an Orillia grocer, among others maintained that it was right to see that proprietors of buildings put their places of business in such a condition to prevent fires.

"An ounce of prevention is worth a pound of cure," someone said, and the resolution carried.

Resolution No. 2 read: — "That it is the opinion of this meeting that subsections (b) and (c) of Section 72 of the proposed Workmen's Compensation Act be amended, so that retail merchants cannot be taken under the operation of the act by the board, but only through an amendment to the act itself, passed by the Government."

In discussing this Secretary Trowern did not think that retailers should be included in this act against their will. He styled the whole thing as "a leap in the dark," and thought the Government would find that out.

After further discussion in which G. B. Ryan and Eric Jamieson, of Hamilton, took part the resolution carried.

The "Great White Way" of the convention city from photograph taken at midnight.

Neepawa, Man.—Neepawa Plumbing and Heating Co. have given up business.

Sherbrooke, Que. — Jospeh Lacombe has been succeeded by Lacombe & Fils., Limited.

Gladstone, Man. — Alex. Anderson, hardware and implement dealer has sold his hardware business to Williams Co., Ltd.

Humboldt, Sask:—Ritz & Yoeger have disposed of their hardware business to Geo. E. McKinney, late of Powell River, B.C.

Theodore, Sask.—Learmonth & Laying, hardware dealers, have dissolved partnership, T. F. Learmonth continuing the business.

Paint Traveler Resigns.

J. F. Bowden, Toronto, Ont., has resigned his position with the Imperial Varnish and Color Co., Toronto and intends taking a complete rest and change for a time. Mr. Bowden has been associated with the Imperial Varnish & Color Co., for the past nine years, part of the time calling on the trade in North and North-western Ontario. During recent years he has looked after the selling end to the hardware and paint trade in Eastern Ontario, Quebec, Maritime Provinces and Newfoundland.

British Columbia Items.

J. Hopper, of the Hardware Company, is in California on a few week's holidays.

Eby & Sparks have opened a new general store at Terrace, one of the new and growing places.

Cooper & Parks have purchased the business at Deroche, formerly held by the Nicomen Supply Company.

Now that they have got into fine new quarters, Denmark and Burton, Chilliwack, have one of the best hardware stores on the lower mainland.

Friends of Mr. and Mrs. T. Kirk recently gave them a surprise party, the occasion being their china wedding.

Mr. Greaves, manager of the Shore Hardware Company, Victoria, has returned from a visit to his old home at London, Ontario. He brought back a bride.

Owen & Whalley, who have had a butcher shop and hardware store on Fourth avenue, have sold out the butcher shop and will devote all their time to the hardware section.

The Drake Hardware Company, Victoria, are making considerable improvements to their establishment, so as to provide room on the main floor for a display of sporting goods.

J. Bryson, sr., member of the hardware firm of Bryson & Sons, New Westminster, an old-established house, has been re-elected alderman for 1914. The municipal contest was very keen in New Westminster.

Mr. Moscrop, of the hardware firm of McTaggart & Moscrop, who recently sold out to Johnston & Salisbury, has gone to Toronto to live. The climate of the coast was not beneficial to Mrs. Moscrop's health.

Fraser & Carpenter have opened a hardware store at Newport, which hereafter is to be known as Squamish. Mr. Fraser was formerly in business at North Vancouver. Newport is the new town at the head of Howe Sound, on the line of the Pacific Great Eastern, which will run from North Vancouver to Fort George.

Personals.

The following representatives called on the Montreal hardware trade during the past week:—

Thos. Mortimer, Toronto, Rabone & Sons, Heath Foundry Co., El Star Company, Alfred Williams, Ltd.

Jas. Kinsman, Philadelphia, North Brothers Mfg. Co.

W. H. Wilson, Rochester, Rochester Stamping Co., Robeson Cutlery Co.

B. A. C. Catlin, New Britain, Conn., Corbin Cabinet Lock Co.

J. W. Hubbard, Sheffield, Stacey Brothers.

Mr. Shaw, Sheffield, Alfred Fields, Limited.

Mr. Shine, Peterboro Lock Company, Peterborough.

Chas. R. Hubbard, Hamilton, Atkins Saw Co.

R. Barrington, Cleveland, Cleveland Twist Drill Co.

C. L. Gerard, general manager, J. Wiss & Sons, Newark, N.J.

A. Sumner, president, and Percy Dixon, general manager of the firm of Sumner & Company, hardware merchants, Moncton, N.B., were in Montreal for a few days during the week.

C. McArthur and William Forbes, of the firm of Brace McKay & Co., hardware dealers, Summerside, P.E.I., were in Montreal during the week.

T. B. Williamson, of H. S. Howland, Sons & Co., Toronto, visited the Ottawa Exhibition.

C. E. McLaughlin is now covering the Canadian trade for the Oneida Community Co.,Niagara Falls, Ont.

Gordon C. Seybold, general manager Cochrane Hardware Co. stores, was a visitor in Ottawa last week.

S. H. Lewis, of Smith's Falls, is now representing Pinchin, Johnson & Co. (Canada), Ltd., in Eastern Ontario.

F. R. Newman, manager Canadian Fairbanks-Morse Co., Toronto, sailed from London, England, on the 25th.

S. L. Adolph, hardware merchant, Listowel, Ont., was a visitor at the Toronto office of Hardware and Metal this week.

G. H. Mabee, of the Latham Hardware Co., Moose Jaw, Sask., was a visitor at the Toronto office of Hardware and Metal this week.

M. J. Butler, of Armstrong, Whitworth of Canada, Ltd., left Montreal, on Feb. 19, on a visit to the parent works in England. He expects to be back in Canada about the latter part of March.

William H. Evans, representing Messrs. Wilckes-Martin-Wilckes, lampblack makers, New York, and Messrs. Blundell, Spence & Company, Hull, England, called upon the trade this week.

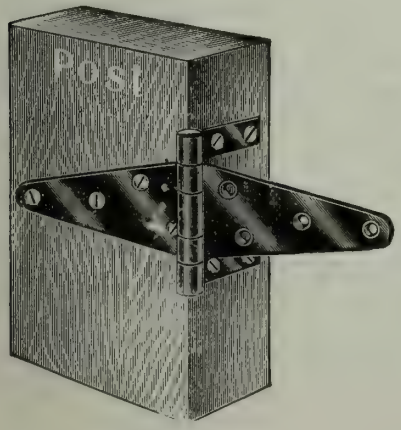
Frank Bishop, senior partner of Messrs. Bishop & Son, the old established hardware firm of Brantford, Ont., accompanied by Mrs. Bishop, was in Montreal recently, en route to St. John, N.B. from whence they have sailed to England for a short visit.

Among the visitors at Ottawa during the week were: S. H. Alexander, of Wood-Vallance & Co., Hamilton; Col. Gartshore, of McClary Mfg. Co., London; A. W. Poole, Brandram-Henderson, Ltd., Montreal; Harry James, Shurley-Deitrich & Co., St. Catharines branch; Chas. Thomas, Sherwin-Williams Co., of Canada, Toronto branch.

New Goods Offered Canadian Hardwaremen

LADDITE GAS MANTLE.

The Hamilton Gas Mantle Co., Hamilton, Ont., announce that they have purchased the secret process rights for the manufacture of the Laddite incandescent



Laddite Gas Mantle.

gas mantles for Canada, including the registered trade mark Laddite.

It is claimed by the makers that the Laddite mantle maintains its brilliancy upwards of 2,000 working hours. This is said to be due to the action of the Laddite element, which, it is said, prevents the vaporization of the ceria oxide, one of the ingredients used in combination with thorium, the light-giving element.

PAUL HINGES.

The Paul Hinge Co., Muskogee, Okla., are offering the trade the Paul hinge, here illustrated. The makers claim that in the construction of the Paul strap and tee hinge it absolutely does away with the three weak points of the ordinary hinge.

Paul Hinge.

The Paul hinge, the company states, stops twisting off where they are fastened only once on the central pin. They also prevent the gate or door sagging and from pulling off, for the leaves on the Paul hinges prevent any strain on the nail heads.

The hinges are packed one pair in a box with screws or nails, or in convenient assortments, including the 4, 6, 8, and 12-inch sizes.

"PULL EASY" NAIL COLLARS.

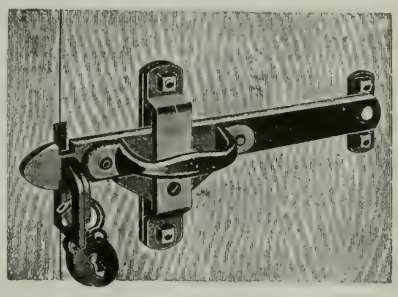
The Pull Easy Manufacturing Co., Waukesha, Wis., is offering the trade the "Pull Easy" nail collars, here illustrated. The collars are made of steel, and are for use in building concrete forms, false work, braces, scaffolding, and in any other place where nails are used for a temporary purpose.

With the collar, the nail may be imbedded just as firmly in the wood as ordinarily. But it holds the head of the nail proper far enough out of the wood so that the claw of a hammer or nail puller can easily catch it.

It will not crumple or break down

Pull Easy Nail Collars.

when sledge hammer blows are rained upon the nail head. The collar may be used over and over again. Its base is much larger than the head of a 20-penny nail, so that it has a greater drawing surface. It is claimed that a concrete form put together with "Pull Easy" collars needs no reinforcing clamps or wires.



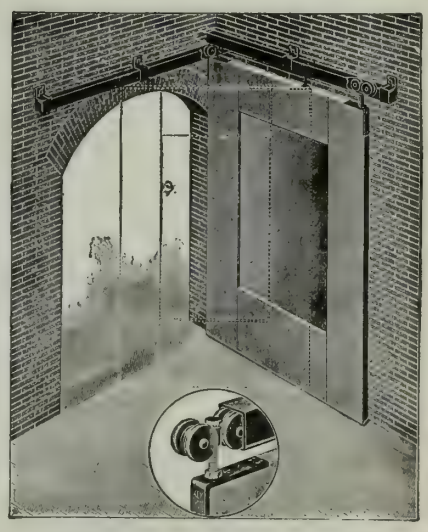
There is only one size nail collar, and it fits any size nail from an 8-penny to a 20-penny. The carpenter or form builder goes to his work with his ordinary supply of common nails and a few hundred "Pull Easy" nail collars in one corner of his apron. When he is driving nails for temporary purposes, he finds it a simple matter to slip a nail collar over any size nail he wishes to use.

In dismantling forms and falsework, the quantity of good lumber split and broken is said to be very great; but by the use of these nail collars, it is said, this waste is avoided.

The collars are put up in boxes of 5,000, 10,000 and 20,000.

NEW LATCH AND HANGERS.

Among the new lines which are now being made by the Richards-Wilcox Canadian Co. at their plant in London, Ont., are the No. 126 sliding door latch, and



No. 126—Sliding Door Latch.

also their No. 235 trolley track and hangers.

The No. 126 sliding door latch is said to be a heavy latch of exceptional utility, reversible for right or left-hand doors. It is made of steel, is 14 inches long, and adjustable for doors from 2 inches to 3 inches thick. The manner of setting keeper on the jamb permits use of padlock if desired. The latches are finished in japan.

The No. 235 trolley track and hangers for angle doors are used largely for garage work and in buildings where

No. 235—Hangers and Track.

space does not permit the use of the ordinary sliding door. This arrangement carries the door either right or left against the side wall.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

With the weather moderating, and Spring approaching, there appears to be a slight improvement in business.

A large number of orders are booked for March 1 delivery, and next week should see a big movement in many lines. The paint outlook is exceptionally bright, and hardwaremen are looking forward to an exceptionally busy Spring paint trade. A few price changes have taken place during the week. Flat and round head bright screws have declined 10%, making present quotations very low. Glass has declined in Toronto, and a change has taken place in turpentine quotations. In the metal market there is still signs of optimism, although the volume of business passing is not large.

MONTREAL.

MONTREAL, Feb. 25.—This week has brought a much livelier feeling to the local market, and business is much better than one week ago. Orders have been received during the past week for many lines of spring goods. There has also been a general sorting demand. The lumber camps are still ordering supplies, and, owing to the persistent cold weather, coupled with good roads, this business has been quite heavy during the last few months. The lines which are most in demand for this class of work are boot calks, cant hooks, axes, axe handles and coil chain.

There has been quite a demand from all centres for tools and supplies used in the maple industry, and in view of the near approach of that season the demand is increasing to a marked extent for pails, sap spouts, sap bits, etc. This industry will open up in a few weeks, and there should be a heavy movement in the lines mentioned between now and then.

There appears to be a much better demand from the country dealers than that which is coming from the city dealers. This is explained by the fact that the weather, which has been so consistent, has held the city men up, and they will not order their spring supplies until the temperature takes a drop and things break up. At the present time they are carrying fairly heavy stocks, and it will be necessary for them to reduce this before they get in their spring supplies. The weather in this province during the past three months has been quite steady, and zero or under has been the general reading of the thermometer. At the present time there does not look to be much chance for a break-up for a couple of weeks, as the general feeling is that winter weather will be experienced until well on into March.

February is, as a rule, a very bad month for collections. Why this should be is more or less of a mystery. January and February are the slow months for the retailer, but as this is known to him he naturally does not buy any more than is necessary, therefore his accounts should not be very large. However, this fact is borne out by the majority of the wholesale houses, and they report collections a little slower than usual, although they add that they are no worse than they were for the corresponding period of last year. It may be reported that collections are normal.

DECLINE IN PRICE OF SCREWS.

Flat head and round head bright screws have declined 10 *per cent. at Toronto and Montreal. The discount on the former is now* 85-10-7½-10%-10% *and in the lathes* 80-10-7½-10%-10%. *Round and flat head brass remain unchanged, the former being quoted at* 75-10-7½%-10%, *and the latter at* 70-10-7½%-10%. *It will be seen that the price on bright screws is now very low.*

Decline in Screws.

There has been an additional 10 per cent. discount allowed for screws this week, and all quotations are now including the new discount. Apart from this there has been no other change to report during the week.

The metal market has been rather dull during the week, but improvement is looked for.

Tin.

The London quotation to-day is given out as £173 15s. for spots, while the futures are quoted at £175 15s. These prices show quite a falling off from those view of the curtailment of buying, and they look for further decline unless that condition shows some change.

Lead.

The local situation is not strong by any given one week ago, which were at an advance of £3. The New York prices are also lower than those of one week ago, and are given as $38.20 and $38.50 for spots and futures respectively. Locally there has been no change. A report from New York would lead one to believe that cheaper prices were not at all unlikely.

Spelter.

Theer is no change in the local situation, and both the demand and the quotations given last week can be repeated. The London quotation has advanced 2s. 6d., and is given this week as £21 10s, while the New York price of $5.22½ is 2½ cents under that given one week previous. The opinion in New York is that the market has held up remarkably in means, and, although there has been no change from the prices of last week, the market is weaker. The London quotation to-day is showing an advance of 2s. 6d., and is given as £19 12s. 6d., while the New York price has fallen off 2½c, and is given as$3.85. New York reports are to the effect that concessions have been made in order to move spot stocks, hence the reduction.

Copper.

The local situation is unchanged from one week ago, and neither the demand nor the quotation is altered. London price for spots has fallen off 13s. 9d., and is given as £64 6s. 3d., while futures have also dropped off 11s. 3d, and are given this week at £64 18s. 9d. The New York quotation is 15 cents under that of last week, and is $14.30. The market is reported as being fairly steady at this figure.

Antimony.

Locally there is no change to report in this market, both the price and demand remaining unchanged from one week ago.

Iron.

The local market is none too strong, and the same may be said of the London market, which quotes £2 10s. 4d. this week, a reduction of 6d from one week ago. The New York market is in rather a peculiar condition at the present time.

In the stove and heating business the situation is rather a waiting one. That

branch of the hardware business is now waiting for the present season to close, and the next season to open in order to get in their line of gas stoves.

TORONTO.

TORONTO, Feb. 26.—Business this week cannot be stated as being too rosy. The steady cold weather has to a certain extent caused a slight lull. Hardware jobbers and manufacturers report that most of their travelers were at the recent convention, and have not got down to where the orders would be coming in as yet. Inquiries for prices on larger quantities are being received; hence a feeling of optimism is the order of the day.

The metal market is steady. Tin has a tendency to drop a ¼ cent, but will have settled to its old price, as quoted last week, by the time we go to press.

Hardware.

The hardware jobbers report business as being seasonably quiet, though much more so on the whole than last year during the same period. Retail merchants have allowed their stocks to run lower than in previous years, and rush shipments were the order of the day. The outlook is very good, and inquiries for prices on larger-sized orders are being requested.

Cement.

There is a slight lull in the demand for cement on account of the extreme cold weather which has been experienced throughout the whole Dominion. Cement merchants, however, are making larger shipments now than ever before during the same period, and no doubt cement, which at one time was a commodity only in demand during the summer, will become generally in demand all the year round.

Rope and Twine.

Business in rope and twine is seasonably quiet. 1914 quotations on binder twine are still held in abeyance, but will be issued shortly. Rope remains as follows:—

Pure Manila rope	15c	base
British Manila rope	11c	base
African hemp	11c	base
Sisal	10½c	base
Lath yarn, single	9¾c	lb.
Lath yarn, double	10¼c	lb.

Woodenware.

Manufacturers and jobbers report business in this line is holding out well. There is a slight decrease this month, but all through the winter the demand has been satisfactory.

Brushes (Hair and Fibre).

Reports show that a considerable amount of brushes have been sold recently by hardwaremen; their stocks are lower and buying is brisker. Rush orders are being received from all parts of Canada. For quite a period this line was rather slow, but now, with stocks at a lower level and the introduction of new lines, it is felt that a greater volume of business will be done in the near future.

Iron Pipe.

Demands for iron pipe, both black and galvanized, are a little slow, and are not expected to be otherwise until building operations begin. Reports show that this year is expected to be extra busy.

Tin.

Tin is a little unsteady, and, while it is reported a quarter of a cent lower, it will have recovered its position by the end of the week, and stand at the same price as quoted last week; viz., 42 cents to 44 cents.

To Members of the O.R.H. & S.D.A.

Treasurer Caslor Offers to Take Up Matter of Rebates From Ottawa Hotel—It is Said That Some Visitors Were Overcharged.

Gentlemen,—I have received a letter from A. R. Benhardt, Preston, who attended the Ottawa convention complaining that he was overcharged at the Chateau Laurier, and, as there were others who were overcharged, I want to explain the situation.

The circular issued by the Exhibitors' Association announcing the hotel arrangements at Ottawa read as follows:

"For hardwaremen, exhibitors, guests and ladies who attend the convention and exhibition, a special rate has been secured at the two leading hotels at Ottawa, the Chateau Laurier, and the New Russell. The rate is $1.00 without bath, and $1.50 per day with bath for five days.

The rooms are expected to accommodate from two to five persons according to size. If you reserve a room that is expected to accommodate three persons, the charge will be for the whole room $3.00 without bath, or $4.50 with bath.

A deposit of $5.00 must be sent with your application. Send money orders, checks without exchange added will not be accepted. For the $5.00 deposited, reservation will be made for you, from Feb. 16th to 21st, at either of the hotels mentioned, The committee reserving the right to assign to either hotel mentioned.

After committee assign you to hotel, deliver the hotel accommodation coupon, or receipt for the $5.00 to the hotel where you register, this will be credited to your account, either in full or on account, according to accommodations you select, and this assures you the special rate engaged for you."

It was understood that all reservations were for five days, and there would be no rebate if a person only stayed three or four days. And it was also understood that if two delegates occupied a room large enough to accommodate three or more, and the hotel clerks wished to put more men in the room they could do so. We have usually slept about four in a room at conventions, and we were willing to do so at Ottawa.

On Wednesday, the third day of the convention, a complaint was received from C. R. Bailes, Oshawa, that he was being overcharged at the Chateau Laurier. Mr. Bailes paid a much higher rate than expected and left the hotel the next day.

The Retail Hardware Executive held a session after the theatre party on Wednesday night and threshed the matter out with the Exhibitors' Executive, adjourning at 1.30 a.m., the Exhibitors advising that hotel bills be paid for the advertised amount "on account," to refuse to pay the overcharge, but to send the bills with the unpaid balance to the secretary of the Exhibitors' Association. This announcement was made at Thursday's convention meeting.

On Friday most of the retailers left and finding that the Chateau Laurier hotel clerks were insisting on bills being paid in full, I took the matter up with Manager Folger, who said his system would have to be followed and bills paid in full. But he went with me to the room occupied by Mr. and Mrs. Wanless and admitted that they had been overcharged, and promised that he would send me a rebate for them. I secured a rebate of $4.00 for R. W. Clements, Milton, and forwarded to him.

Acting on this understanding I requested others to pay their bills in full and leave their receipts with me to secure rebates.

Mr. and Mrs. Occomore, Mr. and Mrs. Conn and Mr. and Mrs. Wrigley, therefore, paid their bills in full, each paying overcharges of from $3.00 to $6.00.

These rebates should be paid promptly, and if they are paid to any they should be paid to all who have claims.

If, therefore, any retailers who visited Ottawa last week were overcharged, and send their receipts to me, I will try and secure rebates, and will go to Ottawa, if necessary, to see Mr. Folger, manager, of the Chateau Laurier, who, I feel certain, will adjust matters satisfactorily.

JOHN CASLOR. Treasurer.

Toronto, February 26th, 1914.

Securing the Co-operation of the Painter

Experience of Hardware Merchants in Connection With the Co-operation Problem — How One Merchant Got the Painter Interested in Ready-Mixed Products.

ONE of the questions in the question box at the recent Ottawa Convention was, "What is the best method of securing the co-operation of painters to use ready-mixed paints and decorators' materials? This is a problem which confronts hardwaremen in almost every town and city. One retailer at the convention stated that it was almost impossible to get the painters to co-operate and he did not know of a painter in his town who was in favor of using ready-mixed paints.

The majority of painters even though they may think that a good ready-mixed paint is superior to the hand-mixed article will not admit it. This opinion of this hardware dealer is shared by many other hardwaremen in the trade. There are also a good many hardware merchants who are inclined to think that the trade of the average painter is not any too desirable. This view may be correct in many cases but nevertheless there are a good many painters who are absolutely sound and are able to meet all their liabilities.

The trade of the reliable painter is very desirable and it appears as though there should be a great deal more co-operation between the retail hardwareman and the painter than really exists at the present time.

One merchant recently put forth the plea that it was absolutely impossible to co-operate with the painter. The merchant stated that painters in his town purchased their goods from a supply house in a distant city, and only went to his store for small amounts of painting materials at times when their stock had run low.

Investigation of matters in this town disclosed the fact that a continuous war raged between the hardwaremen in this town and the painters.

The newspaper ads. of the merchants were continually rubbing against the grain of the painters. Advertisements would often appear advocating that the public dispense with the services of the painters, by ready-mixed paints, and do the work by home labor. This method of advertising was naturally resented by the painters who thought they saw, or did see an attack being made on their method of making a living. The result was that the painters of the town in addition to knocking ready-mixed paints, purchased their supplies from an outside point.

Another retail hardware merchant in attendance at the Ottawa convention related an incident to show how he got the ball rolling and secured trade from a local painter.

A resident in the town where this merchant is located was building a new residence and was undecided as to what finish should be used on some of the walls in the interior.

When canvassing the resident for an order for builders' hardware the merchant suggested that a flat wall finish be used for some of the walls. The merchant explained how the finish could be applied, how it could be washed, the beautiful effect of the finish, and the easy manner in which it could be renewed at any time, without any difficulty in securing colors to match, (an objectionable feature when hand-mixed goods are used), the merchant also explained that he would fully guarantee the goods if the painter applied them according to directions. The painter was rather reluctant at first but he finally agreed to do the work.

When the job was completed the owner of the house was delighted with the work and the painter was forced to admit that the ready-mixed product was not so bad after all. The merchant then approached the painter and made him a proposition whereby the latter is now receiving a discount on all the ready-mixed paints he uses and in the course of a year his purchases total up to a considerable amount. The merchant and the painter are now co-operating and are getting along hand-in-hand.

The manager of a paint department in a large hardware store in an American city, in writing to an American contemporary stated as follows:—

Don't overlook the painters, even though there may be a few in your town who are not altogether reliable. Their influence and co-operation is desired, and a little tact on your part will be the means of securing a good word from them to a prospective customer.

I am forced to tarry on the subject of getting the painters' co-operation, for to be the real paint man in your town, you will have to get at least the painters' willingness to spread your paints. The average painter, when it comes to finance, is not there. Therefore, it is up to you to get next to a couple or more practical painters, and prove to them that in handling the line that you do, you had in mind the requirements of any first-class painter. Tell them that they know, better than you, what their standing is in the community. However, if they seek decorating business urge them to get in line with you, because you are are going to make some one, not only THE painter, but THE interior decorator, of Smithville.

Get them started right, by letting you make the sale of the material with a fair commission for them. Take an interest in their plans and welfare, and with the assistance of our traveling representative, you should have no trouble in keeping the painters on your side.

If I were starting in to get more profit out of the retail paint business, the first thing I would do after placing in stock a standard and well-advertised brand of goods, would be to call the painters to my home some evening to talk over the prospects for future business. This would be a move to gain their confidence. I would follow this up by a "Smoker" in the store, in which I would lead up to this proposition:

"You are not following the painter's trade for your health any more than I am handling paints for my own health. However, it is just as essential that I make sales with a fair profit, as it is for you to expect a profit for your skill and labor as a mechanic.

"Now, genetlemen, you will admit that the brands of paints and sundries I am carrying, so far as quality is concerned, are standard; and that the prices I have placed on these goods are in keeping with the quality. It takes an investment of several hundred dollars to carry a stock that will meet with your requirements, yet I am willing to carry a complete line, provided we can get together on the proposition I wish to make you whereby all concerned can profit.

"I know that in order to make a success in this department it must come through your influence and the material you use. Both of these are valuable assets to my business. Appreciating this fact, I propose that we get together and make an agreement for our mutual profit and benefit.

"My idea is to allow you a working interest in my paint department in the form of a commission on everything that you use in your contracting or any material that your influence has actually helped to sell. Even if a houseowner buys from our stock the paint to do his own work, and if it is your influence that prompted him to use the goods we carry, you will get your commission."

The writer then went on to explain the amounts of the commissions, etc. This could be arranged by the dealer.

Are You Ready for Spring Re-decorating Activities?

As regularly as Spring itself comes house-cleaning time—and with house-cleaning re-decorating Paper-hangers and decorators are working overtime. You would be surprised to learn just how many tons of paste are required in re-decorating the homes of one community. If you are observant you will also note that the best decorators are using

FULLER'S  DRY PASTE

It has long been the standard paste with paper-hangers, because in its manufacture all possible improvements have been made. Put up in 200-pound barrels, 100-pound half-barrels, 35-pound pails, and packages. **Fuller's Dry Paste** is in condensed powder form—mixes with cold water, and is ready for immediate use. It is a paste with a body—does not set too soon, but allows the paper to slide easily before drying, and does not discolor delicately tinted papers. Fuller's paste has also an extensive covering capacity—2½ pounds of the powder make a bucket of paste when mixed.

Knowing decorators will ask for **Fuller's**, so don't lose good profits by not having your stock in shape.

BERRY BROTHERS' VARNISHES

For longest wear and easiest care, recommend Berry Brothers' Varnishes for your customers' floors, woodwork and exposed outside surfaces. They protect the wood perfectly—they keep it looking bright and handsome—make the work of cleaning easier, therefore less expensive.

Berry Brothers' products have stood for 56 years as the *standard* of high-grade varnishes. They are the result of careful, scientific manufacturing methods, so they give lasting satisfaction.

There's a Berry Brothers varnish for every need. The following principal products are best known and most widely used in ordinary finishing or refinishing work:

Liquid Granite—A floor varnish whose name suggests its wonderful durability.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Wood Finish—For the finest rubbed (dull) or polished finish on interior woodwork.

Luxeberry Spar Varnish—(It's waterproof)—widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

If you do not handle Berry Brothers' Varnishes, write us direct for information.

Methods of Retailing Paints and Varnishes

MONTREAL.

MONTREAL, Feb. 25.—There is a big rush on at the present time shipping out spring supplies all over the country. Many orders for spring are still being received, and the trade is busy shipping out to all centres. A great many orders being received at the present time are for immediate delivery, while there are others which are not to be shipped out until the 1st of April. Collections have been quite a bit better during the past week, and, although February is recognized as rather a poor month, this year it has really not been noticed to any great extent. There are some accounts which could be better, but they are not numbering so great as those f a few months ago. This looks to be a good year in the paint business, and retailers all through the country seem to recognize this fact.

White Lead.

The demand at present is showing a slight increase over that of the last few weeks, and local dealers look for a further increase from now on. The quotations this week are unchanged from those of one week ago, and ton lots are selling at $8.05, while less than a ton are quoted at an advance of 20 cents.

Linseed Oil.

There has not been any change as regards demand, but there has been a change in the quotations. Although this is not general, there are some firms quoting as low as 58 cents for raw, while boiled is quoted at an advance of 3 cents. The other quotations vary until they reach 60 cents for the raw and 63 cents for boiled oil. We are quoting the higher prices herewith:

Raw Oil—

1 to 4 barrels	60c per gal.
5 to 9 barrels	59c per gal.
10 to 25 barrels	58c per gal.

Boiled Oil—

1 to 4 barrels	63c per gal.
5 to 9 barrels	62c per gal.
10 to 25 barrels	61c per gal.

With open prices for carload lots.

Prepared Paints.

As stated above, the demand at present is good, and orders are being received from all centres mostly for immediate shipment, although there are some which call for shipment as late as the 1st of April. City dealers have not as yet ordered their requirements, and this will, no doubt, prolong the present rush for some time to come.

Glass.

There is no change in the demand in the market, and business is still a trifle backward, although it is expected to pick up in the near future. There has been no change in the quotations from one week ago.

Putty.

There is the same quiet demand in this market that has featured it for some time back, and, although there should be quite an increase in this before long, the usual spring demand has not started in.

Bulk, in casks....$2.30 per 100 pounds.
Bulk, in drums... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.

With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

Locally the dealers seem to be split in their quotations, as no two received by us to-day corresponded. The highest quotation received was 68 cents per gallon, while the lowest was 64 cents. Lots of 5 barrels and over are quoted 1 cent cheaper in each case.

Gasoline.

The demand at present is very good, considering the weather, which has been very severe all winter. The usual spring rush is expected shortly, and this will start the busy season. The quotations as given last week are still in effect: 25½c per gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21c for 100 gallons and over.

Benzine.

The same steady demand is in evidence at the present time, and prices which ruled last week are still in effect. There is very little change in the demand for benzine at any time of the year, with the possible exception of spring, which, no doubt, stimulates it for a time. The prices are as follows:—

Barrel lots in wood are quoted at 23 cents per gallon, in steel and drums 20 cents, while local tank wagon price is 19 cents per gallon for 100-gallon lots and over.

TORONTO.

TORONTO, Feb. 26.—Paint jobbers and manufacturers are a little quiet, though they report that where the temperature of the weather is not so low the paint business is better. However, on the whole, this line has nothing to complain of. Shipments are better than they were a short period ago. Orders are being received for early spring shipments, and the trade as a whole bears a healthy tone.

Linseed Oil.

The demand for linseed oil is a little low on account of the conditions of the weather. Reports show that this commodity is holding its own. Orders are being received for spring delivery, and jobbers and importers are in an optimistic spirit. No doubt the coming mild weather will increase demands. Prices remain as quoted last week, viz.:—

Raw—

Single barrels	.....	65c.
3 to 5 „	.....	63c.
6 to 9 „	.....	61c.

Boiled—

Single „	.....	68c.
3 to 5 „	.....	66c.
6 to 9 „	.....	64c.

Oil in less than barrel lots 7 cents per gallon. Cans are charged for—5-gallon, 50 cents each, and 10-gallon, 75 cents.

Turpentine.

Turpentine has shown a decided drop in prices, and, while there is not a large quantity reported on hand, prices are quoted as follows:—

Pure 5-gallon cans	.....	74c.
„ in single barrel	.....	67c.
„ 2 to 4-barrel lots	.....	66c.

The reason for this reduction in price is that demands for turpentine in England showed a decided decline; hence a decrease. But it is felt that before very long turpentine will again rally to its old prices, which were quoted the same for several weeks. This feeling prevails on account of there not really being such a large quantity on hand at the source of supply.

Glass and Putty.

Demands for glass and putty are fair. Before the cold spell which prevails at present demand was a little brisker, particularly during the month of January. However, there are several more inquiries being received for quotations on glass, in particular in large bulk, than previously. There is a decrease of 5 per cent. on glass quoted this week.

White Lead.

Orders are a little slow for present shipment, but much more numerous for spring, and orders are still being booked for delivery until May 15th at the following prices:—

5-ton lots, $7.90 per 100 lbs.
1-ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Prepared Paints.

Orders for spring shipment are up to all expectations, and a few houses report demand better than ever before for this period of the year.

REPEAT ORDERS

No one ever yet built up a permanent paying business with inferior goods. It isn't the first sale that makes the business, but the repeat orders you get from satisfied customers, who come to you because they know by experience you sell the things they want.

DEPENDON
LIGHT HARD OIL FINISH

is a trade-builder because it has precisely the qualities that appeal to practical men—dries hard, rubs to a fine polish, will stand hard wear and is always uniform. It is the most dependable hard oil finish made, therefore the surest to give satisfaction and bring the customers back for more.

IT PAYS to sell **DEPENDON** because the first sale means a steady customer.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Hardware, Metal and Paint Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

MARTIN-SENOUR PAINTS & VARNISHES

What's It Worth To You?

Right in **your** town is the only place where advertising will do **you** any good—

The value of a Paint Manufacturer's Advertising Campaign to **you** depends, not only on how forceful the messages—but how many people in your locality read them—how many of your possible paint customers are reached.

Ask the Paint Salesman who talks "Big Advertising" —"Co-operation" —"Dealer's Selling Helps," to give you details. Get a list of the Publications used—see how many of them circulate in your town—see what it's worth to **you.**

Advertising in Magazines and Farm Papers, that are published in the United States, and have only a scattered Canadian Circulation in the large centres, will never sell a dollar's worth of paint for you.

Martin-Senour Advertising is **Canadian** Advertising—in **Canadian** Papers—published for **Canadians**—by **Canadians.**

If you believe that it pays to sell pure paint —100% Pure Paint, backed up by strong selling messages that are carried to your prospective customers effectively—If you believe in quick sales and satisfied customers, then write or wire for the details of our exclusive Agency Proposition.

Not an Enterprise for the "Quitter"

¶ "If there is one enterprise on earth," says John Wanamaker, "that a 'quitter' should leave severely alone, it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom.

¶ "He must know before he begins it that he must spend money—lots of it.

¶ "Somebody must tell him that he cannot hope to reap results commensurate with his expenditure early in the game.

¶ "Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day and year by year, until it exerts an irresistible power."

RESULTS from small investments. Read Hardware & Metal's Want Ad. Page.

ROBERTSON SOCKET HEAD WOOD SCREWS

Will Give the Wood Worker the Best Satisfaction

They Save Time, Labor and Material

This is a real wood screw. A specially designed screw driver fits snugly into the square hole, and there it stays until the work is done.

This is the only wood screw of this type on the market and it is invaluable to carpenters, cabinet-makers, carriage-makers and for electric wiring.

Be sure to stock a few.

We manufacture high quality Hand Drivers, Yankee Bits, Brace Bits, Rivets, Bars, Washers, Nails, Wire, etc.

Drop us a card for catalogue.

Letter received from our Maritime Distributers

Benj. Moore & Co., Ltd.,
West Toronto, Ont.

Gentlemen:—

We have just landed the car of Moore's House Colors and Muresco shipped on the 29th and are glad to report it has opened up most satisfactorily.

This is the sixth year which we have been handling your lines, and it gives us pleasure to report that our sales each year have shown a very good increase, and that each year we find it a more satisfactory and easy line to sell. Everywhere in the territory which we cover, we find that it is becoming more popular all the time, and we look for steadily increasing sales.

Wishing you a prosperous year's business, we remain,

Yours very truly,
EMERSON & FISHER, Limited,
H. W. Emerson.

BENJAMIN MOORE & CO., LIMITED

NEW YORK CHICAGO CLEVELAND

"SILKSTONE" Flat Wall Colors
(COPYRIGHT)

should form part of your "this season's" stock. Smooth as silk—hard as stone, sanitary, washable, and better than wall-paper, they are ready sellers to all interested in interior decoration.

And this doesn't mean just the householder alone—but also the professional decorator, who finds "Silkstone" is better than the sort he can make himself.

This business can be all yours—write us and we'll tell you how.

Branch at Calgary, Alta. **WINNIPEG, CANADA**

JAMIESON'S
Prepared Paints

are always made with "consumer satisfaction" constantly in mind. In fact this feature of our paint-making has developed into a sort of religion with us.

Consumer satisfaction is the ultimate test—Jamieson's Paints have been successfully passing under this test for over half a century.

A LETTER

Circulated by a

MAPLE LEAF AGENT

Amongst his customers

Cory & Co.
Hardware Merchants
Paints, Oils, Glass, Wire Fencing, Graniteware, Tinware, Etc.

Next door to the Molsons Bank
Frankford, Ontario
Canada

Dear Sir:—

We are very pleased to tell you that we have secured the exclusive agency for Frankford for MAPLE LEAF PAINTS and FLOGLAZE ENAMEL. Our Mr. F. A. Cory has travelled for the past ten years and has had an opportunity of talking with the leading hardware merchants and painters in Eastern Ontario and they all told us to handle the MAPLE LEAF line. Even merchants who were selling other lines of paints told us to secure the agency if we could get it.

When we lived in Belleville we bought it from J. W. Walker for our own house, and the results were so satisfactory that we do not have any hesitation in recommending it to you and if it does not prove satisfactory in every way we will cheerfully refund you your money.

Yours truly,
CORY & CO.,
Per. F. A. C.

It would be useless for us to add any further comment.

M L FINISHES THAT ENDURE
QUALITY

Extending confidence to customers as Cory & Co. have done denotes the same confidence in MAPLE LEAF lines that you can safely extend to your own. It is a confidence that will compel you to get right down behind the M. L. line and push it for all you're worth.

Hadn't you better write us for prices on a sample order.

BLACK WIRE CLOTH.
$1.60 per 100 square feet.

Stewart No. 8 Sheep Shearer

The No. 8 Stewart Sheep-shearing Machine has been on the market for four years, and in that time has enjoyed the largest sale of any shearing machine ever put out.

The tripod base is solid and substantial.

Gears and gear case, as well as base and upright, are made entirely of metal and are the same style exactly as in the No. 1 Stewart ball-bearing horse-clipping machine.

MILLER-MORSE HARDWARE COMPANY LIMITED

"The Big Winnipeg House"

are now booking orders for March shipments and have provided enormous stocks for the Western Canadian territory.

The gear case of the No. 8 is enclosed and protected from dust and dirt of all description. Gears are cut from the solid steel bar and are made file-hard. They could not possibly be harder or tougher. They are all carefully assembled and run with clocklike precision. The oil holes in the upper part of the gear case enable the operator to keep the gears continually running in a bath of oil so that there is very little friction or wear. The shearing shaft is of the solid core universal jointed type, the only successful type of shearing shaft, as it transmits the power directly from the gear case to the knives without loss. A slow motion of the crank handle gives the knives a tremendous speed. The complete machine stands 39 inches high.

Stewart No. 1 Ball-Bearing Horse Clipper

The base of the Stewart No. 1 Ball-Bearing Horse Clipper is designed to be strictly rigid and substantial.

The upright is in two parts for convenience in taking the machine down and packing it into small space.

The gear case is especially made to exclude all dust and dirt from the gear mechanism within and to contain oil whereby the gears run in continuous lubrication. The gears are all cut from the solid steel bar and are made file-hard by a special hardening process.

They are ingeniously arranged in such a way that a slow motion of the crank handle is transformed by them into a tremendous speed as it is transmitted through the flexible shaft to the clipping knife.

The ball-bearings do away with friction almost entirely and make the machine turn so easily that it is mere child's play for anyone to run it.

The flexible shaft is six feet long, ample to reach all parts of the horse easily. The whole machine weighs only thirty-six pounds, so that it can be picked up and carried about to any side of the horse or part of the stable in one hand.

In the center of this page is shown a splendid illustration of the Stewart No. 1 Ball-Bearing Horse Clipper, and of which the Western trade can be supplied by the

MILLER-MORSE HARDWARE COMPANY LIMITED

"The Big Winnipeg House"

The shaft of the Stewart No. 1 Ball-Bearing Horse Clipper is the most flexible of all clipping machine shafts.

The Stewart clipping knife is known wherever horses are used as the simplest and most perfect of any knife used on clipping machines. It runs easier and clips faster than any other clipping knife ever offered with a machine.

For farm use and the use of the general horse owner this machine is not equalled. With it a horse can be clipped in thirty minutes.

In every sense it is the best clipping machine value extant.

No. 1 in Action

THERE'S MONEY IN THE RIGHT PAINT

If you stock a complete line of **Ramsay's Paints and Varnishes** there's no danger of a customer going to "the other store" because you couldn't fill the bill.

Furthermore, that customer will be **satisfied.** Time and climate won't alter his first good impression of the paint you sold him because Ramsay's Paints have stood the test since 1842, and have built up a reputation for right-down durability and unfading qualities in spite of our strenuous weather conditions.

Ramsay's paints sell themselves—stock them, there's money in it for you.

A. Ramsay & Son Co.

MONTREAL

Paint Makers Since '42

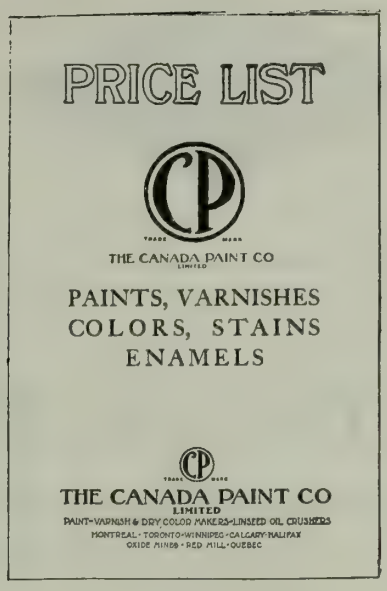
"WILWEAR" Bath-Room Fittings

the goods that produce an expression of confidence on the face behind the counter. That expression brings sales and profits to the dealer. "WILWEAR" is guaranteed, and has all the good features that make selling a pleasure, namely, quality, weight and finish. No dead stock when handling our patterns. Don't be contented with results from high-priced lines; your customers are entitled to more consideration. Send for catalogue "B."

NOVELTY MFG. CO.

WATERBURY, CONN.

Brooms and Whisks



You want a first-class line of Brooms for **Spring Trade** and the **Keystone Brand** is what you should have to give your stock the proper tone. You will find it difficult to secure three lines which will measure up to the "Jubilee," "Klondike" and "Nugget."

We specialize in whisks, and with over sixty lines to choose from we should be able to satisfy the most fastidious tastes.

Stevens-Hepner Company

LIMITED

PORT ELGIN ONTARIO

Every Paint Dealer should have this new Price List. Write for one to-day.

It lists and describes every kind of paint, varnish, stain, enamel, etc., for which there is a demand.

The quality of every product will satisfy your customers and help to make your paint business a success by building up a permanent patronage.

The prices allow you to make profits consistent with a successful business. And behind this CP Price List and Catalogue is the one proposition to bring more customers to your store, that you should investigate right now.

It will be a courtesy that we appreciate, to have our Representative call on you and explain the CP proposition to you.

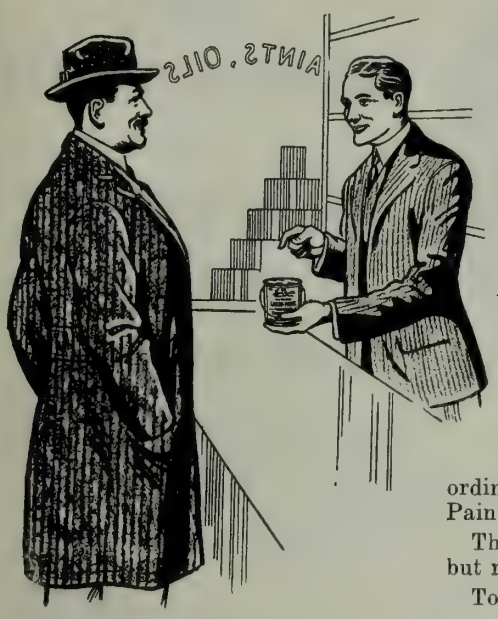
WIRE BALE TIES

Our wire, for baling hay, is made from the finest quality Bessemer Rods, and is 10 per cent. stronger than any other baling wire.



This is the line that brings the dealer clean, satisfactory profits with every sale, as it is not the come-back kind.

Get our prices and send us a trial order—we guarantee to satisfy. We also recommend our WIRE NAILS and STAPLES as inferior to none.

The Laidlaw Bale-Tie Co., Hamilton Ont.

Geo. W. Laidlaw, Vancouver, B.C. Harry F. Moulden, Winnipeg, Man.

WE DO TWO-THIRDS—YOU, ONE-THIRD!

High Standard Paints Linger on No Man's Shelves—They are Making New Sales Records in Canada.

A third of your paint profits should depend on your own selling work—one-third on the results of the maker's work to help you sell paint—and one-third on the results the paint gives the customer.

Two-thirds legitimately depend on other factors than yourself.

Mighty important proportion, isn't it? Are you sure that the line you are pushing does this much for you?

There isn't another paint maker that **dares** put up the advertising and the co-operation that goes with the "High Standard" agency. What would be extravagance with ordinary goods is a sound investment with Lowe Bros.' High Standard Paints.

There isn't a dealer who has sand enough to take up our proposition but makes money.

To-day is the day to write us.

An Ermined Judge

The Supreme Court of Canada is becoming overloaded with business. The big increase in cases during 1913 has meant that the six judges who sit daily in the dingy old building at Ottawa have been hard-worked men. The procedure is simple, dignified, and conducted with almost an Arctic silence.

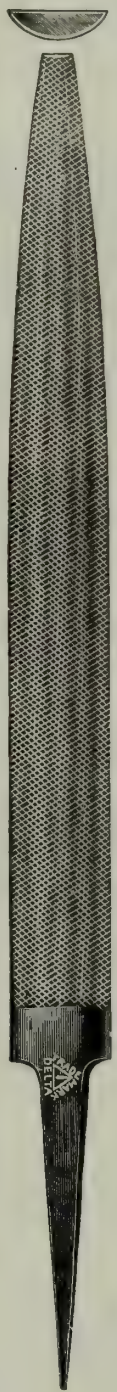
Yet there is a human side to the situation, for the trappings of flesh cannot be wholly discarded in this, the Clearing House of legal wrangles.

A special writer, at the suggestion of "MacLean's Magazine," visited the Court, and in other divers places dug up much useful information concerning which the average Canadian knows little.

The March "MacLean's" will appear with the first of the celebrated Coburn covers, and the illustrations have been attempted on a strikingly broader scale. Besides this leading article there is the pronouncing of a leading Toronto doctor on "The Truth About Radium."

Several short stories, well illustrated, will appear in this issue.

Do not miss this copy. The cover alone, being something new in Canadian journalism, will be more than worth the price.



Send your name and address on a postcard to Dept. "M" and commence your subscription with this striking number—Mail it to-day.

Subscription $2 a year. *Twenty cents a copy.*

14 Years A Dealer But Finds No Better Fence Than PEERLESS

Read This Letter

Forestville, Ont., Jan 13, 1913

The Banwell-Hoxie Wire Fence Co.,
Hamilton, Ontario

Dear Sirs:—I have been in the fence business for the last fourteen years putting up fence for farmers and have erected as high as four thousand rods per year. I have put up a good many different makes of fence but can positively say that "The Peerless" has given the best satisfaction taking into consideration even wire, no slack wires, no wires breaking, no wires rusting, and fence holding its tension which keeps the fence tight. "Peerless Fence" that I put up six years ago with posts thirty feet apart is tight and free from rust and does not sag.

Truly yours, E. G. Hooner

He's but one of the thousands of satisfied Peerless dealers—satisfied there's no better, no more profitable, no bigger producer of return orders than Peerless Fencing. His Peerless Fence agency is one of his biggest assets. If you had it you would say the same.

Peerless Farm Fence

is made of Open Hearth steel wire—heavily galvanized in such a thorough manner that it will not flake, chip or peel off. The wires are tough, elastic and springy and will not snap or break under sudden shocks or quick atmospheric changes. The joints are securely held with the "Peerless Lock" which will successfully withstand shocks and strains and yet, it can be erected on the most hilly and uneven ground without buckling, snapping or kinking. We also build a full line of poultry fence, ornamental fence and gates.

We Offer You This Coveted Agency

If you are located in our unassigned territory, we want to offer you the selling rights for this remarkable fencing. We want to add you to our list of satisfied, money making agents. We have a very attractive agency proposition. Want it? A postal brings it. Write today—now.

Banwell-Hoxie Wire Fence Co., Ltd.
Winnipeg, Manitoba

Architects' Own Designs and Special Requirements Carefully Executed

Our new Catalogue, 1911 edition, fully illustrated, mailed free on application to Wholesale Hardware Merchants.

"Heralds of Expansion"

After a year of comparative slackness, due to tight money conditions, hardwaremen in every corner of the Dominion are preparing for a good year's business in 1914.

Architects report that there is great building activity in sight. Engineers say that millions of dollars' worth of construction work which was held up last year, for lack of funds, will be pushed ahead as soon as the frost is out of the ground.

That 1914 will be a year of expansion for Canada seems assured. And it is this idea which C. W. Jefferys had in mind when he painted the frontispiece for Hardware and Metal's Annual Spring Number.

The above reproduction does not fully bring out the strength and attractiveness of Mr. Jeffery's painting, but full justice will be done it on the front cover of Hardware and Metal's Annual Spring Number, where it will be reproduced in natural colors.

Look for this big Number on the 21st of March.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa.

THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

FIRE INSURANCE—INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

MEN WHO SELL THINGS. BY WALTER D. Moody, Business Manager of the Chicago Association of Commerce. An indispensable book for merchants, manufacturers, employers, salesmen and all who have goods of any kind to sell. The author forcibly sets forth such themes as how to approach men; how to create and develop the compelling personality, the genial address, the engaging presence of the energetic business-getter; how to attract, convince and sell a prospective customer under adverse conditions; how enmity may be turned into friendship, interest into desire, curiosity into sales, and sales into permanent custom. A few of the subjects discussed are: Right Kind of Salesmen; Specializing Efforts; Letters to the Trade; Getting the Price; Retail Salesmen; Sales Manager, etc. 205 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

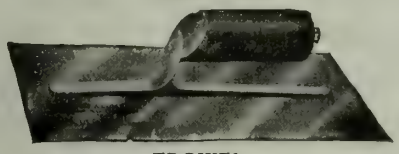
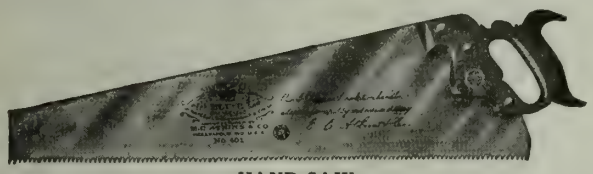
ATKINS' STERLING SAWS



COMPASS SAW

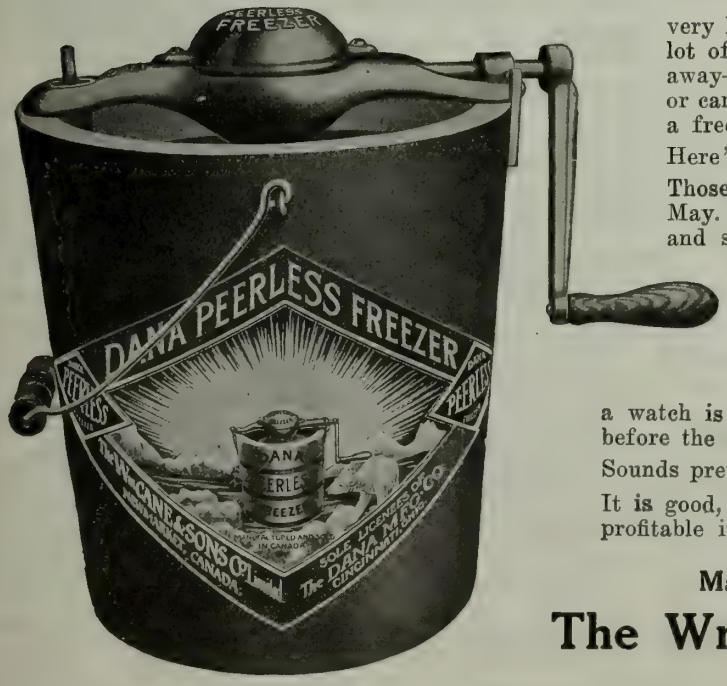


NEST OF SAWS

BACK SAW

TROWEL

HAND SAW



The Big sensation at the Ottawa Convention. Justly popular—because they bring a fair profit.

If you are not satisfied with the money you are now making on Saws—then write to us.

E. C. ATKINS & CO.

Makers of Sterling Saws.

Canadian Factory—Hamilton, Ont.
Vancouver Branch—109 Powell St.

It will probably be hot this Summer—

very hot, the sort of weather that makes people eat a lot of ice-cream. And a great many of them will be away—out of town—on lake shore, in Summer cottage or camp, where ice-cream parlors do not abound, where a freezer is a necessity.

Here's your chance for some big business.

Those people will be going away about the middle of May. Put in a stock of Dana Peerless Freezers now, and start suggesting that they take one with them.

Show them the Peerless—explain its operation to them. Point out, that the very tall, slender can makes for quick freezing, that the dasher removes the frozen cream from the sides, as fast as it becomes solid. Let them try the Peerless, and find that it is as easy to grind as a watch is to wind—and you will be sending us reorders before the Summer is through.

Sounds pretty good, doesn't it?

It is good, and if you'll write us, we'll tell you just how profitable it is too.

When the Bristles come out

and decorate that piece of work he's been so carefully painting; when the brush curls at the end, loses its shape, becomes useless for anything but applying tar; when this happens just after he's bought it—right in the midst of his Spring painting—be he amateur or professional, he's liable to say things.

Yes! And he's liable to think things too. His thoughts—not kindly ones, by any means—will hark straight back to the store where he bought that brush. And notwithstanding the fact that he most probably bought the paint there, and that he finds it excellent—he'll mentally tabulate that dealer as unreliable, and resolve to patronize the other fellow down the street.

Can you afford to run a risk like this?

Dare you jeopardize the enviable reputation that has required perhaps years of steady application to business building, that has given you the name for selling the best paint in the neighborhood? Are you willing to stand a chance of losing good customers—just because you sell inferior brushes?

Don't do it; there isn't any need.

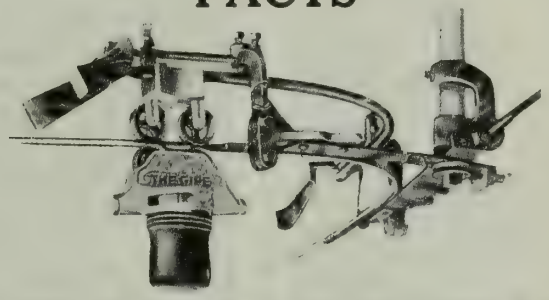
We make brushes, the equal of any made to-day, that don't cost any more than the unguaranteed kind; that, because of their right-down honest brush values, can be trusted to look after your reputation as a dealer—anywhere.

Write to us and let us tell you how profitable is boosting business,—the Meakins way.

Meakins & Sons, Limited
Hamilton, Ontario

BRONZITE

The Permanent Green Paint



Dip a brush into "Bronzite"—see how **easily and evenly it works,** how it covers a larger surface than any paint you have ever used.
This is because "Bronzite" has body, strength and consistency—these are things which make covering capacity.
The lasting and attractive qualities of "Bronzite" make friends everywhere—and for this reason you should be a "Bronzite" Booster.

Write for particulars.
Used on all work where a green paint is needed.

COLONIAL WORKS Inc.
225-237 Norman Avenue, BROOKLYN, N. Y.

FACTS

We can perform more functions by our modern wire carrier system, and with a greater degree of dispatch and certainty than can be accomplished by any other of this type of machine, all of which means that we can reach more points in a store and do so in a better and more satisfactory manner than has been accomplished heretofore. Remember our ten days' trial. You are invited to put us to the test. Send for our new catalogue G.

Revolving CASES

A TIME SAVER and System Promoter. Every up-to-date Hardware Store should have these Cases. They prevent the mixing of screws and bolts, thus enabling the dealer to keep his stock in good shape, making it a pleasure instead of a task to handle them. These Cases are also used by the Auto trade for keeping small parts, and no one who has seen or used one will be without them. Catalog on application. Sold by all jobbers. Manufactured by

American Bolt & Screw Case Co.

DAYTON, OHIO.

KIR-BEN GRATE TALK

A series of Kir-Ben talks will appear in this paper—
watch for them.

Kir-Ben furnace is fitted with the largest style grate, the roller-bearing duplex type, an original and exclusive Kir-Ben feature, and the only roller-bearing grate made. This is the only grate that will always work freely and remove the ashes from the outer edge of the fire-pot without disturbing the live coals in the centre. It is a known fact, applicable to all styles of coal-burning devices, that the coal burns first around the edges and sides, consequently there is an accumulation of ashes up the sides, and a body of live coals within. The fire-pot being the best heating surface of the furnace and ashes being a non-conductor of heat, this accumulation should be removed in order to get the best heating results. The Kir-Ben circular shaking grate (orannular rings) brings these ashes down into the basket formed by the duplex portion of the grate, and permits their removal without wasting any of the live coals or unconsumed fuel. This entirely does away with the sifting of ashes necessary with all other styles of grates.

Kir-Ben Limited, Almonte, Ont.

WROUGHT STEEL

Screen Door Hardware

COMPLETE SETS IN CONVENIENT PACKAGES

Set No. 1750.

Set No. 1750 is made up of one pair of 3x3 ornamental, loose-pin butts to screw on the surface of the door; one five-inch wrought steel pull; one high-grade No. 3 spring, of much better quality than is usually used on screen doors; one gate hook and eye. Each set is packed neatly in a neat, strong, telescope carton, with screws of the proper size and finish, ready to be handed to the customer.

These sets are finished handsomely in Japan, Antique Copper, Dull Brass, or the Rust-Proof "Stanley" Sherardized finish.

A less expensive set, No. 1752, is also put up with 2½x2½ butts, and a No. 2 Spring. It is made of good materials, handsomely finished, and is fully equal to other sets on the market.

Send in your order for Stanley Screen Hardware, and be prepared for Spring business. Write us, if your jobber cannot supply you.

Big Profits Easily Made

O-Cedar Polish Mop

(Made in Canada)

In our advertising, in the daily papers in the largest cities from coast to coast and in the largest and most popular magazines, we are telling thousands of housewives that the **O-Cedar Polish Mop makes easy to clean those hard-to-get-at places,** such as between the banisters, tops of high furniture, tops of doors, etc., and what a beautiful, highly-polished surface it leaves on hardwood floors and linoleums!

Hardware Merchants who stock and display the O-Cedar get the benefit of this advertising in the form of quick, easy sales and very good profit.

O-Cedar Polish Mops are sold on the "Satisfaction or money back" principle.

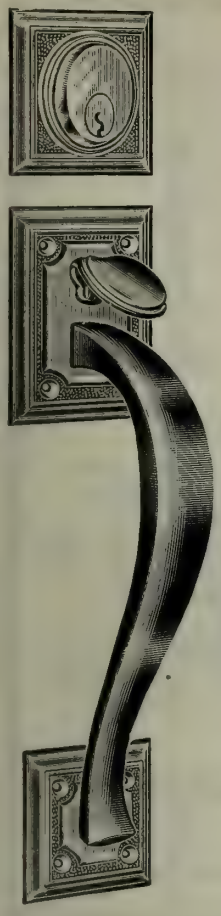
Deciding Upon New Lines



The other day, a Western Ontario hardwareman visited our office, and discussed with the editor some new lines he purposed taking up this Spring.

There are hundreds of other hardware merchants in Canada, who intend branching out on somewhat new lines, for the Spring and Summer trade.

To these, we commend Hardware and Metal's Annual Spring Number, to be issued March 21, for careful study and consideration.

Not only will the reading pages give them the very best ideas that Hardware and Metal's capable editorial staff can get together, but the advertising pages will have the most valuable suggestions of saleable goods, of any number yet published by Hardware and Metal.

You will make money by studying both advertising and news pages of this great number with unusual care.

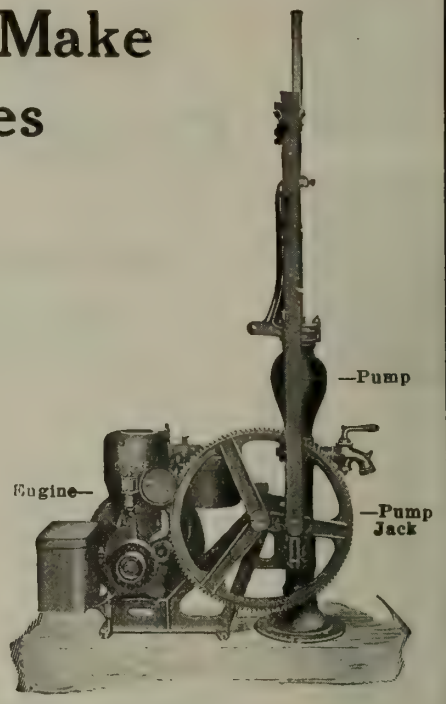
How the Hardware Man Can Make Money Selling Farm Engines



Every farmer is a prospect for a farm engine. Thousands of engines are being sold annually throughout Canada. The agricultural papers are full of farm engine advertising and long articles on the many uses and economy of the farm engine. Farmers read these papers very closely and are buying engines as rapidly as they can afford to. Farmers must come to the hardware dealer for supplies, and while there will look at a farm engine if you have one in stock.

You can add to your profits by securing the agency for a reliable farm engine.

FAIRBANKS-MORSE FARM ENGINES

Have an international reputation for reliability and long service. Farmers like them and speak well of them. Fairbanks-Morse engines are made in Canada, and are backed by a strong organization. We relieve you of all responsibility. Our engines are made in all the common sizes for farm use. By representing us you can supply any size or type of engine the farmer may need. The Eclipse engine shown here is in universal use and would be a safe engine to carry in stock, as there would never be a chance of your having it left on your hands. It is easy to sell. We are selling them all the time direct to farmers.

Write us in regard to handling our farm engines.

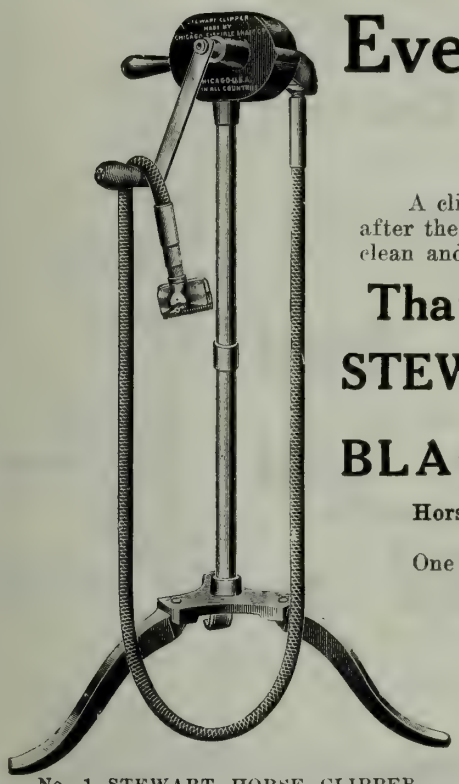
A Comparison which is a Convincing Argument in favor of Clipping

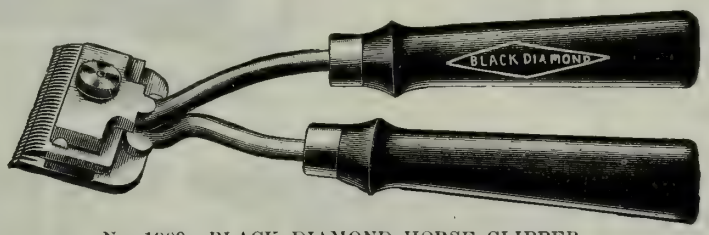
CLIPPED

UNCLIPPED



Every Horse Worth Keeping Is Worth Clipping

A clipped horse looks better, feels better and works better. He dries out quickly after the day's work, rests well and his food does him good. He is more easily kept clean and increases in value.



That is why You can sell, this Spring, our STEWART HORSE CLIPPING MACHINES and BLACK DIAMOND HAND CLIPPERS

Horse Clippers are used extensively by Dairymen for clipping the flanks and udders of cows.

One dairy near Chicago has 100 Stewart Horse Clippers for use on its cows.

No. 1 STEWART HORSE CLIPPER.

No. 1909. BLACK DIAMOND HORSE CLIPPER.
Ball-Bearing; Nickel Plated; Ebonized Handles.

The Flexible Shaft of No. 1 Clipper can be used on the No. 8 Shearing Machine, and the jointed shaft of the No. 8 Shearing machine can be used on the No. 1 Machine; Therefore by possessing either machine, it can be adapted to Clipping or to Shearing by buying the other Shaft required.

With a Good Sheep Shearing Machine 20 cents' worth more wool can be gotten from every sheep, and it is cut evenly from over the body.

No second cuts are put into your clipping as is the case with hand clippers.

IT PAYS TO SHEAR SHEEP WITH A MACHINE

A Confidential Chat With Our Readers

Never has Hardware and Metal's staff been busier than at this very moment.

Of course, the unceasing effort to make each issue a little better than the last, keeps things pretty well stirred up at this office most of the time. But just at present everybody is putting forth the very best that is in him to make the 1914 Annual Spring Number a record-breaker in every respect.

And there are only two weeks left in which to complete our preparation, print and mail the finest issue ever turned out by a Canadian hardware paper.

There were special incentives this year to make our annual Spring Number excel all our previous efforts. The most potent of these was that we have regarded this year's number as a sort of Silver Jubilee Number, and we were determined that it should stand out from its twenty-five predecessors in such a way as to show, at even a casual glance, that it was Hardware and Metal's supreme effort, after having served Canadian hardwaremen well and faithfully for over twenty-five years.

We have gone to so much trouble and expense with this number, that we want our readers to give it special attention. To facilitate this, we are attaching a cord at the upper left-hand corner, so that it may be hung on a convenient hook, where proprietor and clerks may consult it frequently during the months to come.

This week one of our editors is in New York and another is touring Western Ontario—both in search of good live ideas for the Spring Number. Our new Western editor has arrived in Winnipeg, having picked up many fine articles en route. He has written in saying that he will have some splendid material ready for the Spring Number. In fact, our entire editorial staff is working at top capacity, with the idea of turning out, on March 21, an issue which will worthily celebrate Hardware and Metal's Silver Jubilee, and reflect the enormous advance made by the Canadian hardware trade in general, since Hardware and Metal was first issued in 1888.

Our New Office Building.

The favorable weather of the past few days has been a great boon to the builders who are erecting the MacLean Company's new office building.

Two or three weeks ago we published a cut in Hardware and Metal showing the building in course of erection, and, at that time, brickwork was being done on the second floor. Great progress has been made since, and, as we go to press, the brickwork on the fourth floor is pretty well completed.

When finished, the building will contain five storeys, and will be given over to the business, editorial, and advertising staff of the MacLean Publishing Co.—Canada's pioneer trade paper publishers. The offices will be light and airy, having ample windows on three sides.

The present building, which was considered ample for its purpose, when it was erected five years ago, is to be used solely by the mechanical plant.

We are hoping that we may get into our new offices early in May, and we want as many of our readers as possible to visit us, and get acquainted with us in our improved surroundings.

Sandusky Power or Electric Washer

Here is a thoroughly practical Washer, one that will do a family washing right at home, under sanitary conditions and save from $1.00 to $3.00 each week, enough to pay for it in a short time.

Every Dealer who has stocked it has found it exactly as represented—first-class in every respect and a splendid seller.

Every woman is captivated by the way it starts automatically and by the perfect condition of the clothes and their snow-white cleanness after washing. You will find it

A Trade-Bringer

worth handling, because every woman who gets one recommends it and sends more customers to you.

One big selling point which takes with prospective buyers is the novel wringer device. It permits wringer to be started, stopped, reversed or swung to any position. And while the washing is going on, the wringer will wring from the rinse water to the bluing and from the bluing right into the basket. The construction of the entire Washer is the best possible.

Space won't permit full details, but if you'll write we send them and tell you about our Guarantee Certificate plan which helps you make quick sales. Our proposition is worth sending for. Don't neglect it.

Associated with THE A. B. ORMSBY, Company, Limited
TORONTO and WINNIPEG

"Universal" Aluminum Hot Water Bottle

The body of the "Universal" Aluminum Hot Water Bottle is seamless, being drawn from a single piece of metal, and the neck and stopper are so formed that with the cap in place an absolutely water-tight joint exists.

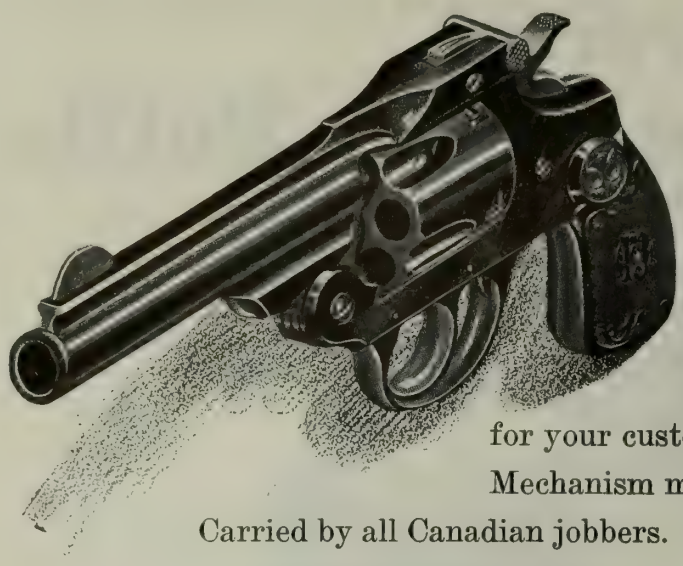
The average life of a rubber hot water bag is two years and it will wear out even though standing idle. Pieced metal bottles will rust through or open at the seams when least expected. Aluminum does not rust or corrode. The "Universal" Hot Water Bottle cannot leak because there are no seams or joints to come apart.

It will stand upright on any flat surface, making it unnecessary for the hands to come in contact with the hot metal while the Bottle is being filled.

One side is concave in shape, allowing the Bottle to rest comfortably on its side and without loss of heat when laid flat in contact with the body. The perfectly smooth metal surfaces are easily cleaned and it is therefore more sanitary than bags or bottles of other types.

Owing to the large capacity of the Bottle it is possible to use a greater quantity of hot water, thus enabling the Bottle to stay hot all night and many hours longer than those of smaller size.

It will render a lifetime of service outlasting several hot water bottles of the ordinary kind.



No. 100. Complete with Cotton Felt Bag. Each, $3.50.
Capacity, 1½ quarts. Weight, 9 ounces.

Your Jobber will be glad to quote you on these BOTTLES, or write direct to us.

Of What Value is a Guarantee Without a Guarantee ?

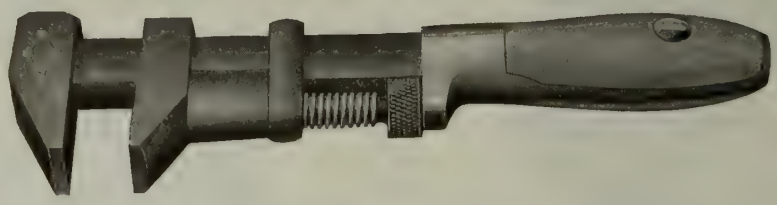
Almost everybody guarantees their goods to-day. It is hard to make a sale unless you stand back of the goods.

But a guarantee is only as strong as the firm behind it. Its value is measured by the ability of the firm to make it good.

There is a wrong impression prevailing among most people as to the status of the guarantee. They look at it only as the promise of the manufacturer to replace defective articles. Under such a guarantee you can replace a poor tool innumerable times. You could keep it up for a lifetime (if the business lasted that long), but only at a constant loss to you through the trouble and delay occasioned by the replacement.

You should select a brand of goods where the guarantee is *guaranteed.*

DISSTON BRAND GOODS



have a strong guarantee of quality, but back of this guarantee is the long history of the House of Disston. The unequalled reputation which we have established for our products is itself in turn a guarantee—a guarantee that backs *our* guarantee.

Our reputation for making efficient and high-grade saws, tools and files, assures the buyer that there is little likelihood of his having to take advantage of our guarantee. That gives the guarantee its fullest meaning. It is the guarantee of a guarantee.

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 178th street, and anchored them while they put out to stop the other two barges.

But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.

Both these courses are also profitable—in money and good-will alike.

Why overlook the Brush ?

Some people seem to think, that as long as the paint is all right, any old kind of brush will do to put it on with. And some dealers let people go on thinking this way, instead of attempting to point out to them how the best paint may be spoiled by using an inferior bristle-shedding brush. These dealers argue, that since they have the name for selling the best paint in the locality—people are bound to come and buy from them.

They overlook the fact that they will probably supply the brushes as well as the paint, and do not realize that poor brushes, besides spoiling the finish, have a decided tendency to boomerang back on the head of the dealer who sold them.

All of which means—

Make sure of the brushes you sell.

Make sure that they are made by a firm that has a great reputation at stake, that simply dare not jeopardize it by turning out inferior brushes. Make sure that the brushes you buy have the guarantee of a firm like this back of them, and yet do not cost any more than the unguaranteed sort. In other words—

Make sure that they are made by Meakins.

Write to us and let us tell you how profitable it is safeguarding your reputation—the Meakins way.

Meakins & Sons, Limited, Hamilton, Ont.

THE

KEEN KUTTER

Trade Mark Points to Profits

When your customer buys Keen Kutter goods he buys QUALITY that sends him back to you for other things. He is sure his purchase will be right—he knows that he is protected by an absolute guarantee that means money back if not satisfied. KEEN KUTTER

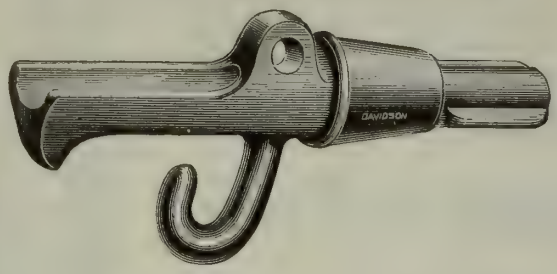
QUALITY CUTLERY

is making friends for live dealers because each article is the best of its kind, and all covered by Keen Kutter guarantee of quality. No other line or brand can so conscientiously protect the dealer. The Keen Kutter trade mark will bring you reputation and customers.

Write us now for full particulars.
It will pay you — pay you well.

SIMMONS HARDWARE CO.

Manufacturers and Distributers



Philadelphia, Pa. — St. Louis, Mo. — New York City
Sioux City, Ia. — Toledo, Ohio
Wichita, Kans. — U. S. A. — Minneapolis, Minn.

This line embraces Scissors, Shears, Table Cutlery, Pocket Knives, Razors, Safety Razors, and many others too numerous to mention.

THE "EMPIRE" SAP SPOUT

STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7-16-INCH BIT WHEN TAPPING, and it will be found that with the **"EMPIRE" SPOUT** every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

This will be an age of Concrete

Just as other ages have been named after some much used material—the stone age, the copper age, the iron age—for example, so will this, in days to come, be known as the concrete age.

And it will have earned the title, for concrete is being used everywhere, more and more, every day.

Now if you are a

Rogers Portland Cement

dealer you will be right in line for making money out of this big, new business, because you can look after the needs of any small contractors who are doing jobs close to your store—can save them the trouble of hauling cement from the supply house.

And when they know the brand you handle, they'll be glad to give you their orders—for Rogers' Cement meets the approval of their architects and engineers—**Rogers' Cement is standard.**

But you don't need to carry a large stock to meet their varying needs. We'll attend to that as obediently as you tell us to.

You can't find a better proposition from your viewpoint,—**so write now**, to-morrow may be too late.

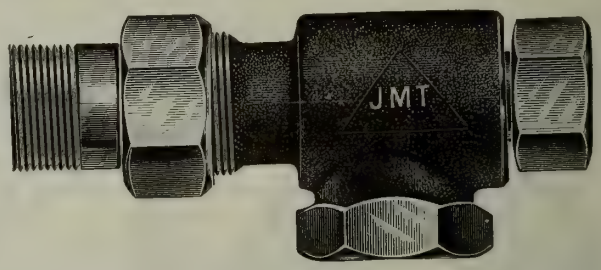
Morrison's New Water Jet Lifter



The Morrison Water Jet Lifter is a device for draining off any accumulation of water without the worry and expense of attendants and the old style of pump. This little ejector is designed to automatically pump water out of excavations, basements, etc., without any attention whatever except that necessary to attach it and set it in operation. It makes no difference whether the water is hot or cold, clear or muddy. There is nothing to adjust, nothing to get out of order, nothing to rust or corrode, nothing to clog up.

Guaranteed to operate successfully on lifts, or suction heads, up to thirty feet, depending on the pressure. Made in four sizes with capacities up to 600 gals. per hour.

Saves its price in one day.

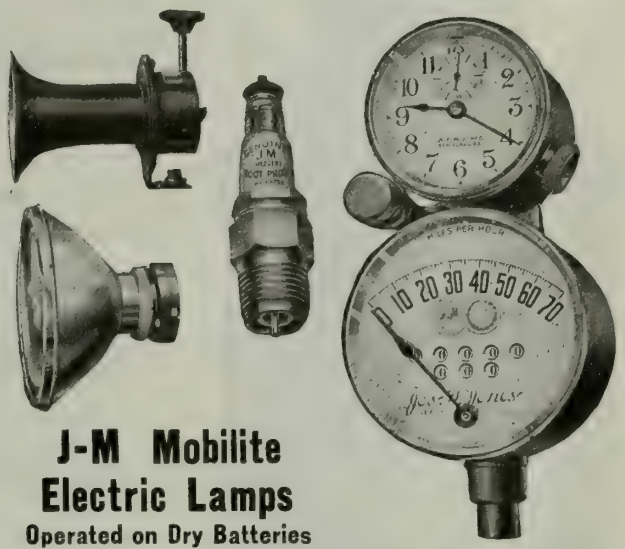
There's only one possible rattle when you sell Fernald Quick-Shift and Anti-Rattler—the rattle of coin in your cash drawer.

The Fernald Quick-Shift and Anti-Rattler is the little all-steel snap-locking device that hooks up a buggy with shafts or pole quicker than the telling of it. It snaps on so tenaciously and holds so snugly that every bit of the shaft rattle on any rig is wiped out of existence.

The reputation of Fernald is national. Its low price whoops up sales, and every driver can afford it and will buy it. Transfer the noise it cuts out to your till. It's a pleasant sound and will pay you well.



Your jobber has the Fernald Quick-Shift and Anti-Rattler in dozen lots of individual packages. Fall in to-day.

Fernald Manufacturing Co., Inc.

North East, Pa.

JM AUTOMOBILE ACCESSORIES

Backed by the Guarantee of a $5,000,000 Concern

J-M Mobilite Electric Lamps

Operated on Dry Batteries

For head, dash, tail and speedometer lights, and interior car illumination. Also for motorcycles, motor boats, camps, bungalows, etc.

Made of hard rubber, fitted with a Tungsten bulb, a powerful lens and reflector. Six 30-ampere Red Seal Dry Batteries will operate a set of four lamps from 300 to 420 hours.

Jones Speedometer

Most accurate speedometer made. Operates on the centrifugal principle, therefore is not affected by atmospheric changes. Strongest in construction. Has fewest number of parts. Not affected by jars or bumps. Big speed figures—steady hand—clock dial. Trip and season odometer. Instantaneous trip reset.

Long Horn

This mechanical horn never fails. It is not dependent on batteries, motor, bulb, wires or anything else that can possibly break or get out of order. Costs nothing to operate or keep in repair. Made in various styles for all purposes.

J-M (Mezger) Soot-Proof Spark Plug

The only plug that can not short-circuit—because it is the only plug that is absolutely soot-proof. Porcelain insulation becomes so hot at firing point that carbon is burned up the instant it settles. Over 12 years on the market. Millions in use.

J-M Non-Burn Brake Lining

Gives Perfect Control of Car

Grips the drum the instant brakes are applied. Never slips. Unaffected by frictional heat, oils, water, grit, etc., because it is made of pure asbestos fibre interwoven with strong brass wire.

Red Seal Dry Batteries

(Guaranteed)

If Red Seal Dry Batteries do not prove satisfactory, we will supply new batteries without cost. This guarantee is the most convincing argument we can possibly offer to prove the high standard of Red Seal Dry Batteries for ignition work.

Made in three capacities: 20, 30 and 35 amperes, 1½ volts per cell.

Andrews Wire Works of Canada, Ltd.

WATFORD, ONT.

Here's a money making proposition for You

Gurney-Oxford Warm Air Furnace

There is no better furnace made than the Gurney-Oxford.

Tests have conclusively proven that there is no furnace made or marketed in Canada which will deliver more heat AT THE REGISTER for the amount of fuel consumed than the Gurney-Oxford.

One-way fire travel takes most of the heat out of the products of combustion before they reach the flue. This alone means greater efficiency. Our improved reversible grate bars burn coal to a fine white ash. No half-burnt coal with the Gurney-Oxford Furnace.

These grates are practically trouble-proof. Three burning faces instead of one mean three times the life.

Now Consider This:

You can make more profit on Gurney-Oxford Furnaces and at the same time give your customer better value.

If you will send for the information we will gladly send it to you.

If you can get half a dozen prospects together we will send one of our heating engineers. You and he can get together and make some money for both of us.

May we not figure with you on your heating this Spring? Send us a card for prices and data.

Vol. XXVI. MARCH 7, 1914 No. 10

Opening Up the Big House Cleaning Campaign

With Approach of Spring the Housewife Looks Forward to Annual Upheaval of the Home Furniture—There Are Many Assistants to Help Her That Must Pass Through Hands of the Hardware Merchant—Now is the Time to Plan for Big Business.

THE dirt "Bogie-man" will soon be abroad in the land with his mysteries satchel. At any rate the housewife is convinced of his prospective arrival and it requires a good deal of her energy, time and ingenuity to get him and his microbes out of the house. Fortunately she doesn't have to depend much upon her own resources these days. Formerly the "elbow grease" had to be diligently applied. But with the many lines on the market today that help in this great annual dirt upheaval, she plays a parlor game in comparison to the strenuous times of the past. The retail hardwareman, being the logical medium through which many of these auxiliaries pass from manufacturer and wholesaler to consumer, stand to reap great benefit from the annual spring house-cleaning campaign.

MR DIRT WILL SOON HAVE A BUSY TIME DODGING THE HOUSEWIFE

A Lesson From Nature.

With the return of March, Nature herself begins her annual spring cleaning. She is about to open up her doors which have been closed during the winter season and the earth must be got ready for that event. The keen winds send the accumulated dust of the winter before them and the melting snow carries off the refuse from the roads. It is a time of cleansing and renovating.

The busy housewife is now beginning to talk of that season dreaded by man but beloved by "the contrary sex," and of course a necessary concomitant of civilized life—House-cleaning. And at places where women congregate will be heard the oft-repeated question, "Have you started house-cleaning yet?"

Now is the time for the dealer to see that his stocks of house-cleaning goods are sufficient and varied. Once he decides on conducting a strong selling campaign, he can undoubtedly figure on moving out large quantities of the chief lines. The present is the time to act.

But in business as in all else a man must practise what he preaches if he expects to have many people follow his advice and the dealer who thinks he can persuade others to go into extensive house-cleaning operations while his own place requires cleaning, will find himself left at the post by those competitors who have first set their own place to rights before starting on the trail of their neighbors. A clean store is the first essential to a good campaign in house-cleaning accessories.

The possibilities of this campaign are evident when one thinks over the list of lines that will soon be selling freely. In olden days there was little else but the broom, the mop, stove polish and some soap. While these are indispensable yet, many more have been added. There are for instance.

Vacuum cleaners, carpet beaters, dustless mops, dustless dusters and cloths, feather dusters, brooms, whisks, scrub brushes, window brushes and rubbers, metal and silver polishes, furniture and floor polishes, wall-paper cleaner, tubs, pails, mops, curtain stretchers, cotton gloves and dozens of other cleaning aids.

Using Broom Racks.

Many dealers have circular and straight broom racks in which to show brooms. One dealer told Hardware and Metal how last year he had increased his sales of brooms very largely by moving his rack to the front of the store. He had been keeping it back near the warehouse door and found that he was selling only two or three brooms a week; under

the new arrangement he sold an entire rackful in the same length of time.

Study Value of Sweeping Powders.

With brooms of course sweeping powders should be sold. In selling these, the dealer must not forget to see that his patrons are well informed as to the advantages of using them. If it is explained to a woman that a sweeping powder will absorb the dust, kill germs on the floor, brighten the carpet and spread a pleasant odor throughout the rooms, she will be much more likely to buy than if she is asked to try a box without knowing thoroughly what results to expect.

People Couldn't Resist Buying.

Another dealer one time bought a stock of metal polish. It was a new line and not much asked for. For a long time it lay on a shelf till it became almost dead stock. Then, through Hardware and Metal he heard of a method that another dealer had tried out. This man had put two old pots in a window, one cleaned by a metal polish, and one dirty. On the dirty one he put a ticket saying: "Before using Blank polish," on the cleaned one he put another ticket saying "After using Blank polish." In about two weeks he had sold out his entire stock of five cases. "Women passing simply couldn't resist that display," he said.

The dealer who intends to take advantage of this time-honored and necessary custom must get to work early. By drawing attention to the approach of the spring cleaning and bringing to the customer's notice the fact that he is prepared to supply all requirements, he will get in on the ground floor of the housewife's estimation.

Silver polish and floor polish could be advertised the same way. One dealer is known who put a large maple board on the window, one end of which was streaked with grease and dirt, the other had been polished a pretty brown. This was displayed to show what the certain kind of floor polish which the retailer handled would do.

Selling Dustless Mops.

In selling dustless mops and dusters the most effective method for making sales is to give demonstrations. A piece of linoleum, about two or three feet square, answers the purpose nicely. Dust can be sprinkled on the linoleum in the presence of the customer and then picked up with the dustless mop. The dealer need not be at all backward in recommending the use of good dustless mops. Their usefulness has been clearly demonstrated, and they are here to stay.

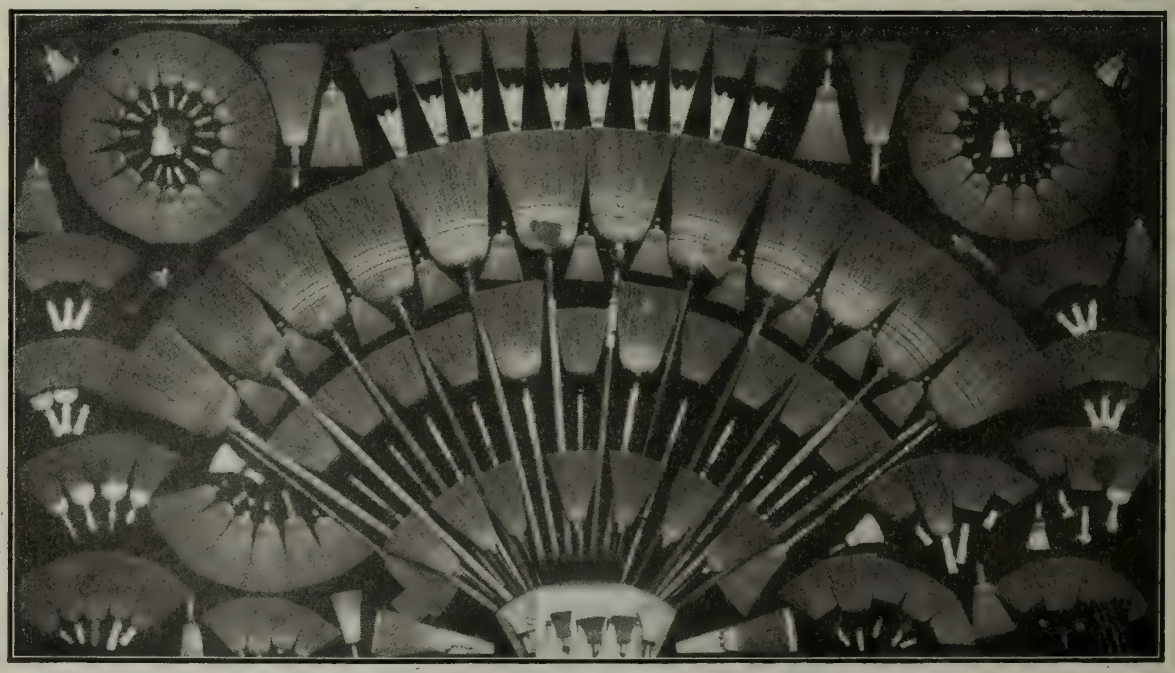
In selling dustless mops do not overlook the opportunity to sell dustless dusting cloths, banister dusters, etc.

Vacuum Cleaners.

The spring is also a good season in which to sell vacuum cleaners. Vacuum cleaners are more easily sold by giving actual demonstrations in the home of the prospective customer. Do not be afraid to push the sale of high-grade cleaners. An unsatisfactory cleaner is a poor investment, and will give constant trouble.

It matters not where your store is, there are many prospective purchasers of vacuum cleaners in your locality.

If you sell a cleaner that gives satisfaction, the purchaser will help you to advertise. If you have already sold a number of cleaners in your town or city see that the purchasers are well satisfied, and then use their names for references when trying to make sales.



Curtain Stretchers.

Curtain stretchers when set up take up considerable room. Folding stretchers are to the inexperienced rather hard to put together. Many and many a time I have seen a clerk struggling with a set of folding stretchers, trying to put them together in the presence of a prospective customer. The difficulty encountered by the clerk often makes a bad impression on the customer.

One of the large city merchants who sells several gross of stretchers each year stated that during the house-cleaning season he always had a sample of each kind set up. By this I do not mean the small models supplied by the manufacturer. A sample of each of the large stretchers carried in stock was set up and placed on display.

Customers make their decisions quickly, and clerks save a great deal of time and worry by adopting this method.

The house-cleaning season offers the hardwareman a splendid opportunity to do a big business in really profitable lines.

An exceedingly attractive display of brooms and whisks which would undoubtedly get the attention of the passers-by. Try this trim during the house-cleaning campaign.

Eighty-five Per Cent. of Failures Due to Individual

Lack of Capital Caused Only 41 Per Cent., Compared With 50 in 1912—Incompetence, Inexperience and Fraud at Basis in Larger Number of Cases—An Interesting Analysis.

AN analysis of the causes of business failures in Canada prepared by Bradstreets is worthy of careful consideration. It may be noted that a comparison of causes in Canada bears no unfavorable relation to those operative across the border. As is inevitable in every young country, lack of capital is a besetting trouble. In 1912 this was the cause of 50.3 per cent. of the failures, although in 1913 the figure fell to 41.3, less than any preceding year. Incompetence held nearly the same position as in 1912, the percentages being 16.9 and 16.3 respectively, so far as the actual numbers were concerned, although in 1913 the percentage of liabilities due to incompetence was only 15.5 compared with 22.8 in 1912. Inexperience was the cause of nearly double the failures in 1913 as in 1912, 9.6 to 5.1; unwise credits, 2.7 in 1913 to 1.3 in 1912; failures of others, 1 per cent., compared with .9 per cent.; extravagance, .8 per cent. in each year; neglect, 2.8, compared with 4.3; competition, .4, as against 1 per cent.; "specific conditions," 14.2 versus 12.8; speculation a shade higher, .8 against .5; and fraud 9.5, compared with 6.7.

The total number of failures in Canada was 1,827 and 1,312 in the two years respectively, with the assets $8,140,990 in 1913 to $5,611,675, and liabilities $16,650,450 and $12,355,282.

Different in the States.

In the United States incompetence ranks far higher than in .Canada as a cause for failure in business, 28.6 per cent. in 1913 and 30.2 in 1912. Inexperience was less fatal than here, 5.1 per cent.; while lack of capital, as might be expected, also had much less to do, 29.2 per cent. of failures being classed under this head. There is a remarkable similarity in the place of extravagance, eight-tenths of one per cent. in each country. Fraud caused 11 per cent. of failures in the United States, and speculation more than in Canada, 1.1 per cent.

Dividing causes of failures roughly into two classes—A, due to faults of those failing, and B, not due to faults of those failing. In the former are included incompetence, inexperience, lack of capital, unwise credits, speculation (outside regular business), neglect of business (due to doubtful habits), personal extravagance, fraudulent disposition of property.

In class B. are three specific conditions disaster, etc., failure of others (of apparently solvent debtors), and competition.

Mostly Due to Individual.

In 1913, 80.5 per cent., or over four-fifths of the failures in Canada and the States were attributed to the shortcomings of those who failed, while 19.5 per cent. were due to causes apparently beyond their control. In 1912 the proportions were almost identical, 80.3 and 19.7

"This constancy in statistics over two such dissimilar years," remarks the Bradstreet report, "is a striking feature, and one which seems to point to the relatively small effect of what might be termed business environment in predisposing to disaster in 1913."

In 1911, 78.9 per cent. were charged to the individual, while 21.1 proceeded from outside causes. In 1910 the proportions were 82 and 18 per cent. respectively; in 1909, 81 and 19; and in 1908, 77.5 and 22.5. It is presumed that the cutting down of outside causes since 1908 was due mainly to greater care in granting credit. Taking the amount of liabilities in place of the number of failures, personal causes are credited with 73.7 per cent. of the dollars and cents total for 1913, and 26.3 per cent. to outside causes. In 1912 the percentage was 80 and 20, almost the exact percentage of the numbers of failures.

Leading causes of failures rather lost in influence in 1913 in the United States when compared with 1912: lack of capital, incompetence and specific conditions; but in Canada the latter two increased in force.

Increase in Fraud.

In both countries failures due to fraudulent disposition of property showed a considerable increase, perhaps the most unfavorable phase of all. It accounted for 26 per cent. of the increase in the number of failures over the previous year. Fraud as a cause in 1913 showed the largest number ever recorded, and its proportion was exceeded only four times in twenty-three years. In the States Unwise Credits furnished 16 per cent. of the liabilities compared with 2.6 in 1912, but the increase in Canada was not nearly as large.

Over 94 Per Cent. With Little Credit.

"Of the 16,378 insolvent concerns in the two countries for 1913, 15,533, which is 94.8 per cent., were rated as having very moderate or no credit, as compared with 95.2 per cent. in 1912; 93.9 in 1911; 95.9 in 1910, 95 in 1909 and 91.3 in 1908. Only 4.4 per cent. were classed as good credit in 1913 against 4.3 per cent. in 1912, 5.4 per cent. in 1911, and 3.4 per cent. in 1910; while eight-tenths of 1 per cent. of all those failing or suspending had very good or higher credit, as against half of 1 per cent. in 1912, seven-tenths of 1 per cent. in 1911 and 1910 and five-tenths of 1 per cent. in 1909. The proportion of all failing in the two countries possessed of $5,000 or less capital was 91.8 per cent. in 1913,

(Continued on page 57.)

SUMMARY—DOMINION OF CANADA, NEWFOUNDLAND AND ST. PIERRE AND MIQUELON.

Failures due to	Number		Assets		Liabilities

HARDWARE AND METAL

VOL. XXVI. No. 10 Toronto, Canada, March 7, 1914 Two Dollars per Year

A Fair Warning

IF the regulations of the Workmen's Compensation Act, as at present drawn up, go into effect, the retail merchants of Ontario will be placed in a position that is scarcely fair to their interests. The commissioner has promised that they will not be included in the original bill as it is presented to the Legislature, but a rider has been added that may nullify this provision at any time. Under this the retail merchants may be included in the operation of the Act if the commissioner so decides. The only warning is to consist of a thirty days' notice in the official Gazette. This the Retail Merchants' Association takes to mean that no opportunity will be afforded the retail men to present any case against inclusion; they will be condemned, unheard, with a thirty days' stay of sentence. This is manifestly an unfair method. The merits of the case for the retailers have not been laid at length before the commission, as from the outset there was no serious intention evident of including them. Before the commission reaches a decision it surely should allow the association, or individuals, to argue against inclusion in the Act; then if the decision goes against them, they should be permitted to deal with the terms that would govern them in that event. The R. M. A. proposes the precaution that the Government, not the Commission, be the arbiters.

Price Maintenance Bill

PRICE maintenance is a live problem that has been before the trade—and particularly the United States trade—during the past few years. The Supreme Court of that country has been rather averse to the idea of a manufacturer fixing the retail price of his product and much litigation has cropped up to decide its legality.

At the present time, however, a bill is before the House at Washington to allow the manufacturer of a proprietary article legal power to fix and maintain the retail selling price of his product.

The main purpose of the measure is to encourage price standardization on branded merchandise of uniform quality by enabling producers of such goods to name and legally uphold the retail price on their wares. Under the terms of the bill, producers who wish to avail themselves of the privilege of naming and enforcing the retail price on their merchandise are required to file with the Bureau of Corporations a statement of their brands or trademarks and also the uniform prices to be charged at wholesale and in sales to the public.

The effect of the measure would be to create in the field of branded merchandise an absolute uniformity of price at all times and in all parts of the country, in the case of those manufacturers who could show their good faith. Monopolies are specifically excepted from those entitled to the privileges named in the measure, none but bona fide producers being permitted to name their retail prices.

Sunshine in Failure Records

SEVERAL phases of the relation of business failures to successes are discussed in an article in this issue, based on complete returns compiled by Bradstreets for Canada and the United States for the year 1913. One of the tables prepared by this company affords proof of the gradual improvement in the personal equipment of men who are entering business. In 1882 the percentage of failures to those in business was .93, or about one in 110. The next year the percentage was 1.20, or one in eighty-five, and in 1893 reached its highest point, 1.40 per cent., or one in seventy-one. In 1911 this had dropped to .77 per cent., in 1912 it was .82, and even in 1913 was only slightly higher, .82 per cent., or one in 122. This is a far call from the 1893 record.

There is no doubt that a certain proportion of the improvement is due to stricter methods in granting credit, but a marked advance in the average equipment of the merchant is a large factor in the better result. There is a more general recognition that success in business calls for personal qualities of a high order, as well as financial backing and other external facilities, and there is less evidence of ignorant embarking upon this difficult sphere of work as the years go by. The cutting down of the percentage of failures is, of course, of unusual advantage to every community and every country, and the personal efforts of merchants to raise the level of business operations, and the partnership work of associations, and the influence of trade journals all find their reward in this hopeful tendency.

The Business Situation

BUSINESS in hardware lines is somewhat improved on account of the approach of spring and the fact that jobbers and manufacturers are shipping spring orders. Orders for immediate requirements are not heavy, but this condition is usually experienced at this season of the year. The metal markets are in much the same condition as they have been for some time past. While a fair amount of business is passing it is of a hand-to-mouth variety. Metal merchants are, however, hopeful of a continued steady improvement in business conditions. Collections are fair. Paint manufacturers are very busy getting out spring orders and as far as their trade with hardware merchants is concerned, business is good. With the breaking up of winter there should be a decided improvement in the demand for all classes of hardware and building materials. Commenting on the business outlook The Financial Post says:

Railway earnings, bank clearings, and other indices of trade are bearish. To some extent dullness is seasonable. In Quebec and Ontario, however, trade is showing some tendency to brighten. But in the West the wave of economy, not altogether voluntary, has not passed away. There buying is extremely cautious, and it is still cautious in other parts of the Dominion.

There remains strongly impressed upon the public mind the momentous questions which Parliament at Ottawa will have to deal with. The Government has before it the question of continuing a policy of railroad construction and of putting into operation new lines already constructed, which, linked together, make two new transcontinentals. If these lines are left solely to the capital resources of the companies through which they have been built, it may be some years before they become effective agencies of development and business-producers. In the meantime the country would be the chief loser. Not only will trade dullness be accentuated, but the confidence which investors abroad have in Canada will be rudely shaken.

In addition to the question of carrying to completion the larger railway products, the Government is faced with a serious condition of the steel industry. Depression of an acute character—the worst since 1903—has overtaken it, and overtaken some of the mills before they fully recovered from the shock resulting from the removal of the bounties. There is not much hope for the future of this fundamental industry unless it obtains some measure of aid to offset the disadvantage of being shut out of other markets by high protective tariffs.

The foregoing questions are uppermost in the minds of business men, and little change in business can be looked for unless they are settled one way or the other—when either further depression or greater confidence will ensue accordingly as Parliament decides.

With two very serious questions affecting the immediate future still open fundamental conditions cannot be regarded as being entirely sound. Business depression continues, as evidenced by the accumulations of funds at Canadian centres. January bank statement, which has just come to hand, shows an increase of savings deposits of $10,000,000, as compared with December, and it will not be surprising if the February statement shows another increase. Bank clearings for the week showed another decline, and more railroad rolling stock accumulated in the yards. Though these facts are evidence of depression, they also presage a change. Economy on a national scale and continued liquidation is a splendid tonic, the effects of which cannot long be delayed.

Brighter spots on the horizon are approaching easier conditions in London, and a noticeable improvement in the United States. Idle cars there are on the decline, and the figures will be still further improved when spring movement of merchandise in Canada commences.

Some of the industrial companies' statements being issued at present show less decline in business than anticipated, and some show an increase. If January and February conditions obtain for a much longer period of the year there is not much hope of fat balance sheets at the close of the current year.

Selling Profitable Goods

WE frequently hear hardwaremen complaining about the narrow margin of profit in many of the staple lines of hardware. It is true that in some localities quotations on staple lines have been cut very low. Sometimes the low prices result from excessive competition and in other cases there does not appear to be any special reason why the goods should be sold so cheap.

It seems unfortunate that hardwaremen should not be able to make a legitimate profit on such lines as nails, wire, etc., and yet the fault lies largely with the retailers. In a letter, read before the Ottawa Convention by President Macpherson, and which later appeared in Hardware and Metal, this question was dealt with, and should be carefully considered by every retailer. There is also another point worthy of consideration. During recent years there has been a marked tendency on the part of retail hardware merchants to sell lines of specialties, principally for household use, on which there is a literal margin of profit. These specialties are frequently appearing on the market, and hardwaremen by keeping in close touch with their trade paper, and studying its advertising pages closely, can often pick up new lines which prove to be rapid sellers and profit-makers. With overhead costs of doing business and other expenses increasing the hardware dealer should keep closely in touch with his trade paper, and watch for the new lines which are constantly appearing. Little things with big profits are what many of the successful merchants are selling these days.

Editorial Briefs

HAVE you started your spring paint campaign?

• • •

KEEP closely in touch with markets. They mean dollars to you.

• • •

THE SEASON for improving business is rapidly approaching.

• • •

HAVE YOU booked your requirements for your spring trade? Do not be caught without the goods.

SPRING is only fourteen days away.

• • •

INCOMPETENCE and inexperience cause many failures.

• • •

THE EARLY bird gets the business—and the profits—when it comes to selling housecleaning supplies.

• • •

DO YOU conduct a follow-up system in your paint department?

R.M.A. Convention Strong on Fair Legislation

Over Thirty Resolutions Considered, Majority Dealing With Laws on the Statute Books, on Proposed Legislation or Legislation Wanted—Pedlar, Dead-Beat and Early Closing Among Questions Considered—B. W. Ziemann the New President.

TORONTO, March 5.—In last week's issue the initial proceedings, up to time of going to press, of the 15th annual convention of the Retail Merchants' Association, Ontario Board, were presented. While the attendance was not as large as it should have been, yet delegates were enthusiastic in their deliberations and put considerable ginger into the various discussions.

The Resolutions Considered.

The consideration of the many resolutions presented occupied the bulk of the two days convention. Among the questions up in addition to those discussed in last week's issue were the paying of cartage at both ends; co-operative stores; appointment of a fire marshal; collecting agencies; public markets; false advertising; guessing and voting contests; early closing; the adulteration of goods and many others.

The chair was occupied by President E. C. Matthews, of Toronto, who is succeeded by B. W. Ziemann, of Preston, who has been connected with the association a good many years.

Want Parcel Post as It Is.

Resolution No. 3: — "That it is the opinion of this meeting that no change should be made in the present parcel post system, as recently adopted by the Government, until it has been fully worked out and tested, and that we should insist, as far as possible, that it be self-sustaining."

Mr. Ryan asked what the resolution meant. Mr. Ziemann replied that one metropolitan paper is already clamoring for a zone of 150 miles, and that was why the resolution was brought in. The resolution carried.

Resolution No. 4:—"That whereas a special committee from our association prepared a memorandum setting forth the reasons why the present business tax rate—which is fixed by statute, should be reduced to 10 per cent. throughout the Province, and presented the same to the Ontario Government, and so far no action has been taken thereon. We therefore request that the subject be again taken up with the Government and pressed forward to some definite conclusion."

Without discussion, T. B. Cramp moved the adoption of this report. It was seconded and carried.

B. W. ZIEMANN, Preston, Ont.,
Elected president of the Ontario Branch R.M.A., at annual convention.

Bulk Sales Substitute.

Last year at the annual convention there was a lengthy discussion on the proposed Bulk Sales Bill. This year many views were ventilated on a proposed substitute. The resolution submitted was as follows:—

"That it is the opinion of this meeting that the wholesale trade and the manufacturers would secure better results than they would through their proposed Bulk Sales Act, if all retail merchants who propose selling out their businesses would be compelled by laws to give all their creditors fifteen days' notice of their purpose, and that in addition to this they ask those creditors with whom they are not acquainted, to sign a document, setting forth in a simple manner, that they would not sell out their businesses, without the consent of their creditors; and further, that we consider that the time has arrived when the retail trade could not only assist themselves, but also the wholesalers and manufacturers, by reporting to the secretary, at the head office all cases of severe price-cutting in the various cities and towns, and all cases wherein the merchants know there may be a likelihood of any retailer offering his goods in such a manner as to demoralize the trade and eventually deceive his creditors."

Eric Jamieson, of Hamilton, thought that to give 15 days' notice would frequently stop the sale. He considered this part of the resolution was an evidence of working for the wholesaler.

B. W. Ziemann, of Preston, reviewed the conferences held with the wholesalers and manufacturers, connected with the Credit Men's Association, pointing out the objections the retailers took to the Bulk Sales Act. This act he said would affect every merchant, good, bad or indifferent. The suggestion as contained in the resolution would enable the wholesalers to have protection against men coming into the trade of whose honesty they were dubious.

F. C. Higgins, of Toronto, did not see where the wholesaler would be protected by the resolution. "Suppose," he said, " a man does not give 15 days' notice; he sells his business and disappears. How will the wholesaler get justice? Is not that just the very thing the Credit Men's Association want to cover?"

Secretary Trowern maintained that under the act which would cover this resolution the business could be sold at once. The agreement could be signed but the purchaser could not legally take possession of the goods until 15 days had elapsed. He did not see how this would prevent a closing of a sale. He also said the bill would be applicable to the wholesaler, to boarding houses and even to farmers. Some one asked if the farmers had made any request to be included in the bill. Two or three of the

ONTARIO R. M. A. OFFICERS.

President—B. W. Ziemann, Preston, Ont.

1st Vice-President — A. M. Patterson, Brockville, Ont.

2nd Vice-President—R. D. Cameron, Lucknow, Ont.

Treasurer—F. C. Higgins, (grocer) Toronto, Ont.

Secretary—E. M. Trowern, Toronto, Ont.

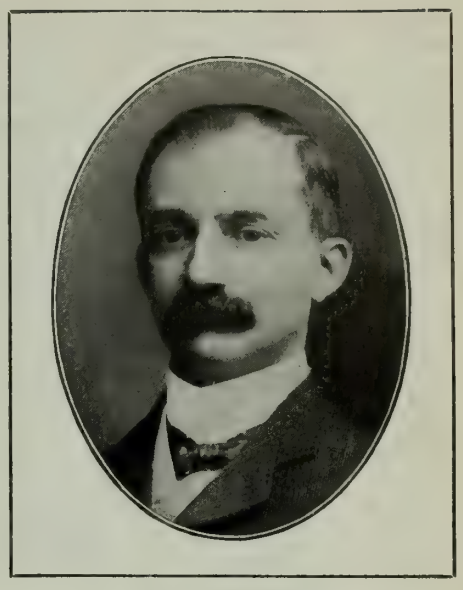
Representatives on Dominion Board—A. Weseloh, Berlin; R. D. Cameron, Lucknow; A. M. Patterson, Brockville; F. C. Higgins, Toronto, and Secretary Trowern.

members maintained it would simply be putting a halter around the necks of the merchants if they passed the resolution.

R. D. Cameron, of Lucknow, was willing that the wholesalers get an act to protect themselves, but did not think the retailers should propose it. "It was time enough," he said, "to discuss the bill when it was prepared by them."

Eventually it was moved that the first part of the resolution be referred back to the Committee on Legislation, and that a resolution be framed by it and submitted to each member; and that the second and third parts of the resolution be discussed with the wholesalers.

Compulsory Afternoon Closing.



Eric Jamieson, of Hamilton, introduced the following resolution re compulsory afternoon closing:—"That this convention consider the advisability of amending the early closing by-law, so as to enable the merchants in any municipality to close their places of business on any one afternoon of the week they may desire."

N. C. Cameron pointed out that as at present constituted the statutes allow municipalities to pass a by-law compelling stores to close after seven o'clock, excepting Saturday nights and nights prior to holidays, providing 75 per cent. of the merchants in any line petitioned for same, but it did not permit compulsory afternoon closing. The resolution carried.

Express and Freight Claims.

Another resolution read:—"That we believe that our members should receive greater benefit if, instead of making application direct to the express and frieght companies, in tracing parcels, or securing payments for claims they would submit all complaints to the head office, so that they could be taken up by the association, instead of individually."

In discussing this many of the members considered it in their interests to deal promptly with all freight and express claims themselves. T. B. Cramp, of Orillia, considered that in his experience he had freight claims from 25c. to $25, and he has invariably had them settled with the express companies in one month and with the railway companies in two months. "If we send in our claims promptly and properly," he said, "we come out better with our local agents." A Midland merchant said the reason claims were settled so promptly in Orillia was because there was competition in railway transportation.

E. M. TROWERN,
Secretary of the R.M.A. for over 15 years.

Several dealers cited individual cases illustrating the lengthy dealings sometimes experienced. The resolution eventually carried with the addition of the word "exceptional" being inserted between the words "all" and "companies."

Another resolution dealt with co-operative society legislation, and the association will make every effort to see that any bill introduced is vigorously opposed.

The following resolution was next considered:—"That as a great many requests have been made by members of our association, to make provision for an efficient inspection of the proper weight of articles sold over retail counters, that this convention consider the advisability of requesting the Dominion Board to take such steps as will provide for the same."—Carried.

Watch Collecting Associations.

"When you sign a card like this," said Secretary Trowern, holding up a printed card in his hand, "you make yourself liable for all the debts of the concern." He was referring to a certain collecting agency. The following resolution was carried in this regard:—

"That it is the opinion of this convention that a very large sum of money can be saved by our members, if they would write and secure information from the head office before they subscribe to,

(Continued on page 44.)

CARTAGE AT BOTH ENDS.

"That it is the opinion of the meeting, that the system of charging for freight cartage at both ends, is unfair to the retail trade, and that we recommend that this matter be referred to the Dominion Board, and that they be requested to take such steps as will remedy the evil."

This resolution caused considerable discussion, and the matter of charging of freight was certainly demonstrated to be a live problem. From the comments made it was shown that all retailers are not treated alike by shippers. Some have to pay cartage at both ends, whereas others only have to pay it from their own station. Secretary Trowern suggested that the matter be taken up individually with members by letter to find out whether they pay cartage at one end or both ends and their views on the entire matter.

Eric Jamieson, a Hamilton grocer, thought that the wholesaler should put the freight charge on the invoice. "Many men," he said, "are not merchants. They figure their selling price from their first cost. If the wholesaler were to charge the freight on the invoice as well as a fair amount to cover cartage, it would be better for merchants." It was pointed out by one member that the cartage charges had only to be paid at both ends on goods sent out from three places in Eastern Canada. In none of the other wholesale centres did the shipper ask the merchant to pay this at both ends.

W. J. Maher, of Cobourg, said that the cartage was in the bill, even in cases where delivery was made free of charge. Other merchants, however, claimed that this was not the case.

T. B. Cramp, an Orillia grocer, suggested that the wholesale houses invoice the goods to the carter in each town and have him deliver to the individual merchants. This he maintained would save much expense. It was the way the majority of biscuit firms were doing. "Let us buy our goods F.O.B. at our own station," he said, "freight and cartage paid. This cost would then be in the invoice."

Eventually the resolution as brought in was referred to the Executive, who were asked to cover the points discussed and determine the opinions of the trade before referring the matter to the Dominion Board.

or connect themselves in any way with any rating or collecting associations or agencies."

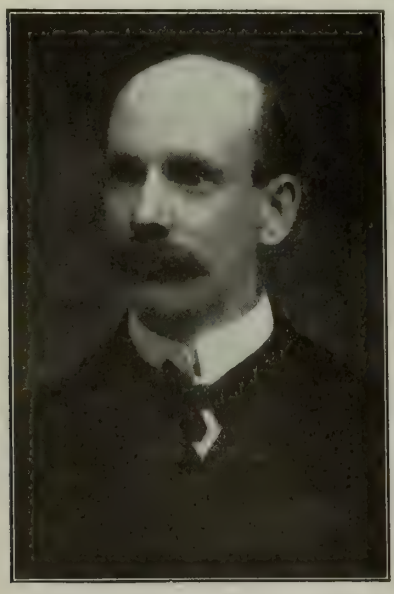
The next resolution was referred to the local associations to be dealt with as the occasion arose:—

"That it be a recommendation from this convention, that literature be published and circulated among our members, setting forth all the facts and circumstances—from the butchers' and grocers' standpoints—regarding public markets."

The association will oppose proposed legislation to tax all vehicles used by retailers in Toronto.

In view of the importance of the retail trade in the province, the Ontario Government will be urged to appoint a Minister of Inland Trade to look after retail interests.

Want False Advertising a Crime.



A resolution reading:

"That we recommend action of the Dominion Board, in asking for legislation during the coming session, that will make false advertising of merchandise a crime," was carried without discussion.

Another that carried without discussion read:—"That this convention take further steps to press our amendments to the Division Court Act, regarding garnishee and simplifying the collection of small debts."

To Educate the Consumer.

Volunteers will be called for to carry out the spirit of this resolution, which passed with little discussion:—"That it is the opinion of this meeting, that the time has arrived that we, as an association, should undertake a strong educational campaign, to educate the public to a greater knowledge of the importance of the retail trade; so that the various sections of trade will not receive the abuse they have received through the press, and by the "Women's League" and other organizations, who are not familiar with the processes of distribution, and that this meeting recommend that the executive appoint a committee from the various sections of trade, who would be willing to give their time to addressing public meetings, with the object of educating the general public to the true conditions and the importance of the retailer in the community."

F. C. HIGGINS, Toronto,
A grocer who holds position of treasurer for R.M.A. of Ontario for coming year.

The association by resolution desired that the Trading Stamp Act shall be amended to include all forms of guessing and voting contests.

In connection with the Cold Storage Bill in the House of Commons, the association declared in favor of clauses to protect the retailer.

Interprovincial judgments, so that they will be operative in every province, to facilitate the collection of small debts, were approved and a recommendation will be passed on to the Dominion Board to see what can be done.

Would Hold Manufacturer Responsible.

This resolution, carried without discussion, met the approval of every grocer present:—"That it is the opinion of this meeting that any goods that are sold to retail merchants as being unadulterated, and they are found to be adulterated that the manufacturer should be prosecuted instead of the retailer."

"That the Government be asked to place an embargo on cattle and live stock going into the United States," was still another resolution discussed.

W. J. Maher, Cobourg, pointed out that there was a difference between an embargo and export duty, and believed that the matter should be gone into thoroughly with the farmers' associations before anything was done. A clause was, therefore, added that before anything was presented to the Government that the executive confer with the farmers' associations.

The next resolution dealt with smuggling at Sault Ste. Marie port, and requested the Dominion Board of the R.M.A. to interview the Minister of Customs asking him to stop smuggling at that port. It was introduced by J. Stevenson and carried.

A resolution to the effect that "this convention is opposed to municipalities engaging in the retail business" passed without discussion.

To Follow Up Delinquents.

W. J. Maher, of Cobourg, asked this pertinent question: "Why cannot we get legislation preventing a man going from one town to another leaving an unpaid account, just as the hotel man has legislation to prevent a man leaving without paying his bill at a hotel?"

This was a popular subject, and at once a resolution was passed instructing the incoming executive to see if legislation can be secured covering this point.

J. R. Dargavel, M.P.P. for Leeds, Ont., who is himself a retail merchant, attended the convention on Thursday afternoon and addressed the members. He referred to the introduction of the Bulk Sales Bill into the Legislature last year, and the successful fight he put up with Mr. Trowern to have it ejected. "I imagine," he said, "it will never be introduced into the House in the same shape. I have been forty-six years in the retail business and my experience leads me to believe that any man who desires to go into business can get all the goods he wants from wholesalers. If it hadn't been for the people in my town who have come and gone in years gone by I probably could have retired now. In my opinion neither the people nor the wholesalers, nor myself, have reaped any advantages because these merchants have come and gone."

The speaker urged the formation of county associations of merchants. "I have no fault to find with the wholesale merchants; they probably have treated me as fairly as anyone else, but when they decide to do anything they dictate to us, and we must accept their terms."

Merchants' Catalogues.

R. D. Cameron, of Lucknow, introduced a discussion on the methods of a certain merchants' agency. This company sold catalogues to retailers illustrating and quoting prices on dry goods, furniture, watches and hardware, the retailers in turn to hand these catalogues to their customers. Customers could then order goods from the catalogue from the retailer. The latter passes the order on to the agency, and the agency to the manufacturer, who sends the goods direct to the consumer, thus elim-

TO CONSIDER MAIL ORDER TAX.

On motion of Levi Wildfang, of Elmwood, Ont., the following important resolution was carried:—"That it be an instruction from this convention that the information be secured from the retail merchants throughout Ontario as to whether they are favorable to have a special tax placed on large mail order catalogue houses, and that the money so secured, through taxation, would be paid into the various municipalities from which it is taken."

inating entirely the wholesaler. Each merchant who desires to become connected with the system pays $30. Mr. Cameron did not believe in the propriety of such business. "I would not care," he said, "to take orders for furniture, jewelry or hardware through these catalogues and injure my fellow merchants in those lines." He was informed that the concern could not operate in any place 2,000 or over, as the manufacturers who signed up with it would not allow it to do so.

On motion of Secretary Trowern, the matter was referred to the executive to be taken up with the wholesalers.

Day Dreams of Agitators.

In his annual report, Secretary Trowern referred to the continued "high cost of living" agitation and to the ignorance displayed by those who believed the cure was tied up in housewife's leagues, co-operative buying, and retail markets. "Nothing but day dreams," he termed them. It was something the association had to remedy.

He dealt with the success that had met the efforts of the association in formulating the credit reporting system. This was doing splendid work. He explained that last Fall it was found that $4 of the $5 fee sent to the head office by members was found insufficient to cover the work of the association, including the credit reporting system. It meant, he said, that either the per capita tax had to be retained or the system would have to be discontinued, and the former course was decided upon.

During the year he had visited the Canadian West, and while there got the associations in the four western provinces affiliated with the Retail Merchants' Association of Canada.

Treasurer N. C. Cameron then read his report, and after considerable discussion, it was referred to a committee of three—J. A. McCrea, of Guelph, and J. S. Vancamp and J. Bartram, of Toronto, who will form a financial committee for 1915. This committee will receive a report from the treasurer at least ten days before next annual meeting.

Wholesale Grocer Heard.

The last item on the programme was a conference with the wholesale trade, represented by Hugh Blain, of Eby, Blain, Limited, Toronto. After discussing the matter of the merchants' agency catalogue, which was again explained by Mr. Cameron, Mr. Blain dealt with the relations between wholesaler and retailer and with the problem of the high cost of living.

"Anything that cuts off the retailer," he said, "injures the wholesaler, and, while the opposite may not be true in every case, it is a fact that the wholesalers are necessary in a great many instances." He referred to the impossibility of the retailers—the average retailer—getting teas from Japan, Ceylon, etc., and dried fruits from California. "So that," he added, "anything that has a tendency to cut out the one has a tendency to cut out the other. We are the established channels of trade, and while it may be possible for the producer of vegetables and fruits and a few other things going direct to the consumer where they are close to one another, yet it is not in others.

"If parcel post is going to be adopted generally by the Government, and if the Government is going to carry goods at less than cost, it will create a very serious condition of affairs. If it is going to be run at a loss to the country, it will be ruinous to the retail trade, because of the advantage that is being and will be taken of it by the mail order houses. What are you retailers doing? Remember the daily press is entirely against you."

The cause of the high cost of living, Mr. Blain contended, was the present high standard of living. If the people want the trade to give good service, operate spotless stores with the most modern fixtures, they must bear the burden. "In the final analysis," he declared, "the consumer has got to pay for these things."

G. W. Cheney, a Sarnia grocer; F. C. Higgins, of Toronto, and R. D. Cameron, of Lucknow, commented favorably upon Mr. Blain's remarks, and after votes of thanks were passed around, the fifteenth annual convention of the R.M.A. of Ontario was brought to a close by the new president, B. W. Ziemann.

THE PEDLAR DISCUSSED.

The pedlar question is always one that brings the merchant to his feet. There is so much unfairness being practised by certain municipalities in allowing pedlars and transients for a mere nominal license to take the cream of the trade, that the retailer is justified in what he may say or do to increase the license. The resolution submitted to the convention on this question read as follows:—

"That we consider it would be in the best interests of the retail merchants of this Province, who pay municipal taxes and business taxes, as well as maintain other expenses in connection with the retail sale of merchandise, that a Provincial Pedlars' License be charged to all pedlars, and that a portion of the said license be remitted to each municipality, and that any person who is found making false statements, or deceiving the public, should have his license cancelled."

It was pointed out that each municipality now charges a license on pedlars operating within its limits. It was also shown that municipalities can charge whatever they wish under a certain limit.

T. B. Cramp, of Orillia, did not think provincial power should be extended to pedlars and moved, seconded by Eric Jamieson, of Hamilton, that the resolution be not adopted.

Daniel Bohlander, of Waterloo, complained that farmers should also pay a license when they peddle from house to house. "When municipalities put up a $20,000 market to house them, they should go there," he declared.

Mr. Trowern agreed with the sentiments expressed by Mr. Bohlander, stating that in Toronto pedlars dress up as farmers—some of them even bring their wives along—to help make their prospective customers believe they are from the farm and peddle from door to door.

B. W. Ziemann, of Preston, contended that the government should put the law governing pedlars, transient traders, hawkers, etc., into such English that any magistrate in the country could interpret it. As it stands to-day it is too ambiguous. Discussing it as he understood it, he said that a pedlar who took out a county license in Waterloo cannot use it in Berlin or Preston.

"Why should a man," he asked, "who makes an article or raises it be allowed to peddle from house to house free, when we have to pay a business tax? Why should he be given special privileges?"

Mr. Bohlander later made a resolution to approach the government to give municipalities the privilege of placing manufacturers and farmers in the same position, but some of the members, while admitting its fairness, considered it would be difficult to do this in face of the present high cost of living talk, and finally both resolutions were rejected.

A Letter from Secretary Tobin

More Light on Misunderstanding Regarding Hotel Rates at Recent Ottawa Exhibition and Convention—Charges not According to Schedule Will be Adjusted.

Editor,
Hardware and Metal,
Toronto.

The notice published on page 59, February 28th issue of "Hardware and Metal" explains the situation fairly well in regard to this somewhat famous misunderstanding.

The circular issued by the Canadian Hardware Manufacturers Exhibitors' Association which Mr. Caslor quotes is correct, and all charges not according to that schedule will be adjusted to agree with those terms.

I do not agree with Mr. Caslor that all claims should be paid for. I am aware of some claims that were made, that were not correct, and in some instances, the claimants admitted that they were in error when the conditions outlined in the circular were explained to them, and in more than one instance claims were allowed and paid by me when the claim was not right. In one instance, three visitors who were not satisfied, were refunded the $15.00 paid for their mileage books, and full amount of their hotel bill was paid for them, so that up to date of their complaint, their accommodation cost them nothing.

I am also informed that some of the guests claimed accommodation, $5.00 for five days, plus 50c for bath, or a total of $5.50 for the five days.

The Canadian Hardware Mfrs. Exhibitors are following up this matter carefully. Each case will be given proper care and attention. The Grand Trunk Railway are interested in having the guests of the hotel properly taken care of, and no one approves of a system or lack of it that caused the trouble.

The claims that are not according to the printed circular issued by the Can. Hdw. Mfrs. Association, should not be made; they do not assist anyone. Two important points must be considered: First, all reservations called for five days, and any less time cost the same. Second, the maximum capacity of the room must be considered, not the ordinary capacity, but a capacity such as convention crowds always must expect, and where parties limited the number they wanted in a room (and in a great many instances they did in making their reservations), the charge for the full capacity should be paid by the occupants.

One point that seemed difficult to understand by the visitors was, where a man and wife reserved a room, that the room so engaged would accommodate three persons or more, and that the capacity of the room was its proper rated price.

On Thursday, February 18th, the manager of the Chateau Laurier assured Mr. Bittues and the writer that notwithstanding the printed cards placed in the rooms, that occupants would not be requested to pay more than the special rates agreed upon for this Convention, and where this has not been done, it will be my duty and pleasure to adjust the claim.

Yours truly,
F. M. TOBIN,
Sec'y.-Treas.
Can. Hdw. Mfrs. Exhibitors.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of "Hardware and Metal" of March 10, 1894:—

"Otton Bros., dealers in stoves, house furnishings, steamfitters, etc., dissolved partnership March 1, H. H. Otton retiring. J. A. Otton will continue the business. Otton Bros. were in business 17 years at the time of the dissolution."

Editor's Note.—The business is now running under the name of H. H. Otton & Son. Fred Otton is manager and buyer for the firm.

"James Arthurs, of Commanda, was in the city last week."

Editor's Note.—Jas. Arthurs, M.P., is now in the hardware business at Powassan, Ont.

Dumb Waiters, Etc.

Sedgewick Machine Works, 128 Liberty St., New York, have just issued Catalogue L., consisting of 52 pages, illustrative and descriptive of their line of dumb waiters, elevators, etc.

RESOLUTIONS OF C. H. M. E. A.

The following resolutions were passed at the last meeting of the Canadian Hardware Manufacturers' Exhibitors Association held at Ottawa:

Resolution No. 1:—The Canadian Hardware Manufacturers' Exhibitors wish to express herewith a hearty vote of thanks to the following firms:—

Kir-Ben Co., Ltd., Almonte, Ont.;
Butterworth Foundry Co., Ottawa, Ont.;
Clare Bros., Preston, Ont.;
Jas. Smart Mfg. Co., Ltd., Brockville;
Jas. Stewart Mfg. Co., Ltd., Woodstock;
Can. Heating & Ventilating Company, Ltd., Owen Sound;
Gurney Foundry Co., Toronto;
McClary Mfg. Co., London, Ont.;
Hall-Zryd Foundry Co., Hespeler, Ont.;

for their courtesy in installing the efficient heating system which greatly assisted in making the Convention such a success. Their labors are doubly appreciated, because of the Association knowing of the difficulties encountered and work performed in the installation.

Resolution No. 2:—To the Lady Convenors of the Ladies' Committee of Ottawa:

The President, Officers and Members of the Canadian Hardware Manufacturers' Exhibitors express herewith a very hearty vote of thanks to the lady Convenors and their Committees for the work performed and courtesies extended to the Convention delegates en bloc during the week just past.

Resolution No. 3:—Mr. Mulligan, Russell House, Ottawa. It is the sense of the resolution Committee that the courtesies extended and the tolerance meted out on the part of Mr. Mulligan of the Russell House be acknowledged herewith, and a copy of the resolution forwarded to him.

Resolution No. 4:—Resolution to Mr. H. G. Elliott, General Passenger Agent, and Ottawa Staff of Grand Trunk System. The Canadian Hardware Manufacturers' Exhibitors wish to express herewith a hearty vote of thanks to the officials representing the Grand Trunk System for the able manner in which the necessities of travel to and from the Canadian Hardware Manufacturers' Exhibitors Convention have been handled without a dissenting voice or complaint from any of the visiting delegates.

Sgd.—M. R. Griffiths, A. A. Bittues, Resolution Committee, Canadian Hardware Manufacturers' Exhibitors.

A Prize Essay on

At Store Banquet

"How a Salesman Can Be Most Valuable to Customer and Store"

Salesman Should Study Goods—He Should Look Well-Dressed—Wait Promptly on Customers—Work in Harmony and Make Suggestions—Knowledge, Judgment and Enthusiasm.

AT a banquet of a men's furnishing store in Cleveland, O., Browning, King & Co.'s, an innovation on the programme was a prize essay competition on the subject, "How a Salesman Can Be Most Valuable to Customer and Store." The one adjudged the best was by T. J. Wise, and is a level-headed view of a salesman's attitude, and well worked out.

"A salesman should make it a point to be loyal to the store he works for; he must act and show it in every way, not only in the store, but outside of business hours as well. Always praise the firm, their merchandise—and by so doing you will boost their business and your own. Always make yourself have confidence in the store's merchandise. In some instances the store may receive goods that in your opinion do not come up to the standard you think they should carry, but don't criticize and run down the goods, as it has a bad effect on your fellow salesman and also makes you lose confidence in the goods yourself. Show your loyalty to the store by working hard to sell the hard numbers. It is impossible for any store to always buy the goods that are easy sellers, and we should all put forth an extra effort to dispose of the hard-to-sell merchandise. Do not forget the fact that we salesmen are paid to sell the firm's merchandise, not to criticize it.

"The salesman should also make a study of the goods he sells, he should acquire a thorough knowledge of same, so that he can answer intelligently any question a customer might ask in regard to them. In so doing the customer will gain confidence in the salesman, which is half the sale, and it will bring him back again.

"A salesman should always make it a point to put up a good appearance, especially if he works in a clothing store; I don't mean that a salesman should go beyond his means in his dress, but he can be careful in selecting his apparel, so that he looks well-dressed. He can advertise the firm's goods more than he realizes himself. People who know you are connected with a clothing establishment are quick to observe any new garment you wear, and also note the cut and style of your clothing, hats and furnishings, so let us all be careful in our dress, and make as good an appearance as possible.

"How can a salesman best serve the customer to show the best results? In my opinion, this is the vital point in the success of any retail business. The salesmen can make a great showing if they will only pull together, and make it a point to be pleasant and courteous to every customer they meet; make them feel at home in your store, impress them with the fact that it is a pleasure to wait on them.

Bringing Customers Back.

"I can recall quite a number of instances where customers have come back to our store and bought from us because of the proper treatment we gave them. We can also well serve the store and the customer if we all are on the alert to approach customers and see that they are promptly waited on, whether it be in our own department or not. If the customer should want to purchase something in some other department than your own, and all the salesmen are busy, step in and show him goods, until you can turn him over to someone. It is impossible for the floorwalker to approach every customer who enters the store, and we can assist him very much if we all make it a point to meet customers and see that they are served. Let us have people who come into our store say it is a pleasure to trade with Browning, King & Co., because the salesmen are so prompt and courteous.

Deliver When Promised.

"I also think a salesman can well serve the customer and the house if he makes a note of what time the customer he waits on wants his purchase delivered; go to the tailor shop or bundle counter and impress on those two departments that they must get the goods out when promised. The salesman should get the customer to give the tailor as long a time as possible to make the alteration on his suit or overcoat; in so doing you help the tailor, and the customer is not so often disappointed in the delivery.

"A salesman can increase his sales wonderfully, and also the sales of other departments, if, after making a sale, he will suggest other goods to the customer. If a customer asks for a certain article or make of goods which you do not have in your stock don't let him get away; suggest to him that we do not carry the line of goods he asked for, but we have something just as good, and show him the article at the same time. In this way many a sale can be saved.

No Petty Jealousies.

"The salesmen of any store should always try to be on friendly terms with each other. Do away with the petty jealousies that come up in business; be honest and on the square with one another at all times. Never start an argument in front of a customer; it makes a bad impression.

"The salesman should always see that his stock is kept clean and in good order. It always creates a good impression with the customer if you can lay your hand quickly on the garment you want. A salesman should always work in harmony with the head of his department; help him in every way by making suggestions for the betterment of the de- your store if you all work together. As I write this essay a great many things come up in my mind which apply to this subject, but will close now by making a suggestion. No doubt there will be many good things said here to-night, so let us all profit by what we hear, and practice what we preach; by so doing we will well serve the customer and also the store."

The second in a lengthy list of those judged worthy of a prize was by D. N. Jerauld, scarcely as practical or definite but still full of good ideas. He divided the subject of the value to the customer into three headings, Knowledge, Judgment and Enthusiasm.

The Risk of Bluffing.

"If ever 'knowledge is power' it is to the salesman who knows his line, and this is one of the prime essentials in dealing with a customer. A lack of

*Abstract of Paper, Institution of Mechanical Engineers.

such knowledge reveals itself in a weak uncertainty on the part of the salesman, which has lost many a sale, and if he endeavors to hide it under a bluff he runs a chance of being discovered by a critical public.

"Second to a knowledge of his line, a salesman should try to acquire a fund of general information that can be used incidentally. Nothing so impresses a customer as to have a salesman able to converse intelligently on any subject that comes up.

"Judgment.—If knowledge is power, then judgment is the right use of that power. We often hear of a salesman who is resourceful, tactful and diplomatic, which really means that he uses good judgment. He uses it in handling his customers and catering to their whims. He does not forget that it is up to him to extract the almighty dollar from them with the least possible pain. He creates a favorable impression by being cheerful, polite, and, above all, having an obliging manner. Antagonism melts before a smile. The old motto of the photographer, 'look pleasant, please,' has sold many a customer. He encourages his customer to have implicit confidence in him and his goods. To do this he is honorable in his dealings, positive in his statements relative to the goods he is selling. He avoids arguments, if possible, and exercises self-control in meeting the insults of customers, realizing that the ability to do these are a salesman's great assets.

'Ginger' of a Sale.

"Enthusiasm. — Enthusiasm has accomplished practically all the greatest undertakings of the world. The part it plays between salesman and customer is paramount. It multiplies the salesman's power and raises his ability to the highest point of efficiency. Enthusiasm is the 'ginger' of a sale; without it the efforts of the salesman are flat and tasteless, and the customer remains unimpressed. Goods enthusiastically presented are half sold.

"If we are enthusiastic in our work and over our goods the customer will catch the fever. We will repeat our division of qualities a salesman should possess to be of most value to a customer: Knowledge, Judgment and Enthusiasm. But the greatest of these is Enthusiasm; it is the keynote of the salesman's success.

"The second phase of our subject, namely, 'How Can the Salesman Be Most Valuable to the Store?' is in a large measure included in his value to the customer, for the one reacts to the good of the other. But there are perhaps a few points which I might suggest as having a more definite relation between the salesman and the store.

First Impressions.

"First—The salesman is under more obligation to the customer than the customer is to him. He should appreciate his customer and be on the alert to make as many as possible on the outside, by always having a good word for the store.

"Second—Nothing creates in the customer a desire to buy like stepping into a well-ordered and attractive department —well-kept stock, clean cases, including, of course, well-groomed clerks. 'First impressions are lasting impressions.'

"Third—The salesman should never forget to be watchful of his conduct, for customers are inclined to form from him their opinions of the house and visit upon it all his short-comings.

"Fourth— Be ever mindful of suggesting goods in other departments; a valuable salesman will always do this. Last, but not least, let the relation between salesman and management be most cordial, and that does not necessarily mean intimacy. Then let there be perfect co-operation on the part of the entire working force, and we challenge you to find a more ideal condition in any store in the country. In the common vernacular of the day, 'Can you beat it?' "

FOR THE SALESMAN.

Be loyal by working hard to sell the hard numbers.
Acquire a thorough knowledge of the goods.
Look well-dressed.
Be pleasant and courteous to every customer.
See that delivery is on time.
Avoid petty jealousies in your department.

MAKING RAPID PROGRESS.

Work is rapidly progressing on the Frothingham & Workman Building, which was recently damaged by fire. Repairs to the main building, which was uninjured except by water, are now practically completed, while the rebuilding of the warehouse in the rear is fast progressing, the roof being already about half finished.

MONTREAL CLERKS ORGANIZE.

The retail clerks from the hardware dry goods and grocery trades have decided to organize a protective association, affiliated with the Retail Clerks' International Protective Association.

PAINT CO. INCORPORATED.

The Wearwell Paint & Varnish Co., Ltd., head office St. Lambert, Que., capitalized at $25,000, has been incorporated to make, manufacture, and deal in all kinds of paints, varnishes, color, etc.

PRESIDENT DESCHAMPS' SPEECH.

The following speech was delivered by David Deschamps, the president of the Hardware section of the Quebec Retail Merchants' Association at the Ottawa convention.

"To the chairman, officers and members of the Canadian Hardware & Stove Dealers' Association of the Province of Ontario, on behalf of the members of the Hardware Section, Montreal branch, of the Retail Merchants' Association of Canada.

It offers me very much pleasure indeed to be here with you upon this occasion, so as to convey the greetings and our best wishes of success and prosperity to our fellow merchants of the Province of Ontario.

I wish to congratulate you particularly upon the success of this gathering. The large number of retail hardware merchants who have left their business to meet in Ottawa and discuss amongst themselves the various questions which mean so much to each and every one of them, shows that there is a feeling in the hardware trade that certain things need to be adjusted. This meeting seems to me to be unique in its kind, as you have the good fortune to have with you a large number of the best hardware manufacturers of Canada, who have installed an exhibition which stands out as the largest exhibition of this kind that has ever been organized on this Continent.

If I am well informed, I understand that wholesale hardware merchants of Canada who are meeting to-day in Montreal will also be with you in a body this evening. These facts demonstrate more than I could do by words the spirit of co-operation which exists between the manufacturers, wholesalers and retailers of Canada. This spirit of co-operation between these different interests is the result of organization, and should convince every one of you that the remedy to certain difficulties which exist in trade is to be found exclusively from organization.

Your Association has done in the past very good work and more of it is expected from it.

On behalf of the hardware merchants of the Province of Quebec, I wish to assure you that at all times, we will be only too pleased to co-operate with you to promote this spirit of co-operation between manufacturers, wholesalers and retailers. We believe in that principle, and we are willing to share the responsibility of fostering the same amongst all those concerned.

You, undoubtedly, Mr. Chairman, have many questions to take up, and I do not intend to take more of your valuable time, and I will, therefore close these remarks by wishing every success to this meeting, and every prosperity to your members."

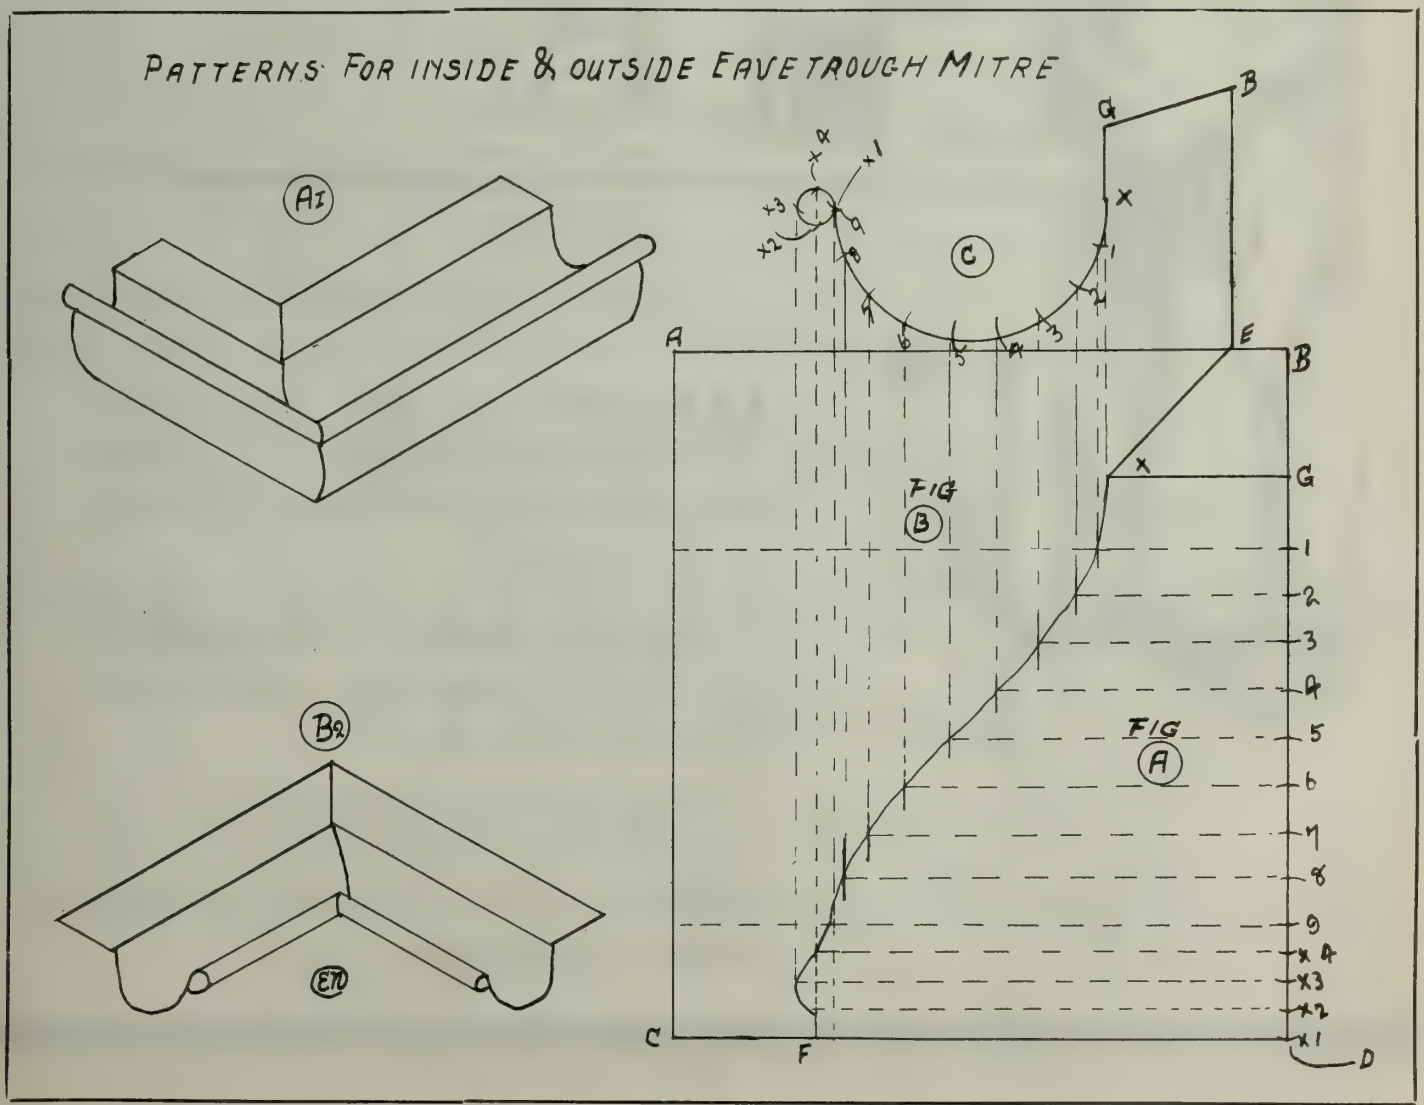
Problems For Sheet Metal Workers

EDITOR Hardware and Metal.—I have read with great interest your articles on the developing of tinshop patterns. Could you please show how to develop a pattern for a square mitre of an eavetrough.

Yours truly,
Inquirer.

Complying with inquirer's request we herewith show the proper way to develop eavetrough or gutter patterns, while our inquirer did not state in his request whether it was an inside or outside mitre pattern he required, we herewith show how both may be developed.

In Fig. A1 is shown a perspective view of an outside mitre. In Fig. B2 will be seen the perspective of an outside mitre.



We will now proceed with the developing of the pattern. First draw an elevation plan and size of eavetrough required as shown in Fig. C. It may be here stated that while the trough we are showing is a simple half round one, it does not matter what style or size is required, the same method is adopted.

When plan as shown in Fig. C. has been drawn erect vertical line B.D. being the total length of material required, then draw horizontal lines A, B, C, D, these being long enough to make the two pieces of the mitre if new material off large pieces is being used up, but if small pieces are to be used any size large enough.

Having drawn lines A, B, C, D, forming almost a square as shown, proceed by spacing off pattern as shown in Fig. C., viz:—B, G, x 1, 2, 3, 4, 5, 6, 7, 8, 9, x1, x2, x3 x4. These spaces being necessary to form the stretchout, transfer these spaces to vertical line B, D, as shown, then erect lines as shown from x, 1, 2, 3, etc., in Fig. C. Next draw horizontal lines, G, x, 1, 2, 3, 4, 5, etc., so as to intersect the various vertical lines of the same numbers. Then draw line as shown where these vertical and horizontal lines meet or intersect as shown this being the pattern. The portion marked Fig. A being pattern for outside pattern as shown in plan AI. If the eavetrough happens to be one of the same style as shown, viz., a true half circle, the portion marked Fig. B will be pattern.

Before concluding this answer to inquirer let us here mention that in a shop where a large amount of eavetrough work is done, a great deal of scrap may be used up in making these mitres, and the work is interesting to the apprentices.

It is of course well known that these mitres can be bought very cheap, but we must consider that the time on such jobs is well spent and to the lad in the shop learning his trade, the employer has a duty to perform. He will reap a greater benefit in the end than the actual cash value saved in buying these ready made.

GLIDDEN'S

"GREEN LABEL" VARNISHES

There is
Quality
in Every
Drop

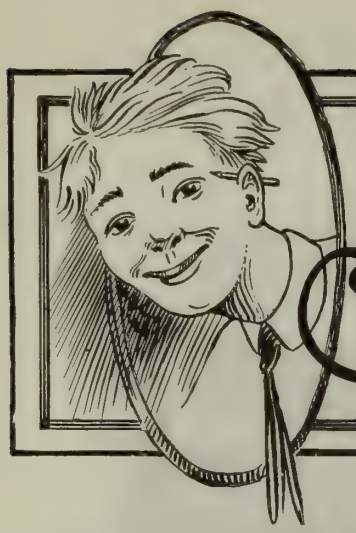
WHEN you sell Glidden's "Green Label" Varnishes you make a permanent friend of the buyer.

"Green Label" Varnishes are always uniform, standard, dependable.

They dry with a hard, smooth surface, like glass, but never brittle; tough as rubber, but never gummy.

Over 50% of the piano output of America is finished with varnish made by GLIDDEN. The very name is synonymous with Quality — Excellence — PERMANENCE.

We have a mighty interesting proposition to offer you in connection with Glidden's "Green Label" Varnishes, White Enamels, Endurance (Mission) Wood Stains, Waterproof Flat Wall Finishes, Cement Coatings, and JAP-A-LAC.



This proposition is worth while investigating. Write TO-DAY for full particulars.

THE GLIDDEN VARNISH CO., Limited

TORONTO, CANADA

Factories: Toronto, Canada
Cleveland, Ohio

Branches: London, New York, Chicago

THE JUNIOR CLERK'S PAGE

A SALESMANSHIP TALK.

By Herbert N. Casson.

In good salesmanship there is always a great deal of action.

The man who is selling goods should not stand transfixed like a dummy, moving nothing but his tongue. He should act. He should show by actual demonstration exactly how good and superior is the article which he is trying to sell.

Whether a salesman is behind the counter or on the road, he should always, whenever possible, show the article which he is trying to sell. If it is impossible to show the article, he should show some part of it or some picture of it. Words, you must remember, are only third best. The article itself comes first, a picture or part of the article comes second, and talk about the article comes third.

Why does the street faker attract so many busy people? Simply because every street faker always has something in his hand, is always in action, and is always demonstrating the remarkable virtues and values of the knick-knack he is trying to sell.

Action in salesmanship dramatizes the whole performance. It stages the operation of selling. Every good salesman has a great deal of dramatic instinct. He knows how to present an article. He knows how to throw scenery around it. He knows how to bring out in a striking way the best points of his goods.

Even if a clerk does not know enough about an article to show it off to advantage, he can do one thing at least—he can keep it moving. It is a curious psychological fact that any article which is being moved about and held up in various ways looks much more attractive than the same article lying by itself on the counter.

The eye loves motion.—Standard Oil Bulletin.

"TOO BUSY TO READ."

He is a familiar type—the fussy, fretful man who imagines that he is about the busiest fellow in town. He often dumps in the waste-basket, unwrapped, copies of business or technical magazines that contain valuable articles bearing directly on his problems. He fondly believes that he is too busy practising to bother with what others are "preaching."

The trouble with this type of man is that he has not learned that the real executive is the man who so plans his work as to leave a reasonable amount of time for reading and planning.

There are shoals and breakers ahead when the accumulation of new ideas ceases.

The man who declares he has no time to read is unconsciously advertising his small caliber, his slavery to detail, his arrested development.—Printer's Ink.

REMARKS OF THE JUNIOR CLERK.

Man has always had a tendency to go up in the air.

* * *

A reformer never believes in himself as much as he wants others to believe in him.

* * *

Some men try to hide their light under a bushel, while others make a fireworks display.

* * *

If we were permitted to choose our neighbors, they would probably turn out just as unsatisfactory.

* * *

Some people believe in keeping their troubles dark, while others make light of them.

* * *

A Kingston newspaper publishes a letter from a lady who believes the end of the world will come next year. We hope not. A lot of things we are interested in are just beginning.

A MAIL ORDER CUSTOMER.

The following letter was recently received by a prominent Montreal wholesale hardware firm from a party residing in an Ontario town:—

Dear Friend,—I wrote to see if you have one of them No. 220, 20-gauge shot guns at 5.33. If you have I would like one. My mother died shortly and I was asked if I would like one. I get 50c. and 75c. every $1.00. Saturday night I help my father in the barber shop and he pays me that sum. I wanted to know if you would accept from 75c. to $1.00 per week the way I get it for I would not keep it any other way my father and I was thinking this out. I think it is a good plan and I will be thankful to you if you would do that for after I get the gun all paid for I will buy some empty shells and a loading outfit from you you will not be sorry for it I betch you. For you are the first one I wrote to you on that account that everything catologued was in good order and lowly priced. There are another man in town wants a 16 or 20-gauge shot gun and he is waiting to see mine first his name is Ma. claren a boot fixer he is paralysed in his legs and is a good byer and if you dont think I am honest why ask him so. you will make money by us two any way for I wont wonder but if gun satisfies him he will get a loading outfit also so good bye for now write soon and let me know I will send money as soon as you write.

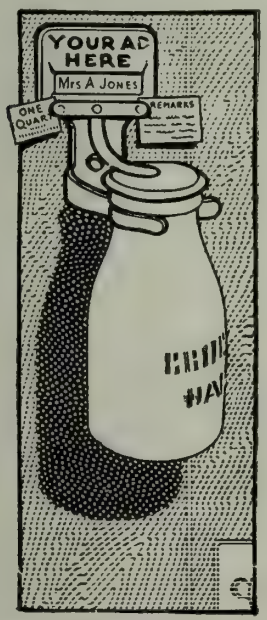
Yours truly,

_____

This is the strenuous business day. The old-time campaigners must now sit back and watch the younger men win the battles. The way to get business is to go after it. The whole world admires a fighter. We can't help admiring even a man whose cause may not be the best, but who stands up like a warrior, faces the issue that confronts him, and fights with boldness and courage until he conquers.—W. H. Cottingham.

New Goods Offered Canadian Hardwaremen

MILK BOTTLE HOLDER AND COVER.



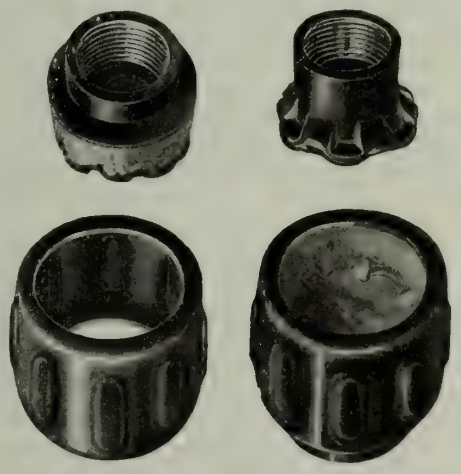
The Pull Easy Mfg. Co., Waukesha, Wis., are offering the trade the Sanitary Milk Bottle Holder and the Sanitary Milk Bottle Cover here illustrated.

The milk bottle holder can be fastened to the door casing at any height desired. It is made of sherardized, rust-proof steel. It is claimed that the spring steel neck clasp is capable of sustaining four times the weight of a quart bottle of milk. A cap completely covers the top of the bottle protecting it from rain and flies.

No. 2—Milk Bottle Cover—Open.

A double clip provides place for the milk tickets and any message for the milkman. There is also a panel for the name of the owner.

No. 1—Milk Bottle Holder.



The milk bottle cover is claimed to provide a safeguard for every bottle of cream or milk. The cap is made of aluminum. As soon as the milk is brought in, the pasteboard cap is dug out and the aluminum cap is slipped on. When the bottle is tilted the cap instantly falls open allowing the milk to flow out without touching any part of the cap. When set upright again, the cover closes down snugly over the bottle mouth. It is claimed that the inverted top fits any bottle closely, making it practically air tight.

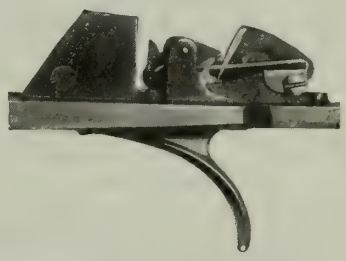
DRAWN STEEL PIPE INSULATORS.

The Wirt Company, Germantown, Pa., has produced a line of joints in which drawn steel is used exclusively. These insulating pipe couplings, called in the fixture trade "insulating joints," were originally made of cast iron or brass, afterwards of malleable iron.

The new electrical wiring rules of the underwriters specify that insulating joints used on electric or combination fixtures should have double insulation and should stand a test at either end of 4,000 volts, alternating current, for five minutes. The joints described herewith comply, the company claims, with these requirements, and are manufactured under the supervision of the Underwriters' Laboratories.

DRAWN STEEL PIPE INSULATORS.

The cut on the upper right-hand side shows a drawn steel thimble consisting of a threaded cap with a "pie-crust" fluted flange.



The cut on the lower left-hand side represents a drawn steel shell, inwardly flanged and corrugated to give a grip on pipe-tongs, or wrench.

The upper left-hand cut and the lower right-hand cut show the parts after completion, as broken in the testing machine, these specimens having pulled apart by shearing the insulation. ⅜-inch pipe size carried under this test up to 8,000 pounds on a straight pull.

The insulation is of the nature of artificial stone, molded in place and subsequently hardened, and has been named "Di-el-ite." This is one of the special products of the Wirt Company.

KAUTZKY SINGLE TRIGGER.

The A. H. Fox Gun Co., Philadelphia, Pa., announce that they have acquired the exclusive control of the patents for the Kautzky single trigger here illustrated and which they claim has been successfully applied to double barrelled shot guns.

No. 4—Kautzky Single Trigger.

The working parts of the trigger are said to be few in number and substantially designed.

Recently Mr. Kautzky has invented an improvement in his sear block which renders his single trigger positive against doubling.

It is now mechanically prevented from doing so, no matter how the shooter may handle his trigger. Attention has been given to the correct adjustment of the trigger, the correct amount of release between the first and second barrels and its special adaptation to the Fox action. It is, of course, absolutely selective both for first and second shot. It has the further advantage of returning to the original barrel without attention from the shooter in cases where only one barrel is fired and the gun then reloaded.

The Fox Company announce that they can equip all Fox guns new or old with the new trigger.

MILLER-MORSE BONSPIEL.

The second annual Bonspiel of Miller-Morse Hardware Co., Ltd., was run off last week, and many interesting and well contested games were pulled off. The four handsome silver cups presented by the firm were won by Mac. Irwin's rink, composed of H. Kellett, J. J. Corbett, Edmund Wildgoose and W. N. Irwin, skip.

The results throughout the spiel were as follows:

1st. Round:—Lawrence 13, Williams 6; Irwin 14, Glover 4; McCaig 9, Gordon 5; Blackwood, 13, Craig 12.

2nd. Round:—Irwin 18, Lawrence 10; Blackwood 8, McCaig, 7; Cookson 11, Cordingley, 7.

Finals:—Irwin 18, Blackwood 3; Irwin 12, Cookson 5.

Current News of the Hardware Trade

Fire Losses.

Okotoks, Alta.—The Okotoks Hardware Co. suffered severe loss by fire.

New Firms.

Melfort, Sask.—Sydney Smart is opening a new hardware store here.

Medicine Hat.—McClelland & Mathews, tinsmiths and plumbers, have started business.

Personals.

O. B. Mueller, of the Mueller Mfg. Co., Sarnia, has been elected president of the Board of Trade.

R. J. McAlpine, of St. Mary's, has taken a position as traveling representative of David Maxwell & Sons, west of London.

Bert Connor, who for the past seventeen years has been connected with M. W. Connor & Son, hardware merchants, Madoc, Ont., severed his connection with the firm, March 1. In future he will devote his time to the insurance business.

Business Changes.

Toronto, Ont.—T. J. McBride, hardware merchant, has sold out.

Hamilton, Ont.—Skedden Brush Co. have sold out to P. E. Garson.

Windsor, Ont.—Poulter Hardware Co. have been succeeded by Ripley Peck Hardware Co.

New Glasgow, N.S.—A. McPherson & Sons' foundry have been succeeded by New Glasgow Foundry and Machine Co.

Port Cornwall, Alta.—Mr. Rogers, of Rogers, Pope & Wilson, hardware merchants, is severing his connection with the firm.

Enderby, B.C.—G. H. Murrin has taken over the business of the Fulton Hardware Co. Mr. Murrin was formerly manager of the hardware business of W. R. Megaw, Vernon, B.C.

Will Enlarge Factory.

Stratford, Ont.— On account of the passing of a by-law last week, the Stratford Mfg. Co. will go ahead with the plans for the enlargement of their plant.

Death of N. J. Clinton.

Windsor, Ont.—The death occurred in a Detroit hospital of Ald. N. J. Clinton, of this city. The deceased was formerly a partner in the hardware firm of Neveux, Clinton & Baxter.

Death of W. B. Shannon.

The death took place recently at Viscount, Sask., of W. B. Shannon, hardware merchant. The body was taken to Tara, Ont., for interment. Mr. Shannon was one of the pioneers of Viscount, and was prominent in business and social circles.

Death of J. G. Insole.

The death occurred on February 28 of Jas. G. Insole, Hamilton, Ont. The deceased at the time of his death was secretary of the Canadian Stove Manufacturers' Association. He had been connected with the hardware business for many years and was one of the oldest members of the Commercial Travelers' Association.

The late Mr. Insole was born at Mosely, England, and at the time of his death was 69 years of age.

Winnipeg Notes.

Harry Pringle, permanent representative in Saskatoon, of the G. F. Stephens & Co., Winnipeg, is in town, and will remain for some time.

W. B. Shannon, hardware merchant, Viscount, Sask., died on Feb. 17.

Macklin, Sask.—A. A. Graham, has bought out A. F. Fetherstonhaugh.

The Miller-Morse Hardware Co., Ltd., Winnipeg, report that C. H. Read, late of Regina, has joined their sales force, and will solicit business for the company over the Manitoba-North-western, Kirkella branch, Grand Trunk Pacific, Saltcoats to Viscount, Viscount to Strassburg, Rivers to Watrous.

P. B. Buchanan is starting out over the entire Western territory, including Manitoba, Saskatchewan, and Alberta, with a specialty line of builders' hardware and cutlery. "Buck," as he is familiarly known to the boys, represents the Miller-Morse Hardware Co., Ltd., of Winnipeg.

The Miller-Morse bonspiel is narrowing down to the finals. This sporting event has created considerable interest in local curling circles, for a great amount of latent talent has been discovered. The boys have certainly put up the first-class article, keeping the competition very keen throughout.

C. H. Prest, late of Kelliher, Sask., has joined the staff of Miller-Morse Hardware Co., Limited, Winnipeg, as a special representative.

Personals.

The following representatives were calling on the Montreal Hardware trade during the week:

R. F. Way, The Armstrong Mfg. Co., Bridgeport, Conn.; W. F. Brockman, Wittl Manufacturing Co., Chicago, Ill.; Douglas Clarke, Rome Manufacturing Co., Rome, N.Y.; W. Craig, Hahn Brass Company, New Hamburg, Out.; W. N. McNeil, William Vogel & Brother, Brooklyn, N.Y.; John G. O'Brien, Caldwell Manufacturing Co., Rochester, N.Y.

J. B. Allen, representing the firm of Jonathan Crookes and Son, of Sheffield, England, is sailing for Canada on the 14th of this month on a business trip.

W. H. Hamilton, Secretary-Treasurer, Consumers' Cordage Company, Montreal, is in Toronto this week on business.

Fort William, Ont.—The Fife Hardware Co. are now using the new warehouse which they erected here.

Fort William, Ont.—J. L. Wells and J. T. Emerson, of Wells & Emerson, Port Arthur, left recently for Los Angeles, Cal., to spend the winter. They have an orange grove there, with a manager and a full staff of men.

St. John Notes.

St. John, N.B. — The hardware store of Emerson & Fisher in Germain street was entered this week by a thief or thieves and money stolen from the premises. It is believed that some articles of hardware were also taken.

St. John, N.B.—A new electric lighting system has been installed by T. McAvity & Sons, Ltd., in their Water street plant, replacing the old gas light system in use there for so many years. The new system lights the brass shop, foundry, offices, core rooms, pipe shed, cleaning rooms, pattern shop, and stockroom. The generating plant is situated in the power plant of the brass manufactory, and consists of a 20 kilowatt generator driven by 25 horse-power high speed Leonard engine. It is equipped with a large slate switchboard. There are thirty clusters of four lights each, equipped with lamps of 100 watt, besides the various single lights. The new lighting system is much more efficient than the gas equipment, and will no doubt promote greater satisfaction.

Russell C, Chown, of the Chown Hardware, Ltd., Edmonton, has been appointed superintendent of the stores and works department of the city of Edmonton. Mr. Chown is well known among the hardware trade having been for many years at Belleville, Ont., before going West. He is a past president of the Ontario Retail Hardware and Stove Dealers' Association. Mr. Chown was for three years a member of the Belleville City Council.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

During the past week an improvement in business has been reported in the hardware trade. With the breaking up of winter, the demand for certain lines has been stimulated. Booked orders for spring are now being shipped and will gradually increase in volume for some weeks. In the metal markets a fair volume of business is passing, but mostly of a hand-to-mouth variety. It is expected that conditions will show steady improvement from now on. Paint manufacturers are busy and booking in this line has been very heavy. A number of price changes have occurred during the week. The stove trade is seasonably quiet, although there will soon be a good demand for gas ranges.

MONTREAL.

MONTREAL, March 4.—The market this past week has been a little quieter than during the previous week, but business has been very good. There has not been any change in the quotations, but there is a very firm feeling in several lines.

Brushes.

Owing to the Mexican situation the market for rice root is very firm, and manufacturers in the United States have increased their prices in accordance with the advance in root. The local situation is such that it would lead one to think that the future course of all corn brushes is in an upward direction, and, in fact, there are a number of the local dealers who anticipate an increase in the near future. There are quite a number of the retail trade who seem to be aware of this fact, too, as the orders for brushes have started in already, and they are moving out quite freely, particularly the scrub and horse brushes. The price of bristle brushes is quite stiff. There is not much hope held out for any immediate relief in the rice root situation, as conditions in Mexico are far from on the mend, or at least they appear to be at present.

Egg Crates.

In view of the near approach of Easter, also spring weather, and also the fact that hens will start in to lay now that the cold weather has started to disappear, there has been a much better movement during the past week in crates of all sizes, and apparently the demand has started in around the country.

Maple Tools.

All lines are moving out quite well, and the business is on the increase in this particular department. Sap spouts, bits and pails are in great demand all through the province.

Lumbering Tools.

The demand for lumbering tools at present is leaning toward those tools which are used for driving purposes. The demand for axes has now almost come to a close, and the attention which was given that line has now diverted to cant hooks, boot calks and chain.

Spring House-Cleaning Lines.

The retailers throughout the country seem to be getting in line for the spring demand, for such articles as tacks and oil cloth, binding, etc., are moving out freely at present.

There is also a demand for sweeping powders, mops, etc. The dustless mop is certainly receiving quite a portion of the attention, too.

Spring Deliveries.

There is quite a lot of booking going on at present for such lines as freezers, lawn mowers, green wire cloth and lawn tools, including rollers. Most of these goods are being booked for future delivery.

Valves and Fittings.

The demand at present is showing up much better than that of a week ago. Dealers throughout the country seem to be getting ready for the spring business in this line, also the building trade. As usual there will be quite a demand for repair purposes in order to get the engines, etc., working after the winter lay-up.

Builders' Hardware.

Up till the present time there has been very little movement in this line, but local jobbers believe that when the demand does start it will be quite heavy in view of the fact that retailers are not carrying very heavy stocks at present. A good season in this line is expected.

Dry Batteries.

There has been quite a spirited demand during the past week for these, and it appears as if the retailer was preparing for the spring business, which will come greatly from the autoist.

Ladders.

In anticipation of the spring house-cleaning demand there has been quite a movement in ladders, and quite a number are being shipped out at present.

Screws.

Since the additional discount was allowed last week there has been a better demand from all centres, although this has not been extra heavy.

Bolts and Nuts.

At the present time there is little movement in these lines, but the jobbing trade are confident that it will start in the near future.

Polishes.

The movement in this line has been quite heavy during the past week, and dealers are evidently preparing for the spring trade, which should start in during the next couple of weeks.

There is quite a healthy feeling existing at present, and, although the month of January was not quite up to the same period of the previous year, February showed much better figures, and up to date it can be said that the sales this year have shown an increase over those for the same period of one year ago. The month of March has the appearance of being ahead of last year, al-

though it is probably a little early to make any predictions at present. However, if business holds out the way it is at present, there is only one end in view.

As to collections, these are in very good shape at present, and there is no complaints heard locally. Although there are still a few slow accounts on the books, these will be found no matter how prosperous the country is. "Slow but sure" is the way one jobber puts it.

Metals.

In the metal market during the past week there has been little change and prices are much the same as in the previous week.

Tin.

The local situation is unchanged from one week ago, and the same quotations are in effect.

The London market closed steady yesterday. The quotations on that market are £173 5s. for spots and £175 7s. 6d. for futures, which prices show a decline of 10s and 7s 6d respectively from one week ago. The New York market is quoting $38 and $38.20 for spots and futures respectively. Both these markets are reported as being firm, although stocks are said to be accumulating.

Spelter.

Locally the situation has not changed from one week ago, and the same prices are in effect.

The London quotation for this week is £21 7s. 6d., a decrease of 2s. 6d. from one week ago. The New York quotation of $5.30 is showing an increase of 7½ cents. Business is at present rather dull, as the busy season is approaching rapidly and we will then see a heavy movement in this market.

Lead.

The local market is firming up a bit, although there has not been any change in the quotations.

London quotes £19 7s. 6d., which has fallen off 5s. from the quotation of one week ago, but that market is said to be also firming.

New York quotes $3.87½, or an advance of 2½c. That market is also said to be steady, although it is claimed that this is due to manipulation, as the demand from consumers has not been heavy. In fact, it is reported that it has been rather light.

Copper.

The local market is not showing any change from one week ago, and the situation is the same both as regards price and demand.

London quotes £64 2s. 6d. for spots, while £64 12s. 6d. is being asked for futures. The New York quotation is $14.30, which is the same as that of one week ago. It is said that the New York market is taking on a waiting attitude, as both buyers and sellers are following that plan.

Antimony.

There is no change to report in this market, as both the demand and the quotations are the same as those of one week ago.

Iron.

The situation locally is unchanged from one week ago, with the same price in effect, under the same demand, which is light.

The London quotation is the same as that of last week, £2 10s. 4d., and the market is termed quiet, as is also the New York market.

Stove and Heating.

There are some manufacturers who are reporting business as being dull, while others claim that their sales for the present year are in advance of those for the same period of 1913. The gas stove trade has not yet started in, although there is some business passing in this line. About the first of next month will see business at its best for the gas ranges. Local dealers report business as being dull as compared with other months, but this is not unexpected, and, therefore, not a disappointment.

TORONTO.

TORONTO, March 5.—With the gradual breaking up of winter comes a distinct feeling of optimism in the hardware, metal, and paint trade in Toronto. It is true that the volume of business passing for immediate requirements is not large, but nevertheless there is an improvement in conditions. With the advent of March 1st a large number of booked orders began to move. Spring orders for paint, oil, hardware, etc., have been heavy, and indicate that the retail merchants look forward to a good volume of business during the coming spring and summer.

The Metal Markets.

In the metal markets a fair amount of business is passing. It is true that the volume is not large and is from a hand-to-mouth variety, but still there is an improvement, and an authority on matters pertaining to the metal trades states that he believes there will be a steady improvement from now on.

Lead advanced 10 cents per hundred during the week. Copper is unchanged and in good demand. Pig iron, spelter, and tin remain unchanged in price, with fair demand.

Collections are fair, although not as good as desired.

Jobbers Notice Improvement.

Toronto hardware jobbers have experienced a slight improvement in business during the past week. Sorting orders are more numerous. Booked orders for March 1 delivery are being sent out in fairly large numbers, although the bulk of spring goods will be shipped about April 1. Very few price changes have taken place.

Decline in Sash Weights.

Toronto jobbers report a decline in the price of sash weights. Solid weights are now being quoted at $1.50 per 100 lbs. and sections at $2.15 per 100 lbs.

Nails, Screws, Etc.

No change has taken place in the price of wire nails, the ruling price being 2.15 base. Flat, oval, and round head bright screws are still being offered at the reduced prices quoted last week. Present quotations in screws are shown in the accompanying panel.

Quotations in bolts, nuts, etc., are shown in current market quotations.

Cement, Etc.

The demand for cement is rapidly increasing, and with the breaking up of winter will become more pronounced. Toronto quotations are as follows:—Portland cement, $1.55 per barrel f.o.b. cars, and $1.63 per barrel in car lots delivered.

Less than car lots the quotation is $1.85 per barrel delivered.

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Electrotypers' Solder	30c		lb.
Brazing Metal	26c		lb.
Ingot Brass, red	14	to 16c	lb.
Ingot Brass, yellow	13	to 15c	lb.
Wire Solder	27½	to 29½c	lb.
Wiping Solder	25	to 27c	lb.
½ and ½ solder	25	to 27c	lb.
Pattern Aluminum	23	to 24c	lb.
Ingot Aluminum 99% pure	19	to 20c	lb.
Spelter	$5.35	to $5.65	per 100 lbs.
Copper	15¾	to 17¼c	lb.
Tin	41	to 43c	lb.
Lead	$5.65	to $5.85	
Tinkers' Bar Solder	28	to 29c	lb.

The Stove Trade.

Business in the stove line has shown improvement over last week. There is a fair demand for gas ranges, although the demand will be more pronounced a little later on.

One prominent manufacturer whose plant is located in Toronto reports that a large number of orders are being received from the West, and that Vancouver, Calgary, and Winnipeg branches report a nice improvement in business.

Rope and Twine.

Business in rope and twine is seasonably quiet. 1914 quotations on binder twine are still held in abeyance, but will be issued shortly. Rope remains as follows:—

Pure Manila rope	15c.	base
British Manila rope	11c	base
African hemp	11c	base
Sisal	10½c	base
Lath yarn, single	9¾c	lb.
Lath yarn, double	10¼c.	lb.

Cartage Companies.

The cartage companies, which are considered to be the barometers of trade, are doing more business than was expected. The manager of one of the large companies stated that a general increase in business had been experienced, although, as is usual at this time of the year, capacity point had not been attained. "There has been a decided improvement during the past three weeks," said he. "Confidence in the future has been restored, and the end of the month will see the return of normal trade conditions, with a very probable corresponding increase of industrial output during the spring."

The Building Trade.

With the gradual breaking up of winter comes a reawakening of the building trade. Inquiry at the offices of the various big lumbering firms situated in different parts of the city elicited the information that sawmills and planing plants are showing signs of life, while inquiries for prices, etc., are daily increasing in number.

Manufacturers of builders' hardware look forward to a big improvememnt in building operations during the coming building season.

WINNIPEG.

WINNIPEG, March 3.—Business generally has been rather quiet, owing to the fact that so many country dealers have been in town attending the Bonspiel, the winter event which brings them all in. The travelers having nothing to do, turned out to entertain them. It is hoped now that finer weather has arrived that things will pick up. General spring goods are going out fairly well, there being a good demand for garden tools, screen doors, wire netting, fencing, etc.

Price Changes.

Rubber belting is down, the price now being 60 per cent. off. Churns are also down, there being a reduction of 10 per cent. in all the sizes. Flat and round-head bright iron screws are down ten per cent. to meet the eastern reduction.

Paint Markets.

The spring orders for paint are just being rushed out, and after that is over, local manufacturers and agents look for a big business about April, when it is proposed to organize big municipal campaigns all over the West. If such a campaign gets the proper backing from the press and the municipal authorities, it should result in an increased business in paints. The hardwareman must look for his profits this year from the painting and repairing of buildings already up, for few will go up this year. The idea is to get the people to realize that a clean-up of this nature is necessary by united advertising of paints and hardware necessary for repairs. It will be started in Winnipeg shortly in good shape. Thousands of merchants throughout the West are sending for booklets giving color schemes and methods of approaching likely users of paint. Winnipeg dealers are already ordering their requirements for prepared paints, and the majority of the spring business is in and being shipped. Shipments have been heavy for the end of February.

Glass is dull, and business must be worked up in conjunction with the scheme outlined above. There is no end to the number of lines that would have a demand if such a scheme were begun: garden tools, for instance, seeds, wallpaper, etc. There was a meeting of the city glass dealers last week, together with paint and hardwaremen, and it was decided to advance the price of glass 50c on double and 25c a case on single. This is on account of the advance in price in Belgium. The price of window glass is always fluctuating in the West, and it is hard to say whether these new prices will be maintained.

New prices on putty are being prepared, and will be ready next week. It is expected that casks per 100 lbs. will be dropped from $2.90 to $2.75; bladders in barrels, from $3.15 to $3.10, and cases of 100 lbs., from $3.40 to $3.10. These prices are now under consideration. The demand for putty since the New Year has been light.

Linseed oil orders for the spring have been received, and in many cases shipped. Dealers look for increased sales. Turpentine is quoted as follows:

5-gallon cans ..... 85 cents.
Single barrel ..... 80 cents.
Containers extra.

EIGHTY-FIVE PER CENT

(Continued from page 39.)

as against 91.5 per cent. in 1912, 90.9 per cent. in 1911, 91.5 per cent. in 1910, 91.8 per cent. in 1909 and 90.2 per cent. in 1908. If the next highest capital rating is considered with the lowest, it is found that 97.5 per cent. of all failing had less than $20,000. Of those failing in 1913, 56.7 per cent. had less than $5,000 liabilities, as against 58.2 per cent. in 1912, 60.3 per cent. in 1911, 60.9 per cent. in 1910 and 61.2 per cent. in 1909."

The comparative statement of failures in Canada for the past four years is as follows:—

Year.	No. in business.	No. failures.
1913	149,852	1,827
1912	142,583	1,312
1911	130,466	1,401
1910	128,881	1,469

How Capital Was Distributed.

As regards capital the percentage of failures in the two countries with less than $5,000 capital was 91.8, almost the same as the year before. There were 5.7 per cent. between $5,000 and $20,000; 1.6 per cent. from there to $50,000; and .5 from this to $100,000. These percentages have a remarkable similarity to those of previous years.

In a general survey Bradstreets refers to certain unsettling causes operating more across the border than in Canada, floods, tariff changes, etc.

A Brighter Outlook.

It goes on: "To what extent each of these unsettling causes was directly responsible for some curious fluctuations in the failure totals and liabilities cannot, of course, be established, but as time goes on and the outlook, which began to clear late in 1913, is being viewed more favorably, the overmastering importance of the financial element in the entire situation seems to become increasingly clear. Money hoarding abroad because of fears of war found a parallel at home in close handling of bank reserves and a scrutiny and restriction of credit which has found few counterparts in any but years of acute panic strain. The striking ease of money since the outset of 1914 and the stronger tone of securities markets abroad as well as at home fortifies the theory that as the financial stress and its effects were of a world-wide character, so the reaction therefrom is and should necessarily have correspondingly far-reaching effects, making due allowance, of course, for the crop and trade developments of the coming spring and summer.

"The record of 1913 shows 14,551 failures or suspensions, with aggregate

(Continued on page 60.)

Methods of Retailing Paints and Varnishes

Keeping a Record of Paint Sales

Follow-up System Can be Readily Used in Retailing Paints—Used as a Basis for Soliciting and Effecting Further Sales—Results Will be Astonishing.

IN the retailing of paints and varnishes the retail merchants in many instances do not attach enough importance to the first sale, either to a new customer, or of a first item which may lead to other sales.

The possibility of repeat orders depends to a great extent on the quality of the goods sold and the service rendered in the first transaction, but the merchant by adopting a follow-up system can secure many repeat orders.

The Paint and Varnish Record recently drew attention to the opportunity which presents itself to the live merchant who is willing to take advantage of the follow-up system. The article reads in part as follows: There is no line of business that lends itself so readily to this follow-up system as does the retailing of paints, varnishes, and allied lines, because there is no other line in which the individual items are so closely connected. The sale of a paint brush naturally leads to the sale of paint; paint requires fillers, varnishes, stains, and colors; these lead again to more brushes and incidentally bring in putty and window glass; and those dealers handling wall paper and wall finishes are right in line for pushing the sale of those items in connection with the sale of any other items they may sell.

The one beautiful feature underlying the retailing of paints is that if a housekeeper or owner once starts on the very smallest job of painting or varnishing, he or she can be very easily encouraged to go ahead and paint or varnish everything around the place, because, verily one newly painted spot in the home doth make everything else look dingy and sick in comparison.

The time for suggesting additional items is not properly at the time the first sale is made, because usually at that time there is no thought of further work to be done and suggestions, unless very, very mildly made might be unwelcome, to say the least. Much greater results can be obtained if at the time of the first sale, the name and address of the purchaser be secured, automatically if the goods are to be delivered, and if not under the excuse of natural interest in tracing the results of the job. This is a very important item and should be made a necessary part of every sale, even if the supplies are sold to a painter for use on contract work, because it is the only way in which the owner or housekeeper can be reached in the most appealing way.

Then after sufficient time has elapsed for the completion of the original job and for the comparison between the freshly painted work and the old surfaces to have made sufficient impression, a very short letter, a phone call, or a personal remark, asking as to satisfaction with the first job and suggesting other work along the same line will be most effective.

For instance, Bill Jones' wife buys some white enamel for her sink. Two or three days later we offer to furnish her enough material to enamel her whole kitchen for "about" so much, or floor stain for so much, or wall finish for a certain lump sum. Or Bill himself buys a brush and we find he is going to use up some old paint for his reaper. We, in a few days, suggest some more of the same paint for his plow and his mower, because by that time he has had time to see how much better his reaper looks with the fresh paint and to realize how much better it is protected against rust and rot.

And it is always well to make a rough estimate, and so to state it, as to the cost of the entire job, because practically no one but a practical painter, knows or appreciates how little paint it takes to do a certain amount of work, and there would be much more paint used if housekeepers and owners had it shown to them in actual figures.

The opportunities for beneficial work of this kind is absolutely unlimited and it seems almost a crime that they are so grossly neglected. There should never be a sale made over a retail counter but what a record is made of the buyer and the purpose for which intended, and this record used as a basis for soliciting and effecting further sales. If such a system be handled promptly and efficiently its results will be astounding to any who have never before tried it.

EVERYBODY WAS SATISFIED EXCEPT THE MAN WHO DIDN'T ADVERTISE.

Jones was a steady customer at the Cobweb Hardware Co. (a concern who did not believe in advertising), but one night while reading his local paper, a catchy ad. of the Up-to-date Hardware Co. attracted his attention. He read it. Next day a striking poster caught his eye—it was the Up-to-date Hardware again, and later he found himself interestedly looking at a splendid window display of goods he had seen advertised in his favorite magazines—it was the Up-to-date Hardware Store—and so inviting! In he went, and from that day he continued to purchase goods of them. Now, who paid for the advertising? Mr. Jones received good service and full value for his money. The Up-to-date Hardware Co. made a profit on the goods sold; in fact, the only loser was the Cobweb Hardware Co. Who, then, paid for the advertising? Think it over!—Paint Salad.

ANNUAL DRIVE AND SUPPER.

The members of the staff of T. McAvity & Sons, Ltd., St. John, N.B., enjoyed their annual sleigh drive this week, some thirty or more driving to the Clairmont House, where an enjoyable time was spent. A turkey supper was served, and was followed by a round of toasts, speeches, musical and literary numbers. Ronald McAvity occupied the chair and acted as toastmaster, while Clifford McAvity presided at the other end of the table. T. A. Ramsey proposed the toast to the King, which was honored in music.

R. A. and Clifford McAvity replied to the toast to "The Firm," conveying the best wishes of the members to the employees present. W. Belmont Winchester sang his favorite number, "Comin thro' the Rye," after which Walter Coughlan gave an interesting talk on the plumbing branch of the business. This was followed by a piccolo solo by Troop Thorne.

W. F. Coleman spoke on behalf of the engine department, and Roy Evans championed the interests of the tank department. There were speeches by Mr. Cummings and Mr. Kindred, and Mr. Myers responded to the toast to "The Ladies." Bruce Ferguson was heard in a vocal solo; John Trifts danced the Hieland schottische in true Scottish style; Bruce Erb gave a reading; and there were several other equally pleasing numbers. Eli Wolfe dispensed a fine programme of music

Past-Master Painters Will Ask For

Pratt & Lambert Varnishes

Over Sixty Years in varnish-making has developed products that are well known to every painter. Only on their merits have P. & L. varnishes attained the premier position of popularity with painters whose experience has afforded them an opportunity to judge just which of the many varnishes on the market have given the best results. Watch the old painter and you will find that he will choose from

These Well-Known Brands

"61" Floor Varnish for floors.
"38" Preservative Varnish for best interior work.
Spar Finishing Varnish for exposed work.
Alcolac for first coats.
"110" Cabinet Varnish for general interior work.
"Vitralite," the long-life white enamel.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, March 4.—The business on the local market is still in full swing, and orders are being received for spring supplies every day. There is a much better feeling throughout the country than was anticipated by all, and it is the general opinion that business will be back where it belongs in a few weeks. The building trade should be a busy one during the coming year, as it was curtailed last season, so that this ought to double up the operations for the coming season. This means larger paint sales.

White Lead.

There is a very satisfactory demand for white lead, and the market is reported as being very firm. Pig lead is quoted at £20 in London, which is an advance over last week. The quotations this week are unchanged from one week ago. Ton lots are selling at $8.05, while less than a ton sells at an advance of 20 cents.

Linseed Oil.

The market this week is very firm, as the demand is keeping up; in fact, there is a slight increase this week on account of the milder weather. The local dealers are united in their quotations this week, and those who were quoting cheaper oil last week are now back at the former figures.

1 to 4 barrels	60c per gal.
5 to 9 barrels	59c per gal.
10 to 25 barrels.....	58c per gal.
Boiled Oil—	
1 to 4 barrels.....	63c per gal.
5 to 9 barrels.....	62c per gal.
10 to 25 barrels.....	61c per gal.

With open prices for carload lots.

Prepared Paints.

Most of the local manufacturers are reporting the largest year in their history, so that it is not difficult to judge the amount of business which is being carried on at present. Spring deliveries are going forward, while orders are coming in every day from all centres for paints of all descriptions.

Glass.

Business is still rather quiet, although there has been a better inquiry lately. Although the cost of manufacturing has increased from one year ago, it does not appear to affect the quotations, as local manufacturers report that there will not be any advance for some time to come. May 1st ought to see this business pick up a little, and from then on it will increase steadily until the busy season commences about August 1st. At present, though, there is not much business passing.

Putty.

There is not a great deal of business passing at the present time, and the same quotations are in effect, which are as follows:—

Bulk, in casks....$2.30 per 100 pounds.
Bulk, in drums... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.
With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

The market, which was a little weaker last week, has firmed up, and is not quite steady. The prices quoted this week range from 65 to 68 cents per gallon for one-barrel lots. Cheaper prices are quoted for larger quantities. The demand is very good.

Gasoline.

The demand is picking up a little each week, and will continue to do so from now on, as the roads are getting better, and that means more gasoline. The same prices are in effect.

25½c per gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21c for 100 gallons and over.

Benzine.

The demand is possibly picking up a trifle, although not very heavily. The demand is quite steady at all times, although the spring will see a little freer movement in this line. The following prices are still in effect.

Barrel lots in wood are quoted at 23 cents per gallon, in steel and drums 20 cents, while local tank wagon price is 19 cents per gallon for 100-gallon lots and over.

TORONTO.

TORONTO, Mar. 5.—Paint manufacturers and jobbers report that there has been an improvement in business owing to the apparent breaking up of winter.

Quite a number of orders booked for March 1 delivery have been sent out.

Some dealers who have been rather backward in placing spring orders are now coming forward and making purchases. A large volume of spring business is expected by the trade in general.

Linseed Oil.

Trade in linseed oil is not brisk at present, although a slight improvement in business is reported. Some very low prices have been quoted on linseed oil and turpentine, and dealers should investigate the standing of firms offering oil at ridiculously low prices. The ruling quotations on oil remain as follows:

Raw—

Single barrels	65c.
3 to 5 „	63c.
6 to 9 „	61c.
Boiled—	
Single „	68c.
3 to 5 „	66c.
6 to 9 „	64c.

Oil in less than barrel lots 7 cents per gallon. Cans are charged for—5-gallon, 50 cents each, and 10-gallon, 75 cents.

Turpentine.

The Southern market has advanced considerably, although local quotations remain unchanged. It is expected that higher prices will prevail here before long. The ruling prices are:—

Turpentine—
Single barrels, 67c. imp. gallon.
2 to 4 „ 66c. imp. gallon.
5-gallon lots, 74c. gallon.

White Lead.

White lead is still being booked for delivery until May 15 at the following prices:—

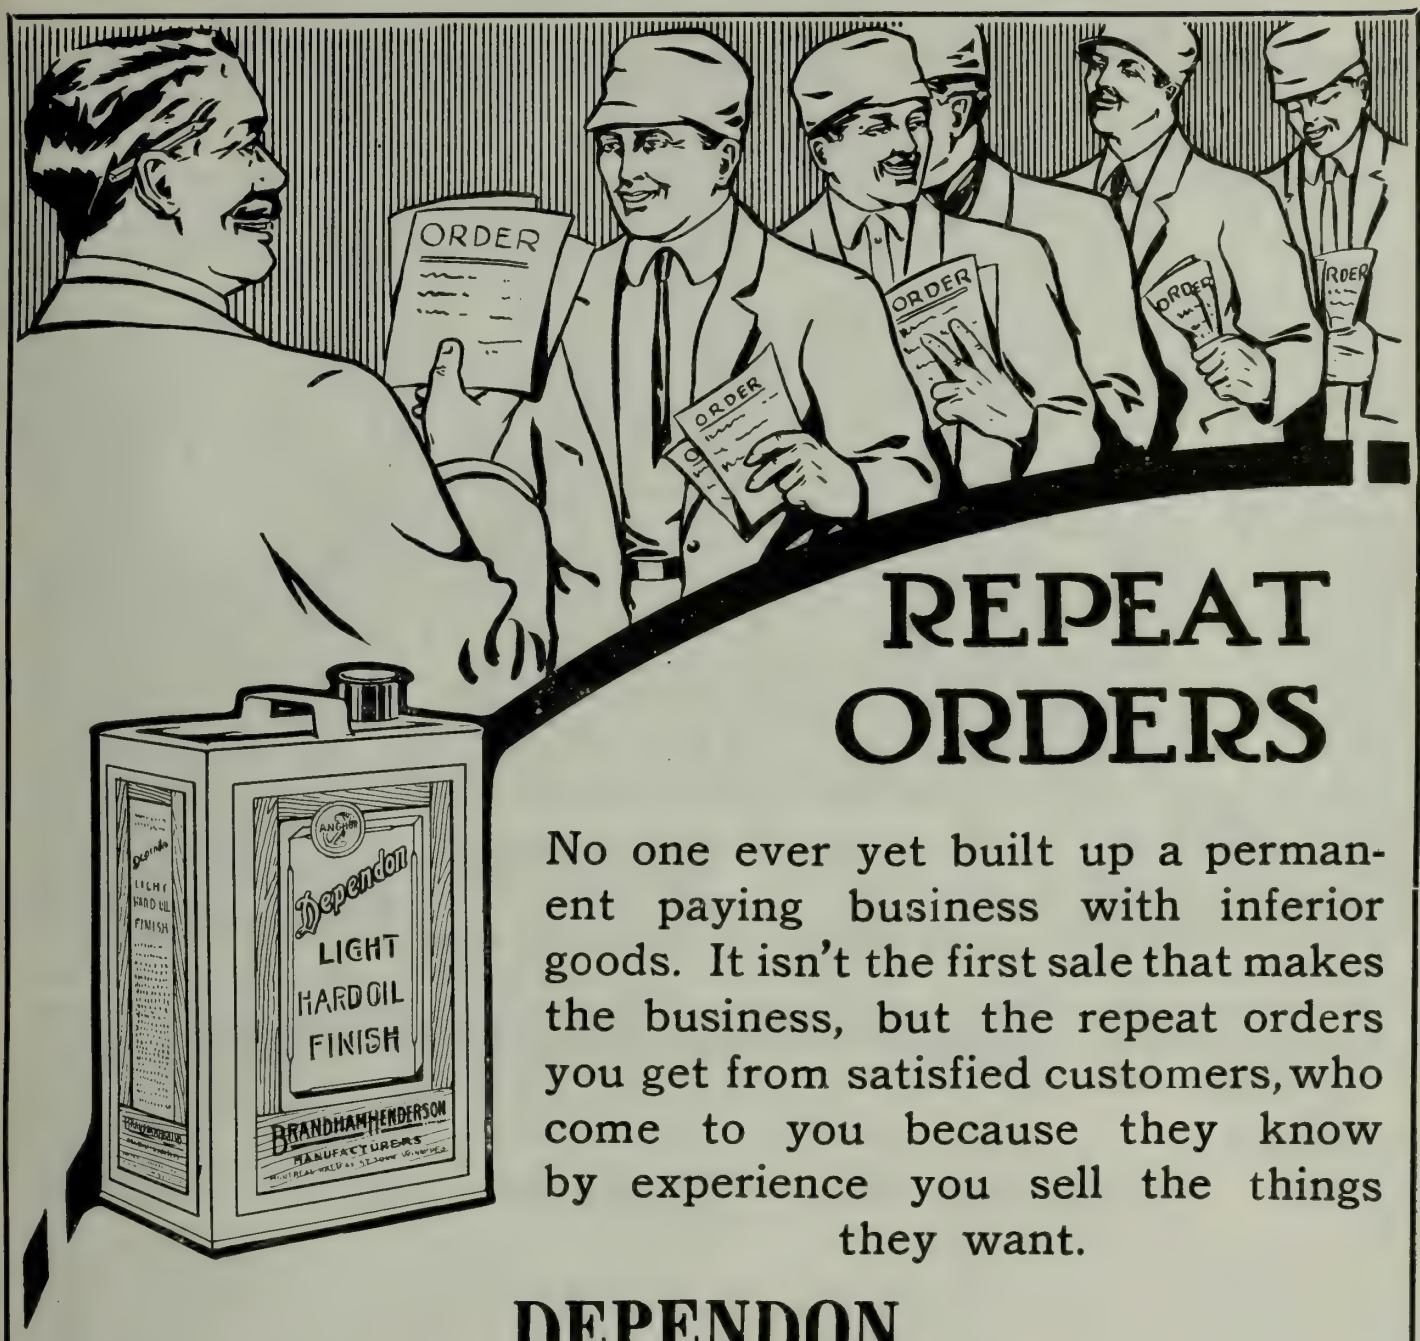
5-ton lots, $7.90 per 100 lbs.
1-ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Glass, Putty, Etc.

There is a seasonable demand for glass and putty. Glass is quoted at 20 per cent. off list prices shown in current market quotations.

Putty quotations are also shown in current market quotations.

Prepared Paints.



Spring orders are now being shipped, and from now on there should be a steady increase in the demand for ready mixed paints and varnishes.

EIGHTY-FIVE PER CENT.

(Continued from page 57.)

liabilities of $292,347,343 and assets of $159,054,911. There is here shown an increase of 5.3 per cent. over 1912, of 15 per cent. over 1911, or 25.7 per cent. over 1910, and of 3.6 per cent. over 1908, the year of trade depression following the acute financial panic of 1907.

Over 1906, about the best of recent years, the increase in number was 55 per cent., but compared with 1896, and 1893 decreases were shown of 3.5 and 6.1 per cent., respectively. As regards liabilities, 1913 showed an increase of 46 per cent. over 1912, of 55 per cent. over 1910 and 1911, and of 108 per cent. over 1909, but marked a decrease of 1.2 per cent. from 1908 and of 23.5 per cent. from 1907. It was this combination of increased number and enlarged liabilities which made 1913 the third worst year as regards failures and the fourth worst year in liabilities that the country has record of in the past third of a century."

REPEAT ORDERS

No one ever yet built up a permanent paying business with inferior goods. It isn't the first sale that makes the business, but the repeat orders you get from satisfied customers, who come to you because they know by experience you sell the things they want.

DEPENDON
LIGHT HARD OIL FINISH

is a trade-builder because it has precisely the qualities that appeal to practical men—dries hard, rubs to a fine polish, will stand hard wear and is always uniform. It is the most dependable hard oil finish made, therefore the surest to give satisfaction and bring the customers back for more.

IT PAYS to sell **DEPENDON** because the first sale means a steady customer.

BRINGS BIGGER BUSINESS BETTER PROFITS

MARTIN-SENOUR PAINTS & VARNISHES

Trade-Getting—and Holding

Trade-getting is largely a matter of advertising, while trade-holding is dependent upon the quality of the goods sold.

Our big nation-wide advertising campaign in the Leading Magazines, Farm, Religious and Commercial Publications of Canada, will impress many people right in your town with the merits of Martin-Senour Paints and Varnishes. Attractive Bulletins, Out-door Signs, Effective Mailing Folders, Booklets, Etc., will lead many new customers to the stores of our Dealer-agents, while Window Trims, Cut-out Displays, Store Signs, etc., will focus our big advertising campaign to The Martin-Senour Dealers' Store.

But success isn't made up of orders—it's reorders that count, and back of Martin-Senour advertising — back of all this splendid cooperative dealers' selling helps is the supreme quality of the goods, producing such splendid results, and giving such entire satisfaction to the user that each sale widens the way for more sales to follow.

If continuous profits interest you—write.

Letter received from our Maritime Distributers

Benj. Moore & Co., Ltd.,
West Toronto, Ont.

Gentlemen:—

We have just landed the car of Moore's House Colors and Muresco shipped on the 29th and are glad to report it has opened up most satisfactorily.

This is the sixth year which we have been handling your lines, and it gives us pleasure to report that our sales each year have shown a very good increase, and that each year we find it a more satisfactory and easy line to sell. Everywhere in the territory which we cover, we find that it is becoming more popular all the time, and we look for steadily increasing sales.

Wishing you a prosperous year's business, we remain,

Yours very truly,
EMERSON & FISHER, Limited,
H. W. Emerson.

BENJAMIN MOORE & CO., LIMITED

NEW YORK CHICAGO CLEVELAND

Hints to Dealers on

Paint Up, Clean Up, Campaign

Many dealers have assumed a pessimistic attitude towards 1914 business. It's a bad way to begin the year. There may be a general falling off of business in certain lines, but this loss can be compensated by gain in other lines. Paints and Varnish can be pushed to the front, through the above-mentioned campaign, as can trade in Garden Tools, Garbage Cans, Brushes, Brooms, Etc.

Make it a civic movement. Get your Mayor, Council, Board of Trade, School Board and Churches interested in it as a Civic Crusade against dirt, flies, etc., as a civic advertising campaign to interest intending investors, as a matter of pride in your town.

Let all dealers join hands, get in touch with your opposition—make it a municipal movement, and let no petty jealousies interfere in the general plan. You go after the business in open competition and you'll get your share. Write us for further particulars.

"The passer-by judges the character of a store from the character of its windows."

A letter from a firm who have been selling paint for over fifty years

THE firm of J. W. Paton was established in 1869. About ten years ago we took on the Sherwin-Williams line. Previous to that time we had handled a cheaper line of prepared paint, and in addition we installed a special equipment of tubs for mixing lead and oil in large quantities for our customers.

"Since taking on the Sherwin-Williams Agency our sales have largely increased year after year owing to the fact that the quality of every Sherwin-Williams product always pleased the customers and brought them back for more of the same kind. In addition to this, the aggressive advertising of the Sherwin-Williams Paints and Varnishes created a steady and growing demand and has helped us in our advertising plans.

"We, ourselves, have always been aggressive advertisers: we know that good advertising helps to build the business. One of the most successful features has been a large poster showing an illustration of a painter on a swing stage, and this has given us good general publicity. We have also found special circular work very helpful at the particular time of the year when the people are interested in paints and painting. We have covered the city thoroughly. In preparing the circulars we have found the Sherwin-Williams advertising electrotypes and special cuts very helpful.

"Then we are firm believers in attractive windows, and we give a great deal of time and attention and go to a great deal of expense in order to make our windows unique. The passer-by judges the character of a store from the character of its windows, and so we always want our windows unusually attractive, and we continue this plan from one year's end to the other.

"We have endeavored to back up this first favorable impression given by our windows by keeping our store bright, neat and clean, and by rendering quick and efficient service to our customers. Our staff are men who are well posted in the paint business, so that they can assist the property owner with capable advice and information as to painting problems.

"Our motto is:

'QUALITY, QUANTITY AND DISPATCH.'

It means the best goods carried in sufficient quantities to allow us to give our customers exactly what they want when they want it."

Yours very truly,
JAMES F. PATON, Manager.

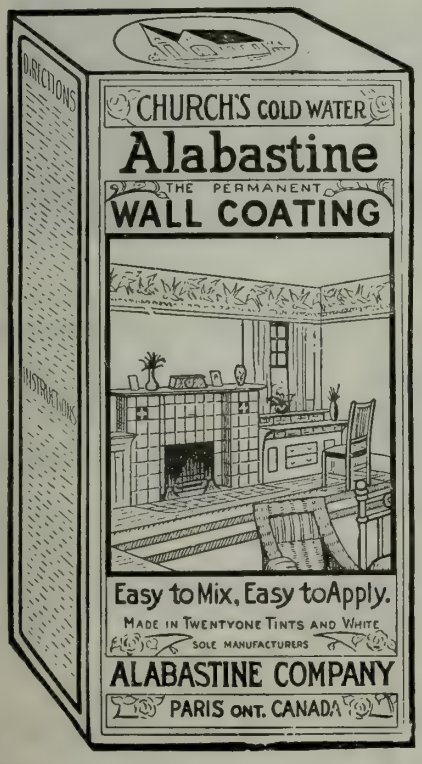
Quick Sales—Quick Profits

It's important for you to handle a line of paints that do not lean on you for all the selling work. The time you and your clerks take selling paints of unknown reputation is making a great big hole in your profits.

Lowe Bros.' High Standard Paints have a 50-year-old reputation for quality. On top of that we come along with advertising and co-operation that any Lowe Bros. dealer will frankly admit he never saw the equal of. We're entitled to the business on a quality basis, and we're going to get it and we'll make money for the man who works with us. Maybe we need you in your town.



To-day is the day to write us.

THE INTERNATIONAL NICKEL COMPANY

43 Exchange Place NEW YORK

He Sniffed Banking

And Finance From the Cradle

Herr Von Gwinner, German, born in that great International money centre—Frankfort-on-the-Main, presiding genius of that twin of the German Empire, the Deutsche Bank, with its capital of $50.000.000, and now leading a project in monumental finance to break the Standard Oil Monopoly, is epigrammatically described in the March "MacLean's" by Frederic W. Wile.

The Berlin correspondent of the London Daily Mail has made a big hit with these character studies of the makers of Modern Germany. In none has he equalled his powers as he has in this account of the big financier.

"We borrow too little. The thing is to borrow right. Talent is necessary for everything but borrowing requires genius."

"It was from Konia that Cicero, banished, wrote to a Roman friend that there were more asses in the country than men."

Such is his terse, interesting style. Every business man cannot afford to miss this sketch.

And more, the Coburn covers begin in the March MacLean's. They are a distinctly Canadian triumph in Magazine Art This whole issue is crammed with interest and attractiveness.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

'Eliminate the Failure and the Professional Idler.'

¶ No man or woman should be permitted to grow to manhood or womanhood without being able to do something intelligently that the world wants done; without being sufficiently skilled to earn a respectable living and enjoy the better and finer things of life.

¶ No man or woman should be permitted to grow up into middle life without an occupation, without a trade, without a training along a certain line, or without a profession. This is a problem that should be handled by the state and the nation working in conjunction; and training schools should be established and factories should be erected for the purpose of bringing about this end.

¶ This is a very simple proposition and to any of us who have an inquiring mind the idea occurs logically and naturally. It is so simple, in fact, and so evident, that no one can possibly walk around the proposition or walk away from it.

¶ The average money paid for unskilled labor is $1.50 a day. This labor is unintelligent, untrained, misdirected and represents less than one-tenth of individual efficiency. It is the labor of those who have developed neither brain nor hand; of those who have never been trained, and who have never trained themselves to do anything intelligently that the world wants done. And just here we may say that no man can develop his hand without developing his brain.

¶ The training of boys and girls, of young men and young women is the most ignorantly handled of anything connected with our modern civilization, and this ignorance is responsible for the greater part of our poverty; for the suffering and sickness that usually come from poverty and is responsible, in a very great degree, for the unhappiness and the misery that exist throughout the human family.

¶ As a nation we are supporting a vast number of battleships and along with the navy we are sup porting thousands of idle men who become, by the nature of their environment, professional "do-nothings." Young men who select the navy as a vocation are not only dependent on someone else for the food they eat and for the clothes they wear, but the nature of their calling is such that they are almost entirely unfitted for any useful vocation in life.

¶ As a nation we are supporting an army of men who do not work and who do not study—an army of professional idlers. And this is, without doubt, the greatest travesty in our modern civilization—that the Government should keep an army of men either on land or sea, that produces nothing, that does nothing but consume and destroy, is the greatest mystery of our time. The policy has been handed down to us from a semi-civilized period of the world when the soldier and the priest were a burden on the peasant who toiled in the field and suffered under taxes to support them.

¶ Our battleships are out of date almost as quickly as the style of woman's dress and ready for the junk-heap. Every year millions of dollars are spent to build these steel monstrosities of idleness, and every year millions of dollars are spent to feed and clothe and transport an army of idlers. Instead of having an army of a few hundred thousand young men, we should have an army of ten million young men, and each of these men should be trained and educated by the Government to earn a living; to be useful to the Government while they are working for the Government, and at the same time fit themselves to do skilfully and intelligently something the world wants done when they grow up to manhood.

¶ A half hour each day is enough time to devote to the routine of military training. That a young man should be paid by the Government to parade around covered with brass buttons and braid instead of producing something useful for the Government and for himself is a crime against taxpayers; against the man who is lured into this life of idleness.

¶ How long will it be, I wonder, until we develop a race of thinking men and women—a race of individuals intelligent enough to do away with this organized "Army of Parasites?"

Efficiency

To HARDWARE-MEN

who have a

Sanitary and Heating Department

as well as a

Tinsmith Shop

You or your foreman plumber, steamfitter or tinsmith should be a subscriber to

SANITARY ENGINEER

Because

1. **Its Advertisers**—are those who sell the best goods at the right price.
2. **Its Question Box** "is practical."
3. **Its Articles**—are of vital interest to those engaged in the craft.
4. Its course in sheet metal work has been very favorably commented upon; in fact one subscriber stated to us recently that this course was worth over $25.00 alone.
5. We solve problems for you through our columns which are at times beyond the best of us.
6. It is the voice of the trade.
7. It stands for all that is along the lines of progress in Sanitation, Heating and Ventilation.

Bissell's 1914 Spring-Easter Offer

NOW IN FORCE

In order that our customers might be able to order Bissell sweepers to the very best advantage at the outset of their Spring business, we brought out our Spring-Easter offer this year nearly a month earlier than usual, and inasmuch as it will expire correspondingly earlier, we would suggest that you place your order for your Spring requirements now.

The interest shown by our customers in the past has prompted us to repeat our offer of one nickel-trimmed

"GRAND RAPIDS" SWEEPER FREE

in consideration of a very nominal amount of local advertising and window display as heretofore. We will be glad to mail you a copy of our Spring-Easter announcement, with proof sheet of free co-operative newspaper cuts.

Bissell Carpet Sweeper Co.

THE "WANT AD."

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

The

R. McDougall Co., Limited

GALT, CANADA

Dealers—Handle this Fence

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

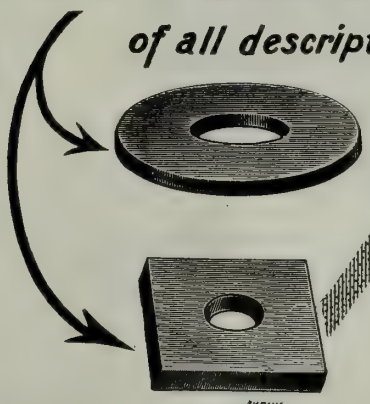
How About Handling This Money-Making Line

Do you know that many hardware dealers who carried **Spramotor** accessories made good profits last year? Our line of parts is the best made and completely standardized. Over 16 years on the market and never approached for excellence in materials and workmanship. There is a good, steady demand from the best class of trade for **Spramotor** accessories. Many dealers sell complete spraying outfits for us, and add handsomely to their profits.



Get in touch with us to-day and ask us how you can make money with our line.

You will find this
MAXWELL "HOME 65"
FOOD CUTTER

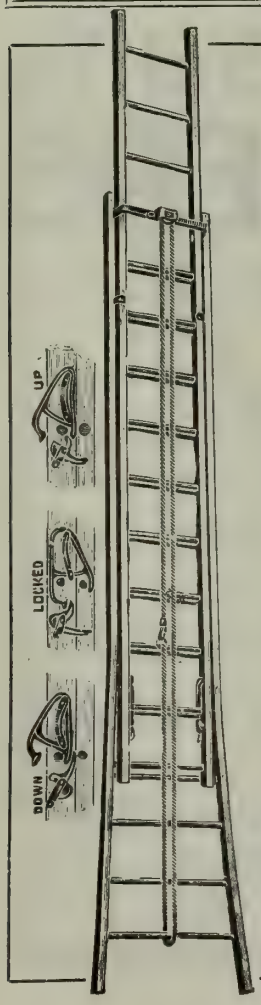
one of the best selling lines you ever handled.

The "Home 65" is a new machine embodying all the latest principles. Made in the standard family size and much stronger than the ordinary type of machine. Cap fits close, rendering the machine quite watertight. The open-end cylinder makes it easy to clean. Supplied with different cutting plates.

DAVID MAXWELL & SONS, St. Mary's, Ont.

There's a place for Everything

So goes the old proverb and it certainly was never so true as when applied to wire cloth. Awkward to cut, awkward to unroll, wire cloth can never be efficiently handled except on a **Bowser Wire Cloth Display Rack.**



The "Bowser" gives you a neat, convenient place to keep your wire cloth, where it is out of the way, yet easy to see and easy to get at.

Inaugurate a new period of store efficiency by writing for prices now.

R. M. Bowser & Son

Dept. A. RENFREW, PA.

A Profitable Investment

because the demand for it is year long—because it has never yet failed to make satisfied customers—because it is needed, in town and on the farm—because it brings you a good profit and the selling of it is easy.

Such is the **Stratford Rope Extension Ladder.** It is made of clear yellow pine, with rock elm rounds, secured so as to prevent any springing or strain, and may be had in all lengths from 20 to 60 ft.

A profitable investment—truly! But the proof of the pudding is in the eating.

Write for particulars.

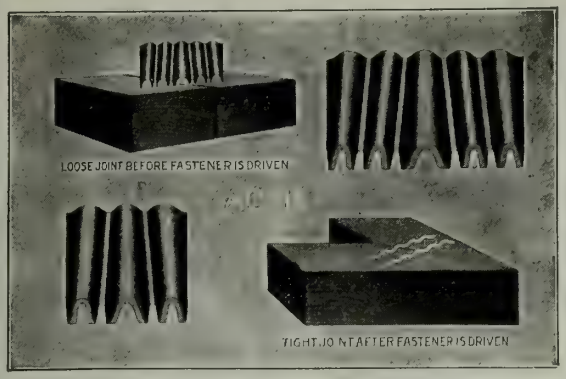
Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.



The Thermo Washer is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

Amatite ROOFING

The Roofing that Needs No Painting

WHEN your roof is covered with Amatite, there is an end to the roof painting nuisance.

Amatite has a real mineral surface and needs no painting.

The mineral surface makes painting unnecessary and it will stand rain and hail and wind and snow, for years, without attention.

When you paint the old-fashioned roofings you are practically trying to keep them from getting wet. Amatite is made to get wet, for water won't hurt it a bit. Next time your old-fashioned roofs need painting, cover them with Amatite instead.

A sample of Amatite and booklet about it will be sent on request. Address nearest office.

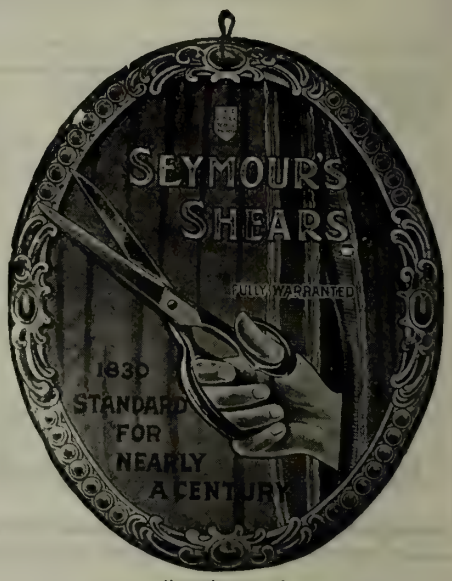
DIRECTORY OF MANUFACTURERS



Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

FIRE INSURANCE—INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

BRONZITE

The Permanent GREEN PAINT

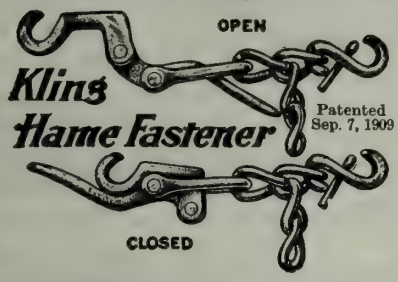
A dark, deep, rich, luxurious green very unlike any other green

Has a distinctive tone, a tone all of its own. "Bronzite" isn't just mixed or made—it's built from a permanent base, and its color made fast by lasting ingredients. Paint a building with "Bronzite" and the color is "grafted in"—it clings to the surface almost like powder marks burned in the skin or the tattooing on a sailor's arm.

Let us tell you ALL about it. Write for particulars.

Used on all work where a green paint is needed.

COLONIAL WORKS Inc.
225-237 Norman Avenue, BROOKLYN, N. Y.

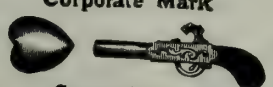


All kinds of **WOOD Planes**

THE CHAPIN-STEPHENS CO., UNION FACTORY
PINE MEADOW, CONN., U.S.A.

Smith Hardware Co., Ltd., Agents, Montreal, Canada.

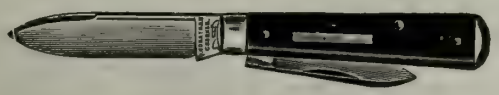
No Getting Away From It!



The Kling Hame Fastener holds customers as well as horses. Anyone can attach it in a minute. Keeps the collar uniformly tight at all times. No matter how he lunges, the horse can't open it or break it. We refund the money for any that may be returned to our dealers. Costs you $2.25 a dozen from any jobber.

Look for "Kling" on the lever. Circular on request.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.
Sole manufacturers of the Klingsnap and Kling Hame Fastener.
D. C. Ross & Co., 56 Colborne Street, Toronto, Ont.
Canadian Distributing Agents.



Jonathan Crookes & Son

Corporate Mark

Sheffield  **England**

Granted 1780.

SUPREME CUTLERY

For Sale by Leading Wholesale Houses

The Bold Markings

on this Rabone Rule make it a Favourte for use at all times.

The markings are large and well defined and are readable at a glance. It is our No. 1167, two or three feet, four-fold boxwood rule; fitted with stout square brass joint and brass middle plates.

Marked 8ths and 16ths. Markings are deeply indented. Indelible and Very Bold.

TRADE MARK
HOCKLEY ABBEY
ESTABLISHED 1784

This is not an accidental pattern but was produced in response to a WIDE DEMAND FOR IT It is a line every dealer should stock. In material, make, and finish it is well up to the Rabone Standard.

Ask your jobber for quotations and write for a Catalogue to our Canadian Representative:

DEALER

This Lock, Mr. Farmer, is the one used in our "Great West" Fencing

You might possibly get some cheaper fence than ours, but you will look in vain for any better.

Our Fences are made in the West, designed especially for the Western trade, and we guarantee every Rod as to strength and durability.

It is the "Standard Fence" of our "Great West."

Write for our illustrated catalogue and price list.

John Wanamaker says that advertising doesn't jerk — it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

STANLEY Cabinet Assortment

of Ornamental Hinges

TRADE S.W. MARK

Many of your customers are looking for just such hinges, and don't know that you have them. Put one of these cabinets out on your counter where they can see the samples on the display board.

The stock is on the inside of the cabinet, each box plainly labeled. The time of clerk and customer is saved in making the sale.

The Hinges Sell Themselves

This is Assortment A. There are three others:

B. Cabinet Hardware C. Door Bolts D. Small Plated Butts

All Interchangeable

You can buy one cabinet and by changing the sample board and stock from time to time, always have a fresh display attracting the attention of your customers.

Get in the game and beat the other fellow to this, the latest wrinkle in retailing.

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

ROGERS'

PORTLAND CEMENT

This is cement that can be depended upon to give maximum service in any kind of construction work.

It is ground and screened carefully to give large covering power, speed and uniformity of set and great strength.

It has a good record of service, and is well and favorably known by leading builders and contractors.

Much cement will be used right in your vicinity this Spring. If you make it known that you're an agent for Rogers' Portland Cement you'll sell most of the cement that is required.

Rogers' Agents need not carry a large stock, for in case the amount they have on hand does not meet a demand we will ship immediately from our large reserve stock.

Let us put you on our list of representatives NOW.

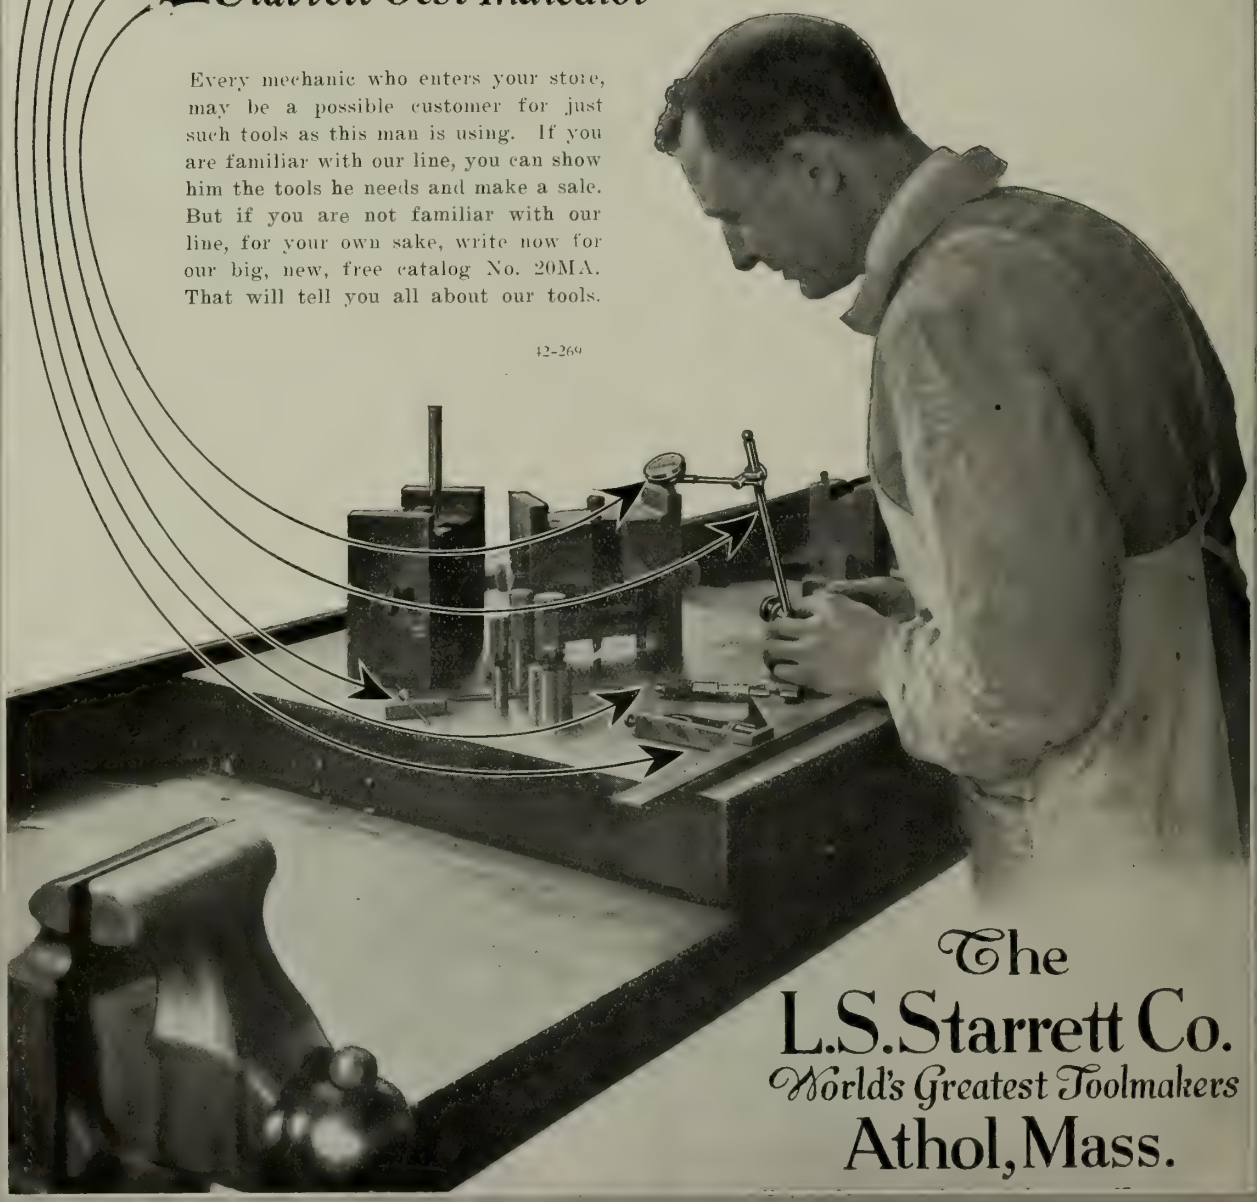
Making Jigs in a Precision Shop. Every Tool a Starrett !



Here is a good illustration of what we mean when we speak of the tremendous sales possibilities for Starrett tools. This actual photograph of a jig maker in one of the finest precision shops in Boston shows the tools which he uses on his work. These tools made profitable sales for someone—but please notice that they are all Starretts.

Starrett Combination Set
Starrett Micrometer
Starrett Depth Gage
Starrett Surface Gage
Starrett Test Indicator

The reliance placed on Starrett tools by the best tool makers, jig makers, and machinists proves our claims for accuracy and service. By service we mean, not only lengths of usefulness but convenience and scope.

Every mechanic who enters your store, may be a possible customer for just such tools as this man is using. If you are familiar with our line, you can show him the tools he needs and make a sale. But if you are not familiar with our line, for your own sake, write now for our big, new, free catalog No. 20MA. That will tell you all about our tools.

Corrosion—

What Havoc It Plays With Sheet Metal!

One large Railroad System estimates that it loses 18 tons of metal daily due solely to corrosion. Think of it—6,570 tons per year!

What a criminal waste! Can you imagine the amount of money wasted by other users who cannot afford it as well as the railway company?

How Can This Waste Be Reduced?

When we are troubled with bodily ills we secure permanent relief only by determining and treating the cause of our illness. A headache powder may cure your headache temporarily, but it does not eliminate the cause. This brings us to our subject.

To reduce corrosion of iron and steel we must get down to the base—the metal itself. Protective coating alone is only a headache powder—a temporary relief.

The use of a sheet metal that will resist corrosion is the logical method of reducing the corrosion of iron or steel.

But is it possible to produce such a sheet metal and still have the price within reach of the average consumer? Fortunately it is more than a possibility—it is a reality.

We are prepared to furnish actual service tested material, not an experiment—

TONCAN METAL

Corrosion-Resisting Sheets

Are the Solution to the Problem

Toncan Metal is Corrosion Resisting because of its purity, homogeneity and care used in its production. There is no more durable sheet metal made from iron ore than Toncan Metal. This fact has been proven by actual service tests covering many years.

Toncan Metal is moderate in price; in fact, lower than charcoal iron and only a trifle higher than steel. It can be secured in the flat sheet form and various styles of Roofing, Eaves Trough, Conductor Pipe, Culverts, Etc.

Mr. Dealer:

Lay in a stock of Toncan Metal Sheets and Products before your competitor does. Write for prices.

For complete data and proof cut this out and mail it to us to-day.

What Motor Trucks Can Do For The Hardware Dealer

Mack Truck used by The James Walker Hdw. Co. Hardware Dealers, Montreal.

The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.

We are sales agents for the leading gasoline motor truck of the world—MACK.

Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

COLDWELL LAWN MOWERS

It will probably be hot this Summer—

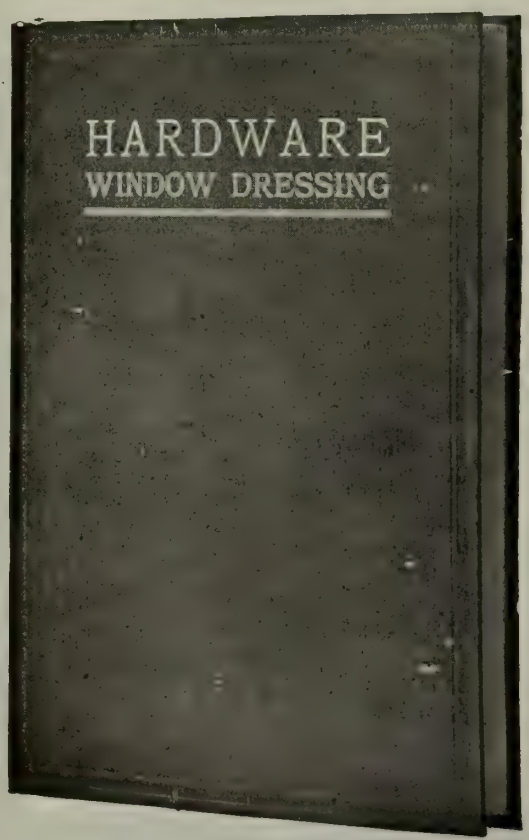
very hot, the sort of weather that makes people eat a lot of ice-cream. And a great many of them will be away—out of town—on lake shore, in Summer cottage or camp, where ice-cream parlors do not abound, where a freezer is a necessity.

Here's your chance for some big business.

Those people will be going away about the middle of May. Put in a stock of Dana Peerless Freezers now, and start suggesting that they take one with them.

Show them the Peerless—explain its operation to them. Point out, that the very tall, slender can makes for quick freezing, that the dasher removes the frozen cream from the sides, as fast as it becomes solid. Let them try the Peerless, and find that it is as easy to grind as a watch is to wind—and you will be sending us reorders before the Summer is through.

Sounds pretty good, doesn't it?



It is good, and if you'll write us, we'll tell you just how profitable it is too.

Vancouver, B.C. MONTREAL, QUE. St. John, N. B.

—and concrete is the material

Go, take a walk around your town.

Look at the great buildings that, mushroom-like, are springing up all around. Note how the framework is made of concrete—or if of steel, note how men are busy, encasing the steel members in a concrete jacket—the fire-proofing.

Or take a peep at the little bungalows that are being built. Here again you notice the wooden forms in place, ready to receive the poured walls—of concrete.

What does this all mean?

It means that you have been watching construction in the material that distinguishes this 20th century—and that concrete is that material.

Rogers Portland Cement

because of its recognized standard quality, because its uniformity and great strength have made it the favorite of engineers and architects, the country through, is well adapted for making concrete,—for the skyscraper or the cottage.

And if you handle Rogers', you can make big profits from this great growing business, because you can supply contractors who are building near to your store,—easier than they can be supplied from the big dealers.

Moreover, under our co-operative plan, you are not required to carry large stocks. We are ready to ship to the job, as quickly, and in as large quantities, as you tell us to.

Write us to-day and be appointed our recognized dealer.

Butterfield's Tools on your shelves or in your show cases mean **Gold Dollars** in your **Till.**

BUTTERFIELD & CO.

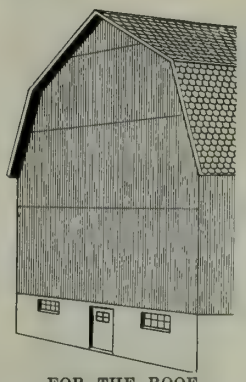
ROCK ISLAND, QUE.

The Brush also counts!

Don't think that because you sell a man paint you know to be absolutely dependable that you have cinched him as a steady customer. Remember that he must use a brush to apply the paint with and that nine times out of ten he is going to buy the brush from you.

And remember, too, that if he finds the brush worthless, if he finds that the bristles come out, that they curl at the ends, and become useless for doing fine work with—it is going to offset any good opinion he may have formed about you, on account of the excellence of the paint.

Now ask yourself: Can you afford to risk your reputation as a dealer of the best paint—just because you sell unreliable brushes?



Of course you cannot. And—as the reliable Meakins kind doesn't cost any more than the inferior sort—you'll be very short-sighted if you do.

Our brushes are made in a way that ensures their guarding your reputation, in a way that makes them back up, splendidly, the good-will creating-power of your paint sales.

You need never have any fear of their letting you down, of their failing to be your very best representative.

Write and let us tell you how profitable is sales-making—the Meakins way.

Meakins & Sons, Limited, Hamilton, Ont.

During rush hours—

When your whole sales-staff is put to it to render efficient service in the store; when members of your family have been drafted in to help out; when some of your customers are paying cash, others want the goods changed, still a third lot wish you to send things C. O. D., and some fellow—a good friend of yours—tells you he'll drop around to-morrow and settle for the things he's just bought—that's when mistakes occur, through which leak so many of your profits.

You probably look after your cash sales, but can you keep an absolutely dead-accurate check on all the credit transactions as well?

Can you hand your credit customer an invoice of the goods just bought, which is, at the same time, a statement of his **total** standing at your store, a gentle reminder that his account is getting larger; a mild but effective incentive to pay it off before it gets too big? Can you do this in a moment, just as quick as you can fill out the ordinary sales slip?

Can you, during your most busy moments, automatically prepare statements for your driver, showing on which goods he is to collect C. O. D., and retain in your office duplicates of all C. O. D. transactions, by which you can check up the money he brings in? And this without any more effort than making a cash sale! Can you keep a tab on the fellow who'll drop in to-morrow, to pay for what he bought to-day, so that everybody in the store may know the amount owing if he calls—and you may remember, if he forgets?

If you have a **McCaskey System** in your store you are already doing all these things—doing them well, keeping everybody satisfied, and saving money.

If you have not—you had better write for our book, "John Ashley." It will open your eyes to the real state of your credit department, maybe!

KIR-BEN BASE TALK

A series of Kir-Ben talks will appear in this paper weekly—watch for them.

The Kir-Ben Main Bottom and Ring is a solid one-piece casting, deeply flanged to give unusual strength and rigidity. It differs entirely from the common practice of making the bottom in several parts, which prevent the furnace being installed in a level position, and frequently result in faulty installation of casings, and the trapping of flow of warm air.

A further very important feature of the Kir-Ben Main Bottom is the fact that it is the same diameter or size as the upper part of the casing, thus allowing for the proper circulation of cold air, and permitting necessary pipe connections to be made without crowding.

Another new feature consists of the ash-pit being bolted to the bottom, adding to the strength and rigidity of the base. The joint is made with a deep flange, giving ample room for cement and making an airtight and dustproof joint.

In the larger sizes the main bottom casting is made in two pieces, securely bolted in a rigid manner and with dustproof joints as above. This is to lessen breakage in shipping and make handling more convenient.

Vol. XXVI. MARCH 14, 1914 No. 11

The Valuable Asset of a Loyal Sales Staff

Loyalty Leads to Bigger Business — No Merchant With An Enthusiastic Staff to Co-operate With Him Can Fail to Make a Success—An Anecdote With a Moral.

IT was at a meeting of credit men and the conversation had been turning on the very pertinent question of assets. For several minutes discussion centered on the case of a retail merchant known to all present who had struggled through countless discouragements and several periods of semi-insolvency to a position of financial soundness.

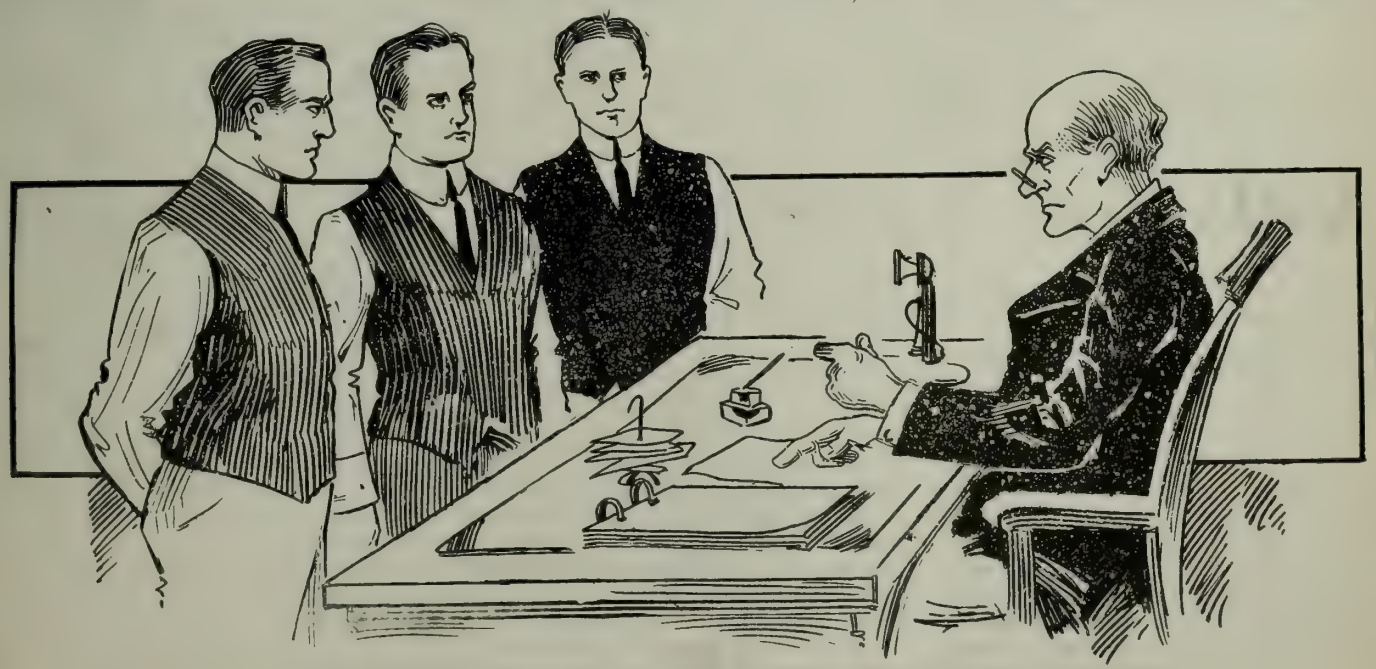
"There was a time," said one, "when he had no assets worth speaking of. I wonder that his creditors didn't wind him up then and there."

"There was never a time," said another member of the party," when Bennett didn't possess big assets. It all depends on what you consider assets. I'll tell you what Bennett had from the start, and has yet. He was honest as the day is long, he had an indomitable will and he had a loyal staff. Ever consider loyalty as an asset? It's one of the best a merchant can have."

The writer, who happened to make one of the party, pondered the last remark over very carefully. Is staff loyalty an asset? Most decidedly; one of the most invaluable and essential assets in the carrying on of a successful retail business. But is it always regarded as such?

It may seem at the outset superfluous to argue that staff loyalty is an asset to the merchant. It is asknowledged by all. But on the other hand it is equally true that there are a great many merchants who handle their staff as though they had no realization of the fact.

They pay their employees so much per week and make it their business to see that they get value to the fullest extent from them. That is the sole basis on which the relationship between employer and employee is maintained. In the course of a recent address, A. F. Sheldon summed up very concisely the mental attitude of the parties to such a relationship. "How much can I get out of my staff for the wages paid?" is the thought of the employer. "How little can I do for what I am getting?" is the idea that runs in the mind of the employee.



Mutual liking and interest and loyalty; are they possible under the circumstances? An automatic adherence to duty, a cut-and-dried basis of minimum efficiency is the result.

What is staff loyalty? The loyal salesman can be described as one who is really interested in the business, who takes the trouble to think about it, who strives to please customers. The most complete degree of loyalty consists not only in loyal service during store hours but in loyal thought. The salesman who does his best to please customers and to make his sales large but who does not give any thought to how the business can be improved or to the changing of conditions which he knows to be wrong and detrimental, who, in fact, does not bring whatever share of initiative and resource he may possess to the furthering of the interests of the business; this salesman, valuable though he may be, is not in the fullest sense loyal.

With this definition of loyalty before one, the immense advantage of a loyal staff becomes at once apparent, "Give me the services of a thoroughly loyal staff and I can win through any difficulties," said the head of one of the largest retail establishments in the world.

Lack of loyalty is the hardest handicap under which any business can be placed. It spells inefficient service, prefunctory performance of duty, machine-like manipulation of all branches of store work.

The attitude of the staff decides to

The next morning he called his staff down to the office.

no inconsiderable extent the growth of a business. It is the merchant who enlists the hearty and loyal co-operation of his staff who builds his business up to large proportions. Where the bond between employer and employee is one of dollars and cents—only that and nothing more—the growth of the business will not be spontaneous.

A case comes to mind of a hardwareman who had been in business in an Ontario city for a full quarter of a century. He had a good trade, being the oldest established merchant in the town. At one time he had been "the" hardware merchant of the district but this supremacy had passed from him fifteen years or more back. Two of his competitors had left him on the back stretch. Their trade had increased very considerably and both had graduated from modest stores on side streets to large, modern-front, handsomely-equipped emporiums. Both had motor trucks for delivery purposes. The former leader, we will call him Smith, had never moved from the store he had first occupied—a spacious but rather dingy looking stand on the main street.

The writer had often visited the store and knew the whole staff from the crabbed old proprietor down. The establishment always left the impression somehow that it lacked something. The store was large and well stocked. The fixtures though old were adequate and had not yet reached the stage of dilapidation. Manufacturers' lithographs were used to good advantage—show cards were to be seen. But there was nevertheless, a distinct something lacking about the place.

After several visits the writer concluded that the trouble consisted in a total lack of originality and action. The clerks performed their work well but they did not seem to be actuated with more than an average share of ginger. There was no evidence of enthusiasm anywhere. New stunts never greeted the eye at Smith's. The window displays were always on the same lines. The store service was good enough in a limited way but one would never need to expect a favor at Smith's. To sum it up, the whole staff seemed to be willing to let well enough alone and to earn their so-much per week,—and not give an additional cent's worth of service.

And their attitude did not seem strange after one became acquainted with the head of the business. Smith was a morose, snarling old fellow with a positive genius for economy in details. He watched the lighting and heating bills with piercing scrutiny. Disbursements were checked and rechecked and put under the microscope of ruthless economy. Needless to state Smith did not believe in liberal salaries. Pay a man as small a wage as possible and keep after him to see that he did his work—such was the policy of Hiram Smith.

Just when his change of heart was effected, or how, is not certain. Probably, however, it dated from the time that he had occasion to visit another city and dropped around to see an acquaintance in the hardware business.

During the course of the conversation, the friend alluded to the fact that he had just closed a nice contract with a builder to supply the hardware and the heating for a row of dwellings that the latter was putting up.

"We got in on the ground floor," he explained. "One of my boys heard that the houses were to be built and he hustled around and buttonholed the builder. We had figures in the builder's hand before another dealer in town knew anything about it. And we got the contract."

"Do your clerks get business for you that way often?" asked Smith.

"You bet they do," affirmed the friend. "I've the greatest little bunch of live wires ever collected together. Why, those boys of mine are fairly bubbling over with sales ideas."

"If an idea got into my store by any mistake," said Smith, morosely, "they'd shoot it out. Wouldn't know what it was, in fact. There isn't a man in my store that has had an idea for ten years."

"Then get a new staff," advised the friend. "Or perhaps you need a few new ideas yourself. Think it over."

When Smith returned, he created somewhat of a sensation by shaking hands with each member of the staff. He seemed in a more amiable mood than any of the clerks had ever seen him in before.

The next morning he called his staff down to the office and gave them a long talk, outlining a plan he had evolved of basing salary increases on the increase in the turnover in the business. The salesmen listened in wonder and with a faint show of growing enthusiasm. It was the first time in the recollection of them all that the boss had ever voluntarily mentioned the odious word increase.

"And now it's up to you, boys," he concluded. "I want you to show an interest in the business. If you can increase our sales, your salaries will go up accordingly."

The change in the attitude of the staff was rapid and complete. They began to take a real interest in the store. Innovations were introduced here and there and seldom a day passed but some suggestion was given to the boss. A new snap was noticeable everywhere. Bright ideas were used to improve the window display.

"I hardly know the place," said Smith to himself one day.

And as for the staff, they hardly knew Smith, so complete had he made the change in himself. His attitude invited co-operation instead of repelling it. It was an effort for him sometimes to maintain this new front, but he succeeded.

The result was felt in a largely increased turnover. Business started to steadily increase—and kept on increasing. The improvement was so marked that each member of the sales staff got a substantial advance on the strength of the promise which had been made.

The change can easily be accounted for. Smith had acquired a new asset, one that his business had sadly lacked before— the loyalty of his staff.

THE ADVERTISING VALUE OF COURTESY.

"Persistent advertising combined with attractive window display produce a strong, business-creating force," says a successful Ontario merchant, "but the effect of these important essentials will be greatly reduced without the salesmanship of courtesy."

Customers are human beings, with human feelings, and are as susceptible to the influence of courtesy in business dealings as in social affairs.

Take for instance the merchant offering accommodation to the public as a means of attracting people to his store. He should see to it they are given in a spirit that will make them bear good fruit. A directory carelessly flipped on the counter; a postage stamp sold with a look of annoyance a "five-spot" changed with a tired, weary expression —these things done by an unthinking clerk may kill the effect of a liberal store policy.

Salesmanship may be a difficult science, but surely the "salesmanship of courtesy" may easily be put into practice even by the junior clerk.

If the merchant will get into closer contact with his clerks he will get into closer contact with his business. Some merchants have adopted the monthly dinner plan of getting together. After a good feed the ball is started rolling and affairs are discussed pro and con. The merchant comes in for his share of the "knocks," and, like a sensible man, goes behind them to find the cause of them. When he finds he has been in fault he quickly rectifies his mistake and benefits by doing so.

A Novel Daily Bulletin Will Attract Trade

Easy to Make and Easy to Operate—Useful for Featuring New Goods—Announcement of Seasonable Goods—Special Sales—New Goods, Etc.

EFFECTIVENESS and simplicity are combined in this novel method of advertising by means of a daily bulletin. One of these home-made printing presses may be used advantageously for window or interior dis-

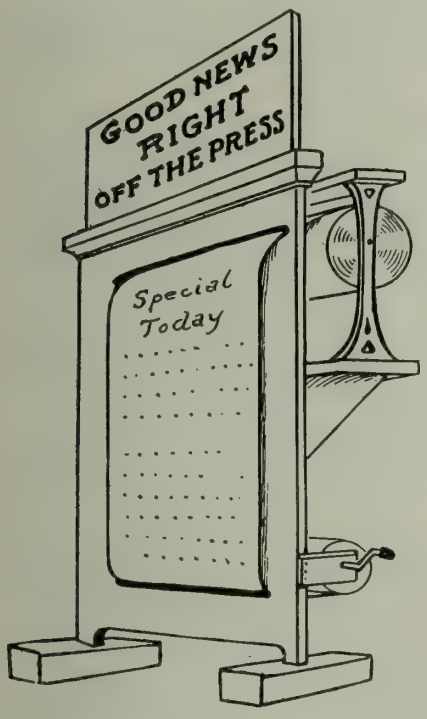


Figure 1.

play or as an outside bulletin to catch the eye of the passer-by.

The upright style shown in Diagram 1 is best for outside use, since it would take up much less space on the sidewalk. The wooden frame can easily be constructed in spare time, and all that is needed is a roll of manila wrapping paper in its holder at the top and a small wooden roller with crank attached at the foot. If desired the sides and back may be closed in so as to protect it from the weather.

The printing press idea is best carried out in diagrams 2 and 3, the first illustrating the skeleton of the press and the second the way it looks when finished.

First of all a couple of packing boxes are secured and on top is placed the roll of wrapping paper. Two scantlings are used for the lower frame and two short pieces for legs. The roller is made to fit into the end of the long scantlings and the crank through the end as shown. If a board is placed behind to support the bulletin, diagram 2 may be used as shown if desired. It is not complete, however, until finished up as shown in diagram 3. This looks rather complicated at first, but the effect is easy to secure. The sides are first boarded in with planed boards, leaving the ends of the upper roll of wrapping paper exposed by cutting the boards in circular manner around it. If the "printing press" is not for outside use and is not likely to be damaged, a covering of cardboard or straw-board may be used instead of wood. The frame should be given a coat of metal grey (dry scenic color) as a background, and the mechanism can be painted in with an ordinary half-inch brush, using black for the outlines over grey. This will give the effect of machinery and will make the sign on the top, "Good News Right Off the Press," seem altogether appropriate.

This is a good practical feature and if changed daily and good, live "copy" used customers will soon look for it just as they would a newspaper bulletin.

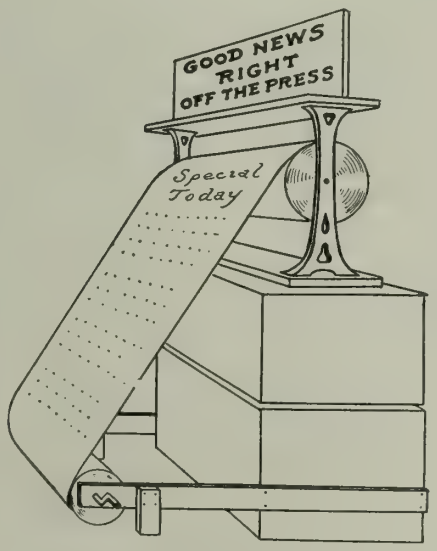

Figure 2.

Make your bulletins timely—seasonable. It is important also to vary your subjects so that all lines will be covered in the course of time. The bulletins can be made much more attractive if illustrated in colors. A few colored crayons and a little practice will enable you to make very fair cartoons. Or, if pictures of the goods featured can be secured and pasted on and the bulletin written around the illustrations, an excellent effect will be secured.

Figure 3.

CANVASSING FOR STOVE SALES.

Have you ever given any thought to this method of securing business in your district? If not, is it not worth while considering?

When one considers to what extent this is being done in all lines of business, and, further, when we see the efforts being made by mail order houses, who make such attractive appeals through their catalogue, it is worth while considering whether more aggressive methods, on the part of the local dealer, are not necessary in order to offset this.

Personally, we believe that a great deal of business can be secured and many more sales made by more aggressive methods and by bringing to the attention of the customers the advantages you have to offer. Many who have been thinking of buying a new stove, but have put it off (buying something else instead), can be made immediate buyers. Consider how many times you yourself have purchased goods solely because you were canvassed by an energetic salesman.

Again, many ranges are sold by peddlers at very high prices, and the goods, as a rule, are quite inferior; but from the fact that peddlers can sell inferior stoves at their high prices is very conclusive evidence that there are a lot of people ready to buy through personal solicitation.—Enterprise News.

HARDWARE AND METAL

VOL. XXVI. No. 11 Toronto, Canada, March 14, 1914 Two Dollars per Year

The Business Situation

THERE has been a big improvement in business with hardware jobbers during the past ten days. Since the first of the month when Spring shipping commenced, business has been picking up nicely.

In the metal markets, business is rather slow, and the number of orders is not large. Conditions appear sound and there is good reason to believe that before long there will be an improvement. Buyers are still cautious and are not buying heavily. Paint manufacturers are busy handling the Spring rush, and orders are plentiful, especially from the smaller towns and cities. With the opening of Spring there will be a resumption of building operations, in fact in many centres a large amount of building is now under way. Retail hardwaremen are looking forward to a large volume of Spring business, and although there has been much talk of hard times the Spring booking of the retail hardwaremen has been very heavy. Business in some lines is rather quiet at the present time, but there is every reason to believe that as far as the hardware trade is concerned there will be a big improvement during the next few weeks. The Financial Post commenting on the business outlook says in part:—

It is somewhat unfortunate that important questions left for Parliament to determine have been deferred to so late a date in the year. It would be much better for business generally if Parliament concluded its sittings by the end of February. Canada's commerce has assumed large, and will very soon attain still greater dimensions, out of which arises matters which have to be dealt with to a greater or less extent by Parliament. It would be much better, therefore, if all questions as to tariff and as to aiding work of development were settled early in the year, so that plans could be laid to commence work as soon as Spring opens up.

In the West shipments of grain are improving, and reports as to collections are not at all discouraging. Apparently all classes, not even excluding those engaged in rural pursuits, are still liquidating liability. This process cannot but have eventually very desirable results.

Some inquiries made amongst bankers elicited the information that loans were being applied for on an extensive scale to facilitate stock-raising and other forms of mixed farming. This policy in the course of a year or two will have good results.

In the face of steadily declining earnings of railways, contraction of bank clearings, Customs receipts and other indices of depression, it would be difficult for the average business men to view the future other than cautiously. Our factory plant as a whole is not working much more than 90 per cent. of capacity, and there was no immediate indications of demand requiring them to employ a larger proportion of their plant. This condition tends to money ease. Banks under prevailing conditions deem it better to pursue a very conservative policy. There will, however, be a tendency to be generous in so far as accommodation for the actual producer is concerned.

In London our loans are not being received as well as anticipated, and there are a good many, aggregating large figures, which are overhanging the market. This is no doubt due to several causes, the chief of which is the extent of our recent borrowings, and the next is the railway situation in Canada. So much has been said respecting waste of money on railway building as to give cause for the investor abroad to hesitate in making further advances. The attitude of our Government to railways and their construction will have to be defined by definite action before the clouds on the financial horizon of Canada will disperse.

Our Annual Spring Number

THE Annual Spring Special Number of Hardware and Metal will be published next week. It will be the largest number of Hardware and Metal ever issued, and readers who remember the remarkable numbers of Hardware and Metal which have been issued in the past, will have some conception of the amount of work involved in the publication. In view of the fact that our mechanical department will be rushed with special work on this number it is possible that the number may be a day late and will be mailed on Saturday instead of Friday. The indulgence of readers is requested, in case it is not found possible to mail out the special number right on time. The special numbers of Hardware and Metal represent earnest efforts and research of many weeks. Ideas are gleaned from all parts of Canada to make the editorial contents practical and valuable. In the number to be issued next week we believe we have excelled ourselves.

Parcel Post Limit Extended

PARCELS Post limit is now eleven pounds and dealers who have been taking advantage of the six-pound limit will now be able to send parcels weighing up to eleven pounds in weight. The eleven-pound limit was put into effect sooner than expected. It was first announced that the six-pound limit would be in force until May 1, after which the limit would be increased. It has been hinted that the reason for making the change before the time specified was on account of business not being as brisk as expected. The general opinion is that up-to-date Parcels Post has not been used to any great extent, at least not to the extent expected by the postal authorities. Another change and one of more or less importance is the eliminating of the local additional rate of five cents per parcel. This is an improvement as far as the local zone is concerned.

So far the express companies have not made any change in rates as a result of the inauguration of Parcels Post.

There are many retail hardwaremen who are inclined to think that Parcels Post will be of considerable benefit to them. A large number of advertisements of retail hardware merchants are now featuring Parcels Post and are urging farmers to make use of the new system. The mail order houses have lost no time in making Parcels Post work for them and there is nothing to prevent the retail merchant from doing likewise. The local merchant has an advantage on the mail order house in the shape of the local 20-mile zone.

Newspapers and Co-Operatives

NEWSPAPERS would practically have to go out of business if the individual trader were supplanted by "co-operative" socities. The latter do no newspaper advertising of any account—in fact it might be said that they do none whatever—yet newspapers publish for nothing glowing accounts of what the promoters say will be accomplished by these socities, and at the same time live off the proceeds derived from the advertisements of private traders.

This is a point that might well be taken up by associations.. Where there is a branch organization, the secretary or someone else should be delegated to watch local newspapers which occasionally give free advertisments to "co-operative" societies, and have all such discussed at the regular meetings or forwarded to the central office of the parent organization.

No doubt a great many daily newspapers, in their anxiety to get news, give undue prominence to and colored notices of these so-called co-operative institutions without careful consideration, and if their attention were drawn to the matter they would be more careful.

The retail trade should ever remember that if it wants anything it must go after it. Few blessings come to the man who waits.

Push Collections Now

ALTHOUGH the merchant who conducts his business on a credit basis must push collections vigorously at all seasons of the year, there are certain times when it is advisable to make an extra special effort.

At the present time there is good reason for the retail hardwareman to push collections. Within a few weeks the retailer will be busily engaged with the Spring rush of business, and his time will be so occupied that he will be inclined to neglect collections to a certain extent.

Just now the average merchant has plenty of time to push collections, and this is a particularly favorable time when we consider that money is easier and more plentiful than it has been for some time. Owing to the tightness of money the public have been inclined to hold off from paying accounts as much as possible, and the result is that many of the retailers are carrying a large amount in their books. The merchant who pushes collections now will in all probability be able to take the cash discounts allowed for prompt payment on his Spring stocks. The merchant who does not push collections now may find when payments on his Spring goods come due that he will have to seek assistance. The merchant who keeps his accounts collected will not find it necessary to get accommodation at the bank and therefore will not leave himself open to inconvenience. Push collections now and push them hard. Cash in the bank will be very useful in meeting your obligations during the next few months.

Editorial Briefs

PUSH COLLECTIONS now.

* * *

IT'S FAR better to lose a sale than a customer.

* * *

WHEN MONEY is tight the merchant who can finance his business without assistance is indeed fortunate.

* * *

MONEY IS easier, if you are carrying credit customers who have not been paying up regularly, push them for payments.

* * *

PARCELS POST limit has been increased to 11 pounds. Many retail hardwaremen are making Parcels Post work for them. Are you?

* * *

TIME TO start the ball rolling in your Spring paint campaign. All things come to those who go after them. The same rule applies when selling paint.

LOYALTY LEADS to bigger business.

* * *

ARE YOU securing your share of the wire fence business?

* * *

A SALESMAN'S worth to his firm is often based on more than the total of his sales book.

* * *

KEEP AN eye on the markets. Prices are changing and you need to buy in the best markets. Buy right and you can sell right.

* * *

IF THERE is any such thing as luck in business—and we doubt it—it certainly does not come the way of the man who waits for it.

* * *

OUR ANNUAL Spring Number which will be issued next week will be the biggest and best in the history of Hardware and Metal. Watch for it.

Present Parcel Post Conditions to Last Five Years

Government, It Is Stated, Has Given This Assurance—Weight Limit Now Up to the 11 Pounds and 5 Cent Extra Delivery Charge Eliminated.

ELEVEN pounds is now the parcel post weight limit. It was the original intention of Postmaster-General Pelletier to hold the limit down to six pounds until first of May so as to prevent a tie-up of the system at the outset. However, trade, as the merchant would say, "has not been rushing," so we have the eleven-pound limit thrust upon us two months sooner. Dealers who have been taking advantage of the six-pound limit will, therefore, now be able to send parcels by post to their customers, weighing 11 pounds or less at parcel post rates.

Extra Five Cents Off.

Another change, and one that is of more or less interest and importance to many dealers is that the local additional rate of five cents per parcel has been eliminated. This means that in future all parcels posted within the 20-mile zone will be delivered to any place in the city at the ordinary rate.

City merchants, therefore, who have customers in distant parts of the same municipality will now be able to send parcels to them without paying or charging up the extra five cents. This places the system in its regular running order and it remains to be seen of what advantage it is going to be to the country in general.

For Light Expensive Goods.

Retailers, and particularly general merchants who handle comparatively light, and at the same time, expensive goods, should go fully into the advantages of parcel post before rejecting it entirely. Dress goods, boots and shoes, books, many hardware lines such as tools, etc., and the lighter groceries can be sent within the twenty-mile zone at a fairly low rate. A fifty-dollar dress for instance weighing a pound or so could be mailed for 5 or 10 cents; a pair of boots weighing two or three pounds may also be mailed at little extra cost, and a cost which, considering the price of boots, would not be excessive. Same applies to expensive tools, etc. With groceries, however, every dealer should aim to have the order going out as large as possible, and still have it remain within the eleven-pound limit, container included. Eleven pounds can be mailed for 22 cents.

TO LAST FOR FIVE YEARS.

This paper has received information on good authority that the present parcel post rates and weight limits will hold good for at least five years. A scale company which is putting a parcel post scale on the market claims that when it was making provision for its "ready-reckoner" weighing device, the question was taken up with the government, and the advice received that the present conditions governing the system would prevail for five years anyway.

There is, of course, always the possibility of a change of government, and it is a difficult matter to say what a new postmaster-general would do. Nevertheless, it looks as if the present government has given its pledge as above stated, and whether there is a change of officials or not it is pretty certain that the pledge will be maintained. The trade should, therefore, make a note of February, 1919, and see that it has a say as to whether alterations should or should not then be made.

Mail Order Houses Active.

While the twenty-mile zone from each post office was made to protect the retail trade yet the mail order houses are not only taking advantage of the system to get after trade in the first zone, but beyond it as well. The following clipped from a city daily paper partially owned by a mail order house will be of interest:

"At some of the larger stores, the parcel post has been used to great advantage, and thousands of parcels are being sent out each day, and the expectation is that the increased maximum will lead to a very marked increase.

"The present time is an off season, the special winter sales are practically over, and there has been no great rush as yet for the spring goods, but when that comes the number of parcels will be decidedly increased.

"Many of these parcels have hitherto been sent by the express companies, as the old postal rate was practically prohibitive, and, it was remarked, that the companies are bound to feel the competition very severely."

This shows pretty well which way the wind is blowing and emphasizes why the retail merchants should get out of parcel post for themselves everything there is in it.

What of the Express Companies?

The question has been raised as to what course the express companies will pursue if they see their trade slipping away. Possibly their rates may be lowered, but whether they are or not the fact must not be overlooked that the three largest express companies in Canada are subsidiary to the three largest railways which have already been granted an increased government subsidy of $1,000,000 for carrying the extra mails under parcel post. To one of us at least, a million is a lot of money.

Complete Postal Rates for Parcel Post

	1st lb.	2nd lb.	3rd lb.	4th lb.	5th lb.	6th lb.	7th lb.	8th lb.	9th lb.	10th lb.	11th lb.
Within 20-mile zone of any post office	.05	.06	.07	.08	.10	.12	.14	.16	.18	.20	.22
Within each provincial zone	.10	.14	.18	.22	.26	.30	.34	.38	.42	.46	.50
Ontario rate to Quebec or Manitoba	.10	.16	.22	.28	.34	.40	.46	.52	.58	.64	.70
Ontario rate to Saskatchewan or Maritime Provinces	.12	.20	.28	.36	.44	.52	.60	.68	.76	.84	.92
Ontario rate to Alberta	.12	.24	.34	.44	.54	.64	.74	.84	.94	1.04	1.14
Ontario rate to British Columbia	.12	.24	.36	.48	.60	.72	.84	.96	1.08	1.20	1.32

Law effective Feb. 10, 1914.
Weight limit, 11 pounds.
Size limit, 2 feet 6 in. long; 12 in. wide or deep.

Above table now represents the complete parcel post rates. Merchants will find it convenient to place it on file for future use.

Mail Order Houses and the Newspapers

Editorial Arouses a Great Deal of Discussion on Subject of Vital Importance to the Retail Merchant—Metropolitan Newspapers Circulated at Low Rate Carry Mail Order Advertising—A Word For the Trade Press.

SOME time ago an editorial appeared in this paper in which the statement was made that mail order interests held stock in certain metropolitan newspapers.

The editorial pointed out that the newspapers carried the advertising of the mail order houses to all section of the country and went on to say:

"The trade of these houses has grown enormously in these cities where these dailies circulate, but in the other cities and smaller places where there are good local newspapers, they have not made the same gains, because the local newspapers are well edited and are loyal to their local merchants and refuse to carry the advertising of the big city store. The only way in which the big dailies can make headway is by cutting their prices. They get $3 to $5 a year in Montreal, Toronto and Winnipeg, but sell in other cities at 50c. to $1 a year. This does not pay for the white paper on which these newspapers are printed, but the heavy deficits are made up by subsidies through big advertising contracts and in other ways, and by the low postal rates. The merchants and newspapers outside of these three big centres should get together and insist that no newspaper should have the privilege of the mails which has a lower subscription price outside than in the centre in which it is published or which sells at less than the cost of the paper used."

This editorial created a wide degree of interest. Not only have many retail merchants realized for the first time that the mail order menace has been fostered in this way, but the newspaper press of the country has become aroused. The newspaper published in the smaller city or town, with a circulation largely local, has a double interest in this matter. The invasion of the cut-rate metropolitan daily threatens the circulation of the local newspaper. But it does more than that. It carries mail order advertising broadcast and thus threatens the local merchant who is the mainstay of the local newspaper.

That this phase of the situation is being recognized, is evidenced by the comments which have appeared in the daily and weekly press.

The Port Elgin Times says, in part, under the caption, "Unfair to small retail merchants."

"The smaller retail merchants throughout the country are at an unfair disadvantage under the present postal arrangements. Because they are subsidized by the big mail order houses, some of the metropolitan dailies are selling their newspapers at outside points at a mere fraction of what the white paper costs. As these advertising sheets go through mails at newspaper rates, it simply means that the government is circulating the advertising literature of the big department stores practically free of charge. Already the mails are almost clogged with these advertising sheets and the situation is becoming steadily worse. The mail order dailies do not actually interfere with the circulation of local newspapers except setting an unfair standard of newspaper values. The unfairness is in a greater degree to the retailers. The effort of some local newspapers to give their town merchants a fair show by refusing to carry department store advertising is offset by the unfair advantage which the postal department gives to the 'dollar' dailies. We believe that the suggestion of Hardware and Metal that the big dailies be forced to charge the same subscription price in the country as in the city, would provide a proper and adequate remedy. This is a matter which should receive the serious attention of the retail merchants in their association."

This is typical of the attitude adopted by the newspapers throughout the country on this vitally important problem.

The Value of the Trade Papers.

If is also evident that the value of the trade press is fully recognized by the daily press. The one great object of the trade paper is to serve the best interests of the trade to which it applies, to work for the advancement of the merchant, to help him in his daily problems, to show him what others in his particular line of business are doing. It follows that the trade press has been a staunch advocate of the value of advertising for the merchant and has thereby influenced many to a course which has brought them increased business.

The good work of the trade press is eulogized in the St. Mary's Journal, as follows:

"Few people realize the value of good trade newspapers to the whole community. It is wrong to imagine that advertisements monopolize the columns of the average Canadian trade paper. Yet the advertisements alone are worth many times the subscription price to the progressive retailer. The trade paper not only contains valuable information in regard to prices and trade conditions, but it is the apostle of good merchandizing, the breeder of live ideas which make for prosperity in the communities in which it circulates. For instance in the advertising field, the trade journalist, who understands the science of advertising and appreciates its value, passes his ideas on to his readers. And he is doing more to educate the retailers of Canada to the value of judicious publicity than any other single agency."

BE A PERSISTENT ADVERTISER.

Success in any branch of work is always the result of persistent, untiring effort, and in probably no other line of endeavor will you find this more true than in your advertising. Only the man who is in advertising to-day and out to-morrow is dubious of its value. To him advertising is more or less a gamble. It remains for the one, who, with consistency, follows the available avenues of advertising to derive the greatest benefit from is influence. Advertising is, to the persistent advertiser, the greatest means of extending his business and good will, assisting his salesmen, getting his goods off the shelves, taking his message wherever the postman or newspaper penetrates.

One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals the densest fog or the darkest night cannot long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot.

Therefore, be persistent in your advertising.

A SQUARE DEAL.

In business watch your competitors. No one man or concern has a monopoly of all the best brains and methods. Let competition be an incentive to your energy and ambition. Give the other fellow a fair, square deal and beat him out on your merits.—Walter H. Coddingham.

"Health, Kindness and Courtesy"

¶ Everything in this world is largely attitude of mind. No day is beautiful to the man who has indigestion or who has spent the night before at a 'smoker.'

¶ If we radiate good health and good cheer we will get these things back in return. Good humor, courtesy and kindness, pay splendid dividends—and a good long while ago someone said: "As ye sow, so shall ye also reap." This is a fact in Nature, and while we are not indebted to any book or particular individual for this fact, it is, however, a truth which we oftentimes overlook.

¶ A grouch begets a grouch. If a man thinks failure, talks failure, contemplates failure, fears failure, then, verily, failure is on the wing and the spiders are weaving their webs over the door of this man's success. These things constitute what is known as personality, and personality is experience and observation put through a refining process. People with splendid and magnetic personalities have little to say about headaches, indigestion, tonsilitis and appendicitis, because these do not constitute personal magnetism.

¶ The generally accepted theory among intelligent folks nowadays is that a large per cent. of sickness is the result of a large per cent. of foolishness—and people not being anxious to advertise the fact that they have been foolish, silly or indiscreet, say very little about their aches and ills.

¶ If a man sets out in life to accomplish certain things and is willing to sacrifice enough to accomplish his particular purpose, there is hardly any probability that his ambitions will be defeated—unless he should come in contact with a street car or a benzine buggy—and so it is a fact that **we get back just about what we give.**

¶ If we assume an attitude of grief and despair, and carry our troubles, domestic or otherwise, to the office, tell our co-workers about our sleepless night, tell our troubles and ailments to our friends, discuss the latest death with our customers, rehearse the sickness of the community, then we naturally put a clog in the affairs of the day; in other words, we have cut off the power and our business gets indigestion, and if this is kept up sufficiently long, we are sent to the hospital and our business is turned over to our creditors.

¶ If we become excited and angry over the little affairs of the day, get into heated discussions and arguments on politics and religion, tell those who are attempting to assist us that we are not feeling well, then we are preparing for the 'toboggan slide.' If we are to become a power, if we are to dominate, if we are to really hold the reins, to take possession or to take advantage of conditions, then it is necessary for us to store up power, and power, mind you, is not stored up by discussing trivial affairs, by rehearsing disappointments and attending funerals.

¶ The world has had enough of the grouch. The trouble with business, and practically the only trouble with business to-day, is a lot of old-fashioned, old-fogy, out-worn notions which should have been discarded about fifty years ago—or, better still, which should have been lost on the morning the stars were set in the sky. There are just enough of these people in business to-day who start an occasional panic and create a feeling of uncertainty and uneasiness in the business field which gives the entire machinery of things a setback, from which it requires a year to recover.

¶ The principal things that each individual should cultivate more and more are kindness, the work habit, and, above all things else, **the Health Habit.** And just remember this one thing, nothing is so very bad after all. It all depends on the way we see it. If we are to insist on being miserable ourselves, let us retire to the hills and live in a cave or in the crater of an extinct volcano, or let us go where we will not come in contact with other people, where we will not be a burden to those who desire to be happy, to those who desire to do useful work. No man can conduct an intelligent conversation with 'a toothache.' No man can write clearly, lucidly and entertainingly on any subject after he has overeaten, oversmoked or overdrank.

¶ Once more, remember the Moral—we need to cultivate kindness, courtesy and temperance in all things, even if we believe in 'prohibition in none'; and remember also a good place for courtesy and kindness is in your business and among your business associates, as these assets can be and are used for business purposes.

Making a Leader of Woven Wire Fencing

Are Merchants Inclined to Overlook Possibilities—Mail Order Firms do Large Business in This Line—Big Difference in Quality of Fencing—Are Retailers to Blame for Losing Business?

Written for Hardware and Metal by H. H. Moore

ARE hardware dealers inclined to overlook the possibilities of wire fence as a leader in merchandising? The question is suggested by the fact that large cash-with-order houses, are using it to advantage in building up a profitable long-distance trade with the customers of the local merchant.

Farmers everywhere are the recipients of much mail order advertising. At this time of year, they have more opportunity to read and consider it seriously than in the busy weeks of advanced spring. Bulk orders are suggested to them in so attractive form that they are inclined to overlook the home merchant, more particularly if the latter is just a little less aggressive than he should be. The result is the mail order house receives a cash order from the farmer who, for the time being, disregards his reasonable duty of giving the local merchant an opportunity to demonstrate what he can do with a hard cash proposition.

It may be, when the farmer makes a purchase in town he asks the merchant, for convenience sake to chalk it down, overlooking the fact that it costs money to carry accounts from week to week or month to month. He gives to the mail order house, which has no particular interest in his locality, the means of running his business in a most satisfactory manner, forgetting that every account on the dealer's books is in a sense a handicap. On the other hand, it would be unfair to say that the fault is altogether the farmer's if the local merchant does not get after the business.

Those who have given any serious attention to the matter will agree that it pays to make a leader of wire fence. It can be handled efficiently without the investment of a dollar if conditions necessitate it. By arrangement with the manufacturer the dealer who has no facilities for carrying an extensive stock has available a reliable source of supply that can be represented locally by sample, from which he can order with absolute confidence as to deliveries, quality, or guage. In fact one dealer declares that he knows of cases where mail order fence, sold as nine-guage, was nearer ten than nine, and for the purpose required was not giving satisfaction. He thus had an opportunity to emphasize with the mail order customers concerned, the importance of loyalty to the home dealer.

For example, a well-to-do farmer, requiring a certain amount of fencing, enters the local hardware store. The dealer has been doing some seasonable advertising, and is in a position to show the farmer, not a catalogue cut, but the real thing. If the purchase is made, and the dealer does not carry stock, he can immediately write, phone, or wire his manufacturer to ship to him at once the quantity of fence specified. He can undoubtedly make a cash proposition in the matter appear attractive to the farmer —more attractive all things considered, such as direct selection, prompt shipment and local responsiblity than is possible to the mail order house which is not dealing direct. At the same time the dealer has the farmer in his store at a time when the fence transaction may lead to the purchase of other articles. He is moreover strengthening the confidence of the farmer in local service as against long-distance dealing.

The mail order concern is, of course, an aggressive advertiser. It floods the country with circulars and catalogues until the local dealer, no matter what his line, must adopt means to counteract the influence thus created. It appears to be imperative at the same time, that the dealer should declare himself and his business to be a little larger than the opinion of the customer who comes to him for the petty requirements of an emergency business and makes him wait for the money while the nice fat orders are sent out of the locality accompanied by the cash.

Are you making a leader of wire fence?

DEATH OF J. B. LEARMONT.

The death occurred at Montreal on Thursday, March 12, of J. B. Learmont, of the firm of Caverhill, Learmont & Co., Montreal. Mr. Learmont underwent a severe operation at the General Hospital on Wednesday, and died the following day.

The late Mr. Learmont was 70 years of age.

THE HEALTHY STORE.

"His store is healthy, that is why I trade there," said my friend, the builder.

"Why do you use the word healthy?" I asked.

"Listen! Dirt is nothing but matter out of its proper place. Disease is nothing but dirt. A healthy body is clean, wholesome, radiant, active, intensely alive. Every fiber is of the right quality, and is in the right place. Every part does the work for which it was created. It is built to serve, to work efficiently, and it does.

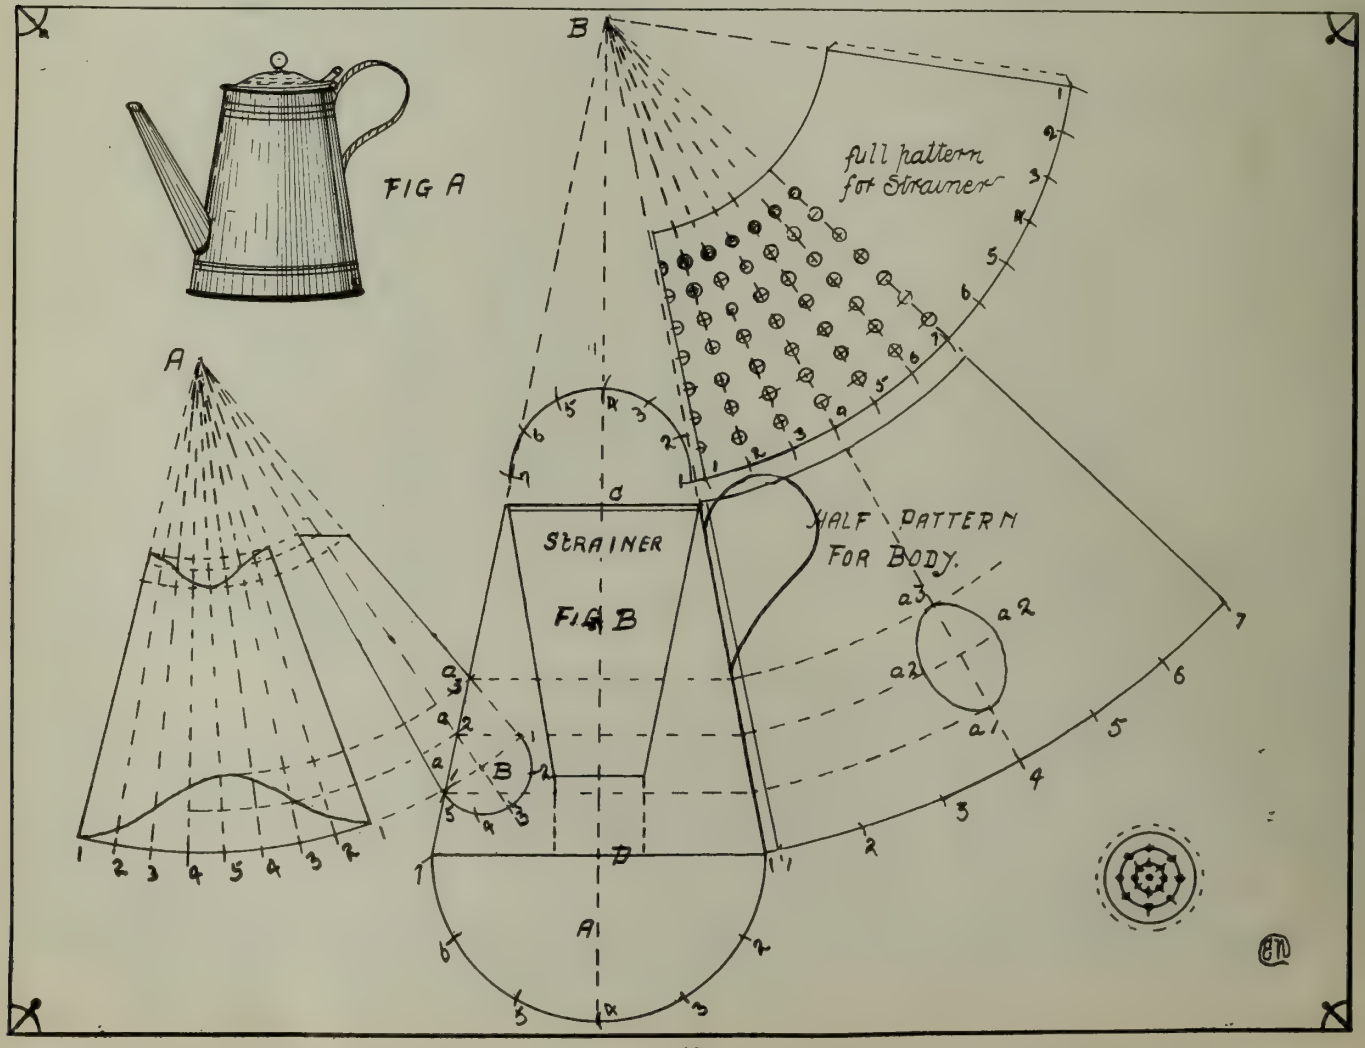
"Now, let's look at that store of Henderson's. The outside is inviting. One would think that he had been trained in one of those high-grade candy stores where they sell bon-bons for two dollars a pound. He has somehow performed the miracle of making uneatable things look appetizing.

"Inside is order. There is a place for everything, and everything is in its place. The salesmen and the customers do not have to stumble over odds and ends. He has made the place like a home that radiates hospitality. Henderson is like the fellow who owns the Mission Inn out in California, and who puts cut flowers and baskets of fruit in the rooms of his guests every day. He makes the visitor feel welcome. When I go in there he makes me feel that he wants to serve me, but that he is not vitally interested in selling me things. There is a difference, you know."

There, you have it! You are interested in one thing—to sell your goods at a profit to the satisfaction of yourself and customer. Healthy, laughing, radiant folks attract friends, make them feel at home, fill them with comfort, and they, without your urging, buy your goods. You want them to buy your goods, therefore you make your store healthy, clean, orderly.

Ingersoll used to say that the time would come when people would see that health is just as catching as disease. Employ healthy clerks, treat them so that they will remain healthy, keep your store clean, wholesome, orderly, make friends of both clerks and customers, and you will find yourself blessed with all the business your are equipped to handle. —Plymouth Products.

Problems For Sheet Metal Workers



THE problem we intend to take up, as will be seen in Fig. A, is one showing how to develop the various patterns required in the make-up of a tea pot with loose strainer. It may, however be stated that we do not show how to make the lid, because there are so many shapes and often where tea pots are made up pressed lids are used, though a lid may be made by cutting a piece of material a little larger and raising it dome shaped with a raising hammer. The tea pots if made up of 14 oz. copper make a very serviceable piece of goods and are capable of withstanding a lot of hard usage. The strainer is a handy addition and with such an attachment, the tea leaves are not apt to prevent the tea from pouring out, as happens with the tea pot which has a strainer fastened in the spout.

We will first draw any vertical line A, then having determined the height and shape of tea pot intersect line A, as shown at CD. Then erect lines which are to give shape of tea pot until they intersect centre line A, making centre B, from which to develop the pattern for the tea pot body. The same rule is followed as is carried out in all vessels of a like shape, take compasses and place point at B, and draw arc for body about three times in length which the body is in diameter, then place compass at D and make half circle as shown, and measure off in equal parts. Transfer these measurements 1, 2, 3, 4, 5, 6, 7 to the arc as shown; this will give a half pattern, then allowance must be made for the seams. The handle is such a simple matter that we do not require to take up space with it. We will now draw the spout, this should be first drawn on to Fig. B, and by erecting the lines as shown a point will be developed A, then divide the bottom measurement of the spout into equal parts and draw centre line from A to B on spout, this being the centre.

Then using A as centre make various arcs as shown from a1, a2, a3. The arc at a1 requires to be three times in length that of the diameter of the spout at that point. Now using B as centre make an arc and divide same into equal portions, transferring these measurements to arc a1. Having done so, draw lines from centre A, down to 1, 2, 3, 4, 5, 4, 3, 2, 1. When this is done repeat the operation at the narrow portion o fthe spout, then it will be seen that these lines will intersect the arcs a1, a2, a3. Then draw the line shown which actually meets at stretchout figures 1, 3, 5, 3, 1. The same at smaller end of spout.

The hole in the body which is required for the spout has now to be cut. This is done by first drawing lines across the elevation of body from a1, a2, a3, and then describing arcs on the pattern of the body to the centre of the pattern. This being only the half pattern we have shown it there, but this hole should be shown in centre so as to have the seam at the back of the tea pot under where the handle is attached. This hole should be cut a shade larger so that the spout may be a tight fit and then peaned over.

We will now pass on to the strainer. This is really developed and may be cut from the same piece of material as the body of the tea pot, the same arcs being drawn, using B as centre, then use the stretchout measurements as divisional lines, drawing several arcs according to the amount of perforations.

Include Interest on Investment in Overhead

Many Owners of Their Buildings Do Not Make Provision for This in Expenses—Why It Should Be There—Example of Successful Manufacturer—An Incomplete Statement.

By Henry Johnson, Jr.

It looks as if this letter might eventually become interesting:—

Hardware and Metal, Toronto, Ont.

Dear Sirs,—Don't know to whom to address this but expect it will fall into the right hands. Took over this store July 1st, 1913, and doing about $40,000 per year (at that rate). Have $2,000 out on good accounts. My expenses are about $85 per week; get very good prices but don't seem to be able to pay bills the way I should. Please give a little advice, for which I am willing to pay.

Was located at ———— ————, before in a small store; did about $14,000 a year and made money every day.

Thanking you in advance,

Very truly yours,

————— ————

But the writer thereof must give me further details to work with. Certain zoological sharks are said to be able to rebuild an entire skeleton if they are given a single spinal vertebra; but I cannot do that, though I have been able to dig some interesting facts from very few figures and meagre details.

So I must ask this gentleman to tell me what he put into the store; what average amount of cash he has on hand; what he thinks he makes on an average in margin; and complete details of his expense account, including everything—such as his own drawing account, or allowance for household expenses, etc. Then I may be able to help him. There will be no charge for the service—it is a matter of mutual helpfulness. He will aid us as much as we can possibly help him.

* * *

Fixed Charges or Overhead.

Some months ago, quoting from a pamphlet issued by an iron and steel making concern, I enlarged on the sound busines policy of charging our own business with interest on its capital investment. So many have questioned the propriety of doing this that I am going to quote again, since the reasoning in that pamphlet seems to me particularly convincing and conclusive. The case is taken of a man who borrows $10,000 with which to go into business, because he has plenty of money but it is invested where he does not wish to disturb it.

He borrows at 5 per cent., therefore pays $500 annual interest and (properly) charges that $500 into expense, or "overhead." After five years he is enabled to pay off the debt and thereafter have $10,000 paid-up capital invested in the business. So I quote:

"Five per cent. on $10,000 was considered a proper overhead charge five years ago; why is it not proper now?

"Five years ago the business was required to earn 5 per cent. in order to pay interest and (we will assume) 20 per cent. to pay on the principal. Then you based your selling price on cost of raw material, productive labor and overhead, which last included $500 interest. Why should you to-day reduce your selling price and profit simply because you are furnishing the capital instead of your creditor?

"Are you not just as much entitled to demand $500 interest to-day from the business as your creditor was five years ago?"

All of which seems so conclusive to me that I cannot improve it. I have charged interest on my capital investment every year before I have figured any net profit at all.

Division of Expense.

What does it cost us to sell goods? The old, long-established English rule is that we shall pay from 6 per cent. to 7½ per cent.—never more than 7½ per cent.—for our wages; but I know of no rule for selling expense.

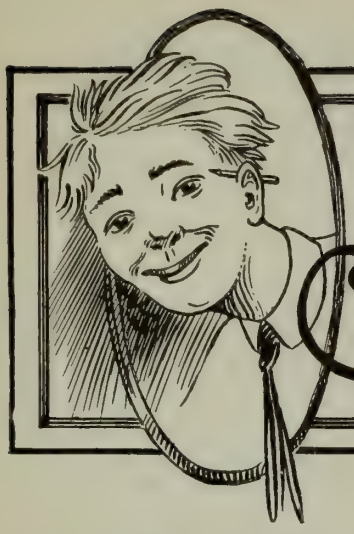
Recently I had occasion to figure what a certain clerk was costing me as a salesman. Dividing his salary by his sales over a period of five weeks I found that he was costing me 3¼ per cent.; but that man's time was not all taken up in selling. Probably not half the time could be so charged. This because he was window dresser, took care of the cracker department, buying all the supplies, and planned and executed a lot of the interior displays. I calculated that the actual selling time did not cost me more than 1¾ per cent. to 2 per cent.

To what account, then, should the remainder of his wages be charged? Plainly, to general expense, or overhead.

In the manufacturing business, work done by a man in turning raw material into finished products is called "productive labor," and, as such, is charged into cost of the various jobs. Other work, such as a foreman superintending a job, goes into overhead. Probably a similar practice would be good in our business. We might properly analyze our expenses so that, as in the case of the clerk mentioned, actual selling time should be charged to wages and the remainder to overhead; because selling is productive and other work is certainly general in its character.

Items of Overhead.

The following is given as a list of overhead charges; and I think it will fit our business, so far as it goes, just as well as it fits the manufacturing business:



1. Stationery.
2. Postage.
3 Telegraph.
4. Telephone.
5. Insurance.
6. Advertising.
7. Fuel.
8. Light and Heat.
9. Traveling Expenses.
10. Taxes.
11. Power.
12. Rent.
13. Repairs.
14. Depreciation.
15. Salaries of employees not engaged in productive labor.
16. Claims allowed.
17. Bad debts.
18. Attorneys and collection fees.
19. Salaries of principals.
20. Interest on borrowed money.
21. Interest on investment.

One more quotation will probably give us enough to think of this week.

"19. An individual, a partner or officer of a corporation, should consider his services worth a fair salary and not feel content with simply his share of the earnings of the business. Therefore, it is necessary and right that fair salaries for prinicipals should be considered in overhead."

Examples for Guidance.

In looking around for guide posts to show us the right way, we should choose the sayings of those who have made a success of their undertakings. The concern from whose pamphlet I quote is conspicuously successful in a fiercely competitive field. So it seems to me that details drawn from its long experience should merit our closest attention. That is why I give those details the space I have here assigned to them.

THE JUNIOR CLERK'S PAGE

HOW DOES YOUR PERSONAL BALANCE SHEET STAND?

Written for Canadian Grocer by C. J. Morris

"Why can't I get on? Look at So-and-So; see what a soft job he's got; just supervises such-and-such a department."

This or a similar complaint is not infrequently heard from the grocery clerk.

"He supervises." But that's the point. Do you know enough to supervise? What are you doing to widen your possibility of usefulness? A man should first set himself to master his own work—that is essential. Then he should set himself to master the work of the man above him. This must be done unobtrusively and tactfully, without creating a suspicion that one is after another man's job.

You do not want to force yourself into the place of any man who is doing his work properly. What you do want is to acquire a full knowledge of the business in which you find yourself, and this you are fully entitled to do.

Can you say honestly that you are studying your business in all its branches? Have you read everything that has been written about it? Have you followed the careers of the men who have got on in it, and are at the top of the tree? Do you know where the things you are handling come from? Do you read your trade paper regularly?

Let us say you are serving out bacon, butter and cheese from Monday morning until Saturday night. What do you know about these goods beyond the weight you give and the price you sell at? Do you know their wholesale prices, and how much profit you are making for your employer?

You may say, "That's not my business; I'm here to sell the goods and I'm a good salesman." If you say this you will remain a salesman—you will never become a manager. How do you think you will ever be able to conduct a business of your own if your interest and knowledge do not extend beyond the work you are doing? Have you ever sat down and tried to make out a trading account of your employer's business, or, at least, of that department in which you are engaged? Have you watched the prices charged by other merchants, and have you considered the reasons for any difference in price you may have noticed? Have you ever noticed whether the sales of any particular article are dropping off or increasing, and have you found out the reason for this? Have you ever made any suggestion to your employer which would increase sales or which would save expense in any way?

If you have done none of these things, just think it over and see how much you have to learn.

Then, again, if you want to get on you must get into the habit of regarding your own self and your own personal affairs as a business concern. Everything can be brought down to a trading account and a balance sheet.

Shall I order two new suits? Credit side—They may help me to get promotion. If I am a traveling salesman my smart appearance may bring me more orders. Debit side—Cost of suits. What you spend wisely on yourself is capital put into the business. What you learn is machinery bought and paid for. Your knowledge and what you have spent on yourself must produce revenue. It is for you to see that you get a balance on the right side. No one will come along to make up any deficit. If your balance sheet shows a loss, you must set to work to make both sides meet and eventually show a favorable balance.

DO YOU READ THE TRADE PAPERS?

The majority of dealers read the trade papers—that is, those papers that refer to his lines of business—because he realizes that the time is well spent, as there are always some new ideas worth having and lots of hints that help him keep up to date and alert to adopt suggestions in reaching out for business.

We sometimes wonder, however, if the boss realizes what a good thing it would be to make sure that his clerks read them as well.—Enterprise News.

REMARKS OF THE JUNIOR CLERK

There are no more to-morrows on the calendar of the chap who does things.

* * *

When a man places his bubble of greatness on exhibition there is always somebody who wants to stick a pin in it.

* * *

If you are too lazy to open the door when fortune rings the bell don't expect her to go to the back door and knock.

* * *

Some men are always getting busy, but they don't keep busy.

VALUE OF ONE ISSUE.

Carlyle, Sask., Feb. 18, 1914.

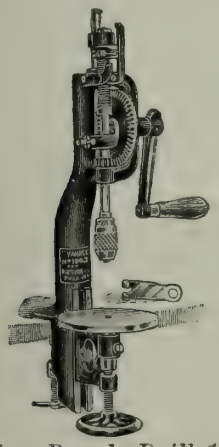
The MacLean Publishing Co.,
Toronto, Ont.

Dear Sirs.—As I have disposed of my business here kindly cancel my subscription to Hardware and Metal. I may say that if I should start in business again, I will certainly not be without Hardware and Metal, as there is sometimes information in a single issue worth many times over the subscription price for the year.

Yours truly,
J. F. McRae.

A man cannot have practical experience in all the lines he is selling perhaps, but he can take advantage of every opportunity to gain experience, and where he fails to get experience he can get knowledge. Nothing will be of greater help right here than the trade papers.

New Goods Offered Canadian Hardwaremen



NEW YANKEE TOOLS.

North Bros., Mfg. Co., Philadelphia, Pa., are offering the trade three new tools which have recently been produced.

The Yankee Bench Drill No. 1003, is made with one speed only (geared 49 to 14) and one turn of the crank gives 3½ revolutions to spindle. The spindle is steel ⅜ inch diameter. All gears have teeth of extra strength and are cut from solid, to run smoothly and accurately, the pinion being of steel. A small lever on arm to left of spindle locks spindle fast to open and close chuck.

The chuck is of steel 1¾ inches long, 1 inch diameter polished and nickel plated, has three jaws of tool steel, hardened and holds round shank, drills up to ¼ inch diameter inclusive. The traverse of spindle (automatic feed) is 1½ inches. The ratchet feeds automatically all drills from No. 54 to ¼ inch. Provision is made by a bracket with arms to throw off ratchet feed at extreme up or down movement, to prevent parts being jammed. The feed screw is of steel, has V thread and fitted with ball-bearing at lower end. All steel parts subject to wear are hardened. The frame is finished in dead black color.

Yankee Bench Drill No. 1005. This is made with two speeds and quickly changed from one to the other by simply moving the shifter on spindle to top notch (S) for slow, or bottom notch (F)

Yankee Bench Drill 1003.

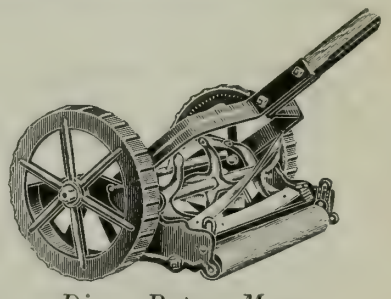
for fast speed. When the shifter is placed in centre notch the spindle is locked fast, to open or close chuck. On the fast speed (geared 64 to 18) one revolution of crank gives 3½ to spindle and on slow speed (geared 14 to 14) one revolution of crank gives 1 to spindle. The spindle is 9-16 in. diameter, of steel; all gears have teeth of extra strength and are cut from solid to run smoothly and accurately, the pinion of slow speed being of steel. The chuck is of steel 2¾

Yankee Bench Drill 1005.

in. long, 1 9-16 in. diameter, polished and nickel plated, has three jaws of tool steel, hardened and holds round shank drills up to ½ in. diameter inclusive. The traverse of spindle (automatic feed) is 2 in. The friction feed brings drill to and from work quickly and ratchet feeds automatically all drills from No. 45 up to ½ in. without risk of breaking. Provision is made by bracket with arms to throw off ratchet feed at extreme up or down movement, to prevent parts being jammed. The feed screw is of steel, has square thread to insure durability, and fitted with ball bearing at lower end. All steel parts subject to wear are hardened. The crank is 6 in. between centres.

The bracket at base of column has a vertical adjustment of 5 in., the slide being 9¼ in. and bracket 4¼ in. long. The table on bracket has an independent movement of 1¾ in. by means of a 4½ in. hand wheel and screw, and can be used for feeding in emergencies, in addition to automatic feed. The table is 6¾ in. diameter, its centre 3½ in. from fall of slide. The lower end of bracket slide on column is 6 in. below base resting on bench; from bench the top of column is 18 in., and from there to top of guide is 4 in. Total height of drill above bench is 22 in., below 6 in., making extreme height of drill 28 in. The distance from end of base on bench to front of table is 13½ in. With table bracket flush with end of column, table all the way down and spindle up, the distance between table and end of chuck is 7½ in., quite a large capacity for a drill of this kind.

NEW HACK SAW BLADE.



A new hard-edge flexible hack saw blade is being put on the market by Simonds Canada Saw Company of Montreal, Que. The chief feature claimed for this blade is that it will do the cutting work of the regular hard blade, and in addition is so flexible that it can be bent a great many times without breaking, thus eliminating a large percentage of the breakage which confronts every user of hack saw blades. The Simonds hard-edge flexible blade is made in the standard lengths and numbers of teeth per inch.

DIXON ROTARY MOWER.

The Clipper Lawn Mower Co., Dixon, Ill., are offering the trade the Dixon Rotary Lawn Mower here illustrated.

The special features claimed for this mower are: the floating bed knife bar, which is swivelled on the tie rod that ties the back end of the mower securely together, and, with the other tie rod at the front, makes a very rigid frame.

At each back corner of the bed knife is a compression spring. These springs press the cutting edge of the bed knife up against the reel or revolving knife, always adjusting itself. The Dixon is

Dixon Rotary Mower.

made with a thrust ball-bearing. The knives are of crucible steel, the lower bed knife being of crucible lip steel. It is claimed that this mower will cut heavy grass without raising the handle and without raising up behind and choking.

Current News of the Hardware Trade

Business Changes.

Bradford, Ont.—Moore Bros. have sold their hardware business to Fraser Bros.

Churchbridge, Sask.—G. S. Breidfjord has discontinued his general store and hardware business.

Halbrite, Sask.—The Halbrite Sheet Tank Co., manufacturers have been succeeded by the Freeland Sheet Tank Co.

Ontario Incorporations.

Frontenac Mica Co., Sydenham, Ont., capitalized at $50,000.

The Whitten Co., Ltd., Bracebridge, Ont., capitalized at $30,000.

The Ontario Rubber & Tire Co., Ltd., head office, Welland, Ont., capital, $750,000.

F. W. Jeffrey & Sons, Ltd., Midland, Ont., capitalized at $50,000, hardware, steamfitters, etc.

The Stoness Anglin Gilbert Mica Mining Co., Ltd., Kingston, Ont., capitalized at $90,000.

Eureka Rubber and Tire Co., Toronto, capitalized at $40,000, to manufacture rubber sundries and accessories.

Drayton, Mills, Ltd., head office, Drayton, Ont., capitalized at $50,000, to manufacture and deal in woodenware, etc.

Canadian Union Metal, Ltd., capitalized at $40,000, head office, Galt, Ont., to manufacture and deal in metal porch columns, trimmings, etc.

New Firm for Guelph.

Guelph, Ont.—The Canadian Metal Products, Ltd., has purchased the buildings and machinery of the Standard Fitting & Valve Co. The new firm of which W. B. Henman, formerly of Cleveland, Ohio, is president, will manufacture high carbon steel structural tubing.

Sold Western Business.

It is reported that the Sarnia Fence Co., Sarnia, Ont., has agreed to turn over its entire Western business to the Grain Growers' Association.

Death of W. W. Janney.

The death occurred at Galt on Mar. 7, of W. W. Janney, who was associated with the Shurley, Dietrich Co. saw works since its inception. The deceased was for many years general superintendent of the factory and latterly became a member of the firm.

Death of Jas. M. McKay.

Harriston, Ont.—The death occurred here recently of James M. McKay, who for 35 years was associated with McColl Bros. & Co., oil dealers, Toronto, first in the capacity of traveler in Western Ontario, and latterly in charge of the company's plant at Harriston. He was a former mayor of the town and also had interests in several of the town's industries.

Caught by Wire.

Brantford, Ont.—John Schultz, of Schultz Bros., had a narrow escape from death when driving his automobile. A gang of electric light linemen had strung a wire across the street, and Mr. Schultz was unable to stop his auto before reaching the slack wire. He suffered concussion of the brain, and the muscles of his neck were severely strained.

Consolidation of Hardware Firms.

A transaction of interest to the trade is just announced, in the consolidation of the Wrought Steel Butt Hinge and Builders' Hardware Departments of the Acme Steel Goods Co., of Chicago and the line of Shelf and Builders' Hardware manufactured by the Watrous Mfg. Co. of Des Moines, Ia. The combined line will be manufactured and marketed by the Watrous-Acme Mfg. Co., which will maintain plants in Des Moines and Chicago, with general offices at Des Moines. A Chicago sales office has been established at 180 North Dearborn St., and butt and hinge orders will be handled there as heretofore.

Western Notes.

J. W. Peart, of Peart Bros. Hardware Co., Regina, was in Winnipeg last week calling on the trade.

H. Conley, sporting goods buyer of the Ashdown Hardware Co., has returned from a trip East.

R. A. Dickie, of Dickie & Anger, Govan, Sask., and R. L. Mitchell, Ninga, Man., were in Winnipeg last week.

William Chambers, of Hamiota, Man., called at Winnipeg last week, accompanied by Mrs. Chambers, on his way East.

The spring convention of the Miller-Morse Hardware Co. salesmen will be held during the first week of April at the head office, Winnipeg.

George D. McCosh, of the Brock Hardware, Brock, Sask., called at Winnipeg last week on his way from the East. Mr. McCosh is Mayor of Brock.

F. S. Lamson, manager of the Ashdown Hardware Co.'s heating and plumbing department, has returned from a business trip South.

Regina is taking up the paint-up, clean-up campaign. Harry Graves, of the Regina Trading Co., is chiefly instrumental in getting the campaign started.

H. Flowers, who has been representing the Marshall Wells Co., Winnipeg, in the cities of Saskatchewan, has been appointed manager of the Somerville Hardware Co., Edmonton.

Industrial Notes.

Ingersoll, Ont.—It is reported that Wilson & Short, Detroit, will purchase the Standish Mfg. Co. plant and install equipment for manufacturing automobile specialties.

Winnipeg, Man.—A site has been purchased at St. Boniface by the Wm. Galloway Co., who contemplate the erection of a plant to manufacture agricultural implements.

Windsor, Ont.—Ratepayers recently voted favorably on three industrial by-laws. Two of the firms benefited will be the Ideal Concrete Machine Co., and the Dowsley Spring and Axle Co.

Personals.

A. Pall, Fort William, was a business visitor in Toronto this week.

Jas. Dandy, Streetsville, was a business visitor in Toronto this week.

Mr. Edwards, Sales Manager, Brandram-Henderson, Montreal, is now on a business trip to Winnipeg.

A. M. Marshall, National Sewing Machine Co., Bellevidere, Ill., was calling on the local trade last week.

E. A. Loomis, Turner Seymoure Mfg. Co., Torrington, Conn., was calling on the Montreal hardware trade during the week.

H. E. Johnson, Toronto, representing Hupfeld, Ludeking Co., Montreal, has started on a trip to Winnipeg and the coast.

Mr. Pratt, President of the Pratt Manufacturing Company, Coldwater, Michigan, has been a visitor to Montreal this week.

Frank Conroy, of Mathews and McLean, of Souris, P.E.I., who has been in the hardware business for the past 35 years, recently called on the Montreal hardware trade, before departing for home. His visit was certainly appreciated by the trade here in particular, as he had just come from the Royal Victoria Hospital of this city, where he had undergone a surgical operation. His many friends in the trade all wish him a speedy recovery and hope that he will be able to take up his work again with renewed vigor.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Business in hardware lines has picked up considerably since the first of the month. In the metal markets no change has taken place and quotations remain stationary, but firm in most cases.

New quotations in binder twine have been issued.

Carriage and machine bolts have declined in price at Toronto.

Paint markets are firm. Gasoline and coal oil are slightly lower at Toronto. Spring orders are being shipped in large numbers and a much better feeling exists in trade circles.

MONTREAL, Mar. 11.—There is a must better feeling in the market this week and shipments are quite heavy to outside points. Country merchants seem to be ordering general hardware in quantities and it appears that they want them shipped in before the roads begin to break up as the amount of business which is passing at the present time is considered very good for this time of the year.

It is the general opinion of many jobbers here that the people in the country are getting outside more now that the weather has turned milder, as the orders being received would lead them to believe that the stocks in the country are getting low.

As to collections: There is not much change from one week ago and as stated then, the east is showing no serious effect from the tightness of money, as accounts are being met pretty well. There are, of course, some dealers who have been obliged to extend credit to customers who never asked for such accommodation before, but this is only considered to be temporary embarrassment and the assistance given will no doubt patch matters up.

Roofing.

There is a great deal of roofing being shipped to all parts of the country at present. All jobbers are sending out shipments daily and the volume of business in this line is large. All country dealers are ordering in quantities. It looks to be a big year in this line.

Refrigerators.

During the week there has been a very noticeable movement in refrigerators, and they are being shipped to all centres. It is the opinion of the trade here that country dealers want to get these in before the roads break up.

Enamelware.

The business at present is rather dull and shipments are conspicuous by their absence. It must be said though, that the demand kept up pretty well during the winter and it is only during the past week or so that there has been any great dropping off.

Brushes.

There is a general increase in the demand of all lines and dealers throughout the country seem to realize that present conditions warrant an increase in the prices now quoted. As explained last week most of the United States manufacturers have advanced their quotation this year and it would not be at all surprising to see the Canadian houses follow along the same lines. The conditions in Mexico are such that the market for rice root is very firm and until that eases off to some extent there does not appear to be much chance of any great change. At present the Mexican outlook does not favor any immediate change in this condition.

Builders' Hardware.

There is a better movement in these lines at present which is thought to be the result of the country merchants from whom most of the orders are being received wishing to get their supplies in before the roads break up. There is very little business coming from the city dealers in this branch of the business.

Dustless Mops.

That the dustless mop has come to stay is almost a certainty, as the demand has once more revived and is quite heavy. Of course, there would naturally be a demand at this time for such lines in view of the fact that retailers are getting in shape for the spring house-cleaning trade, but the orders which are being received at present would lead one to believe that the retail trade are not only looking forward to this business, but are also stocking up for further demands.

Spring Deliveries Moving.

There has been a general movement in the lines which make up the usual spring orders. This is due to the milder weather as the trade seem anxious to get these in before there is any change in the condition of the roads which are good at present.

Driving Tools and Chain.

The movement in these lines is getting heavier each week and apparently the lumber magnates are getting in line for the driving season which will soon open up. The lines most called for are chains, boot calks, cant hooks, etc.

Sugaring Season Approaching.

It seems that those who are interested in the maple industry are preparing for the sugaring season which starts in in about ten days or two weeks. The lines most called for are sap spouts, bits and pails.

The following 1914 quotations have just been issued on binder twine:—

650 ft.twine	13½c lb.
600 ft. twine	11c lb.
550 ft. twine	9¾c lb.
500 ft.twine	9¼c lb.

⅛c per lb. allowance on 5 tons and over.

¼c lb. allowance on 10 tons and over.

Delivery allowed on 300 lbs. and over.

In comparing these quotations with those of last year it will be seen that 650 ft. twine is 1 cent per lb. higher; 600 ft. twine remains the same; 500 and 550 ft. twine are ¼ cent per pound less. It is claimed that the advance of one cent per pound on 650 ft. twine has been caused by the exceedingly high price and scarcity of manila fibre of sufficent length and quality for making the 650 ft. twine.

Metal Markets Show No Change.

In the metal market for the week there does not seem to be much to report as business is much the same as in former weeks although there are some dealers who report a better demand all round.

Tin.

The price quoted this week by local dealers for quantity lots is 40.50 per 100 pounds. The market is not rushed and the business now passing is thought to be quite seasonable.

In the London market to-day the quotation is given as £173.10 for spots while futures are quoted at £175.7.6. The market is reported easy at these figures. New York is quoting the same as one week ago, namely, $38.00 and $38.20 for wholesale and small lots respectively.

Spelter.

The local quotation of 6.25 per hundred has not changed from last week as the conditions are unchanged.

London quotes £21.10, which is an advance from last week of 2s. 6d., while the New York quotation of $5.17½ is 12½ cents under that of one week ago.

Lead.

There is a steady feeling on the local market this week and the quotation given last week of $5.40 still stands. London is quoting £20. or an advance of 2s. 6d. over one wee kago, while the New York price of $3.87½ is the same as that quoted one week ago.

Copper.

Locally there has been no change from one week ago and the price, $16.75, given then, is still quoted.

The London quotation is a little under that of one week ago and is given as £63.15 for spots while 64.5 is quoted for futures. The New York quotation is also down 25 cents and is given as $14.50.

Antimony.

The local quotation this week is under that of one week ago by 75 cents and is given as $9.00 per 100. The market is weak at this figure.

Iron.

There has been no change in the local quotation for domestic iron and it is given as $19.00 again this week.

The London market, however, has gone up a few points and is given this week as £20.10.7.

Gas Stoves Beginning to Move.

There is a little brighter market to report this week, although conditions are yet rather dull. Gas stoves have started to move although the volume of business is not yet great. This business will start in another couple of weeks in real earnest. There is nothing else to report in the market.

TORONTO.

TORONTO, Mar. 12.—Since the first of the month there has been a big improvement in business with the hardware jobbers. The improvement is noticed principally on account of the many shipments of booked orders that are being sent out. It is expected that from now on there will be a steady improvement in business, and that the real quiet season is over.

The Metal Markets.

Business in the metal markets is not any too brisk at the present time, although conditions are sound and gradual improvement is looked for. Buyers are still cautious, and buying is of a hand-to-mouth variety.

Quotations are unchanged from last week. Lead continues firm, and it is not expected that there will be a decline until after the Mexican troubles have been settled.

During the past week some members of the House of Commons have been urging that a bounty is needed to revive the steel industry of Canada. One member proposed a bounty equivalent to one dollar a ton upon pig iron smelted from Canadian ore. He pointed out that there were vast deposits of low-grade ores in Canada which required an expenditure of from 65c. to $1.10 per ton to bring them up to the efficiency of the higher grades of ore which abounded in the United States.

Other speakers spoke about the necessity of greater encouragement to the steel and iron industry in Canada.

Finance Minister White pointed out that bounties had been paid upon pig iron produced from Canadian ore from 1883 to 1911, and yet last year only about 300,000 tons of Canadian ore had been produced, valued at about $600,000. The Canadian ores were low-grade and refractory, and, as has been stated, it required from 65 cents to $1.50 per ton more for treatment than in the case of American ores. Unless, therefore, some improved processes were resorted to for smelting low-grade ores, the proposed bounty would have to be paid indefinitely. He was in hopes, however, that some improved processes now in use would soon greatly improve the value of the Canadian ores. Our production of pig iron and steel had increased enormously, but our output of iron ore scarcely at all.

The minister said he would carefully consider the suggestions made, both as to increasing the duties on pig iron and as to granting a bounty upon iron smelted from Canadian ore. There was some demand for a higher duty upon pig iron. The duty at present was $2.50 per ton. He would not venture to say whether this was too high or too low, but if it was increased, say, $1 per ton, that would mean a 7 per cent. increase upon their raw material for the manufacturers of agricultural implements, the automobile manufacturers, and many other manufacturers. It was difficult, said he, to change the duty on a basic raw material like pig iron without a general revision of the tariff.

Decline in Carriage Bolt Quotations.

Carriage bolts are being quoted 10 per cent. lower than last week. Carriage bolts ⅜ in. diameter and under are now quoted at 65-10-10 per cent. Carriage bolts 7-16 and under are now quoted at 52½-12½-10 per cent.

New Quotations on Twine.

1914 quotations on binder twine have been issued, and appear in the accompanying panel. No change has taken place in rope quotations, but developments are expected.

Wood Screws.

Wood screws are in fair demand, especially flat and round head bright, the two lines in which there has been a

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Wiping Solder	25 to 27c	lb.
½ and ½ solder	25 to 27c	lb.
Pattern Aluminum	23 to 24c	lb.
Ingot Aluminum 99% pure	19 to 20c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	15¾ to 17¼c	lb.
Tin	41 to 43c	lb.
Lead	$5.65 to $5.85	
Tinkers' Bar Solder	28 to 29c	lb.

recent reduction of 10 per cent. Present quotations are as follows:—

Flat head, bright, 85-10-7½-10-10 per cent. off list; oval head, bright, 80-10-7½-10-10 per cent. off list; round head, bright, 80-10-7½-10-10 per cent. off list; flat head, brass, 75-10-7½-10 per cent. off list; oval head, brass, 70-10-7½-10 per cent. off list; round head, brass, 70-10-7½-10 per cent. off list; flat head, bronze, 70-10-7½-10 per cent. off list; oval head, bronze, 65-10-7½-10 per cent. off list; round head, bronze, 65-10-7½-10 per cent. off list. F.O.B. Hamilton, Toronto, and Montreal, with freight equalized thereon. Terms:—2 per cent. cash 30 days, strictly from date of shipment, or 90 days net approved credit.

Nails and Wire.

With the breaking up of winter and the more active commencement of spring building operations, the demand for nails is becoming more pronounced. Toronto quotations are still 2.15 base. No change has taken place in quotations on wire.

Booked orders of poultry netting are now being shipped. Booking in this line has been very heavy for spring delivery. Quotations are shown in current market quotations.

Stoves and Furnaces.

Business in the stove line is fair. As far as oil cook stoves are concerned, business is booming, as spring orders are now being filled. Thousands of oil cook stoves were disposed of by retail hardwaremen last season, and it is expected that the record for sales will be broken this year. There is a more pronounced demand for gas ranges and plates, and within a few weeks there will be an active demand for these lines.

Brass Goods, Fittings, Etc.

Manufacturers of brass fittings, etc., report that the volume of business passing is very satisfactory, and that the outlook for future is good. No price changes have taken place.

The Building Trade.

With the near approach of spring and the breaking up of winter, the outlook in the building trade is brighter. Quite a number of new buildings are now under way, and as the season advances there will no doubt be a steady improvement.

Cement, Etc.

The demand for cement is rapidly increasing, and with the breaking up of winter is becoming more pronounced. Toronto quotations are as follows:—Portland cement, $1.55 per barrel f.o.b. cars, and $1.63 per barrel in car lots delivered.

Less than car lots the quotation is $1.85 per barrel delivered.

WINNIPEG.

WINNIPEG, Mar. 7.—Business has picked up wonderfully during the week-end. Wholesalers who usually have a holiday on Saturday, were working the whole day, owing to an inrush of orders from the West for spring good. Wire nails are enjoying a brisk demand, indicating that the farmers are thinking of fencing and repair work outside. Dealers have been checking their stocks and have found them low, hence the inrush of orders.

There has been a very active demand for blue-stone and formaldehyde, wire fencing, bolts, and all that goes with the spring trade. There has been a good sale of horse clippers. Jobbers realize that country dealers are inclined to hold their stocks down, and are not overloading.

Paints, Etc.

Things are brightening up in the paint trade out West. Considerable sorting business is coming in, and dealers are getting anxious for their spring goods. A bigger interest is being taken in paints than ever before, and hundreds of dealers are writing to manufacturers and jobbers for literature on how to push their paints, for color schemes, and quite a number are having special paint stationery printed. Considerable interest is being taken in the "paint-up, clean-up" campaign being organized, and Regina is one of the cities that have already got it under way. This when properly organized, should result in a much larger business.

Putty.

For some time there has been considerable cutting going on in the West in the price of putty. This has now disappeared and quotations are as follows:

	Per cwt.
Putty, in barrels, bladders	$3 10
Putty, in 100-lb. drums, bulk	3 10
Putty, in 50-lb. drums, bulk	3 20
Putty, in 25-lb. drums, bulk	3 20
Putty, in 12½-lb. tins	3 60
Putty, in 10-lb. tins	3 60
Putty, in 5-lb. tins	3 60

Turpentine.

The price of turpentine in Savanah, Ga., market has been fluctuating recently. There would be an advance one day, which would be lost the next, and the price in Winnipeg remains the same at 80c. per bbl.

Linseed Oil may be expected to advance before long. Prices of white lead will be fairly solid for the next three months.

CONFIDENCE IN THE STOVE TRADE.

F. W. King, manager of the Copp Stove Co., Fort William, Ont., who do a business extending from Sudbury, Ont., to the Pacific Coast, during an interview with the Western editor of Hardware and Metal last week, expressed his confidence that the stove and furnace business during the coming year in Western Canada would revive. He stated that business during the first part of last year was exceptionally good, but that in the latter half it was very poor. Hardwaremen in the West are still holding on to their dollars fearing to launch out, but Mr. King believes now that seeding has commenced, and prospects for a good crop are assured, that orders will shortly be placed. He drew attention to the fact that most manufacturers of stoves and furnaces had large stocks on their hands which must be sold before manufacturing on a large scale can be started again.

AN ADVENTURESOME TRIP.

Creelman McArthur, vice-president and managing director of Brace McKay & Co., Summerside, P.E.I., attended the recent Ottawa Exhibition and Convention, accompanied by the firm's buyer, Mr. Forbes. Mr. McArthur was greatly impressed with the way the Exhibition and Convention was conducted. Several difficulties were encountered in getting to Ottawa, and the trip was not devoid of many exciting features. Mr. McArthur described the trip as follows:

"Left Summerside, P.E.I., Wednesday, February 11th. Went on board S.S. 'Minto' same night. Left Georgetown for Pictou Thursday, 7 a.m. Arrived Pictou following Sunday, 2.30 a.m., after having been in the ice on board S.S. 'Minto' till Saturday, 9 p.m., when S.S. 'Earl Grey' came and took us off the S.S. 'Minto.' After having been released from ice, followed 'Earl Grey,' and when the latter struck heavy ice the S.S. 'Minto' came on her, striking a glancing blow, which caused quite a commotion on board, and not a little damage. Twenty below zero, and several of the crew of S.S. 'Minto' got frost-bitten trying to get ship clear. Second day was milder, and we enjoyed a good skate in the Straits. Saturday night, finding it impossible to reach Pictou with boat docked in the ice, and shortly afterwards a terrific storm arose and lasted till midnight, when both boats again attempted to make Pictou, the 'Earl Grey' docking at 2.30 and the 'Minto' at 4 a.m. Hotels full at Pictou. Got team, drove and walked to New Glasgow. Special train took us to Pictou, where we made connection for St. John, N.B. Between Scotstown and Bury, on C.P.R., two freight trains collided, and we were delayed some hours, finally driving to Bury, and eventually reaching Montreal and Ottawa, arriving latter city 1 a.m. Wednesday, 18th. Were royally entertained by fellow-hardwaremen. Although our trip was rather adventuresome, it was worth while going through to be present at Ottawa.

Methods of Retailing Paints and Varnishes

Push Paint Sundries During Spring

Paint Specialties or Sundries Yield Splendid Profits—An Easy Line to Sell if Shown or Demonstrated—Window Displays Will Also Sell Special Goods.

WITHIN the next two weeks the house-cleaning campaign will be on in full swing. With the arrival of spring there comes a demand for many of the lines carried in the paint department. Customers will visit the store and ask for many of the lines that are usually called for during the house-cleaning season. Business will be brisk and there will be danger of merchants overlooking the possibilities of sales in the line of paint sundries or specialties.

The sale of paint sundries or specialties in the paint department offers a large field for the hardware dealer who is willing to make a special effort to push these lines. Some dealers are content with the sales of what they commonly call prepared paint and neglect big opportunities in the sale of stains, enamels, and special finishes. The demand for paint specialties is growing rapidly and the dealers and public alike are beginning to realize that there are hundreds of articles that can be re-finished and made to look almost like new by the application of paint specialties. The fact that many exclusive paint stores are doing a large business during all seasons of the year is creating a tendency on the part of hardware dealers to try and increase sales in their paint department.

All the leading paint manufacturers make full lines of paint specialties on which the dealer is allowed a good margin or profit. It has been the experience of paint travelers that their chief difficulty is not in getting a dealer to stock the specialties but to get him to push the goods and move them after they have been put into stock.

A merchant should stop to consider that he can very often make almost as much profit in a 35c can in the specialty line as he can on a 65c can of what is commonly called ready-mixed paint. The percentage of profit on sales of sundries is much larger than on the sales of ordinary paint. The majority of specialties are made for use in the home and are gotten up by the manufacturers in attractive packages at very reasonable prices. Good advertising matter and samples are supplied and the dealer is offered any reasonable assistance by the maker. The live merchant will realize that he can make large profits on specialties by pushing them and that it need not interfere with selling his other lines of paint.

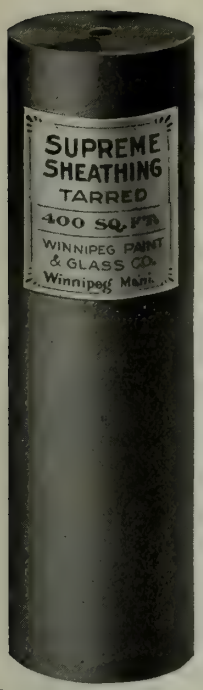
Instructing Salesmen.

It is very important in selling paint specialties that the specialty sold is adapted for the work on which it is to be used and, as many of the paint specialties may be used for a variety of purposes, it is a good plan for the dealer to request the paint traveler to instruct his clerks regarding the nature and use of each specialty. A well-informed sales staff will gain the confidence of customers by being able to answer promptly and correctly any questions that may arise regarding the various uses of the goods.

Some of the Lines.

There is a large sale for bath and other enamels, varnish and floor stains, wall and floor varnishes, wagon and buggy paints, aluminum and gold paints, oil stains, hardwood floor and linoleum finishes, etc., on which a good profit is afforded the dealer and in which almost every householder is interested if attention is drawn to the goods. An old piece of furniture, linoleum, or any other article if refinished with a good specialty and placed in a store window or in a prominent part of the store will attract a great deal of attention. It is usually considered a good idea to leave a section of the article in the old state and customers can see the difference in appearance when the paint or varnish is added.

How Enamel Was Sold.

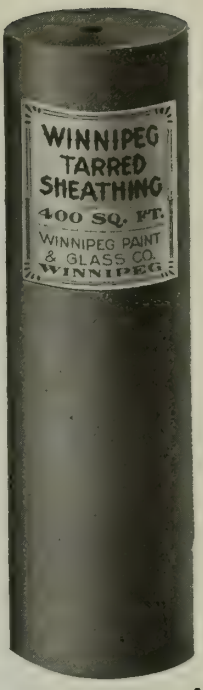


As an illustration of what a little enthusiasm will do, we will cite an instance that occurred a short time ago. A traveler sold a dealer in a large town one gross of stove pipe enamel in cans to be sold at 15c each. The goods arrived and were placed on the shelves. It being the fall of the year, the dealer had a certain number of calls for enamel but on looking at his stock a short time later he discovered that he had the larger part of the gross on the shelf. He then came to the conclusion that the traveler had loaded him up with stove pipe enamel and did not appear backward in saying so. A new clerk suggested that he allow him to put in a window of the pipe enamel. After gaining the dealer's consent, the clerk procurred about ten lengths of rust-spotted stove pipes and varnished one-half of each pipe. He arranged a neat display in the window and used the stove pipes to good advantage in the display. He also had a couple of lengths of pipe in the store where they could be shown to customers. The dealer was induced to mention in his ad. in the newspaper that he was selling Blank's stove pipe enamel for stove pipes, registers, etc., for 15c per tin. The clerks entered with enthusiasm into the task of reducing the stock of pipe enamel and by personal contact, along with the aid given by the displays, they were able to clear out the whole stock of pipe enamel in a very short time. A tray of brushes was also placed near the stock of enamel and in many cases a 10 or 15c brush was sold at the same time.

During the spring many people wish to renovate their gas ranges, oil stoves, pipes, etc., and a large quantity of pipe enamel can be disposed of.

Methods of this kind may be applied to a large number of specialties and, in the majority of cases, the results will be in proportion to the enthusiasm shown by the merchant and his men. If paint specialties are allowed to remain on the shelves until asked for by the public, the dealer will find that his paint sales will be very small compared with what they would be if he made an enthusiastic attempt to demonstrate the lines and show them to the public.

The majority of householders have no idea that they can re-finish or redecorate many articles around the home at small expense, and, if their attention were drawn to the matter, they would be very much interested and in many cases would turn out to be good paint customers. A dealer or his salesmen should not attempt to push a line of paint in which he has not the strictest confidence as to quality and satisfactory results as the right kind of enthusiasm will not be shown.



The specialty lines of paint and varnishes afford too large a field to be treated lightly by the hardware dealer and a good campaign started at the present time will increase paint sales wonderfully during the coming spring.

BUILDING PAPERS

Known to Good Builders Everywhere

You cannot afford to sell anything but the best if you are to retain the business of your customers. Although only a small item in construction cost it is essential that the building paper used should be heavy, tough, and durable. There is no better paper made than these two brands.

Spring Season is Building Season

More building paper is sold in the Spring season than at any other time of the year, and the aggressive hardware dealer will have his stock in a satisfactory condition to handle this business. Purchasing through us you have the additional advantage of being able to order from any one of our five branches, and thus save considerable time and freight charges.

Secure our price list. Then order from our nearest branch.

BERRY BROTHERS' VARNISHES

For longest wear and easiest care, recommend Berry Brothers' Varnishes for your customers' floors, woodwork and exposed outside surfaces. They protect the wood perfectly—they keep it looking bright and handsome—make the work of cleaning easier, therefore less expensive.

Berry Brothers' products have stood for 56 years as the *standard* of high-grade varnishes. They are the result of careful, scientific manufacturing methods, so they give lasting satisfaction.

There's a Berry Brothers varnish for every need. The following principal products are best known and most widely used in ordinary finishing or refinishing work:

Liquid Granite—A floor varnish whose name suggests its wonderful durability.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Wood Finish—For the finest rubbed (dull) or polished finish on interior woodwork.

Luxeberry Spar Varnish—(It's waterproof)—widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

If you do not handle Berry Brothers' Varnishes, write us direct for information.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, March 11.—In the paint trade for the week conditions have not shown much change. There is, however, a much better demand for immediate shipments, and orders are coming freely at present for these. There was quite a quantity of paint shipped on the first of the month, and the very fact that all, or practically all, orders are being received at the present time leads one to think that the retailers throughout the country are getting in their stock before the roads break up. There is a much better feeling as regards collections in the country, and all country merchants are meeting their paper faultlessly. This, however, cannot be said as regards the city merchant, who seems to be a little backward. The larger centres are feeling the present depression more than the smaller towns.

White Lead.

There is the same feeling in this market at present, and the demand is quite satisfactory all round. Pig lead is quoted at £20 in London to-day, and, as this is the same price as last week, there does not seem to be any change in that market. The same quotation is given this week as that of last; namely, $8.05 for ton lots, while $8.25 is quoted for less than a ton. The price is open for sales of larger quantities.

Linseed Oil.

There is no change in the quotations this week, and the demand is practically the same. The milder weather has helped the demand a little.

1 to 4 barrels	60c per gal.
5 to 9 barrels	59c per gal.
10 to 25 barrels.....	58c per gal.

Boiled Oil—

1 to 4 barrels	63c per gal.
5 to 9 barrels	62c per gal.
10 to 25 barrels.....	61c per gal.

With open prices for carload lots.

Prepared Paints.

As stated above, there is quite a quantity of paint going out at present, and local dealers are also holding quite a number of orders for delivery April 1st. One of the local firms claimed that their shipping department was working overtime, and as the rest all claim the best year in their history, it can be easily seen just what paint is going forward and on order at present.

Glass and Putty.

There is not much change in the situation locally, and the volume of business passing at the present time is only seasonable. As stated last week, the local firms do not expect to see any dearer prices for glass this year, and, as business will not start to pick up until the 1st of May, there is not much change looked for in this market.

Putty is in much the same condition, and there is no change in either the demand or prices from last week.

Bulk, in casks....$2.30 per 100 pounds.
Bulk, in drums.... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.
With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

Although there have been continual fluctuations down South all week, there is no change to report in this market, and the price given last week is unchanged, as is also the demand. Local dealers are unanimous in their quotations this week, and all are giving 65 as their price, while orders for more than barrel lots are open.

Gasoline.

The demand is picking up a little each week, and will continue to do so from now on, as the roads are getting better, and that means more gasoline. The same prices are in effect.

25½c per gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21c for 100 gallons and over.

Benzine.

The demand is possibly picking up a trifle, although not very heavily. The demand is quite steady at all times, although the spring will see a little freer movement in this line. The following prices are still in effect:—

Barrel lots in wood are quoted at 23 cents per gallon, in steel and drums 20 cents, while local tank wagon price is 19 cents per gallon for 100-gallon lots and over.

TORONTO.

TORONTO, Mar. 12.—Business in the paint line is showing steady improvement. Since the first of the month there has been a decided improvement in business, and booked orders for spring are being shipped in large numbers.

No price changes have occurred during the week, although quotations are firm. Turpentine looks like a good buy at present prices.

Gasoline and coal oil have declined ½ cent per gallon.

Linseed Oil.

A slight improvement is reported in the demand for linseed oil. The following prices are still ruling:—

Raw—

Single barrels	65c.
3 to 5 „	63c.
6 to 9 „	61c.

Boiled—

Single „	68c.
3 to 5 „	66c.
6 to 9 „	64c.

Oil in less than barrel lots 7 cents per gallon. Cans are charged for—5-gallon, 50 cents each, and 10-gallon, 75 cents.

Turpentine.

Reports from the South indicate that turpentine is showing considerable firmness, and Toronto dealers consider turpentine a good buy at present quotations, which are as follows:—

Single barrels, 67c. imp. gallon.
2 to 4 „ 66c. imp. gallon.
5-gallon lots, 74c. gallon.

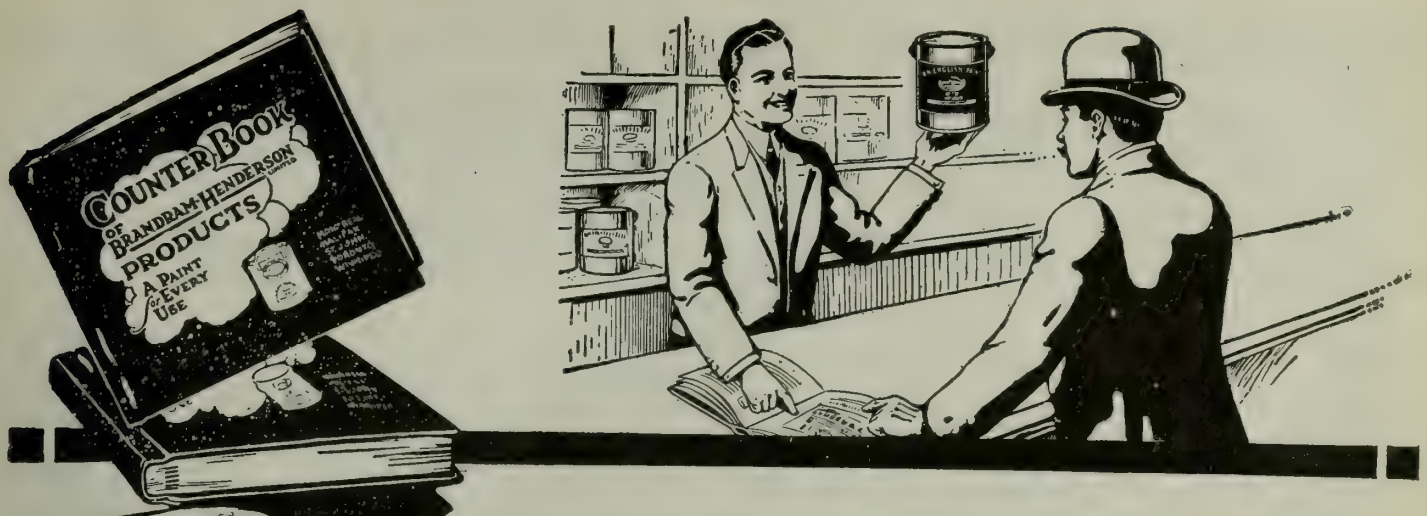
White Lead.

Quotations on lead are firm and unchanged, and the demand will soon become more pronounced. It is felt in paint circles that lead will remain firm for some time. Toronto quotations are:

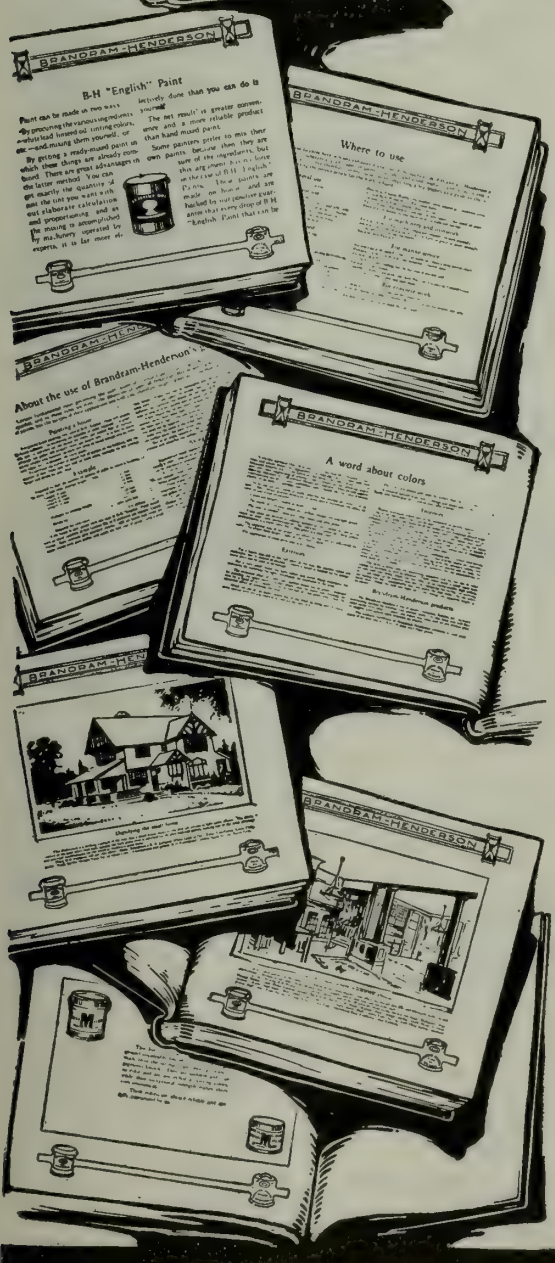
5-ton lots, $7.90 per 100 lbs.
1-ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Glass, Putty, Etc.

No change has taken place in Toronto quotations in glass, and the ruling prices are 20 per cent. off list shown in current market quotations. No change has taken place in quotations on putty.



Prepared Paints.



With the opening of spring there will be a big demand for ready mixed paints. The outlook at present is very favorable, and it is expected that there will be a large volume of business passing in this line during the next few months.

Berlin, Ont.—The Rutenbur Co. are building a factory for the manufacture of automobile engines.

Vancouver, B.C.—A site has been purchased on Burrard Inlet by the Imperial Oil Co. who will build an oil refinery.

Coquitlam, B.C.—Representatives of Canada Sabulite Co. are negotiating a site for a plant to manufacture explosives. The company have factories in London, Eng., and Belgium.

Our new Counter Book is the biggest selling help

we have ever furnished our dealer friends. This book is part of our big 1914 advertising campaign.

It is a practical help for every day and every hour, a silent salesman, covering every detail of B-H products, together with decorative color schemes, color cards and a mass of miscellaneous information useful to you and your customers alike.

B-H "ENGLISH" PAINT

the paint made according to this formula, for all paints that can be made on a white base:

70% Brandram's B.B. Genuine White Lead
30% Pure White Zinc
Ground in Pure Linseed Oil

comes in for a big share of attention. The Counter Book tells how it is made, how and where to use it, suggests color schemes and helps you in every way to convince the buyer of the merits of B-H "ENGLISH" Paint.

It supports the good judgment of the customer who knows what he wants in paints and varnishes, and supplies a timely sales-making inspiration for the customer who does not know.

Our 1914 Campaign

We are not content with making the best paints on the market, but our energetic, up-to-the-minute 1914 campaign in direct support of every retailer of

MINERVA Paints and Paint Specialties

cannot but result in bigger business and better profits.
Ask any "MINERVA" Dealer. HE KNOWS!
Let us tell you all about it—A Postal will bring details.

PINCHIN, JOHNSON & CO.
(CANADA), LIMITED.
377-387 Carlaw Ave., TORONTO
WINNIPEG VANCOUVER LONDON, ENG.
Established in 1834
44-A

ADVERTISING GETS CUSTOMERS ——SERVICE HOLDS THEM

Trade-getting is largely a matter of advertising, while trade-holding is dependent upon the quality of the goods sold.

Our big nation-wide advertising campaign in the Leading Magazines, Farm, Religious and Commercial Publications of Canada, will impress many people right in your town with the merits of Martin-Senour Paints and Varnishes. Attractive Bulletins, Out-door Signs, Effective Mailing Folders, Booklets, Etc., will lead many new customers to the stores of our Dealer-agents, while Window Trims, Cut-out Displays, Store Signs, etc., will focus our big advertising campaign to The Martin-Senour Dealers' Store.

But success isn't made up of orders—it's re-orders that count, and back of Martin-Senour advertising — back of all this splendid co-operative dealers' selling helps is the supreme quality of the goods, producing such splendid results, and giving such entire satisfaction to the user that each sale widens the way for more sales to follow.

If continuous profits interest you—write.

For Deep Drawing, Blanking, Forming, all kinds of Bending. Has Bright Finish for Nickel Plating, Rolled accurate to Gauge. Made in all tempers and in any thickness from .002″ to .250.

When Wood Workers Ask for Screws

Be able to supply them with

PAT. FEB. 2, 1909

SEE THAT SQUARE HOLE

ROBERTSON'S SOCKET HEAD WOOD SCREWS

These screws are far superior to any other kind. They have a square hole into which our specially designed driver fits snugly. The driver cannot slip and thus spoil screw heads or material.

We also manufacture high-grade Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Drop a card for catalogue.

MURESCO

"For Twenty Years the Leading Wall Finish"

ACCEPTS CHALLENGE .:. .:. .:. $100.00 FORFEIT

We understand that certain Kalsomine manufacturers are making the statement that their Kalsomine will cover more surface, pound for pound, and cover it better than MURESCO. If by buying a quantity of their goods and MURESCO on the open market and having two master painters—who may be selected by both parties—test them out, they can prove above statement, we will pay $100.00 to Sick Children's Hospital.

Further Hints on

The Paint Up, Clean Up, Idea

A general meeting of all dealers, Hardware, General Store, Florists, Seedmen, Etc., everyone who sells anything that is used in Spring housecleaning or for beautifying interiors or exteriors, should be called and the general plan outlined. A Committee should be appointed to interview the Mayor and Council, the School Board, Etc. Each Merchant should guarantee to take so much space in the local papers, and these written guarantees handed the papers in return for publicity in both news and editorial columns.

We will be glad to supply our agents with cuts for their advertising, free of charge, or if they wish, write their ads. for them.

Write us for further particulars re these electros and service.

G. F. STEPHENS & CO., LIMITED

Paint and Varnish Makers.

WINNIPEG Branch at Calgary

Why not be in line this spring with the brand of paints that makes every paint customer enthusiastic about results?

JAMIESON'S PURE PREPARED PAINTS

are this kind and are made to bring repeat orders—the only kind that puts real profits in the dealer's pocket. Once a can is sold, the subsequent orders come unsolicited.

We want you to be our agent.

TWO CENTS PER WORD

with a Want Ad. in this paper.

You can talk across the continent for two cents per word

Consider The Woman Buyer

She has grown to be an excellent judge of household paints—critical of color, observant of quality, appreciative of long wear and service and knows what is what for household purposes.

She Makes Paint Business Good

because she is daily learning the economical and sanitary advantages of using a good household enamel about her home.

It saves her worry, keeps up the home and keeps down expense.

FLOGLAZE

"The Finish That Endures"

MAKES GOOD WITH HER BECAUSE IT'S MADE GOOD

As for you, Mr. Dealer, nothing in the household paint line offers you more frequent turnover or better profits than our consolidated FLOGLAZE Proposition. It is sufficient for anything and everything without involving a too great outlay in money or space.

M L FINISHES THAT ENDURE
QUALITY

Our Decorative Aid Department offers you a special co-operative advertising inducement to help introduce Floglaze to your women customers.

Write now and let us all get prepared for bumper Spring business.

Is your paint stock ready for the Spring demand?

Many property owners who had almost decided to paint last year, but who left it over, will be in the market for paints and varnishes this Spring. Look over this list and see if your stock is complete. The Canada Paint Co., with factories and warehouses in Montreal, Toronto, Winnipeg, Calgary and Halifax, is in a position to supply with dispatch whatever paint or varnish products you may be in need of. If you have not received the new CP Price List and Catalogue write for one to-day.

Allwin

GO-CARTS

MOTHERS

PREFER THEM TO

OTHERS

This is the big leader for 1914 — a combination in black and dark green.

No. 7140

Doesn't it strike you as a strong, roomy, substantially built GO-CART?

It's all that, and the design most attractive.

It's roomy and yet it folds completely into a space of 12 x 20½ x 29 inches.

This and other popular styles are shown in colors, and fully described in our

1914 Baby Carriage Catalogue.

Your copy is ready — all priced up.

Send for it.

Dealers have sold more Allwin Folding Go-Carts than any other make in the world, because the Allwin are better Go-Carts.

It pays to handle the most popular line — the Allwin.

That's why we have secured the agency for Western Canada.

You might as well share in our prosperity.

Illustration below represents the Allwin One-Motion Folding Sulky, Steel Frame. The wheels fold under, and the back folds flat on the seat. Size folded, 8 x 17½ x 30½ inches. Roomy seat, high back, good springs.

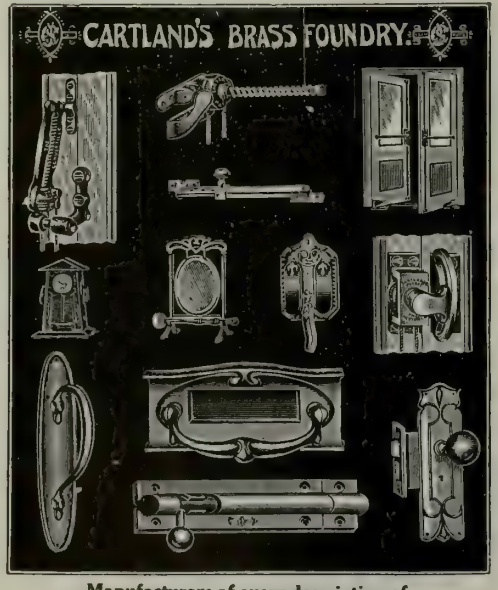
No. 230

MILLER-MORSE HARDWARE COMPANY LIMITED

"The Big Winnipeg House"

The Popularity of Your Store

depends mostly on the Stock you carry. Talking of **paint,** there's no better seller than Ramsay's and every can is a can of satisfaction. Since 1842 Ramsay's Paint and Varnishes have been made right and have proved their ability to **stay** right. Color and quality are fixed.



Ramsay's Complete line **"is"** complete and that's the line of paint for you to carry if you would make yours the most popular paint store in town.

Brooms and Whisks

You want a first-class line of Brooms for **Spring Trade** and the **Keystone Brand** is what you should have to give your stock the proper tone. You will find it difficult to secure three lines which will measure up to the "Jubilee," "Klondike" and "Nugget."

We specialize in whisks, and with over sixty lines to choose from we should be able to satisfy the most fastidious tastes.

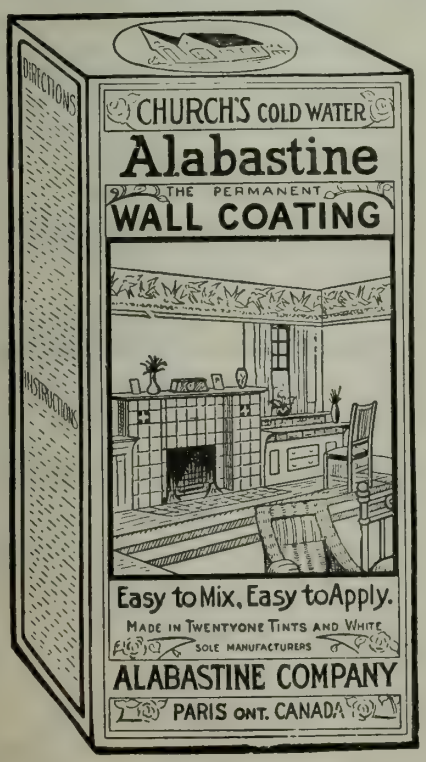
Be Open Minded On This Paint Question

Just be ready to believe there's even more money in it than you ever thought of. Just be frankly ready to see whether

Lowe Bros. Ltd. "High Standard" Paints

can't put you firmer and stronger on the paint map than you have ever been before.

That's all we ask—just be open-minded.
What we have to say to you goes a mighty sight deeper than merely "getting the order." What we have to sell is practically a partnership in our business in your town.
We bring you paints that have never known failure in 50 years. We bring you advertising experience that has been successfully selling goods for two generations. We bring you the real co-operation of a big, successful house that believes in doing exactly as it would be done by. Ask any Lowe Bros. Agent.



To-day is the day to write us.

"Competition Is a Word of the Past to Peerless Agents"

That's the way Peerless dealers speak about their agency. Read what this experienced dealer says about Peerless fencing. Note his Peerless sales ran six times greater than that of other fencing. Look—

The Banwell-Hoxie Fence Co., Hamilton, Ont. — Middlemiss, Ont., Jan. 8, '13.

Gentlemen:—I have been selling fence for the past seven years and in that time have represented several different firms. It gives me pleasure to say that I took the agency for your fencing for 1912 and have sold in that one year more fence than in the other six years of my business, and the best of it is I have not had one complaint in any way against Peerless fence. Different from most fences it stretches flat and all wires of even length; the lock is tight and strong and the quality of the wire is of the best. There is very little other fence used in this district and competition is a word of the past to the agent for Peerless fencing.

Yours truly, J. A. McDONALD.

This is but one of many similar dealer's letters in our files. Everyone is enthusiastic about his Peerless agency. Everyone has nothing but praise for Peerless fencing—the fence that saves expense.

Peerless Poultry Fence

is made of the best Open Hearth steel fence wire—tough, elastic and springy—and will not snap or break under sudden shocks or quick atmospheric changes. Our method of galvanizing prevents rust and will not flake, peel or chip off.

The joints are securely held with the "Peerless Lock" which will withstand all sudden shocks and strains, yet Peerless Poultry Fence can be erected on the most hilly and uneven ground without buckling, snapping or kinking.

The heavy stay wires we use prevent sagging and require only about half as many posts as other fences.

We also build Farm and Ornamental Fencing and Gates.

Do You Want the Peerless Agency?

We still have some valuable territory open to good reliable dealers. Do you want it? Do you want to be the leading fence dealer in your locality? Then write us. Ask for our dealer's proposition now before someone else gets ahead of you.

Does Work Better and Faster Than the Ordinary Hoe

—and Outsells It

We make nothing else but

Cultivator-Hoes and Weeders

and our goods show if

While these products have a decided advantage over the ordinary hoe, they cost no more.

Our 5-prong is the only one having detachable ferrule (pat'd), providing for attaching Cultivator to Wheel Plows. **Now New 3-prong** is a modification in size, weight and cost, cheap as the common hoe in price, and pays a greater profit.

Our Midget is the greatest of all Flower Weeders.
You cannot afford to overlook this line, as you get a very liberal profit.

Canadian jobbers who handle the "Norcross" line are: McLeannan, McFeely & Co., Ltd., Vancouver, B.C.; Lewis Bros., Ltd., Montreal, Canada; The Eureka Planter Co., Ltd., Woodstock, Ont.; J. H. Ashdown Hardware Co., Ltd., Winnipeg; Merrick-Anderson Co., Winnipeg; Jas. Simmons, Ltd., Halifax, N.S.; The S. Hayward Co., St. John, N.B.; Dunlop Bros. & Co., Amherst, N.S.; W. H. Thorne & Co., Ltd., St. John, N.B.

WRITE THEM FOR FULL PARTICULARS.

You will find this MAXWELL "HOME 65" FOOD CUTTER

one of the best selling lines you ever handled.

The "Home 65" is a new machine embodying all the latest principles. Made in the standard family size and much stronger than the ordinary type of machine. Cap fits close, rendering the machine quite watertight. The open-end cylinder makes it easy to clean Supplied with different cutting plates.

Maxwells Ltd., St. Mary's, Ont.

There's a place for Everything

So goes the old proverb and it certainly was never so true as when applied to wire cloth. Awkward to cut, awkward to unroll, wire cloth can never be efficiently handled except on a **Bowser Wire Cloth Display Rack.**

The "Bowser" gives you a neat, convenient place to keep your wire cloth, where it is out of the way, yet easy to see and easy to get at.

Inaugurate a new period of store efficiency by writing for prices now.

Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The **Thermo Washer** is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

SPRAMOTOR WORKS

2002 King St. LONDON, CAN.

502 Erie St. BUFFALO, N.Y.

A Notable Meet Under Mount Royal

The marvellous engineering knowledge that enables the workers on the great tunnel under the mountain at Montreal to meet at the centre only three-fourths of an inch out, is graphically told by the chief engineer, Mr. Brown, in the April issue of MacLean's Magazine.

Blasting out the bluish-grey rock, fighting the gases that often defy analysis, locating pockets of water and exploring old volcanic foundations—all these make the work of tunnelling a most romantic undertaking.

Photographs of the interior meet, of the engineer at work, and of the other interesting features, add to the enlightening and informing entertainment in this, the best issue of the year of Canada's leading magazine.

Furthermore, the second of the Coburn covers —something entirely new and appealing to one's artistic sense, appears on the April cover.

These features alone are worth the low annual subscription price, but its readers will enjoy, besides these, some surprises in the following:

1. Romance of the Taschereau Family.
2. How the R. M. C. Develops.
3. Margaret Anglin—Our Actress.
4. Some Rich Indians in Canada.
5. The Business Outlook,

and several short stories of unusual merit that afford a brief relaxation from the world of realities, carrying one into the by-ways of exciting romance and adventure.

Eventually

you will decide that your file department is is not paying you, and you will start in to find out why.

To do which you will investigate the **Kind** of files you are handing out to your customers—whether they are giving satisfaction — whether customers are coming back and asking for them by name.

Then you will look around to see what successful dealers are doing; and you will find that it is clean-cutting, long-lasting, crucible steel

Delta Files

that are pulling the big business in these dealers' file departments.

So eventually you will stock Deltas, and your file sales will become one of your most successful undertakings.

Now the point is:— Why wait until that time? It is far better to stock up with Deltas now, and start a profitable business right away.

So order to-day; but remember to look for the trade-mark on the tang:

It safeguards you, and your customers—everywhere

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

LUNDY

SHOVELS

It isn't just by chance,

that Lundy Shovels have become a standard wherever shovels are used in Canada.

No, Sir! There's more back of it than that—it's their many points of superiority that have earned for them their enviable place. For instance—

The strap and blade point are made of crucible steel, and are extra strong, thus ensuring long service and durability, from those parts that usually give out first.

This is only one "Lundy" advantage. To fully appreciate their value as business-getters, you must handle them.

They'll be found at your jobber's, most probably; but if he hasn't got them write to us direct.

The Lundy Shovel & Tool Co., Limited

CHICAGO STEEL BENDING BRAKES

(Made in all sizes)

Regarding the Steel Bending Brake we purchased last spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.

Yours truly,

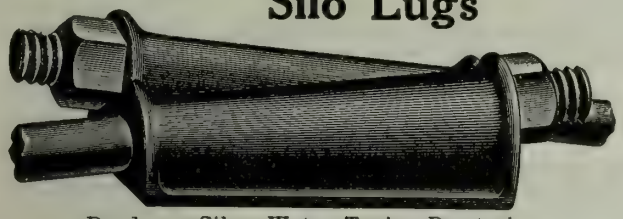
THE McCLARY MFG. CO., C. E. Main. Manager

The Steel Bending Brake Works Ltd., Chatham, Ont.

BRONZITE

THE GREEN OF QUALITY. IT'S DIFFERENT.

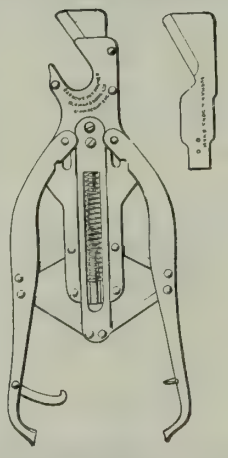
The elements cannot affect the permanency and brilliancy of "Bronzite" to the same degree as other paints. BECAUSE merged with the oils and pigments is a finely pulverized ore which adheres to the surface, binds the ingredients, and perpetuates the color tone everlastingly. This ore is not used in any other paint, nor anything like it. It is a distinctive material, discovered by us and crushed and prepared at great cost.



The "BRONZITE" CIRCULAR will tell you more. Write for it to-day. Used on all work where a green paint is needed.

COLONIAL WORKS Inc.

225-237 Norman Avenue, BROOKLYN, N.Y.



Silo Lugs

Bands on Silos, Water Tanks, Penstocks, Kilns, etc. For round rods ⅜ to 1½—flat bands 2 to 6 inches. Malleable iron. Prompt shipments.

Otterville Mfg. Co'y. Limited

OTTERVILLE, ONTARIO

THE "BARROWS" PRUNER

Special Features:—

- A perfectly easy and smooth "draw-cut" action.
- Immense power by lever blade and toggle motion.
- Detachable blades.
- The only pruner that does not pinch or squeeze the shoot.

A New Model

We are now in a position to make shipments on our latest improved model "Cadillac" Sweeper. This is a hand-power combination carpet sweeper and vacuum cleaner. It will win instant favor among housekeepers who have not electric power in their homes. The

Cadillac

Combined Carpet Sweeper and Vacuum Cleaner

is built lower, so that it will reach under beds, etc., and places where low obstructions would prevent ordinary sweepers from going. The top of the sweeper is constructed of the best 3-ply veneer wood, and the dust bag is also greatly improved. The "Cadillac" is made in Canada, saving duty charges, and sells at a lower figure than other machines. Write for full particulars.

TRADE S.W. MARK

STANLEY

WROUGHT STEEL

Screen Door Hardware

COMPLETE SETS IN CONVENIENT PACKAGES

Set No. 1750.

Set No. 1750 is made up of one pair of 3x3 ornamental, loose-pin butts to screw on the surface of the door; one five-inch wrought steel pull; one high-grade No. 3 spring, of much better quality than is usually used on screen doors; one gate hook and eye. Each set is packed neatly in a neat, strong, telescope carton, with screws of the proper size and finish, ready to be handed to the customer.

These sets are finished handsomely in Japan, Antique Copper, Dull Brass, or the Rust-Proof "Stanley" Sherardized finish.

A less expensive set, No. 1752, is also put up with 2½x2½ butts, and a No. 2 Spring. It is made of good materials, handsomely finished, and is fully equal to other sets on the market.

Send in your order for Stanley Screen Hardware, and be prepared for Spring business. Write us, if your jobber cannot supply you.

CLIMAX

Wall Paper Cleaner

Makes Wall Paper Like New

Saves Repapering and Dollars

It is a live article to sell, because a trial invariably makes a constant user.

Used by Millions

"Climax" cleans the finest to the cheapest wall-paper—it does not damage the most delicate colorings, but, on the contrary, it will restore their original lustre.

Also cleans window shades, kalsomine, frescoes, etc., easily, quickly and efficiently.

Packed in tins only. One can sufficient to clean an ordinary-sized room. Ready for use.

Packed 3 doz. to a case, $1.20 per doz., $3.50 per case.

The Spring house-cleaning season is a good time to introduce Climax.

Send your request for full particulars now.

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

Your customers are reading about the

O-Cedar Polish Mop

(Made in Canada)

We're pointing out its advantages in our advertisements in the daily papers in the important cities from coast to coast in Canada; also in the largest and most popular magazines.

A window display during the house-cleaning season will bring you many profitable sales.

This trial offer will appeal to your customers.

Simply ask them to deposit the price ($1.50) with you on the condition that their money will be refunded without a question if not satisfactory. We assume all risk.

Nothing but lack of funds will result in an O-Cedar Mop being returned. The O-Cedar saves the housewife much back-breaking work. It makes easy to clean those hard-to-get-at places, such as between the banisters, tops of high furniture, under the beds, between the radiators, etc. It leaves a hard, dry, beautiful polish on hardwood floors and linoleums.

Order now. **Write your jobber.**

Padlock profits

are assured if you display the

WOVAL

Padlock Assortment

"Goods well displayed are half sold" is an old quotation, but it is as true to-day as ever, especially with PADLOCKS.

Your sales can easily be doubled if you hang up this attractive metal shutter (gunmetal finish).

Size 9 inches wide x 21 inches high, with 15 padlocks mounted and selling plan on the back, showing that the assortment can be sold for $19.20.

The selling value is as follows:

12	Padlocks at .15 each	$ 1.80
6	Padlocks at .20 each	1.20
12	Padlocks at .20 each	2.40
6	Padlocks at .20 each	1.20
8	Padlocks at .25 each	2.00
4	Padlocks at .35 each	1.40
4	Padlocks at .35 each	1.40
4	Padlocks at .30 each	1.20
4	Padlocks at .35 each	1.40
8	Padlocks at .45 each	3.60
4	Padlocks at .40 each	1.60
Total 72	Padlocks, selling value	$19.20

This shutter is worthy of a place in the most up-to-date hardware store, and the price is within the reach of the smallest hardware merchant.

Write for our price.

Let Us Explain

What we believe is the profitable way—in fact, the only successful way to handle Fishing Tackle and Summer Sporting Goods.

One must carry a First-Class Assortment—not a drug store or grocery line—of Fishing Tackle and Sportsmen's Accessories.

Display them prominently and neatly, at the proper season, and thus create in the minds of buyers that **YOUR STORE** (nobody's but yours) is the **Sporting Goods Store of the town.**

THE REST IS EASY AND CERTAIN

Your store can't help attracting the cream of this trade and that trade will extend to purchases of goods in nearly every other department of your business—**TRY IT THIS WAY FOR A SEASON OR TWO.**

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 176th street, and anchored them while they put out to stop the other two barges.

But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage aw

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.

Both these courses are also profitable—in money and good-will alike.

Every Customer's Satisfied With—

"Empress" Lawn Mower

Open four-knife cylinder. 10½-inch wheels. Special tool steel knives, oil tempered. Case-hardened adjustable bearings. Case-hardened ball-bearings and balls. Specially prepared polished steel shafts. Cheeks easily detached. Made with grass box attachment.

"Woodyatt" Lawn Mower

Open four-knife cylinder. Tool steel knives, oil tempered. Bearings are extra long and adjustable. Best quality material used throughout its construction. Made with grass box attachment. This mower has been on the market longer than any other high-grade mower in the world.

TAYLOR-FORBES LAWN MOWERS

The success of a hardware store depends on a customer's satisfaction. You cannot afford to sell an inferior line simply because it pays a larger profit. You can make a sale once on such goods, but the buyer will not continue to be a customer nor recommend you to his friends.

Taylor-Forbes Lawn Mowers are good and reliable. They have stood the test for forty years and have made a friend of every user. Their quality, finish and distinctive mechanical features have never been equalled.

UNCONDITIONALLY GUARANTEED

If for any reason, at any time within one year from date of purchase, the purchaser of a Taylor-Forbes Lawn Mower is not satisfied with his purchase we **insist** on giving him a new machine or refunding his money.

See that you have a good stock of Taylor-Forbes mowers on hand this Summer. They'll increase your sales.

We want to send you our catalog showing complete line for 1914. Write for it now.

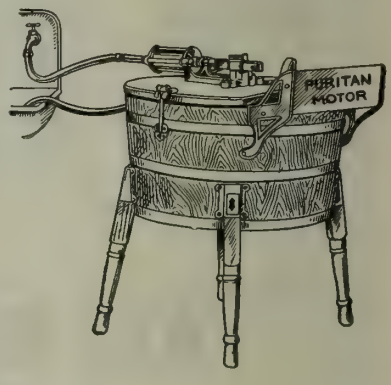
SPECIAL NOTICE

All damaged goods have been removed to separate buildings and are being sold at very low prices.

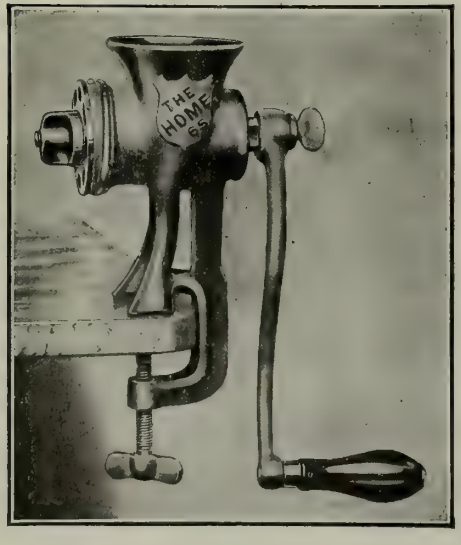
Take a trip to Montreal and inspect them.
IT WILL PAY YOU.

You can make money out of any of these

MAXWELL



lines. They are known everywhere!



MAXWELL'S
"Favorite" Churn
(Bow Lever)

Here's a Churn which has been known and used for nearly twenty years. More "Favorites" are sold annually in Canada than all other makes combined. Barrel of best imported oak with silver aluminum hoops, exceptionally large roller bearings, easy running, and very strong. Notice the bow lever. Handle can be adjusted to centre, left or right, as desired.

MAXWELL'S
"Puritan" Motor Washer

A complete self-washer. Runs by water power from ordinary pressure obtained from the faucet. Requires no attention, simple to operate and no delicate parts to get out of order. Reciprocating motor —the most reliable of all types. Valves built to resist action of grit or sand.

MAXWELL'S
"Home 65" Food Cutter

Here's a splendid seller—an article every housewife needs. This "Home 65" is made in the standard family size, and is much stronger than the ordinary type of machine. Cap fits tightly, rendering the machine perfectly watertight. The open-end cylinder makes it easy to clean, and the mechanism is simple. Supplied with different cutting plates.

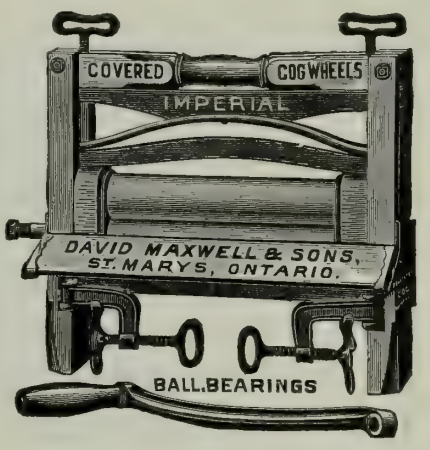
Three more MAXWELL lines

it will pay you to handle:—

Send your orders along NOW—and ensure prompt delivery.



MAXWELL'S
"Excel-All" Washer

The easy-running washer which takes all the labor out of wash-day. Tub runs smoothly on ball bearings, and the top lifts up, giving heaps of room for putting in and taking out the clothes. The improved wringer board can be swung out of the way when not in use. Washer has a neat tubular metal frame and the finish throughout is first-class. You will find this a very popular line.

MAXWELL'S
"Imperial" Wringer

Maxwell Wringers have long been known for their high-grade construction and the splendid value they represent. This "Imperial" Wringer has steel ball-bearings and illustration shows covered gear. Special attention has been paid to the rolls, which are manufactured from the finest rubber. Malleable iron clamps to fit any tub.

MAXWELL'S
Lawn Mowers

A profitable line for your new year's trade. Maxwell Lawn Mowers make satisfied customers wherever they are sold. Every machine is well made, strong and nicely finished. Made in all sizes, each with 8-inch to 10-inch wheels and with either three or four cutting blades. Finished in Aluminum and Carmine. Very light, easy-running machines. Place your order in good time for early deliveries.

WISS QUAL-ITY WINS

There's a whole lot of difference in shears and this difference is worth looking into.

Some shears **break** very easily.

That's because they're made of too brittle metal—a metal that has been hardened all over in a vain effort to secure a good cutting edge.

Some shears **chew** the cloth or rubber, or paper, instead of biting clean through it.

That's because the blades are badly adjusted, or joined with imitation screws (merely rivets).

Some shears quickly lose their cutting edge.

That's either because the manufacturer uses a metal that secures toughness at the expense of sharpness—or that the blades, being badly balanced and unevenly tempered nick and notch each other at every cut.

These faults and many others are inseparable from all **cheap** shears and even some of the higher-priced makes.

Only by buying

WISS

"STEELFORGED" SHEARS

can you escape all the ills that shears are heir to.

They don't Break—Because the frame or "spine" of each blade is **forged** from a tough, elastic steel that will stand all the dropping and banging and hard knocks it is possible to inflict.

They Cut Clean—Because onto this tough, elastic frame is welded the finest crucible steel cutting edge—**strength** and **cutting efficiency** combined; because the blades are balanced and adjusted to the thousandth part of an inch with screws.

They Stay Sharp—Because the crucible steel in Wiss Shears gives the finest cutting edge it is possible to produce; because the blades are hardened in cold running water; and because of the perfect matching of blades and painstaking adjustment.

Your trade will gladly pay a little more for Wiss Steelforged Scissors and Shears when you show them how much more they are getting for their money.

We co-operate with you in every way possible to make your scissors-selling bigger and broader.

Let us explain this to you. A postal will bring our Representative.

It's Always the MAN Behind

Poets and historians have sung to us for years of "the man behind the gun." He, of all others, is the popular hero.

In times of peace, when the brilliancy and pomp of war are forgotten, the wise folks sometimes acknowledge that much is due to the man behind the plow. Largely through his industry and thrift the man behind the gun is made possible.

But forgotten in both song and story is **the man behind the saw.** Though upon his skill and knowledge the modern world has been built, he goes on his way unnoticed.

Standing behind his saw, day in and day out, for many long and weary hours, he helps to build the ships that carry the great guns—he constructs the frames that hold the plow—he rears the home that protects the plowman—he devises and produces almost everything that makes life worth the living.

Patient, simple, unrewarded though his life may be, we have always recognized his supremacy in the world of industry. We have devoted more than three score years to making

DISSTON SAWS

so as to place in his hands an implement that would enable him to develop his skill to the utmost. We have given him the best that could be made and left the rest to him; for it matters not how true the gun—however sharp and shapely the plow—or skillfully designed the saw—it's always the **man** behind upon whom rests the burden of its efficiency.

It is mainly upon the man behind the saw that the Hardware Dealer depends for his living. The dealer who fails to get behind Disston Saws and push them on their merits is losing out with this man, for the reputation of Disston Saws is always a great factor in building the reputation of the man behind the sale.

Housecleaning Time is Here

You know that now is the time when every housewife is renovating her home from top to bottom—and that floors, linoleum and furniture are claiming a large share of her attention.

Now is your opportunity to sell

RONUK FLOOR POLISH

Bear in mind that Ronuk is different from ordinary floor-wax —and that it has many more uses in the home. Ronuk is not only suitable for hardwood floors — it is just as satisfactory as a cleanser and dressing for linoleum—it is unexcelled as a polish for furniture—it cleans and polishes painted and varnished woodwork, auto-bodies, picture frames, and many other household articles.

We are running a special advertising campaign at this season to educate the public to these uses of Ronuk.

By helping to educate your customers to the many uses of Ronuk you are building a larger trade for yourself, because more Ronuk will be bought than other preparations which accomplish only one purpose and are so regarded.

Do you understand the special CASH BONUS offer for increased Ronuk sales in the next few months? If you do not, we would like to explain it to you. Can we send you a window display? Write us.

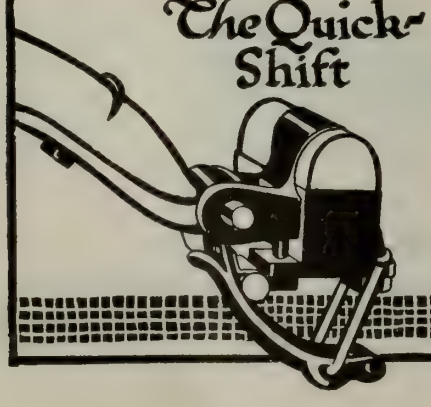
Let the Fernald Quick-Shift Quicken your trade

The more people you get into your store, the more sales you will make and the bigger will be your profits. Right there is the place where the Fernald Quick-Shift can help you.



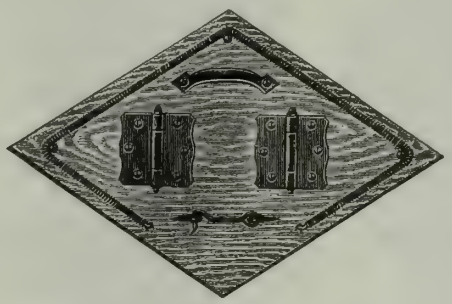
Its value to you is two-fold. It

—gives you a good profit on every sale and the sales mount up into a big aggregate;

—brings into your store people who will come to buy Fernald Quick-Shifts and stay to buy something else.

This anti-noise, anti-temper, anti-time-wasting device is known wherever people ride in buggies. It is known as the quickest change from the shafts to pole and the surest means of cutting out all shaft rattle.

We pack the Fernald Quick-Shift and Anti-Rattler in boxes that hold one dozen pair and cases that hold six dozen pair. They are mighty handy, mighty good to look at, and mighty fine advertising on your shelves. Inside the big box are the little ones, each holding a pair of this device. Ask your jobber about them, or write us.



Fernald Manufacturing Co., Inc.

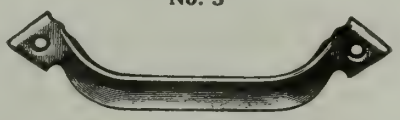
NORTH EAST, PA.

Time saved on each sale means More Time for more sales

Fernald Screen Door Sets are ready to hand across the counter. With them you never have to keep a customer waiting—or to delay other customers—while you fish in one drawer for a spring, in another for a door pull and in another for a hook and eye.

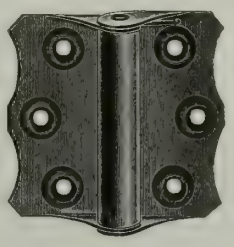
No. 175

This attractive design is made from the finest materials, all baked japan, and put up in boxes holding twelve sets, each set complete in its separate carton.



Nothing could be easier to handle, easier to sell, or more profitable in the long run. Remember when you sell a small article, you must sell it quick to make a profit. And a lot of these quick sales make big profits.

No. 17



These Fernald surface hinges, made of the finest wrought steel in attractive pattern, come in baked japan and are packed three pairs to a carton with screws.

No. 5

Here is a durable, simple door pull, as well suited to storm doors, cupboards and drawers as it is to screen doors. Comes in baked japan, three dozen to a carton.

No. 90

This Spring Hinge is our newest product. It is put up in sets similar to the No. 175 sets, with hinges, door pull, hook and eye and the necessary screws already assembled. You can also obtain it alone in boxes of six pairs.

Unless your store is already getting the benefit of the quick sales methods of Fernald products, get in touch with your jobber at once. He can supply you. Or we shall be glad to answer any inquiries sent to us direct.

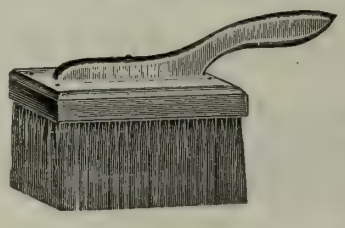
Meakins Brushes



are made with the greatest care from choicest materials and by brush makers of long experience.

The attractiveness brings trial orders and the quality gets steady customers.

We believe our line of brushes are the best that can be procured anywhere.

The rapid growth of our business shows that business is turning our way and that our lines are all that we claim for them.

We have made quite a large addition to our factory so as to give us more room to turn out Flat Varnish Brushes—a line of which we could not begin to supply enough last year. We are now able to supply any quantity of brushes the trade may require.

If your jobber does not handle the "Meakins Line" write us for Illustrated Catalog and Prices.

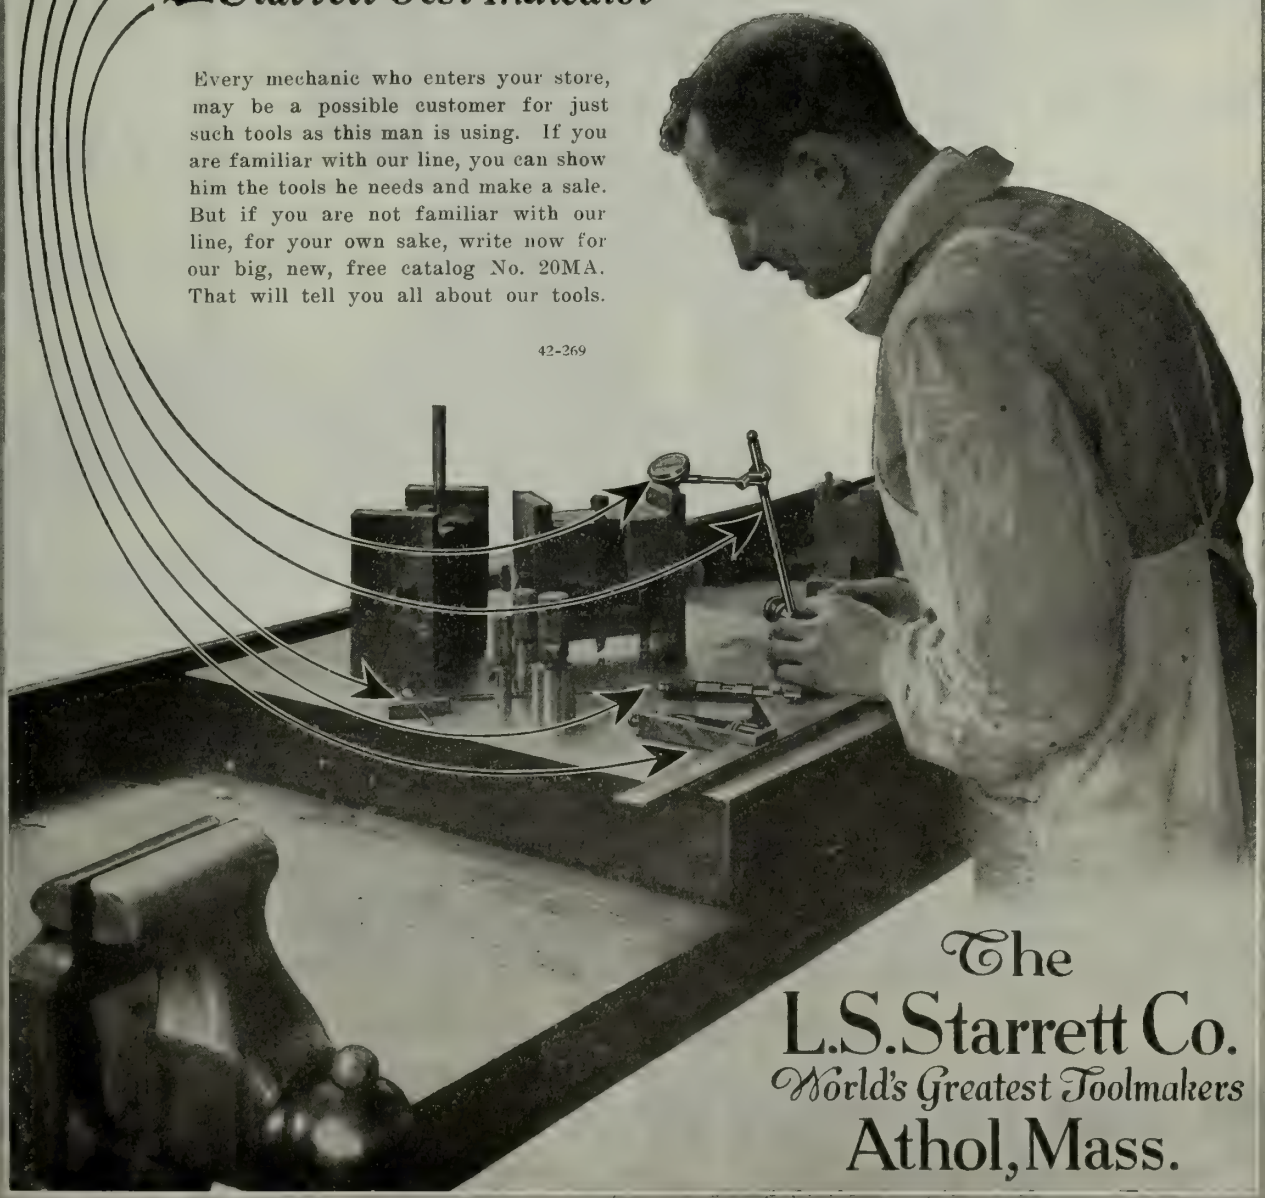
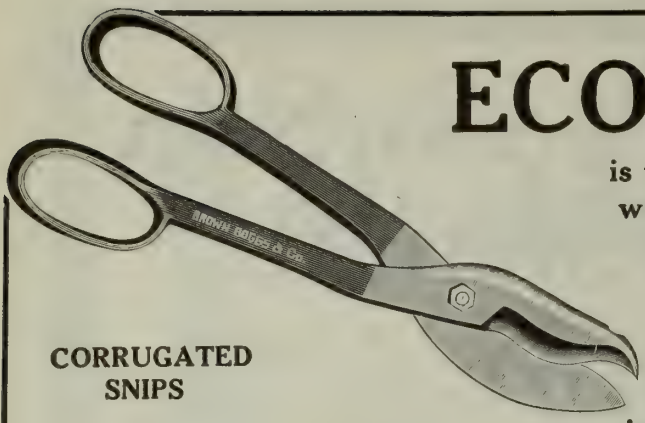
Making Jigs in a Precision Shop. Every Tool a Starrett !



Here is a good illustration of what we mean when we speak of the tremendous sales possibilities for Starrett tools. This actual photograph of a jig maker in one of the finest precision shops in Boston shows the tools which he uses on his work. These tools made profitable sales for someone—but please notice that they are all Starretts.

Starrett Combination Set
Starrett Micrometer
Starrett Depth Gage
Starrett Surface Gage
Starrett Test Indicator



The reliance placed on Starrett tools by the best tool makers, jig makers, and machinists proves our claims for accuracy and service. By service we mean, not only lengths of usefulness but convenience and scope.

Every mechanic who enters your store, may be a possible customer for just such tools as this man is using. If you are familiar with our line, you can show him the tools he needs and make a sale. But if you are not familiar with our line, for your own sake, write now for our big, new, free catalog No. 20MA. That will tell you all about our tools.

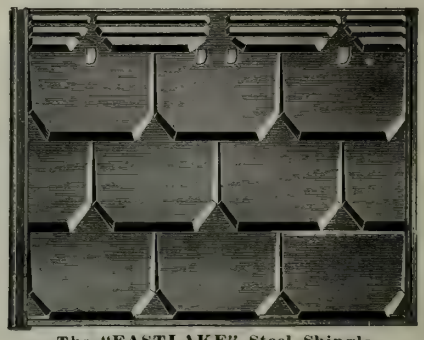
Two Pages of "Metallic" Information

For Dealers, Contractors, Builders and Architects

1884 to 1914



Since the first "Eastlake" Shingle was made by us 29 years ago, there has been no important change in material, style, or finish. The "Eastlake" was the Pioneer Steel Shingle in Canada. Naturally we made the best we could, as in those days quality counted just as much as it does to-day. We have never been able to make a better Shingle than the "Eastlake," and we flatter ourselves that 29 years' wear in itself is a record for roofing—what then would you say of "Eastlake" roofs which are as good as new to-day after this wonderful test?

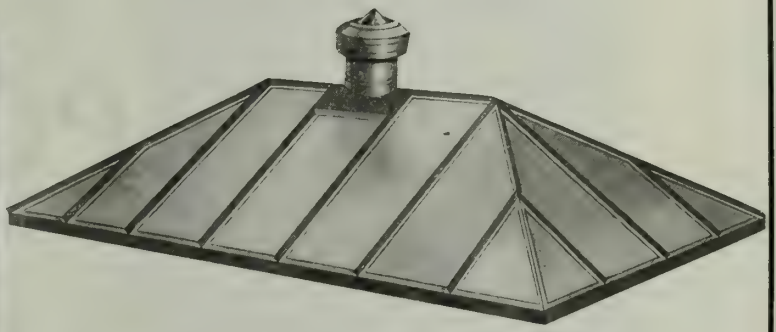
The fact remains that original "Eastlake" roofs are still braving the elements and look good for another 29 years!

This is "Quality by test." Just as we have been fair to ourselves and to the "Consumer" in making first quality goods, so have we been fair to the Dealer from our first business transaction to the present day. Our policy has always been to protect and work with the Dealer. The help we give to the Dealer is no small item in the building up of his business. Plans, figures, costs—all these are intelligently supplied when intelligent enquiries are received.

Samples of whatever lines Dealers require are always obtainable. Advertising to create a demand for "Metallic" materials (see list on other page) has been a strong feature of our policy in helping Dealers.

Let us get together to make the Building Season of 1914 mutually profitable.

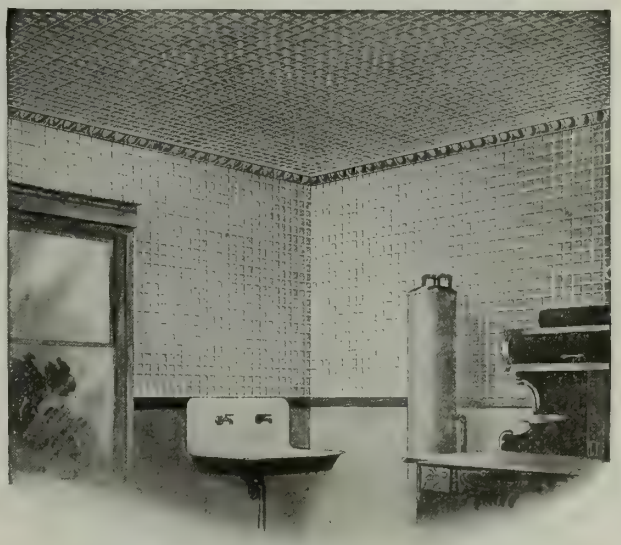
The "EASTLAKE" Steel Shingle. Fireproof. Lightning-proof. and Storm-proof. Lasts a lifetime. Saves money and labor.



An "Acheson" Barn-Roof Light and a "Metallic" Corrugated Iron Sheet—Two exceptionally good things for Barn construction.

This is but one of the ways in which we assist you. Send in your customer's enquiry with dimensions and full particulars and let us figure out the cost for you, showing you also how profitable it is to handle "Metallic" goods.

Being a Statement of Facts Concerning a Policy of Fair Dealing Which has Been Upheld in Spite of Competition for Close on 30 Years



A "Metallic" Skylight with a "Halitus" Ventilator. These are two good lines to handle. The "Halitus" stands supreme as a Barn or Out-building Ventilator, and has no intricate parts to get out of order. The "Metallic" Skylights (especially when the glass is wired) are a splendid adjunct when fireproof construction is required. An outstanding feature is the lightness of this Skylight; it does not require heavy roof construction to support it.

"METALLIC" CEILINGS AND WALLS for the Parlor or Store, Theatre, or Business Building. The most beautiful patterns made by the most perfect machinery, so that every square or sheet is perfect in itself—thus guaranteeing a perfect job. Fire-retardant, lifetime lasting, and always pleasing to the eye, "Metallic" interiors are a strong and satisfactory selling line for you.

Another place where "Metallic" Ceilings and Walls find favour is in the Kitchen. The greatest heat, grease and dust tests are found in the Kitchen, and these are the reasons why "Metallic" materials should be used. The Bathroom, too, is an ideal place for this smart and cleanly covering.

This is the Full Line of Materials Made by the Metallic Roofing Co.

"Get the Cost"

"HAYES" PATENT "METALLIC" STEEL LATH gives the best service of any hollow fireproof constructional material. Plaster and mortar walls will not crack or fall when "Hayes" lath is used.

"Eastlake" Steel Shingles; "Metallic" Corrugated Iron, Brick, Stone and Clapboard Siding and Fronts; Cornices; Roof Ornaments; Roof Tile; Ridge Material; Valleys; Weather Vanes; Eave Trough and Water Piping; Lath; "Acheson" Barn Roof Lights; "Halitus" Ventilators; Ventilator Piping, etc., etc.

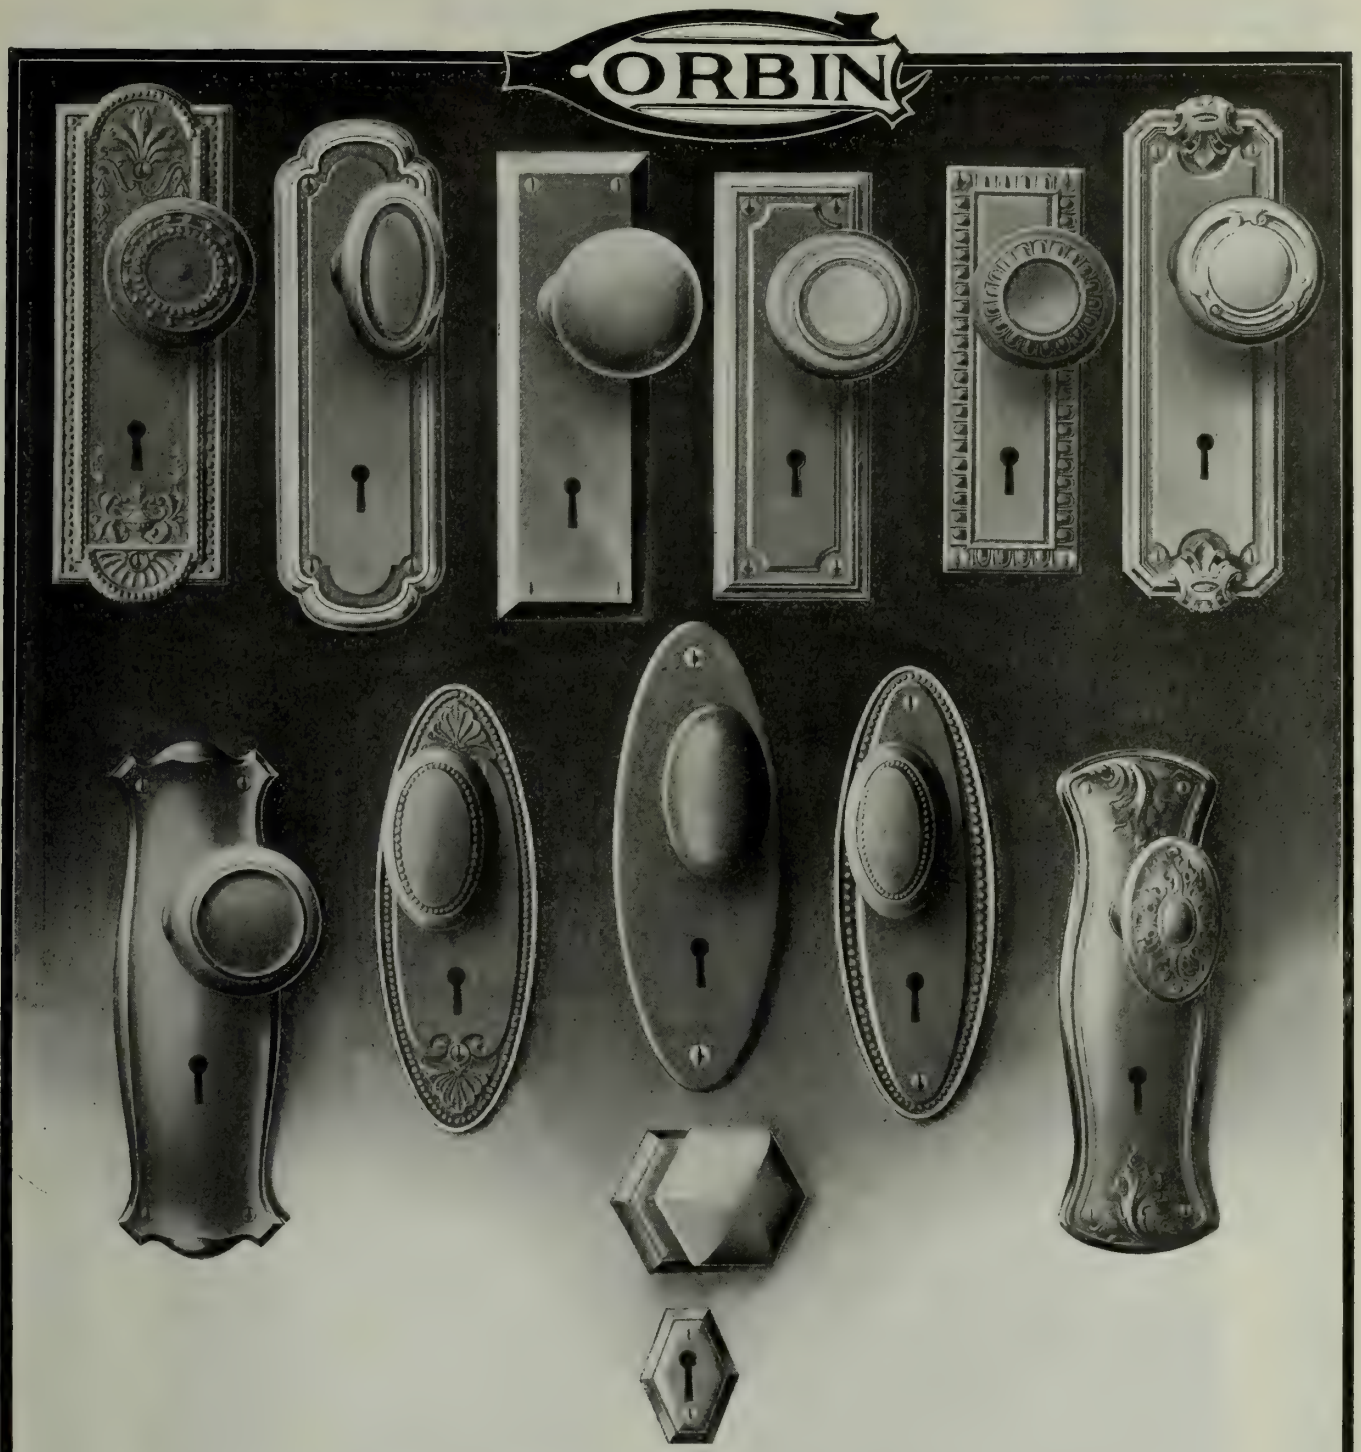
BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.



He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.
